Sincerely yours,

LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.●

SENATE—*Wednesday, April 3, 1985*

(Legislative day of Monday, February 18, 1985)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Gracious God, Father of mercy, justice, order and love, grant to the Senate and its leadership today a special measure of wisdom and strength. You know Lord, the frustration that is experienced as the pipeline of legislation fills and clogs, allowing little to come out at the other end. You know Lord, the immensity of the issues that crowd committees and resist resolution. You know the pressures that invariably build as a recess nears and agreement does not come. Gracious God, help the Senate to resolve whatever blocks movement so that spring recess may be a time of respite, giving the Senators some time to celebrate Passover and Easter free from nagging responsibility. Protect them as they travel. Bless their time with their families. Remind them of their responsibilities to themselves to keep healthy and fit. In the name of Him who brings the deliverance and life which we celebrate this week. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, each leader has 10 minutes, and then there are special orders not to exceed 15 minutes each to the following Senators: COCHRAN, ZORINSKY, PROXMIRE, COHEN, and ROCKEFELLER.

Following those special orders, there will be a period for routine morning business not to extend beyond the hour of 12:30 p.m. with statements limited therein to 5 minutes each.

Following that, it is my hope that we can turn quickly to four matters on the calendar. First, I would guess that we can dispose of the legislation dealing with the Federal supplemental compensation program. I assume we have that from the House. I will alert the distinguished chairman of the Finance Committee, Senator PACKWOOD, and the ranking minority member, Senator LONG, that we will want to move on that first.

It is my understanding there may be germane amendments to that bill, and I expect rollcall votes on amendments and final passage of that proposal. So I say to my colleagues that there could be rollcall votes as early as 1:15 to 1:30.

It is the intention of the leadership to take action on H.R. 1869, the repeal of automobile records requirements, plus some language in the report that will deal with some of the fringe benefit use of empty seats on private airplanes and private aircraft. We think we can resolve that question.

Then, it is still my hope that we can dispose of the war risk insurance bill, and the Export Administration extension, if we can have an agreement on those two matters, if no amendment or nongermane amendments will be offered.

I have indicated to the distinguished Senator from Massachusetts that I will try to determine whether or not we can take action on Senate Joint Resolution 96. I have discussed that briefly with the distinguished Senator from Rhode Island, Senator PELL.

I have not had an opportunity to discuss it with the chairman of the Foreign Relations Committee, Senator LUGAR, though I understand that the staff is working with staff on that particular matter. So I am not prepared to make a statement to the Senator from Massachusetts. But hopefully we will do that in the next hour or so.

Mr. President, I reserve the remainder of my time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. MATTINGLY). Under the previous order, the minority leader is recognized.

Mr. BYRD. Mr. President, I thank the Chair.

COLOMBIAN COAL: A NEW CHALLENGE TO THE AMERICAN COAL INDUSTRY

Mr. BYRD. Mr. President, the shadow of the South American nation of Colombia looms large on the horizon of international coal markets. The implications of Colombia's new-found prominence as a coal producing nation pose a major challenge to the American coal industry. Simply put, Colombia is in a position to become a major competitor in both the export market and in the domestic market, especially on the U.S. east coast and the gulf coast.

Imports of Colombian coal may displace domestically produced coals in the Eastern United States, having a pronounced economic impact particularly on the central Appalachian and midwestern coal industries. To the extent that Colombian coal displaces domestic coal in foreign and domestic markets, the economy of coal-producing States such as West Virginia will suffer. A significant displacement of Appalachian coal in the domestic market will further compound the coal industry's problems in my own State of West Virginia where coal industry unemployment at the end of 1984 was about 33 percent. Moreover, increases in U.S. coal imports and decreases in U.S. coal exports will exacerbate the trade deficit.

I raise these concerns because of a recent event which may have a major impact on U.S. coal markets at home and abroad.

In 1984, a new surface mine known as El Cerrejon [el ser-a-hone] began production in the South American nation of Colombia. The mine is one of the largest surface mining operations in the world, with estimated reserves of 1.6 billion tons and a productive capacity of 15 million tons per year. Productive capacity is projected to reach 30 million tons per year in the future.

The El Cerrejon mine produces high quality, low-sulfur steam coal, which is very attractive to utilities in the east and gulf coast regions of the United States.

The mine is a $3.2 billion joint venture between Exxon Corp. and the Colombian Government through Carbocol, the state-owned coal company. Financing of the mine includes about $1 billion provided by government export banks in Canada, Japan, England, and France. In addition, the U.S. Export-Import Bank provided $200 million for mining equipment.

The total current productive capacity of the El Cerrejon mine is dedicated to the export market. According to a recent report from the International Energy Agency, the Colombian Government is pursuing a goal of exporting 50 million tons of coal per year by the year 2000.

Colombian coal has already penetrated the U.S. domestic market, primarily in Florida. Electric Fuels Corp., the coal-buying division of Florida

Power, recently signed a 4½-year contract to purchase 500,000 tons per year of Colombian coal. The first shipment arrived at Florida Power at the end of February. Florida power officials have indicated that they expect to be buying coal from Colombia well beyond the current contract.

Other utilities along the east and gulf coasts have been actively considering Colombian coal purchases. For example, officials at Tampa Electric have had discussions with Colombian representatives. Tampa Electric officials have indicated that the Colombian coal will be a very important element in future purchases by U.S. buyers because the cost of delivery will be somewhat less than the most attractive Appalachian coals.

Currently, Florida Power's Crystal River station is the only gulf coast facility burning Colombian coal. However, it is important to note that Colombian coal can compete effectively with domestically produced coal on the east coast. Noting that world demand for coal is not growing nearly as quickly as supply, a Department of Energy official recently commented that:

> If Colombian coal is going to be absorbed, it's going to have to take a market share away from someone.

That someone will be coal producers in West Virginia and other Appalachian States.

The entry of Colombian coal into international coal markets will intensify the already fierce competition for markets in Western Europe and other countries. This has disturbing implications for U.S. coal exporters. Colombia is actively marketing its product in Western Europe, the Caribbean, Mexico, and Japan—which collectively accounted for about two-thirds, or 51 million tons, of the U.S. coal exports in 1983. Thus, Colombian coal may displace U.S. coal in foreign markets because of a price advantage resulting from lower mining costs and lower transportation costs. In fact, Colombia has recently negotiated contracts with several nations that currently are or have been consumers of U.S. coal, including Denmark, Israel, Mexico, Finland, Spain, Ireland, Jamaica, Puerto Rico, and the Dominican Republic.

Mr. President, let me cite two examples. Denmark recently signed a 14-year contract to purchase up to 2.2 million tons per year of Colombian coal. At the same time, U.S. coal exports to Denmark have declined by 67 percent from 1983 levels of 1.74 million tons. Finland has signed a 3-year contract for 200,000 tons of Colombian coal. In fact, last year, Finland—which imported as much as 1 million tons of U.S. coal in 1981—dropped the United States from its coal supplier list.

The emergence of Colombia as a major participant in the international coal market, and as a major competitor to domestic producers in specific domestic markets, concerns me, for the economic implications of this situation will be felt most directly in West Virginia. West Virginia coal accounts for almost one-half of the coal exported from the United States, and West Virginia is the third largest coal producer in the Nation. However, West Virginia's prominence as a major coal producer may be challenged by the threat of acid rain legislation, which would devastate the coalfields in northern West Virginia, by the decline of the U.S. coal export market, and by the entry of Colombia into the international coal market.

Mr. President, the economic implications of Colombian coal for U.S. coal markets are not fully understood. I have written to Senator WARNER, the distinguished chairman of the Energy Committee's Subcommittee on Energy and Mineral Resources, to express my concerns. I also asked him to hold a hearing to examine the issue of coal imports generally, and Colombian coal in particular. Senator WARNER has indicated that he shares my concerns, and that he will try to set a date for a hearing.

Because of the effect these may have on our Nation's economy and on the economics of States such as my own, it is essential that we establish the facts, determine a national strategy to assure our best interests are protected, and pursue that strategy vigorously. I am hopeful that subcommittee action will commence in the very near future.

RECOGNITION OF SENATOR COCHRAN

The PRESIDING OFFICER. Under the previous order, the Senator from Mississippi [Mr. COCHRAN] is recognized for not to exceed 15 minutes.

S. 843—FARM AND MARKET RECOVERY ACT OF 1985

Mr. COCHRAN. Mr. President, I am today introducing the Farm and Market Recovery Act of 1985, a bill to establish a new direction for Federal farm policy.

U.S. agriculture is productive, technologically modern, and well-capitalized. It is an industry primed for tremendous growth and opportunity. In fact, yesterday's accomplishments are only an indication of tomorrow's potential. But this potential must be actively cultivated and aggressively pursued. After gearing up in the 1970's to be the world's food supplier, U.S. agriculture is now confronted with a major challenge: How to ensure continued high-level and stable contributions to the U.S. economy while operating in a global environment.

Not only is U.S. agriculture no longer substantially independent of national economics, it now operates as a global industry, and, as such, it is affected by global economic conditions. U.S. agriculture must now embrace many factors and conditions not relevant when operating primarily for domestic markets. Consequently, farm policy decisions must conceptually allow for adequate consideration of the full set of factors that influence global marketing decisions.

U.S. agriculture today must react to national and international political and economic factors. Because it is highly capitalized, agriculture is greatly affected by interest rates. And, as a net exporter, our agricultural sector is also greatly affected by factors such as monetary exchange rates, marketing subsidies and trade practices of competing nations. To have a successful future as a global industry, U.S. agriculture must recognize the impact of these factors and formulate strategies to address them.

In a recent speech, Paul Volcker said,

> The volatility in exchange rates may challenge governments and central banks to think hard about ways to achieve greater stability if spontaneous market forces do not lead to it * * * certainly the exchange rate today is too important an economic variable to ignore in our policymaking.

I believe Mr. Volcker is right, and my bill offers a marketing strategy for dealing with the challenge.

Mr. President, U.S. agriculture cannot generate its maximum economic potential for the Nation's economy with policies designed primarily for a domestic market. Instead, U.S. agricultural policy must cope in a more aggressive way with the realities of less-than-free and competitive international markets.

Failure of Federal farm policy to deal more effectively with the real-world market conditions that exist today will allow only for continued deterioration of the U.S. agricultural economy. A frequent comment heard today is that current policy is not working. The problem with such a statement is that everyone can agree with it because an objective or a cure is not identified.

Just because farm program costs have risen does not mean they are ineffective. In one sense, they are working perfectly because, as the farm economy deteriorates, price support is maintained. Increased program cost simply reflects poor market conditions.

Current farm policy is failing, perhaps in the most important area for a global industry. It is not maintaining markets for U.S. products because it is not designed to react effectively to the realities of international business. As a result, U.S. exports are declining while world production and consumption are increasing. Specifically, what this means is the U.S. share or world trade is decreasing, and the cause of this in-

cludes factors other than price support levels.

Unfortunately, the income prospects look bleak over the next few years because of lost markets, mounting surpluses, and continued low prices. During the hearings I have chaired over the last 2 weeks, I have heard repeatedly from farm groups that exports are down and are deteriorating rapidly. This is borne out by the continued reduction in USDA's estimates for aggregate agricultural exports for this year. In December, for example, USDA estimated that farm exports this year would total $36.5 billion. In February, the estimate was lowered to $35.5 billion, and in March, the estimate was lowered another billion to $34.5.

The reasons cited for these decreasing estimates had nothing to do with whether or not our farmers could compete with farmers overseas. They all dealt with factors beyond the control of the farmer, such as first, a dollar value that has added 35 percent tax on U.S. farm products abroad and a 35 percent discount on agricultural products coming into this country; second, government-administered prices that are set at levels to take our market share; and, third, export subsidies provided by some of our competitors that are cited as the cause of our decline in exports. When you throw in a couple of crippling embargos in recent years, it is a wonder we are exporting anything.

With exports accounting for over half of the sales for cotton, rice, soybeans, wheat, and feedgrains, it is no wonder that loss of market share will result in stock accumulation, depressed prices, low farm income, and increased cost of Federal programs.

In the past, we have put programs into place to cut acreage in an effort to reduce the supply and increase prices. While this approach worked somewhat, until the 1970's, it is no longer effective without some modification in our farm program structure.

Following the fear of food shortages and high prices in the early 1970's, not only did we expand agricultural production in this country, but farmers in many other countries did so, too. As supply eventually began to exceed demand, we tried to cut production to remove the surplus and to improve prices. But our competitors have maintained a policy of continuing to produce—even expand their production—and move their surplus onto the market. Worse still, as we have cut production, our competitors have continued to expand. The unfortunate result is our farmers have been selling less at the same low prices and losing market share.

If we continue current farm support programs without addressing the imperfections in international markets, it is clear that our sales will continue to erode and we will eventually be producing only for a domestic market. Unfortunately, it may not stop there. If we allow international markets to be taken away due to inappropriate policy, what assurances can be made that domestic markets can be maintained?

The long-term consequences of this outlook are unthinkable. This country's foundation is based on a strong agricultural sector. For the United States to maintain its strength and position in global affairs, agriculture must be financially healthy. With the agricultural economy accounting for one-fifth of employment, one-fourth of trade, and one-fifth of our GNP, a retrenchment will have major implications for the entire U.S. economy.

Thus, we find ourselves with two major problems. We have a farm economy that is in financial distress at the same time that lower effective prices are needed to prevent the continued erosion of our markets, domestically and internationally.

The administration's proposal is simply to reduce the loan and target price support structure. By reducing the support enough, the administration argues, first, that we will be price competitive; two, that some additional volume will be moved in through markets; three, that stocks will be reduced; and fourth, that prices and income will improve over time. Unfortunately, interim lower prices and income will result in the needless loss of many farmers and in the restructuring of rural America. More importantly, under the administration's plan, the U.S. agricultural industry will likely be smaller, thereby employing fewer people and contributing less to the national economy.

Mr. President, my bill will solve both problems effectively and efficiently, I think without necessarily reducing the size of the industry. It is the culmination of input from literally hundreds of witnesses, who have shared with the Agriculture Committee their views on ways to provide relief and stability for the financially stressed agricultural industry in the short run and assure a solid recovery for the long run.

Briefly, during the first 2 years of this bill, the support to farmers would remain at current levels to protect farm income, while we test the theory that lower prices in a global industry will result over time in greater export sales, lower stocks, higher prices, and higher farm income. By allowing the Commodity Credit Corporation loans to be repaid at levels that result in no accumulation of Government stocks, we will be competitive in both domestic and international markets, without reducing income support to farmers.

This is a new approach to providing support to farmers. It provides farmers a loan during the fall so they can hold their crops and not be forced to sell at harvest when prices are typically low. However, it removes the minimum price-setting support aspect—as perceived by markets—which has been used by our competitors to gain increased shares of world trade. Thus, this feature is called a marketing loan program. The discount in price below the loan is necessary to offset the high relative value of the dollar in trade and to compete with Government administered prices and subsidies.

We need to act immediately to help reverse the alarming decline in exports, which appears to be accelerating rapidly, in order to help stabilize the farm economy and to set the stage for a sound, long-term recovery that will restore profitability to this vitally important sector of our economy.

Mr. President, I ask unanimous consent that a summary outline of this bill and the bill be included in the RECORD at this point.

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

SUMMARY OUTLINE—FARM AND MARKET RECOVERY ACT OF 1985

The Farm and Market Recovery Act of 1985 is aimed at addressing the near term needs of U.S. agriculture with regard to its ability to effectively compete in domestic and international markets, as well as providing for long-term economic recovery for the industry in general and farmers specifically. In summary, the bill:

(1) Provides near-term assistance through expanded export programs effective immediately upon enactment to help U.S. agriculture to compete more effectively, including:

(a) *Market Bonus Plan.*—Requires Secretary to make available additional stocks of CCC-owned commodities to domestic or foreign purchasers in order to expand markets and help counter unfair trade practices and subsidies, as well as address problems relating to the over-valued dollar;

(b) *Aid to Trade Plan.*—Requires Secretary in cases where country may not meet financial requirements to qualify for export credit or guarantees to make available CCC-owned stocks to reduce the cost of such commodities and to enable that country to qualify for such loans or guarantees;

(c) *Expanded Donation Authority.*—Expands existing Section 416 authority relating to dairy and wheat to include all CCC-owned commodities.

(2) Sets the stage for long-term economic recovery in terms of farm income, prices, market share, and the ability of U.S. agriculture to compete effectively in all markets, domestic and international. Accordingly, the bill—

(a) Provides an extension of basic price supports and related provisions for cotton, wheat, feedgrains, soybeans, peanuts, rice, sugar, and honey.

(b) Allows orderly transition to a more market-oriented program by providing that loan levels and target prices be determined by market prices. However, in no event would loans and target prices be less than current levels for fiscal years 1986 and 1987, or adjusted more than 5 percent annually during subsequent years.

(c) Establishes Marketing Loan which would require Secretary to reduce or otherwise allow producers to repay their regular

CCC price-support loans at the original level or at such level as necessary to (1) minimize potential loan forfeitures, (2) prevent accumulation of government stocks, (3) reduce government cost of storing such commodities, and (4) allow such commodities to be marketed freely and competitively, both domestically and internationally.

(d) Expands Export Credit by authorizing intermediate export credit program providing guarantees on terms of 3-10 years to encourage additional sales of U.S. agricultural commodities as well as value-added products.

S. 843

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act, with the following table of contents, may be cited as the "Farm and Market Recovery Act of 1985".

TABLE OF CONTENTS

TITLE I—AGRICULTURAL EXPORTS
Sec. 101. Expansion of markets for United States agricultural commodities and products.
Sec. 102. Intermediate export credit.
Sec. 103. Export credit sales and credit guaranteees.
Sec. 104. Expanded donation of agricultural commodities.
TITLE II—WHEAT
Sec. 201. Loan rates, target prices, disaster payments, wheat acreage reduction and set-aside program, and land diversion for the 1986 through 1989 crops of wheat.
Sec. 202. Nonapplicability of certificate requirements.
Sec. 203. Suspension of marketing quotas and producer certificate provisions.
Sec. 204. Suspension of quota provisions.
Sec. 205. Nonapplicability of section 107 of the Agricultural Act of 1949 to the 1986 through 1989 crops of wheat.
TITLE III—FEED GRAINS
Sec. 301. Loan rates, target prices, disaster payments, feed grain acreage reduction and set-aside program, and land diversion for the 1986 through 1989 crops of feed grains.
Sec. 302. Nonapplicability of section 105 of the Agricultural Act of 1949 to the 1986 through 1989 crops of feed grains.
TITLE IV—COTTON
Sec. 401. Loan rates and target prices, disaster payments, cotton acreage reduction program, and land diversion for the 1986 through 1989 crops of upland cotton.
Sec. 402. Suspension of base acreage allotments, marketing quotas and related provisions.
Sec. 403. Commodity Credit Corporation sales price restrictions.
Sec. 404. Miscellaneous cotton provisions.
Sec. 405. Skiprow practices.
Sec. 406. Preliminary allotments for 1990 crop of upland cotton.
TITLE V—RICE
Sec. 501. Loan rates, target prices, disaster payments, rice acreage reduction program, and land diversion for the 1986 through 1989 crops of rice.
TITLE VI—PEANUTS
Sec. 601. National poundage quota and farm poundage quota.
Sec. 602. Sale, lease, or transfer of farm poundage quota.
Sec. 603. Marketing penalties; disposition of additional peanuts.
Sec. 604. Price support program.
Sec. 605. Reports and records.
Sec. 606. Suspension of marketing quotas and acreage allotments.
Sec. 607. Suspension of certain price support provisions.
TITLE VII—SOYBEANS
Sec. 701. Soybean price support.
TITLE VIII—SUGAR
Sec. 801. Sugar price support.
TITLE IX—HONEY
Sec. 901. Honey price support.
TITLE X—MISCELLANEOUS COMMODITY PROVISIONS
Sec. 1001. Payment limitations.
Sec. 1002. Commodity Credit Corporation sales price restrictions.
Sec. 1003. Application of terms in the Agricultural Act of 1949.
Sec. 1004. Normally planted acreage and target prices.
TITLE XI—EFFECTIVE DATE
Sec. 1101. Effective date.

TITLE I—AGRICULTURAL EXPORTS

EXPANSION OF MARKETS FOR UNITED STATES AGRICULTURAL COMMODITIES AND PRODUCTS

SEC. 101. (a) Notwithstanding any other provision of law, the Secretary of Agriculture shall formulate and carry out a program under which agricultural commodities, including but not limited to wheat, feed grains, upland cotton, rice, and soybeans, and products thereof acquired by the Commodity Credit Corporation, are provided to United States exporters and users and foreign purchasers at no cost to encourage the development, maintenance, and expansion of export markets for United States agricultural commodities and products thereof.

(b) In carrying out the program authorized by this section, the Secretary of Agriculture—

(1) shall take such action as may be necessary to ensure that the program provides equal treatment to domestic and foreign purchasers and users of United States agricultural commodites and products thereof in any case in which the importation of a manufactured product made, in whole or in part, from a commodity or product thereof made available for export under this section would place domestic users of the commodity or product thereof at a competitive disadvantage;

(2) shall, to the extent that agricultural commodities and products thereof are to be provided to foreign purchasers during any fiscal year, consider for participation all interested foreign purchasers, giving priority to those who have traditionally purchased United States agricultural commodities and products thereof and who continue to purchase such commodities and products thereof on an annual basis in quantities greater than the level of purchases in a previous representative period;

(3) shall ensure, insofar as possible, that any use of agricultural commodities or products thereof made available under this section be made in such manner as to encourage increased use and avoid displacing usual marketings of United States agricultural commodities and products thereof; and

(4) shall take reasonable precautions to prevent the resale or transshipment to other countries, or use for other than domestic use in the importing country, of agricultural commodities or products thereof made available under this section.

(c) If a foreign purchaser sells in the importing country agricultural commodities or products thereof received from the Secretary of Agriculture, under the authority of this section, and uses the receipts from the sale of such commodities or products thereof for the construction or rehabilitation of facilities in the importing country to improve the handling, marketing, processing, storage, or distribution of United States agricultural commodities or products thereof in such importing country, such purchaser shall be eligible to receive supplemental distributions of agricultural commodities or products thereof under this section. Supplemental distributions under this section shall be made with such commodities or products thereof, at such intervals, and in such amounts as the Secretary determines appropriate taking into account the extent to which facility improvements have been made, the capability of the importing country to distribute or otherwise use additional commodities or products thereof, and such other factors as determined appropriate by the Secretary that are consistent with the purposes of this section.

(d) The Secretary of Agriculture shall carry out the program authorized by this section through the Commodity Credit Corporation.

(e) The Secretary of Agriculture may issue such regulations as the Secretary deems necessary to carry out this section.

(f) The authority provided in this section shall be in addition to, and not in place of, any authority granted to the Secretary of Agriculture or the Commodity Credit Corporation under any other provision of law.

INTERMEDIATE EXPORT CREDIT

SEC. 102. Section 4(b) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(b)) is amended—

(1) by adding at the end of paragraph (1) the following new sentence: "In addition, the Corporation may guarantee the repayment of loans made to finance such sales.";

(2) by inserting ", and no loan may be guaranteed," after "financed" in paragraph (2);

(3) in paragraph (3)—

(A) by inserting "or guarantees" after "financing";

(B) by striking out "and" at the end of subparagraph (C);

(C) by striking out "credit" in subparagraph (D);

(D) by striking out the period at the end of subparagraph (D) and inserting in lieu thereof "; and"; and

(E) by adding at the end thereof the following new subparagraph:

"(E) to finance the importation of agricultural commodities by developing nations for use in meeting their food needs.";

(4) by striking out paragraph (4) and redesignating paragraphs (5) through (9) as paragraphs (4) through (8), respectively;

(5) in paragraph (4) (as redesignated by paragraph (4) of this section)—

(A) by inserting "(A)" after the paragraph designation;

(B) by redesignating subparagraphs (A) and (B) as clauses (i) and (ii), respectively;

(C) by amending clause (i) (as redesignated) to read as follows:

"(i) Repayment shall be in dollars with interest at a rate determined by the Secretary."; and

(D) by adding at the end thereof the following new subparagraph:

"(B) Contracts of guarantee under this subsection shall contain such terms and conditions as the Commodity Credit Corporation shall determine.";

(6) by inserting "or guarantees" after "financing" in paragraph (5) (as redesignated by paragraph (4) of this section);

(7) in paragraph (6) (as redesignated by paragraph (4) of this section)—

(A) by inserting "or guarantee" after "finance" each place it appears; and

(B) by inserting "or guarantee" after "financing" in subparagraph (B);

(8) by inserting "or guaranteed" after "financed" in paragraph (7) (as redesignated by paragraph (4) of this section); and

(9) by inserting at the end thereof the following new paragraph:

"(9) For purposes of financing or guaranteeing export sales under this subsection, the Commodity Credit Corporation shall make available, to the extent practicable, no less than $500,000,000 for each of the fiscal years ending September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988.".

EXPORT CREDIT SALES AND CREDIT GUARANTEES

SEC. 103. Section 4 of the Food for Peace Act of 1966 (7 U.S.C. 1707a) is amended by adding at the end thereof the following new subsection:

"(e)(1) If a country does not meet the financial qualifications for export credit or credit guarantees provided by the Commodity Credit Corporation under this section, the Secretary of Agriculture may provide to such country commodities acquired by the Corporation through price support operations and products thereof to the extent necessary to reduce the cost to such country of purchasing United States agricultural commodities and to allow such country to meet such qualifications.

"(2) The Secretary shall review and adjust annually the amount of commodities provided to a country under paragraph (1) in order to encourage such country to place greater reliance on increased use of commercial trade to meet the qualifications referred to in paragraph (1).".

EXPANDED DONATION OF AGRICULTURAL COMMODITIES

SEC. 104. Section 416(b) of the Agricultural Act of 1949 (7 U.S.C. 1431(b)) is amended by striking out "wheat" each place it appears in the first, third, and eighth sentences and inserting in lieu thereof "other agricultural commodities and products thereof".

TITLE II—WHEAT

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, WHEAT ACREAGE REDUCTION AND SET-ASIDE PROGRAM, AND LAND DIVERSION FOR THE 1986 THROUGH 1989 CROPS OF WHEAT

SEC. 201. Effective only for the 1986 through 1989 crops of wheat, section 107C of the Agricultural Act of 1949 (7 U.S.C. 1445b-2) is amended to read as follows:

"SEC. 107C. Notwithstanding any other provision of law:

"(a)(1) Except as provided in paragraphs (2), (3) and (4), the Secretary shall make available to producers loans and purchases for each of the 1986 through 1989 crops of wheat at such level as the Secretary determines will maintain the competitive relationship of wheat to other grains in domestic and export markets after taking into consideration the cost of producing wheat, supply and demand conditions, and world prices for wheat.

"(2) The level of loans and purchases for a crop determined under paragraph (1) may not be less than the higher of—

"(A) 85 per centum of the simple average price received by farmers, as determined by the Secretary, during the immediately preceding five marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period; or

"(B) in the case of the 1986 and 1987 crops of wheat, $3.30 per bushel.

"(3) The level of loans and purchases for a crop determined under paragraph (1) may not be reduced by more than 5 per centum from the level determined for the preceding crop.

"(4) A producer may repay a loan made under paragraph (1) for a crop at a level which is the lesser of—

"(A) the original loan rate established for such crop; or

"(B) such loan rate as the Secretary determines will minimize the number of loan forfeitures, will not result in excessive total stocks of wheat, will reduce the costs incurred by the Federal Government in storing wheat, and will maintain the competitiveness of wheat in domestic and export markets.

"(5) The simple average price received by farmers for the immediately preceding marketing year shall be based on the latest information available to the Secretary at the time of the determination.

"(b)(1)(A) The Secretary shall make available to producers payments for each of the 1986 through 1989 crops of wheat in an amount computed as provided in this subsection. Payments for any such crop of wheat shall be computed by multiplying (i) the payment rate, by (ii) the farm program acreage for the crop, by (iii) the farm program payment yield for the crop. In no event may payments be made under this paragraph for any crop on a greater acreage than the acreage actually planted to wheat.

"(B) The payment rate for wheat shall be the amount by which the higher of—

"(i) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(ii) the loan level determined under subsection (a) of this section for such crop,

is less than the established price per bushel.

"(C)(i) The established price for a crop of wheat shall not be less than the higher of—

"(I) 130 per centum of the loan level determined under subsection (a) for such crop; or

"(II) in the case of the 1986 and 1987 crops of wheat, $4.38 per bushel.

"(ii) The established price for a crop of wheat may not be reduced by more than 5 per centum from the established price for the preceding crop.

"(iii) Any such established price may be adjusted by the Secretary as the Secretary determines to be appropriate to reflect any change in—

"(I) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made, or

"(II) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made.

"(iv) The adjusted cost of production for each of such years may be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and may include variable costs, machinery ownership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop.

"(D) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2) of this subsection.

"(2)(A) Except as provided in subparagraph (C) of this paragraph, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for wheat to wheat or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to wheat for harvest (including any acreage which the producers were prevented from planting to wheat or other nonconserving crop in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33⅓ per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of wheat which the producers are able to harvest on any farm is less than the result of multiplying 60 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 per centum of the established price for the crop for the deficiency in production below 60 per centum for the crop.

"(C) Producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) with respect to their wheat acreage.

"(D)(i) Notwithstanding the provisions of subparagraph (C) of this paragraph, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(I) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting wheat or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(II) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(III) additional assistance must be made available to such producers to alleviate the economic emergency.

"(ii) The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(c)(1)(A) The Secretary shall proclaim a national program acreage for each of the 1986 through 1989 crops of wheat. The proclamation shall be made not later than August 15 of each calendar year for the crop harvested in the next succeeding calendar year, except that in the case of the 1986 crop, the proclamation shall be made as soon as practicable after enactment of the Farm and Market Recovery Act of 1985.

"(B) The Secretary may revise the national program acreage first proclaimed for any crop year for the purpose of determining the allocation factor under paragraph (2) of this subsection if the Secretary determines it necessary based upon the latest information. The Secretary shall proclaim such revised national program acreage as soon as it is made.

"(C) The national program acreage for wheat shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm program payment yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop.

"(D) If the Secretary determines that carryover stocks of wheat are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of wheat. The allocation factor for wheat shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop, except that in no event shall the allocation factor for any crop of wheat be more than 100 per centum nor less than 80 per centum.

"(3)(A) The individual farm program acreage for each crop of wheat shall be determined by multiplying the allocation factor by the acreage of wheat planted for harvest on the farms for which individual farm program acreages are required to be determined.

"(B) The farm program acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage of wheat planted for harvest on the farm from the acreage base established for the farm under subsection (e)(2) of this section by at least the percentage recommended by the Secretary in the proclamation of the national program acreage.

"(C) The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of wheat planted for harvest is less than the acreage base established for the farm under subsection (e)(2), but for which the reduction is insufficient to exempt the farm from the application of the allocation factor.

"(D) In establishing the allocation factor for wheat, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(d)(1) The farm program payment yield for each crop of wheat shall be the yield established for the farm for the previous crop year, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for wheat was established for the farm in the previous crop year, the Secretary may determine such yield as the Secretary finds fair and reasonable.

"(2) Notwithstanding paragraph (1) of this subsection:

"(A) In the determination of yields, the Secretary shall take into account the actual yields proved by the producer.

"(B) Neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection.

"(3) If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of—

"(A) historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or

"(B) if such data are not available, on the Secretary's estimate of actual yields for the crop year involved.

"(4) If national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(e)(1)(A) Notwithstanding any other provision of this section, the Secretary may provide for any crop either for a program under which the acreage planted to wheat would be limited as described in paragraph (2) or a set-aside program as described in paragraph (3) of this subsection if the Secretary determines that the total supply of wheat, in the absence of such a program, will be excessive, taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency.

"(B) The Secretary shall announce any such wheat acreage limitation program or set-aside program not later than August 15 prior to the calendar year in which the crop is harvested, except that in the case of the 1986 crop, the Secretary shall announce such program as soon as practicable after enactment of the Farm and Market Recovery Act of 1985.

"(2)(A) If a wheat acreage limitation program is announced under paragraph (1) of this subsection, such limitation shall be achieved by applying a uniform percentage reduction to the acreage base for each wheat-producing farm.

"(B) Producers who knowingly produce wheat in excess of the permitted wheat acreage for the farm shall be ineligible for wheat loans, purchases, and payments with respect to that farm.

"(C)(i) The acreage base for any farm for the purpose of determining any reduction required to be made for any year as the result of a limitation under this paragraph shall be—

"(I) the acreage planted on the farm to wheat for harvest in the crop year immediately preceding the year for which the determination is made, or

"(II) at the discretion of the Secretary, the average acreage planted to wheat for harvest in the two crop years immediately preceding the year for which the determination is made.

"(ii) For the purpose of clause (i) of this subparagraph, acreage planted to wheat for harvest shall include any acreage which the producers were prevented from planting to wheat or other nonconserving crop in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers.

"(iii) The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base.

"(D)(i) A number of acres on the farm determined by dividing—

"(I) the product obtained by multiplying the number of acres required to be withdrawn from the production of wheat times the number of acres actually planted to such commodity, by

"(II) the number of acres authorized to be planted to such commodity under the limitation established by the Secretary,

shall be devoted to conservation uses, in accordance with regulations issued by the Secretary.

"(ii) The number of acres so determined is hereafter in this subsection referred to as 'reduced acreage'.

"(E) If an acreage limitation program is announced under paragraph (1) of this subsection for a crop of wheat, subsection (c) of this section shall not be applicable to such crop, including any prior announcement which may have been made under such subsection with respect to such crop. The individual farm program acreage shall be the acreage planted on the farm to wheat for harvest within the permitted wheat acreage for the farm as established under this paragraph.

"(3)(A) If a set-aside program is announced under paragraph (1) of this subsection, then as a condition of eligibility for loans, purchases, and payments authorized by this section, the producers on a farm must set aside and devote to conservation uses an acreage of cropland equal to a specified percentage, as determined by the Secretary, of the acreage of wheat planted for harvest for the crop for which the set-aside is in effect.

"(B) The set-aside acreage shall be devoted to conservation uses, in accordance with regulations issued by the Secretary.

"(C) If a set-aside program is established, the Secretary may limit the acreage planted to wheat. Such limitation shall be applied on a uniform basis to all wheat-producing farms.

"(D) The Secretary may make such adjustments in individual set-aside acreages under this section as the Secretary determines necessary to correct for abnormal factors affecting production, and to give due consideration to tillable acreage, crop-rotation practices, types of soil, soil and water conservation measures, topography, and such other factors as the Secretary deems necessary.

"(4)(A) The regulations issued by the Secretary under paragraphs (2) and (3) of this subsection with respect to acreage required to be devoted to conservation uses shall assure protection of such acreage from weeds and wind and water erosion.

"(B) The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of such acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such produc-

tion is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(C) In determining the amount of land to be devoted to conservation uses under an acreage limitation or set-aside program with respect to land that has been farmed under summer fallow practices, as defined by the Secretary, the Secretary shall consider the effects of soil erosion and such other factors as the Secretary considers appropriate.

"(5)(A) The Secretary may make land diversion payments to producers of wheat, whether or not an acreage limitation or set-aside program for wheat is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of wheat to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers.

"(B) The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted.

"(C) The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(6)(A) Any reduced acreage, set-aside acreage, and additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(B) The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of subparagraph (A) of this paragraph.

"(C) The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(7)(A) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe.

"(B) The Secretary may, by mutual agreement with the producers on the farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(f)(1) If the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(2) The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(g) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(h) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(i) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to assignment of payments) shall apply to payments under this section.

"(j) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this section if an acreage limitation program is established under subsection (e)(2) of this section, but may be required if a set-aside program is established under subsection (e)(3) of this section.".

NONAPPLICABILITY OF CERTIFICATE REQUIREMENTS

SEC. 202. Sections 379d, 379e, 379f, 379g, 379h, 379i, and 379j of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1379d-1379j) (which deal with marketing certificate requirements for processors and exporters) shall not be applicable to wheat processors or exporters during the period June 1, 1986, through May 31, 1990.

SUSPENSION OF MARKETING QUOTAS AND PRODUCER CERTIFICATE PROVISIONS

SEC. 203. Sections 331, 332, 333, 334, 335, 336, 338, 339, 379b, and 379c of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1331-1336, 1338, 1339, 1379b, and 1379c) shall not be applicable to the 1986 through 1989 crops of wheat.

SUSPENSION OF QUOTA PROVISIONS

SEC. 204. The joint resolution entitled "A joint resolution relating to corn and wheat marketing quotas under the Agricultural Adjustment Act of 1938, as amended", approved May 26, 1941 (7 U.S.C. 1330 and 1340), shall not be applicable to the crops of wheat planted for harvest in the calendar years 1986 through 1989.

NONAPPLICABILITY OF SECTION 107 OF THE AGRICULTURAL ACT OF 1949 TO THE 1986 THROUGH 1989 CROPS OF WHEAT

SEC. 205. Section 107 of the Agricultural Act of 1949 (7 U.S.C. 1445a) shall not be applicable to the 1986 through 1989 crops of wheat.

TITLE III—FEED GRAINS

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, FEED GRAIN ACREAGE REDUCTION AND SET-ASIDE PROGRAM, AND LAND DIVERSION FOR THE 1986 THROUGH 1989 CROPS OF FEED GRAINS

SEC. 301. Effective only for the 1986 through 1989 crops of feed grains, the Agricultural Act of 1949 is amended by adding after section 105B (7 U.S.C. 1444d) the following new section:

"SEC. 105C. Notwithstanding any other provision of law:

"(a)(1)(A) Except as provided in subparagraphs (B), (C), and (D), the Secretary shall make available to producers loans and purchases for each of the 1986 through 1989 crops of corn at such level as the Secretary determines will encourage the exportation of feed grains and not result in excessive total stocks of feed grains after taking into consideration the cost of producing corn, supply and demand conditions, and world prices for corn.

"(B) The level of loans and purchases for a crop determined under subparagraph (A) may not be less than the higher of—

"(i) 85 per centum of the simple average price received by farmers, as determined by the Secretary, during the immediately preceding five marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period; or

"(ii) in the case of the 1986 and 1987 crops of corn, $2.55 per bushel.

"(C) The level of loans and purchases for a crop determined under subparagraph (A) may not be reduced by more than 5 per centum from the level determined for the preceding crop.

"(D) A producer may repay a loan made under subparagraph (A) or paragraph (2) for a crop at a level which is the lesser of—

"(i) the original loan rate established for such crop; or

"(ii) such loan rate as the Secretary determines will minimize the number of loan forfeitures, will not result in excessive total stocks of feed grains, will reduce the costs incurred by the Federal Government in storing feed grains, and will maintain the competitiveness of feed grains in domestic and export markets.

"(E) The simple average price received by farmers for the immediately preceding marketing year shall be based on the latest information available to the Secretary at the time of the determination.

"(2) The Secretary shall make available to producers loans and purchases for each of the 1986 through 1989 crops of grain sorghums, barley, oats, and rye, respectively, at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, taking into consideration the feeding value of such commodity in relation to corn and other factors specified in section 401(b) of this Act.

"(b)(1)(A) The Secretary shall make available to producers payments for each of the 1986 through 1989 crops of corn, grain sorghums, oats, and, if designated by the Secretary, barley, in an amount computed as provided in this subsection. Payments for any such crop of feed grains shall be computed by multiplying (i) the payment rate, by (ii) the farm program acreage for the crop, by (iii) the farm program payment yield for the crop. In no event may payments be made under this paragraph for any crop on a greater acreage than the acreage actually planted to such feed grains.

"(B) The payment rate for corn shall be the amount by which the higher of—

"(i) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(ii) the loan level determined under subsection (a) of this section for such crop,

is less than the established price per bushel.

"(C)(i) The established price for a crop of corn shall not be less than the higher of—

"(I) 130 per centum of the loan level determined under subsection (a) for such crop; or

"(II) in the case of the 1986 and 1987 crops of corn, $3.03 per bushel.

"(ii) The established price for a crop of corn may not be reduced by more than 5 per centum from the established price for the preceding crop.

"(iii) Any such established price may be adjusted by the Secretary as the Secretary determines to be appropriate to reflect any change in—

"(I) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made, from

"(II) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made.

"(iv) The adjusted cost of production for each of such years may be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and may include variable costs, machinery ownership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop.

"(D) The payment rate for grain sorghums, oats, and, if designated by the Secretary, barley, shall be such rate as the Secretary determines fair and reasonable in relation to the rate at which payments are made available for corn.

"(E) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2) of this subsection.

"(2)(A) Except as provided in subparagraph (C) of this paragraph, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for feed grains to feed grains or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to feed grains for harvest (including any acreage which the producers were prevented from planting to feed grains or other nonconserving crop in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33 1/3 per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of feed grains which the producers are able to harvest on any farm is less than the result of multiplying 60 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 per centum of the established price for the crop for the deficiency in production below 60 per centum for the crop.

"(C) Producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) with respect to their feed grain acreage.

"(D)(i) Notwithstanding the provisions of subparagraph (C) of this paragraph, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(I) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting feed grains or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(II) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(III) additional assistance must be made available to such producers to alleviate the economic emergency.

"(ii) The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(c)(1)(A) The Secretary shall proclaim a national program acreage for each of the 1986 through 1989 crops of feed grains. The proclamation shall be made not later than November 15 of each calendar year for the crop harvested in the next succeeding calendar year, except that in the case of the 1986 crop, the proclamation shall be made as soon as practicable after enactment of the Farm and Market Recovery Act of 1985.

"(B) The Secretary may revise the national program acreage first proclaimed for any crop year for the purpose of determining the allocation factor under paragraph (2) of this subsection if the Secretary determines it necessary based upon the latest information. The Secretary shall proclaim such revised national program acreage as soon as it is made.

"(C) The national program acreage for feed grains shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm program payment yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop.

"(D) If the Secretary determines that carryover stocks of feed grains are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of feed grains. The allocation factor for feed grains shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop, except that in no event shall the allocation factor for any crop of feed grains be more than 100 per centum nor less than 80 per centum.

"(3)(A) The individual farm program acreage for each crop of feed grains shall be determined by multiplying the allocation factor by the acreage of feed grains planted for harvest on the farms for which individual farm program acreages are required to be determined.

"(B) The farm program acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage of feed grains planted for harvest on the farm from the acreage base established for the farm under subsection (e)(2) of this section by at least the percentage recommended by the Secretary in the proclamation of the national program acreage.

"(C) The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of feed grains planted for harvest is less than the acreage base established for the farm under subsection (e)(2), but for which the reduction is insufficient to exempt the farm from the application of the allocation factor.

"(D) In establishing the allocation factor for feed grains, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(d)(1) The farm program payment yield for each crop of feed grains shall be the yield established for the farm for the previous crop year, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for feed grains was established for the farm in the previous crop year, the Secretary may determine such yield as the Secretary finds fair and reasonable.

"(2) Notwithstanding paragraph (1) of this subsection:

"(A) In the determination of yields, the Secretary shall take into account the actual yields proved by the producer.

"(B) Neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection.

"(3) If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of—

"(A) historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or

"(B) if such data are not available, on the Secretary's estimate of actual yields for the crop year involved.

"(4) If national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State or county program payment yields.

"(e)(1)(A) Notwithstanding any other provision of this section, the Secretary may provide for any crop either for a program under which the acreage planted to feed grains would be limited as described in paragraph (2) or a set-aside program as described in paragraph (3) of this subsection if the Secretary determines that the total supply of feed grains, in the absence of such a program, will be excessive, taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency.

"(B) The Secretary shall announce any such feed grain acreage limitation program or set-aside program not later than November 15 prior to the calendar year in which the crop is harvested, except that in the case of the 1986 crop, the Secretary shall announce such progam as soon as practicable after enactment of the Farm and Market Recovery Act of 1985.

"(2)(A) If a feed grain acreage limitation program is announced under paragraph (1) of this subsection, such limitation shall be achieved by applying a uniform percentage reduction to the acreage base for each feed grain-producing farm.

"(B) Producers who knowingly produce feed grains in excess of the permitted feed grain acreage for the farm shall be ineligible for feed grain loans, purchases, and payments with respect to that farm.

"(C) The Secretary may provide that no producer of malting barley shall be required as a condition of eligibility for feed grain loans, purchases, and payments to comply with any acreage limitation under this paragraph if such producer has previously produced a malting variety of barley, plants barley only of an acceptable malting variety for harvest, and meets such other conditions as the Secretary may prescribe.

"(D)(i) The acreage base for any farm for the purpose of determining any reduction required to be made for any year as the result of a limitation under this paragraph shall be—

"(I) the acreage planted on the farm to feed grains for harvest in the crop year immediately preceding the year for which the determination is made, or

"(II) at the discretion of the Secretary, the average acreage planted to feed grains for harvest in the two crop years immediately preceding the year for which the determination is made.

"(ii) For the purpose of clause (i) of this subparagraph, acreage planted to feed grains for harvest shall include any acreage which the producers were prevented from planting to feed grains or other nonconserving crop in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers.

"(iii) The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base.

"(E)(i) A number of acres on the farm determined by dividing—

"(I) the product obtained by multiplying the number of acres required to be withdrawn from the production of feed grains times the number of acres actually planted to such commodity, by

"(II) the number of acres authorized to be planted to such commodity under the limitation established by the Secretary,

shall be devoted to conservation uses, in accordance with regulations issued by the Secretary.

"(ii) The number of acres so determined is hereafter in this subsection referred to as 'reduced acreage'.

"(F) If an acreage limitation program is announced under paragraph (1) of this subsection for a crop of feed grains, subsection (c) of this section shall not be applicable to such crop, including any prior announcement which may have been made under such subsection with respect to such crop. The individual farm program acreage shall be the acreage planted on the farm to feed grains for harvest within the permitted feed grain acreage for the farm as established under this paragraph.

"(3)(A) If a set-aside program is announced under paragraph (1) of this subsection, then as a condition of eligibility for loans, purchases, and payments authorized by this section, the producers on a farm must set aside and devote to conservation uses an acreage of cropland equal to a specified percentage, as determined by the Secretary, of the acreage of feed grains planted for harvest for the crop for which the set-aside is in effect.

"(B) The set-aside acreage shall be devoted to conservation uses, in accordance with regulations issued by the Secretary.

"(C) If a set-aside program is established, the Secretary may limit the acreage planted to feed grains. Such limitation shall be applied on a uniform basis to all feed grain-producing farms.

"(D) The Secretary may make such adjustments in individual set-aside acreages under this section as the Secretary determines necessary to correct for abnormal factors affecting production, and to give due consideration to tillable acreage, crop-rotation practices, types of soil, soil and water conservation measures, topography, and such other factors as the Secretary deems necessary.

"(4)(A) The regulations issued by the Secretary under paragraphs (2) and (3) of this subsection with respect to acreage required to be devoted to conservation uses shall assure protection of such acreage from weeds and wind and water erosion.

"(B) The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of such acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(5)(A) The Secretary may make land diversion payments to producers of feed grains, whether or not an acreage limitation or set-aside program for feed grains is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of feed grains to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers.

"(B) The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted.

"(C) The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(6)(A) Any reduced acreage, set-aside acreage, and additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(B) The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of subparagraph (A) of this paragraph.

"(C) The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(7)(A) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe.

"(B) The Secretary may, by mutual agreement with the producers on the farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(f)(1) If the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(2) The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(g) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(h) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(i) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to assignment of payments) shall apply to payments under this section.

"(j) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this section if an acreage limitation program is established under subsection (e)(2) of this section, but may be required if a set-aside program is established under subsection (e)(3) of this section.".

NONAPPLICABILITY OF SECTION 105 OF THE AGRICULTURAL ACT OF 1949 TO THE 1986 THROUGH 1989 CROPS OF FEED GRAINS

SEC. 302. Section 105 of the Agricultural Act of 1949 (7 U.S.C. 1444b) shall not be ap-

plicable to the 1986 through 1989 crops of feed grains.

TITLE IV—COTTON

LOAN RATES AND TARGET PRICES, DISASTER PAYMENTS, COTTON ACREAGE REDUCTION PROGRAM, AND LAND DIVERSION FOR THE 1986 THROUGH 1989 CROPS OF UPLAND COTTON

SEC. 401. Effective only for the 1986 through 1989 crops of upland cotton, the Agricultural Act of 1949 is amended by inserting after section 103 (7 U.S.C. 1444) the following new section:

"SEC. 103A. Notwithstanding any other provision of law:

"(a)(1) The Secretary shall, upon presentation of warehouse receipts reflecting accrued storage charges of not more than sixty days, make available for the 1986 through 1989 crops of upland cotton to producers nonrecourse loans for a term of ten months from the first day of the month in which the loan is made at such level as will reflect for Strict Low Middling one-and-one-sixteenth-inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States the smaller of—

"(A) 85 per centum of the average price (weighted by market and month) of such quality of cotton as quoted in the designated United States spot markets during three years of the five-year period ending July 31 in the year in which the loan level is announced, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, or

"(B) 90 per centum of the average, for the fifteen-week period beginning July 1 of the year in which the loan level is announced, of the five lowest-priced growths of the growths quoted for Middling one-and-three-thirty-seconds-inch cotton C.I.F. northern Europe (adjusted downward by the average difference during the period April 15 through October 15 of the year in which the loan is announced between such average northern European price quotation of such quality of cotton and the market quotations in the designated United States spot markets for Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9)).

"(2) In no event shall such loan level be less than 55 cents per pound.

"(3) If for any crop the average northern European price determined under clause (B) of paragraph (1) of this subsection is less than the average United States spot market price determined under clause (A) of paragraph (1) of this subsection, the Secretary may, notwithstanding paragraph (1) of this subsection, increase the loan level to such level as the Secretary may deem appropriate, not in excess of the average United States spot market price determined under clause (A) of paragraph (1) of this subsection.

"(4) The loan level for any crop of cotton shall be determined and announced by the Secretary not later than November 1 of the calendar year preceding the marketing year for which such loan is to be effective, except that in the case of the 1986 crop such determination and announcement shall be made as soon as practicable after enactment of the Farm and Market Recovery Act of 1985. Such level shall not thereafter be changed.

"(5)(A) Except as provided in subparagraph (B), nonrecourse loans provided for in this section shall, upon request of the producer during the tenth month of the loan period for the cotton, be made available for an additional term of eight months.

"(B) Such request to extend the loan period shall not be approved in a month when the average price of Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for the preceding month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six-month period.

"(6) A producer may repay a loan made under this subsection for a crop at a level which is the lesser of—

"(A) the original loan rate established for such crop; or

"(B) such loan rate as the Secretary determines will minimize the number of loan forfeitures, will not result in excessive total stocks of cotton, will reduce the costs incurred by the Federal Government in storing cotton, and will maintain the competitiveness of cotton in domestic and export markets.

"(b)(1) Whenever the Secretary determines that the average price of Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for a month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six months, notwithstanding any other provision of law, the President shall immediately establish and proclaim a special limited global import quota for upland cotton subject to the following conditions:

"(A) The amount of the special quota shall be equal to twenty-one days of domestic mill consumption of upland cotton at the seasonally adjusted average rate of the most recent three months for which data are available.

"(B) If a special quota has been established under this subsection during the preceding twelve months, the amount of the quota next established hereunder shall be the smaller of twenty-one days of domestic mill consumption calculated as set forth in subparagraph (A) of this paragraph or the amount required to increase the supply to 130 per centum of the demand.

"(C) As used in subparagraph (B) of this paragraph:

"(i) The term 'supply' means, using the latest official data of the Bureau of the Census, the United States Department of Agriculture, and the United States Department of the Treasury—

"(I) the carryover of upland cotton at the beginning of the marketing year (adjusted to four-hundred-and-eighty-pound bales) in which the special quota is established, plus

"(II) production of the current crop, plus

"(III) imports to the latest date available during the marketing year.

"(ii) The term 'demand' means—

"(I) the average seasonally adjusted annual rate of domestic mill consumption in the most recent three months for which data are available, plus

"(II) the larger of average exports of upland cotton during the preceding six marketing years or cumulative exports of upland cotton, plus

"(III) outstanding export sales for the marketing year in which the special quota is established.

"(D) When a special quota is established under this subsection, cotton may be entered under such quota during the ninety-day period beginning on the effective date of the proclamation.

"(2) Notwithstanding paragraph (1) of this subsection, a special quota period may not be established that overlaps an existing quota period.

"(c)(1) The Secretary shall make available to producers payments for each of the 1986 through 1989 crops of upland cotton in an amount computed as provided in this subsection. Payments for any such crop of upland cotton shall be computed by multiplying (A) the payment rate, by (B) the farm program acreage for the crop (determined in accordance with subsection (g) or subsection (i)(1) of this section), by (C) the farm program payment yield for the crop (determined in accordance with subsection (h) of this section). In no event may payments be made under this subsection for any crop on a greater acreage than the acreage actually planted to upland cotton.

"(2) The payment rate for upland cotton shall be the amount by which the higher of—

"(A) the average market price received by farmers for upland cotton during the calendar year which includes the first five months of the marketing year for such crop, as determined by the Secretary, or

"(B) the loan level determined under subsection (a) of this section for such crop,

is less than the established price per pound.

"(3)(A) The established price for a crop of upland cotton shall not be less than the higher of—

"(i) 130 per centum of the loan level determined under subsection (a) for such crop; or

"(ii) in the case of the 1986 and 1987 crops of upland cotton, $0.81 per pound.

"(B) The established price for a crop of upland cotton may not be reduced by more than 5 per centum from the established price for the preceding crop.

"(C) Any such established price may be adjusted by the Secretary as the Secretary determines to be appropriate to reflect any change in—

"(i) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made, from

"(ii) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made.

"(D) The adjusted cost of production for each of such years may be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and may include variable costs, machinery ownership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop.

"(4) The total quantity of upland cotton on which payments would otherwise be payable to a producer on a farm for any crop under this subsection shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under subsection (d) of this section.

"(d)(1) Except as provided in subparagraph (C) of this paragraph, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for cotton to cotton or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to cotton for harvest (including any acreage which the producers were prevented from planting to cotton or other nonconserving crop in lieu of cotton because of drought, flood, or other natural disaster, or other

condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33⅓ per centum of the established price for the crop.

"(2) Except as provided in paragraph (3) of this subsection, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of cotton which the producers are able to harvest on any farm is less than the result of multiplying 75 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 33 1/3 per centum of the established price for the crop for the deficiency in production below 75 per centum for the crop.

"(3) Producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) with respect to their cotton acreage.

"(4)(A) Notwithstanding the provisions of paragraph (3) of this subsection, the Secretary may make disaster payments to producers on a farm under this subsection whenever the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting cotton or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

"(B) The Secretary may make such adjustments in the amount of payments made available under this paragraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(e)(1) The Secretary shall establish for each of the 1986 through 1989 crops of upland cotton a national program acreage. Such national program acreage shall be announced by the Secretary not later than November 1 of the calendar year preceding the year for which such acreage is established, except that in the case of the 1986 crop, such announcement shall be made as soon as practicable after enactment of the Farm and Market Recovery Act of 1985.

"(2) The Secretary may revise the national program acreage first announced for any crop year for the purpose of determining the allocation factor under subsection (f) of this section if the Secretary determines it necessary based on the latest information. The Secretary shall announce such revised national program acreage as soon as it has been made.

"(3) The national program acreage for upland cotton shall be the number of harvested acres the Secretary determines (on the basis of the estimated weighted national average of the farm program yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop.

"(4) The national program acreage shall be subject to such adjustment as the Secretary determines necessary, taking into consideration the estimated carryover supply, so as to provide for an adequate but not excessive total supply of cotton for the marketing year for the crop for which such national program acreage is established. In no event shall the national program acreage be less than ten million acres.

"(f) The Secretary shall determine a program allocation factor for each crop of upland cotton. The allocation factor for upland cotton (not to exceed 100 per centum) shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop.

"(g)(1) The individual farm program acreage for each crop of upland cotton shall be determined by multiplying the allocation factor by the acreage of cotton planted for harvest on the farms for which individual farm program acreages are required to be determined.

"(2) The farm program acreage may not be further reduced by application of the allocation factor if the producers reduce the acreage of cotton planted for harvest on the farm from the acreage base established for the farm under subsection (i)(1) of this section by at least the percentage recommended by the Secretary in the announcement of the national program acreage.

"(3) The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of cotton planted for harvest is less than the acreage base established for the farm under subsection (i)(1) of this section, but for which the reduction is insufficient to exempt the farm from the application of the allocation factor.

"(4) In establishing the allocation factor for upland cotton, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this subsection.

"(h)(1) The farm program payment yield for each crop of upland cotton shall be determined on the basis of the actual yields per harvested acre on the farm for the preceding three years, except that the actual yields shall be adjusted by the Secretary for abnormal yields in any year caused by drought, flood, or other natural disaster, or other condition beyond the control of the producers. In case farm yield data for one or more years are unavailable or there was no production, the Secretary shall provide for appraisals to be made on the basis of actual yields and program payment yields for similar farms in the area for which data are available.

"(2) Notwithstanding paragraph (1) of this subsection:

"(A) In the determination of yields, the Secretary shall take into account the actual yields proved by the producer.

"(B) Neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection.

"(3) If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of—

"(A) historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or

"(B) if such data are not available, the Secretary's estimate of actual yields for the crop year involved.

"(4) If national, State, or county program payment yields are established, the total farm program payment yields shall balance to the national, State, or county program payment yields.

"(i)(1)(A) Notwithstanding any other provision of this section, the Secretary may establish a limitation on the acreage planted to upland cotton if the Secretary determines that the total supply of upland cotton, in the absence of such limitation, would be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency.

"(B) Such limitation shall be achieved by applying a uniform percentage reduction to the acreage base for each cotton-producing farm.

"(C) Producers who knowingly produce cotton in excess of the permitted cotton acreage for the farm shall be ineligible for cotton loans and payments with respect to that farm.

"(D)(i) The acreage base for any farm for the purpose of determining any reduction required to be made for any year as a result of a limitation under this paragraph shall be—

"(I) the acreage planted on the farm to upland cotton for harvest in the crop year immediately preceding the year for which the determination is made, or

"(II) at the discretion of the Secretary, the average acreage planted to upland cotton for harvest in the two crop years immediately preceding the year for which the determination is made.

"(ii) For the purpose of clause (i) of this subparagraph, acreage planted to cotton for harvest shall include any acreage which the producers were prevented from planting to cotton or other nonconserving crop in lieu of cotton because of drought, flood, or other natural disaster, or other condition beyond the control of the producers.

"(iii) The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base.

"(E)(i) A number of acres on the farm determined by dividing—

"(I) the product obtained by multiplying the number of acres required to be withdrawn from the production of upland cotton times the number of acres actually planted to such commodity, by

"(II) the number of acres authorized to be planted to such commodity under the limitation established by the Secretary,

shall be devoted to conservation uses, in accordance with regulations issued by the Secretary. Such regulations shall assure protection of such acreage from weeds and wind and water erosion.

"(ii) The number of acres determined under clause (i) of this subparagraph is hereafter in this section referred to as 'reduced acreage'.

"(F) The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing, or the production of guar, sesame, safflower, sunflower, castor

beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(G) If an acreage limitation program is announced under this subsection for a crop of upland cotton, subsections (e), (f), and (g) of this section shall not be applicable to such crop, including any prior announcement which may have been made under such subsections with respect to such crop. The individual farm program acreage shall be the acreage planted on the farm to upland cotton for harvest within the permitted upland cotton acreage for the farm as established under this subsection.

"(2)(A) The Secretary may make land diversion payments to producers of upland cotton, whether or not an acreage limitation for upland cotton is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of upland cotton to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers.

"(B) The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted.

"(C) The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(3)(A) The reduced acreage and the diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(B) The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of subparagraph (A) of this paragraph.

"(C) The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(j)(1) An operator of a farm desiring to participate in the program conducted under subsection (i) of this section shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe.

"(2) The Secretary may, by mutual agreement with the producers on the farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(k) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(l) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(m)(1) If the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of loans and payments, the Secretary may, nevertheless, make such loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(2) The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(n) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(o) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(p) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to assignment of payments) shall apply to payments under this section.

"(q) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans or payments under this section.

"(r) In order to encourage and assist producers in the orderly ginning and marketing of their cotton production, the Secretary shall make recourse loans available to such producers on seed cotton in accordance with authority vested in the Secretary under the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.).".

SUSPENSION OF BASE ACREAGE ALLOTMENTS, MARKETING QUOTAS AND RELATED PROVISIONS

SEC. 402. Sections 342, 343, 344, 345, 346, and 377 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1342-1346 and 1377) shall not be applicable to upland cotton of the 1986 through 1989 crops.

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS

SEC. 403. Effective only with respect to the period beginning August 1, 1978, and ending July 31, 1990, the tenth sentence of section 407 of the Agricultural Act of 1949 (7 U.S.C. 1427) is amended by striking out all of that sentence through the words "110 per centum of the loan rate, and (2)" and inserting in lieu thereof the following: "Notwithstanding any other provision of law, (1) the Commodity Credit Corporation shall sell upland cotton for unrestricted use at the same prices as it sells cotton for export, in no event, however, at less than 115 per centum of the loan rate for Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) adjusted for such current market differentials reflecting grade, quality, location, and other value factors as the Secretary determines appropriate plus reasonable carrying charges, and (2)".

MISCELLANEOUS COTTON PROVISIONS

SEC. 404. Sections 103(a) and 203 of the Agricultural Act of 1949 (7 U.S.C. 1444(a) and 1446d) shall not be applicable to the 1986 through 1989 crops.

SKIPROW PRACTICES

SEC. 405. Section 374(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1374) is amended by striking out "1985" and inserting in lieu thereof "1989".

PRELIMINARY ALLOTMENTS FOR 1990 CROP OF UPLAND COTTON

SEC. 406. Notwithstanding any other provision of law, the permanent State, county, and farm base acreage allotments for the 1977 crop of upland cotton, adjusted for any underplantings in 1977 and reconstituted as provided in section 379 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1379) shall be the preliminary allotments for the 1990 crop.

TITLE V—RICE

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, RICE ACREAGE REDUCTION PROGRAM, AND LAND DIVERSION FOR THE 1986 THROUGH 1989 CROPS OF RICE

SEC. 501. Effective only for the 1986 through 1989 crops of rice, the Agricultural Act of 1949 is amended by inserting after section 101 (7 U.S.C. 1441) the following new section:

"SEC. 101A. Notwithstanding any other provision of law:

"(a)(1) Except as provided in paragraphs (2), (3), and (4), the Secretary shall make available to producers loans and purchases for each of the 1986 through 1989 crops of rice at such level as bears the same ratio to the loan level for the preceding year's crop as the established price for each such crop bears to the established price for the preceding year's crop.

"(2) The level of loans and purchases for a crop determined under paragraph (1) may not be less than the higher of—

"(A) 85 per centum of the simple average price received by farmers, as determined by the Secretary, during the immediately preceding five marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period; or

"(B) in the case of the 1986 and 1987 crops of rice, $8.14 per hundredweight.

"(3) The level of loans and purchases for a crop determined under paragraph (1) may not be reduced by more than 5 per centum from the level determined for the preceding crop.

"(4) A producer may repay a loan made under paragraph (1) for a crop at a level which is the lesser of—

"(A) the original loan rate established for such crop; or

"(B) such loan rate as the Secretary determines will minimize the number of loan forfeitures, will not result in excessive total stocks of rice, will reduce the costs incurred by the Federal Government in storing rice, and will maintain the competitiveness of rice in domestic and export markets.

"(5) The simple average price received by farmers for the immediately preceding marketing year shall be based on the latest information available to the Secretary at the time of the determination.

"(6) The loan and purchase level and the established price for each of the 1986 through 1989 crops of rice shall be announced not later than March 1 of each calendar year for the crop harvested in that calendar year.

51-059 O-86-9 (Pt. 6)

"(b)(1) The Secretary shall make available to producers payments for each of the 1986 through 1989 crops of rice grown in the several States of the United States in an amount computed as provided in this subsection. Payments for each such crop of rice shall be computed by multiplying (A) the payment rate, by (B) the farm program acreage for the crop, by (C) the yield established for the farm. In no event shall payments be made under this subsection for any crop on a greater acreage than the acreage actually planted to rice.

"(2) The payment rate for rice shall be the amount by which the established price for the crop of rice exceeds the higher of—

"(A) the national average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(B) the loan level determined under subsection (a) of this section for such crop.

"(3)(A) The established price for a crop of rice shall not be less than the higher of—

"(i) 130 per centum of the loan level determined under subsection (a) for such crop; or

"(ii) in the case of the 1986 and 1987 crops of rice, $11.90 per hundredweight.

"(B) The established price for a crop of rice may not be reduced by more than 5 per centum from the established price for the preceding crop.

"(C) Any such established price may be adjusted by the Secretary as the Secretary determines to be appropriate to reflect any change in—

"(i) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made, from

"(ii) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made.

"(D) The adjusted cost of production for each of such years may be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and may include variable costs, machinery ownership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop.

"(4) The yield established for the farm for any year shall be determined on the basis of the actual yields per harvested acre for the three preceding years. The actual yields shall be adjusted by the Secretary for abnormal yields in any year caused by drought, flood, other natural disaster, or other condition beyond the control of the producers. If no rice was produced on the farm during such period, the yield shall be determined taking into consideration the yield of comparable farms in the surrounding area and such other factors as the Secretary determines will produce a fair and equitable yield.

"(5) The total quantity of rice on which payments would otherwise be payable to a producer on a farm for any crop under this subsection shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under subsection (c) of this section.

"(c)(1) Except as provided in paragraph (3) of this subsection, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for rice to rice or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to rice for harvest (including any acreage which the producers were prevented from planting to rice or other nonconserving crop in lieu of rice because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the yield established for the farm times a payment rate equal to 33⅓ per centum of the established price for the crop.

"(2) Except as provided in paragraph (3) of this subsection, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of rice which the producers are able to harvest on any farm is less than the result of multiplying 75 per centum of the yield established for the farm for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to producers at a rate equal to 33⅓ per centum of the established price for the crop for the deficiency in production below 75 per centum for the crop.

"(3) Producers on a farm shall not be eligible for disaster payments under this subsection if crop insurance is available to them under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) with respect to their rice acreage.

"(4)(A) Notwithstanding the provisions of paragraph (3) of this subsection, the Secretary may make disaster payments to producers on a farm under this subsection whenever the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting rice or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

"(B) The Secretary may make such adjustments in the amount of payments made available under this paragraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(d)(1)(A) The Secretary shall proclaim a national program acreage for each of the 1986 through 1989 crops of rice. The proclamation shall be made not later than January 31 of each calendar year for the crop harvested in that calendar year.

"(B) The Secretary may revise the national program acreage first proclaimed for any crop year for the purpose of determining the allocation factor under paragraph (2) of this subsection if the Secretary determines a revision is necessary based on the latest information. The Secretary shall proclaim such revised national program acreage as soon as it is made.

"(C) The national program acreage for rice shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm established yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop.

"(D) If the Secretary determines that carryover stocks of rice are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of rice. The allocation factor for rice shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop. In no event may the allocation factor for any crop of rice be more than 100 per centum nor less than 80 per centum.

"(3)(A) The individual farm program acreage for each crop of rice shall be determined by multiplying the allocation factor by the acreage of rice planted for harvest on the farms for which individual farm program acreages are required to be determined.

"(B) The farm program acreage may not be further reduced by application of the allocation factor if the producers reduce the acreage of rice planted for harvest on the farm from the acreage base established for the farm under subsection (e)(1) of this section by at least the percentage recommended by the Secretary in the proclamation of the national program acreage.

"(C) The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of rice planted for harvest is less than the acreage base established for the farm under subsection (e)(1) of this section, but for which the reduction is insufficient to exempt the farm from the application of the allocation factor.

"(D) In establishing the allocation factor for rice, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this subsection.

"(e)(1)(A) Notwithstanding any other provision of law, the Secretary may establish a limitation on the acreage planted to rice if the Secretary determines that the total supply of rice, in the absence of such limitation, would be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency.

"(B) Any such limitation shall be announced by the Secretary not later than January 31 of the calendar year in which the crop for which the announcement is made is harvested.

"(C) Such limitation shall be achieved by applying a uniform percentage reduction to the acreage base for each rice-producing farm.

"(D) Producers who knowingly produce rice in excess of the permitted rice acreage for the farm shall be ineligible for rice loans, purchases, and payments with respect to that farm.

"(E)(i) The acreage base for any farm for the purpose of determining any reduction required to be made for any year as the

result of a limitation under this paragraph shall be—

"(I) the acreage planted on the farm to rice for harvest in the crop year immediately preceding the year for which the determination is made, or

"(II) at the discretion of the Secretary, the average acreage planted to rice for harvest in the two crop years immediately preceding the year for which the determination is made.

"(ii) For the purpose of clause (i) of this subparagraph, acreage planted to rice for harvest shall include any acreage which the producers were prevented from planting to rice or other nonconserving crop in lieu of rice because of drought, flood, or other natural disaster, or other condition beyond the control of the producers.

"(iii) The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base.

"(F)(i) A number of acres on the farm determined by dividing—

"(I) the product obtained by multiplying the number of acres required to be withdrawn from the production of rice times the number of acres actually planted to rice, by

"(II) the number of acres authorized to be planted to rice under the limitation established by the Secretary,

shall be devoted to conservation uses, in accordance with regulations issued by the Secretary. Such regulations shall assure protection of such acreage from weeds and wind and water erosion.

"(ii) The number of acres determined under clause (i) of this subparagraph is hereafter in this section referred to as 'reduced acreage'.

"(G) The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(H) If an acreage limitation program is announced under this subsection for a crop of rice, subsection (d) of this section shall not be applicable to such crop, including any prior announcement which may have been made under such subsection with respect to such crop. The individual farm program acreage shall be the acreage planted on the farm to rice for harvest within the permitted rice acreage for the farm as established under this subsection.

"(2)(A) The Secretary may make land diversion payments to producers of rice, whether or not an acreage limitation for rice is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of rice to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers.

"(B) The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted.

"(C) The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(3)(A) The reduced acreage and the additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(B) The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of subparagraph (A) of this paragraph.

"(C) The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(4)(A) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe.

"(B) The Secretary may, by mutual agreement with the producers on the farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(f) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(g) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(h)(1) If the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(2) The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(i) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(j) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(k) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to assignment of payments) shall apply to payments under this section.

"(l) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this section.".

TITLE VI—PEANUTS

NATIONAL POUNDAGE QUOTA AND FARM POUNDAGE QUOTA

SEC. 601. Effective only for the 1986 through 1989 crops of peanuts, subsections (k) through (p) of section 358 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1358(k)-(p)) are amended to read as follows:

"(k) The national poundage quota for peanuts for each of the 1986 through 1989 marketing years shall be 1,100,000 tons.

"(l)(1) The national poundage quota established under subsection (k) of this section shall be apportioned among the States so that the poundage quota allocated to each State shall be equal to the percentage of the national poundage quota allocated to farms in the State for 1985.

"(2)(A) Notwithstanding any other provision of this section, the reduction in the poundage quota allocated to any State for any marketing year below the poundage quota allocated to such State for the immediately preceding marketing year (which poundage quota, for the 1981 marketing year, shall be deemed to be the total of the farm poundage quotas allocated to farms in the State for such marketing year) shall, insofar as practicable and on such fair and equitable basis as the Secretary may by regulation prescribe, be accomplished by reducing the farm poundage quota for each farm in the State to the extent that the farm poundage quota has not been produced on such farm.

"(B) For purposes of subparagraph (A) of this paragraph, the farm poundage quota shall be considered as not having been produced on a farm to the extent that—

"(i) during any crop year immediately preceding the crop year for which the adjustment is being made, such quota was not actually produced on the farm because there was inadequate tillable cropland available on the farm to produce such quota; or

"(ii) during any two of the three crop years immediately preceding the crop year for which the adjustment is made,

"(I) such quota was not actually produced for any other reason (other than natural disasters or such other reasons as the Secretary may prescribe), or

"(II) such quota was produced but by another operator on a farm to which the poundage quota (or the acreage allotment upon which such poundage quota was based) was transferred by lease.

"(C) To achieve the reduction in the State poundage quota in any marketing year, the reductions in farm poundage quotas shall be made first under subparagraph (B)(i) and, if necessary, under subparagraph (B)(ii)(I) and then subparagraph (B)(ii)(II) thereof.

"(3) If application of the provisions of paragraph (2) of this subsection results in a total reduction of farm poundage quotas that exceeds the reduction in the State poundage quota for the marketing year, the reductions in the farm poundage quotas shall be adjusted upward by the Secretary so that the total reduction of farm poundage quotas equals the reduction in the State poundage quota.

"(4) If application of the provisions of paragraph (2) of this subsection results in a

total reduction of farm poundage quotas that is less than the reduction in the State poundage quota for the marketing year, the balance of the reduction in the State poundage quota shall be accomplished by such further reduction in farm poundage quotas for farms in the State as the Secretary determines to be fair and equitable.

"(m)(1)(A) A farm poundage quota shall be established for each farm which had a farm poundage quota for the 1985 crop year.

"(B) The farm poundage quota for any such farm for the 1986 through 1989 marketing years shall be the same as the farm poundage quota for such farm for the immediately preceding marketing year, as adjusted under subsection (l) of this section, but not including any increases for undermarketings from previous marketing years, except that if the farm poundage quota, or any part thereof, is permanently transferred in accordance with section 358a of this Act, the receiving farm shall be considered as possessing the farm poundage quota (or portion thereof) of the transferring farm for all subsequent marketing years.

"(2)(A) The farm poundage quota so determined shall be increased by the number of pounds by which total marketings of quota peanuts from the farm during previous marketing years (excluding any marketing year before the marketing year for the 1980 crop) were less than the total amount of the applicable farm poundage quotas (disregarding adjustments for undermarketings from prior marketing years) for such marketing years.

"(B) Increases in farm poundage quotas made under this paragraph may not be counted against the national poundage quota for the marketing year involved.

"(3) Notwithstanding the foregoing provisions of this subsection, if the total of all increases in individual farm poundage quotas under paragraph (2) of this subsection exceeds 10 per centum of the national poundage quota for the marketing year in which such increases shall be applicable, the Secretary shall adjust such increases so that the total of all such increases does not exceed 10 per centum of the national poundage quota.

"(n)(1) For each farm for which a farm poundage quota was established for the 1985 crop of peanuts, and when necessary for purposes of this Act, a farm yield of peanuts shall be determined for each farm.

"(2) Such yield shall be equal to the average of the actual yield per acre on the farm for each of the three crop years in which yields were highest on the farm out of the five crop years 1977 through 1981.

"(3) In the event that peanuts were not produced on the farm in at least three years during such five-year period or there was a substantial change in the operation of the farm during such period (including, but not limited to, a change in operator, lessee who is an operator, or irrigation practices), the Secretary shall have a yield appraised for the farm. The appraised yield shall be that amount determined to be fair and reasonable on the basis of yields established for similar farms which are located in the area of the farm and on which peanuts were produced, taking into consideration land, labor, and equipment available for the production of peanuts, crop rotation practices, soil and water, and other relevant factors.

"(o)(1) Not later than December 15 of each calendar year (or in the case of the 1986 crop, as soon as practicable after enactment of the Farm and Market Recovery Act of 1985), the Secretary shall conduct a referendum of farmers engaged in the production of quota peanuts in the calendar year in which the referendum is held to determine whether such farmers are in favor of or opposed to poundage quotas with respect to the crops of peanuts produced in the four calendar years immediately following the year in which the referendum is held, except that, if as many as two-thirds of the farmers voting in any referendum vote in favor of poundage quotas, no referendum shall be held with respect to quotas for the second, third, and fourth years of the period.

"(2) The Secretary shall proclaim the result of the referendum within thirty days after the date on which it is held.

"(3) If more than one-third of the farmers voting in the referendum vote against quotas, the Secretary also shall proclaim that poundage quotas will not be in effect with respect to the crop of peanuts produced in the calendar year immediately following the calendar year in which the referendum is held.

"(p) For the purposes of this part and title I of the Agricultural Act of 1949 (7 U.S.C. 1441 et seq.):

"(1) The term 'quota peanuts' means, for any marketing year, any peanuts produced on a farm having a farm poundage quota, as determined in subsection (m) of this section—

"(A) that are eligible for domestic edible use as determined by the Secretary,

"(B) that are marketed or considered marketed from a farm, and

"(C) that do not exceed the farm poundage quota of such farm for such year.

"(2) The term 'additional peanuts' means, for any marketing year—

"(A) any peanuts that are marketed from a farm for which a farm poundage quota has been established and that are in excess of the marketings of quota peanuts from such farm for such year, and

"(B) all peanuts marketed from a farm for which no farm poundage quota has been established in accordance with subsection (m) of this section.

"(3) The term 'crushing' means—

"(A) the processing of peanuts to extract oil for food uses and meal for feed uses, or

"(B) the processing of peanuts by crushing or processing into flakes or otherwise when authorized by the Secretary.

"(4) The term 'domestic edible use' means use for milling to produce domestic food peanuts (other than those described in paragraph (3) of this subsection) and seed and use on a farm, except that the Secretary may exempt from this definition seeds of peanuts that are used to produce peanuts excluded under section 359(c) of this Act, are unique strains, and are not commercially available.".

SALE, LEASE, OR TRANSFER OF FARM POUNDAGE QUOTA

SEC. 602. Effective only for the 1986 through 1989 crops of peanuts, subsections (i) and (j) of section 358a of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1358a (i) and (j)) are amended to read as follows:

"(i)(1) The owner, or the operator with permission of the owner, of any farm for which a farm poundage quota has been established under this Act may, subject to such terms, conditions, or limitations as the Secretary may prescribe, sell or lease all or any part of such poundage quota to any other owner or operator of a farm within the same county for transfer to such farm.

"(2) The owner or operator of a farm may transfer all or any part of such farm's farm poundage quota to any other farm owned or controlled by such owner or operator that is in the same county or in a county contiguous to such county in the same State and that had a farm poundage quota for the 1985 crop.

"(3) Notwithstanding the foregoing provisions of this subsection, in the case of any State for which the poundage quota allocated to the State was less than 10,000 tons for the 1985 crop, all or any part of a farm poundage quota may be transferred by sale or lease or otherwise from a farm in one county to a farm in another county in the same State.

"(j) Transfers (including transfer by sale or lease) of farm poundage quotas under this section shall be subject to the following conditions:

"(1) No transfer of the farm poundage quota from a farm subject to a mortgage or other lien shall be permitted unless the transfer is agreed to by the lienholders.

"(2) No transfer of the farm poundage quota shall be permitted if the county committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) determines that the receiving farm does not have adequate tillable cropland to produce the farm poundage quota.

"(3) No transfer of the farm poundage quota shall be effective until a record thereof is filed with the county committee of the county to which such transfer is made and such committee determines that the transfer complies with the provisions of this section.

"(4) Such other terms and conditions that the Secretary may by regulation prescribe.".

MARKETING PENALTIES; DISPOSITION OF ADDITIONAL PEANUTS

SEC. 603. Effective only for the 1986 through 1989 crops of peanuts, subsections (f) through (l) of section 359 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1359(f)-(l)) are amended to read as follows:

"(f)(1)(A) The marketing of any peanuts for domestic edible use in excess of the farm poundage quota for the farm on which such peanuts are produced shall be subject to penalty at a rate equal to 140 per centum of the support price for quota peanuts for the marketing year in which such marketing occurs.

"(B) For purposes of this section, the marketing year for peanuts shall be the twelve-month period beginning on August 1 and ending on July 31.

"(C) The marketing of any additional peanuts from a farm shall be subject to the same penalty unless such peanuts, in accordance with regulations established by the Secretary, are either—

"(i) placed under loan at the additional loan rate in effect for such peanuts under section 108B of the Agricultural Act of 1949 and not redeemed by the producers,

"(ii) marketed through an area marketing association designated pursuant to section 108B(c)(1) of the Agricultural Act of 1949, or

"(iii) marketed under contracts between handlers and producers, pursuant to the provisions of subsection (j) of this section.

"(D)(i) Such penalty shall be paid—

"(I) by the person who buys or otherwise acquires the peanuts from the producer, or

"(II) if the peanuts are marketed by the producer through an agent, by such agent.

"(ii) If a person or agent is required to pay a penalty under clause (i) of this subparagraph, such person or agent may deduct an amount equivalent to the penalty from the price paid to the producer.

"(E) If the person required to collect the penalty fails to collect such penalty, such person and all persons entitled to share in the peanuts marketed from the farm or the proceeds thereof shall be jointly and severally liable for the amount of the penalty.

"(F) Peanuts produced in a calendar year in which farm poundage quotas are in effect for the marketing year beginning therein shall be subject to such quotas even though the peanuts are marketed prior to the date on which such marketing year begins.

"(G) If any producer falsely identifies or fails to certify planted acres or fails to account for the disposition of any peanuts produced on such planted acres, an amount of peanuts equal to the farm's average yield, as determined under section 358(n) of this Act, times the planted acres, shall be deemed to have been marketed in violation of permissible uses of quota and additional peanuts. The penalty in respect thereof shall be paid and remitted by the producer.

"(2)(A) The Secretary shall authorize, under such regulations as the Secretary shall prescribe, the county committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) to waive or reduce marketing penalties provided for under this subsection in cases in which such committees determine that the violations that were the basis of the penalties were unintentional or without knowledge on the part of the parties concerned.

"(B) Errors in weight that do not exceed one-tenth of 1 per centum in the case of any one marketing document may not be considered marketing violations except in cases of fraud or conspiracy.

"(g)(1) Only quota peanuts may be retained for use as seed or for other uses on a farm.

"(2) Peanuts retained under paragraph (1) shall be considered as marketings of quota peanuts, except that the Secretary may exempt from consideration as marketings of quota peanuts seeds of peanuts that are used to produce peanuts excluded under section 359(c) of this Act, are unique strains, and are not commercially available.

"(3) Additional peanuts may not be retained for use on a farm and may not be marketed for domestic edible use, except as provided in subsection (k) of this section.

"(4) Seed for planting of any peanut acreage in the United States shall be obtained solely from quota peanuts marketed or considered marketed for domestic edible use.

"(h) On a finding by the Secretary that the peanuts marketed from any crop for domestic edible use by a handler are larger in quantity or higher in grade or quality than the peanuts that could reasonably be produced from the quantity of peanuts having the grade, kernel content, and quality of the quota peanuts acquired by such handler from such crop for such marketing, such handler shall be subject to a penalty equal to 120 per centum of the loan level for quota peanuts on the quantity of peanuts that the Secretary determines are in excess of the quantity, grade, or quality of the peanuts that could reasonably have been produced from the peanuts so acquired.

"(i)(1) The Secretary shall require that the handling and disposal of additional peanuts be supervised by agents of the Secretary or by area marketing associations designated pursuant to section 108B(c)(1) of the Agricultural Act of 1949.

"(2) Quota and additional peanuts of like type and segregation or quality may, under regulations prescribed by the Secretary, be commingled and exchanged on a dollar value basis to facilitate warehousing, handling, and marketing.

"(3) Failure by a handler to comply with regulations issued by the Secretary governing the disposition and handling of additional peanuts shall subject the handler to a penalty at a rate equal to 120 per centum of the loan level for quota peanuts on the quantity of peanuts involved in the violation.

"(j) Handlers may, under regulations prescribed by the Secretary, contract with producers for the purchase of additional peanuts for crushing, export, or both. All such contracts shall be completed and submitted to the Secretary (or if designated by the Secretary, the area marketing association) for approval prior to June 15 of the year in which the crop is produced.

"(k)(1) Subject to the provisions of section 407 of the Agricultural Act of 1949 (7 U.S.C. 1427), any peanuts owned or controlled by the Commodity Credit Corporation may be made available for domestic edible use in accordance with regulations established by the Secretary.

"(2) Additional peanuts received under loan shall be offered for sale for domestic edible use at prices not less than those required to cover all costs incurred with respect to such peanuts for such items as inspection, warehousing, shrinkage, and other expenses, plus—

"(A) not less than 100 per centum of the loan value of quota peanuts if the additional peanuts are sold and paid for during the harvest season on delivery by and with the written consent of the producer,

"(B) not less than 105 per centum of the loan value of quota peanuts if the additional peanuts are sold after delivery by the producer by not later than December 31 of the marketing year, or

"(C) not less than 107 per centum of the loan value of quota peanuts if the additional peanuts are sold later than December 31 of the marketing year.

"(3) For the period from the date additional peanuts are delivered for loan to March 1 of the calendar year following the year in which such additional peanuts were harvested, the area marketing association designated pursuant to section 108B(c)(1) of the Agricultural Act of 1949 shall have sole authority to accept or reject lot list bids when the sales price as determined under this section equals or exceeds the minimum price at which the Commodity Credit Corporation may sell its stocks of additional peanuts, except that the area marketing association and the Commodity Credit Corporation may agree to modify the authority granted by this paragraph in order to facilitate the orderly marketing of additional peanuts.

"(l)(1) The person liable for payment or collection of any penalty provided for in this section shall be liable also for interest thereon at a rate per annum equal to the rate of interest which was charged the Commodity Credit Corporation by the Treasury of the United States on the date such penalty became due.

"(2) The provisions of this section shall not apply to peanuts produced on any farm on which the acreage harvested for nuts is one acre or less if the producers who share in the peanuts produced on such farm do not share in the peanuts produced on any other farm.

"(3) Until the amount of the penalty provided by this section is paid, a lien on the crop of peanuts with respect to which such penalty is incurred, and on any subsequent crop of peanuts subject to farm poundage quotas in which the person liable for payment of the penalty has an interest, shall be in effect in favor of the United States.

"(4)(A) Notwithstanding any other provision of law, the liability for and the amount of any penalty assessed under this section shall be determined in accordance with such procedures as the Secretary by regulations may prescribe.

"(B) The facts constituting the basis for determining the liability for or amount of any penalty assessed under this section, when officially determined in conformity with the applicable regulations prescribed by the Secretary, shall be final and conclusive and may not be reviewable by any other officer or agency of the Government.

"(C) Nothing in this section shall be construed as prohibiting any court of competent jurisdiction from reviewing any determination made by the Secretary with respect to whether such determination was made in conformity with the applicable law and regulations.

"(D) All penalties imposed under this section shall for all purposes be considered civil penalties.

"(5) Notwithstanding any other provision of law, the Secretary may reduce the amount of any penalty assessed against handlers under this section if the Secretary finds that—

"(A) the violation on which the penalty is based was minor or inadvertent, and

"(B) the reduction of the penalty will not impair the operation of the peanut program.".

PRICE SUPPORT PROGRAM

SEC. 604. Effective only for the 1986 through 1989 crops of peanuts, the Agricultural Act of 1949 is amended by adding after section 108A (7 U.S.C. 1445c-1)) the following new section:

"SEC. 108B. Notwithstanding any other provision of law:

"(a)(1) The Secretary shall make price support available to producers through loans, purchases, or other operations on quota peanuts for each of the 1986 through 1989 crops.

"(2) The national average quota support rate for each of the 1986 through 1989 crops of quota peanuts shall be the national average quota support rate for such peanuts for the preceding crop, adjusted to reflect any increase, during the period beginning on January 1 and ending on December 31 of the calendar year immediately preceding the marketing year for the crop for which a level of support is being determined, in the national average cost of peanut production, excluding any increase in the cost of land, except that in no event shall the national average quota support rate for any such crop exceed by more than 6 per centum the national average quota support rate for the preceding crop.

"(3) The levels of support so announced may not be reduced by any deductions for inspection, handling, or storage, except that the Secretary may make adjustments for the location of peanuts and such other factors as are authorized by section 403 of this Act.

"(b)(1) The Secretary shall make price support available to producers through

loans, purchases, or other operations on additional peanuts for each of the 1986 through 1989 crops at such levels as the Secretary finds appropriate, taking into consideration the demand for peanut oil and peanut meal, expected prices of other vegetable oils and protein meals, and the demand for peanuts in foreign markets. The Secretary shall set the support rate on additional peanuts at a level estimated by the Secretary to ensure that there are no losses to the Commodity Credit Corporation on the sale or disposal of such peanuts.

"(2) The Secretary shall announce the level of support for additional peanuts of each crop not later than February 15 preceding the marketing year for the crop for which the level of support is being determined.

"(c)(1)(A) In carrying out subsections (a) and (b) of this section, the Secretary shall make warehouse storage loans available in each of the three producing areas (described in section 1446.11 of title 7, Code of Federal Regulations (1984 ed.)) to a designated area marketing association of peanut producers that is selected and approved by the Secretary and that is operated primarily for the purpose of conducting such loan activities.

"(B) The Secretary may not make warehouse storage loans available to any cooperative that is engaged in operations or activities concerning peanuts other than those operations and activities specified in this section and in section 359 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1359).

"(C) Such area marketing associations shall be used in administrative and supervisory activities relating to price support and marketing activities under this section and section 359 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1359).

"(D) Loans made under this paragraph shall include, in addition to the price support value of the peanuts, such costs as the area marketing association reasonably may incur in carrying out its responsibilities, operations, and activities under this section and section 359 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1359).

"(2)(A) The Secretary shall require that each area marketing association establish pools and maintain complete and accurate records by type, area, and segregation for—

"(i) quota peanuts handled under loan,

"(ii) additional peanuts placed under loan, and

"(iii) additional peanuts produced without a contract between a handler and a producer as described in section 359(j) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1359(j)).

"(B) Net gains on peanuts in each pool, unless otherwise approved by the Secretary, shall be distributed in proportion to the value of the peanuts placed in the pool by each producer.

"(C) Net gains for peanuts in each pool shall consist of—

"(i) for quota peanuts—

"(I) the net gains over and above the loan indebtedness and other costs or losses incurred on peanuts placed in such pool, plus

"(II) an amount from the pool for additional peanuts to the extent of the net gains from the sale for domestic food and related uses of additional peanuts in the pool for additional peanuts equal to any loss on disposition of all peanuts in the pool for quota peanuts, and

"(ii) for additional peanuts—

"(I) the net gains over and above the loan indebtedness and other costs or losses incurred on peanuts placed in the pool for additional peanuts, less

"(II) any amount allocated to offset any loss on the pool for quota peanuts as provided in clause (i) of this subparagraph.

"(D) Notwithstanding any other provision of this section, any distribution of net gains on additional peanuts of any type to any producer shall be reduced to the extent of any loss by the Commodity Credit Corporation on quota peanuts of a different type placed under loan by such producer.

"(d) Notwithstanding the foregoing provisions of this section or any other provision of law, no price support shall be made available by the Secretary for any crop of peanuts with respect to which poundage quotas have been disapproved by producers, as provided for in section 358(o) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1358(o)).".

REPORTS AND RECORDS

SEC. 605. Effective only for the 1986 through 1989 crops of peanuts, the first sentence of section 373(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1373(a)) is amended by inserting immediately before "all brokers and dealers in peanuts" the following: "all farmers engaged in the production of peanuts,".

SUSPENSION OF MARKETING QUOTAS AND ACREAGE ALLOTMENTS

SEC. 606. The following provisions of the Agricultural Adjustment Act of 1938 shall not be applicable to the 1986 through 1989 crops of peanuts:

(1) Subsections (a) through (j) of section 358 (7 U.S.C. 1358(a)-(j));

(2) Subsections (a) through (h) of section 358a (7 U.S.C. 1358a(a)-(h));

(3) Subsections (a), (b), (d), and (e) of section 359 (7 U.S.C. 1359(a), (b), (d), and (e));

(4) Part I of subtitle C of title III (7 U.S.C. 1361 et seq.); and

(5) Section 371 (7 U.S.C. 1371).

SUSPENSION OF CERTAIN PRICE SUPPORT PROVISIONS

SEC. 607. Section 101 of the Agricultural Act of 1949 (7 U.S.C. 1441) shall not be applicable to the 1986 through 1989 crops of peanuts.

TITLE VII—SOYBEANS

SOYBEAN PRICE SUPPORT

SEC. 701. Effective only for the 1986 through 1989 crops of soybeans, section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended—

(1) by inserting "soybeans," after "tung nuts," in the first sentence; and

(2) by adding at the end thereof the following new subsection:

"(i)(1) The price of soybeans shall be supported through loans and purchases during each of the four marketing years beginning with the 1986 marketing year at a level equal to 75 per centum of the simple average price received by farmers for soybeans for each of the preceding five marketing years, excluding the high and low valued years, except that in no event shall the Secretary establish a support price of less than $5.02 per bushel.

"(2) If the Secretary determines that the average price of soybeans received by producers in any marketing year is not more than 105 per centum of the level of loans and purchases for soybeans for such marketing year, the Secretary may reduce the level of loans and purchases for soybeans for the next marketing year by the amount the Secretary determines necessary to maintain domestic and export markets for soybeans, except that the level of loans and purchases shall not be reduced by more than 10 per centum in any year nor below $4.50 per bushel.

"(3) A producer may repay a loan made under this subsection for a crop at a level which is the lesser of—

"(A) the original loan rate established for such crop; or

"(B) such loan rate as the Secretary determines will minimize the number of loan forfeitures, will not result in excessive total stocks of soybeans, will reduce the costs incurred by the Federal Government in storing soybeans, and will maintain the competitiveness of soybeans in domestic and export markets.

"(4) For the purposes of this subsection, the soybean marketing year shall be the twelve-month period beginning on September 1 and ending on August 31.

"(5)(A) The Secretary shall make a preliminary announcement of the level of price support not earlier than thirty days in advance of the beginning of the marketing year based on the latest information and statistics available when such level of support is announced.

"(B) The Secretary shall make a final announcement of such level as soon as full information and statistics are available on prices for the five years preceding the beginning of the marketing year. Such final level of support may not be announced later than October 1 of the marketing year for which the announcement applies. The final level of support may not be less than the level of support set forth in the preliminary announcement.

"(6) Notwithstanding any other provision of law:

"(A) The Secretary may not require participation in any production adjustment control program for soybeans or any other commodity as a condition of eligibility for price support for soybeans.

"(B) Soybeans may not be considered an eligible commodity for any reserve program.

"(C) The Secretary may not authorize payments to producers to cover the cost of storing soybeans.".

TITLE VIII—SUGAR

SUGAR PRICE SUPPORT

SEC. 801. Effective only for the 1986 through 1989 crops of sugar beets and sugarcane, section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) (as amended by section 701 of this Act) is further amended—

(1) by striking out "honey, and milk" in the first sentence and inserting in lieu thereof "honey, milk, sugar beets, and sugarcane"; and

(2) by adding at the end thereof the following new subsection:

"(j)(1) The price of each of the 1986 through 1989 crops of sugar beets and sugarcane, respectively, shall be supported in accordance with this subsection.

"(2) The Secretary shall support the price of domestically grown sugarcane through nonrecourse loans at such level as the Secretary determines appropriate but not less than 18 cents per pound for raw cane sugar.

"(3) The Secretary shall support the price of domestically grown sugar beets through nonrecourse loans at such level as the Secretary determines to be fair and reasonable in relation to the level of loans for sugarcane.

"(4) The Secretary shall announce the loan rate to be applicable during any fiscal year as far in advance of the beginning of that fiscal year as is practicable consistent with the purposes of this subsection.

"(5) Loans under this subsection during any fiscal year shall be made available not

earlier than the beginning of such fiscal year and shall mature before the end of such fiscal year.".

TITLE IX—HONEY

HONEY PRICE SUPPORT

SEC. 901. Effective only for the 1986 through 1989 crops of honey, subsection (b) of section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446(b)) is amended to read as follows:

"(b)(1) Except as provided in paragraphs (2), (3), and (4), the Secretary shall make available to producers loans and purchases for each of the 1986 through 1989 crops of honey at a level determined by the Secretary.

"(2) The level of loans and purchases for a crop determined under paragraph (1) may not be less than the higher of—

"(A) 85 per centum of the simple average price received by farmers, as determined by the Secretary, during the immediately preceding five marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period; or

"(B) in the case of the 1986 and 1987 crops of honey, the level of loans and purchases determined for the 1985 crop of honey.

"(3) The level of loans and purchases for a crop determined under paragraph (1) may not be reduced by more than 5 per centum from the level determined for the preceding crop.

"(4) A producer may repay a loan made under paragraph (1) for a crop at a level which is the lesser of—

"(A) the original loan rate established for such crop; or

"(B) such loan rate as the Secretary determines will minimize the number of loan forfeitures, will not result in excessive total stocks of honey, will reduce the costs incurred by the Federal Government in storing honey, and will maintain the competitiveness of honey in domestic and export markets.

"(5) The simple average price received by farmers for the immediately preceding marketing year shall be based on the latest information available to the Secretary at the time of the determination.".

TITLE X—MISCELLANEOUS COMMODITY PROVISIONS

PAYMENT LIMITATIONS

SEC. 1001. Notwithstanding any other provision of law:

(1) For each of the 1986 through 1989 crops, the total amount of payments (excluding disaster payments) that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) for wheat, feed grains, upland cotton, extra long staple cotton, and rice may not exceed $50,000.

(2) For each of the 1986 through 1989 crops, the total amount of disaster payments that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 for wheat, feed grains, upland cotton, and rice may not exceed $100,000.

(3) As used in this section, the term "payments" does not include—

(A) loans or purchases;

(B) any gain realized by a producer from repaying a loan at the lesser of the original loan rate or a loan rate determined by the Secretary of Agriculture; or

(C) any part of any payment that is determined by the Secretary of Agriculture to represent compensation for resource adjustment (excluding land diversion payments and payment-in-kind acreage diversion payments) or public access for recreation.

(4) If the Secretary determines that the total amount of payments that will be earned by any person under the program in effect for any crop will be reduced under this section, any acreage requirement established under a set-aside or acreage limitation program for the farm or farms on which such person will be sharing in payments earned under such program shall be adjusted to such extent and in such manner as the Secretary determines will be fair and reasonable in relation to the amount of the payment reduction.

(5)(A) The Secretary shall issue regulations defining the term "person" and prescribing such rules as the Secretary determines necessary to assure a fair and reasonable application of such limitation.

(B) The provisions of this section that limit payments to any person shall not be applicable to lands owned by States, political subdivisions, or agencies thereof, so long as such lands are farmed primarily in the direct furtherance of a public function, as determined by the Secretary.

(C) The rules for determining whether corporations and their stockholders may be considered as separate persons shall be in accordance with the regulations issued by the Secretary on December 18, 1970, under section 101 of the Agricultural Act of 1970 (7 U.S.C. 1307).

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS

SEC. 1002. Effective only for the marketing years for the 1986 through 1989 crops, section 407 of the Agricultural Act of 1949 (7 U.S.C. 1427) is amended—

(1) in the third sentence, by striking out the language following the third colon and inserting in lieu thereof the following: "*Provided*, That, notwithstanding any other provision of law, the Corporation may not sell any of its stocks of wheat, corn, grain sorghum, barley, oats, and rye, respectively, at less than 115 per centum of the current national average loan rate for the commodity, adjusted for such current market differentials reflecting grade, quality, location, and other value factors as the Secretary determines appropriate plus reasonable carrying charges.";

(2) in the fifth sentence, by striking out "current basic county support rate including the value of any applicable price-support payment in kind (or a comparable price if there is no current basic county support rate)" and inserting in lieu thereof the following: "current basic county loan rate (or a comparable price if there is no current basic county loan rate)"; and

(3) in the seventh sentence, by striking out ", but in no event shall the purchase price exceed the then current support price for such commodities" and inserting in lieu thereof the following: "or unduly affecting market prices, but in no event shall the purchase price exceed the Corporation's minimum sales price for such commodities for unrestricted use".

APPLICATION OF TERMS IN THE AGRICULTURAL ACT OF 1949

SEC. 1003. Effective only for the 1986 through 1989 crops of wheat, feed grains, upland cotton, and rice, subsection (k) of section 408 of the Agricultural Act of 1949 (7 U.S.C. 1428(k)) is amended to read as follows:

"(k)(1) Reference made in sections 402, 403, 406, 407, and 416 of this Act to the terms 'support price', 'level of support', and 'level of price support' shall be considered to apply as well to the level of loans and purchases for wheat, feed grains, upland cotton, and rice under this Act.

"(2) References made to the terms 'price support', 'price support operations', and 'price support program' in such sections and in section 401(a) of this Act shall be considered as applying as well to loan and purchase operations for wheat, feed grains, upland cotton, and rice under this Act.".

NORMALLY PLANTED ACREAGE AND TARGET PRICES

SEC. 1004. Section 1001 of the Food and Agriculture Act of 1977 (7 U.S.C. 1309) is amended to read as follows:

"SEC. 1001. (a)(1) Notwithstanding any other provision of law, whenever a set-aside program is in effect for one or more of the 1986 through 1989 crops of wheat or feed grains, the Secretary of Agriculture may require, as a condition of eligibility for loans, purchases, and payments for such crops under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.), that producers not exceed the acreage on the farm normally planted to crops designated by the Secretary, adjusted as deemed necessary by the Secretary to be fair and equitable among producers and reduced by any set-aside or diverted acreage.

"(2) Such normal crop acreage for any crop year shall be determined as provided by the Secretary.

"(3) The Secretary may require producers participating in the program to keep such records as the Secretary determines necessary to assist in making such determination.".

"(b) Notwithstanding any other provision of law:

"(1) Whenever the Secretary, for one or more of the 1986 through 1989 crops of wheat and feed grains, requires that producers not exceed the acreage on the farm normally planted to crops designated by the Secretary in accordance with subsection (a) of this section, the Secretary may increase the established price payments for any such commodity by such amount (or if there are no such payments in effect for such crop by providing for payments in such amount) as the Secretary determines appropriate to compensate producers for not exceeding the acreage on the farm normally planted to crops designated by the Secretary and participation in any required set-aside with respect to such commodity.

"(2) In determining the amount of any payments for any commodity under this subsection, the Secretary shall take into account changes in the costs of production resulting from not exceeding the acreage on the farm normally planted to crops designated by the Secretary and participation in any required set-aside with respect to such commodity.

"(3) If payments are provided for any commodity under this subsection, the Secretary may provide for payments for any other commodity in such amount as the Secretary determines necessary for effective operation of the program.

"(4) The Secretary shall adjust any payments under this subsection to reflect, in whole or in part, any land diversion payments for the commodity for which an increase is determined.".

TITLE XI—EFFECTIVE DATE

EFFECTIVE DATE

SEC. 1101. Except as otherwise provided herein, this Act and the amendments made

by this Act shall become effective on the date of enactment of this Act.

Mr. COCHRAN. Mr. President, I urge my colleagues in the Senate to review this proposal and I hope it will gain the support of the Senate. I shall be sending around a letter to each Senator, giving each a copy of these remarks and inviting cosponsors for the bill.

I yield the floor, Mr. President.

S. J. Res. 102—THE NATIONAL COMMISSION ON ILLITERACY ACT

Mr. ZORINSKY. Mr. President, for years we have been warned about the implications of the illiteracy problem in this country. In 1963, President John F. Kennedy expressed his concern about the number of young men unqualified for military service because they could not read or do simple arithmetic. Many of them had received passing grades in grammar school, high school and—in a few instances—even in college. He said, "This situation must not be permitted to continue or its implications to go unattended. These figures are an indictment and an ominous warning."

Today, more than 20 years later, 26 million American adults cannot read or write at all, and up to 72 million cannot read or write above the fifth grade level. Other illiteracy rates, according to the National Institute of Education, are: 47 percent of 17-year-old minority youths; 60 percent of inmates in correctional institutions; 75 percent of unemployed persons; 56 percent of Hispanic Americans. And the numbers are growing. According to last year's report, "Books in Our Future," by the Librarian of Congress, adult illiterates are increasing by about 2.3 million each year.

Illiteracy is consuming more and more of our tax dollars for remedial courses in schools, colleges, government agencies, and even the Armed Forces. Additional tax dollars are spent to remedy the effects of illiteracy—crime, unemployment, and welfare.

Most government agencies have high-school level courses for their employees, at the taxpayers' expense, including reading, writing, grammar, and vocabulary. Last year the Army alone spent over $14 million to bring its recruits up to the ninth grade level in reading—and 90 percent of them were high school graduates. Expenditures for welfare and unemployment due to illiteracy are estimated at $6 billion annually. And, according to Barbara Bush, wife of the Vice President, it now costs $6.6 billion a year to keep 750,000 illiterates in jail.

The recent report, "Corporate Classrooms," by the Carnegie Foundation for the Advancement of Teaching noted that education and training by businesses has become a booming sector of American education as companies try to fill the gaps left by inadequate schools and colleges. It noted that the proliferation of remedial work in basic reading, writing and computation skills implies an indictment of the schools for graduating students who lack the fundamentals needed to perform well on almost any job. We are all directly affected by this need for remedial instruction in the business sector because it increases the prices we as consumers pay for goods and services.

Yet, in spite of the staggering amounts of money being invested in remediation, a recent report of the national adult literacy project, sponsored by the National Institute of Education, found that all public and private remediation programs reach only 2 to 4 percent of adults requiring these services.

How can we continue to take for granted a problem that drains such a large percentage of our resources with few appreciable results? Why must we spend so much money to remedy what the schools should be doing properly in the first place? And how can we ignore the human toll—the humiliation and suffering of persons who cannot do the simple things that most of us take for granted, like following written instructions, filling out a job application, or reading a map? How painful it must be to go through life with such a handicap.

Last year, we passed the Education for Economic Security Act at a cost of $100 million to improve the quality of mathematics and science instructions in the United States.

Yet last month, at a Reading Reform Foundation conference on illiteracy held in the Senate caucus room, Charles Richardson, an engineer speaking on behalf of the Sperry Corp. and the Long Island Forum for Technology, had this to say:

> Last year, at two conferences organized by the Institute of Electrical and Electronic Engineers and other technical societies, large scale studies were reported showing that U.S. elementary schools have trouble finding enough time for science instruction because of the time allotted for all the teaching of remedial reading skills. By contrast, fourth and fifth graders in Russia and Japan spend much more time on science and math and no time on reading skills. (That work was finished in the first two grades.) But—get this—studies among U.S. junior high school science teachers found that 87 percent of them cited as a deterrent factor to effective instruction "inadequate student reading abilities!" * * * Even with more remedial reading time than ever before, our kids still don't read well enough to handle science efficiently at the secondary level.
>
> Pondering the pattern of these symptoms, we can draw only two plausible inferences: either American schools are doing an inadequate job of teaching reading and language, or American kids are the stupidest in the world in language acquisition. Which of those alternatives will you buy? And for which condition is there a sensible solution available?

It does make one wonder how effective our $100 million investment will be.

Mr. President, I believe it is time to take a different approach to this problem. We need to find out how to prevent illiteracy—to discover why many students are not learning to read.

Illiteracy is not a disease that strikes in adolescence or in adulthood. The foundations for reading must be laid in the first years of school. This issue was not even addressed in "A Nation at Risk," since it did not cover elementary education.

In 1959, at a citywide PTA meeting in Washington, a school principal, Henry Rucker, expressed his belief that schools have contributed to juvenile delinquency by not teaching children to read. He said:

> Whenever some kid gets into trouble, I look in the file and pull out his record. Almost always, the poor kid is behind three or four years in reading. He can't read, he hates school, he hates books, and he doesn't care. He gets no good attention, so he does something and gets bad attention.

Twenty-five years later, these words are still relevant.

Last year the Senate Education Subcommittee held a hearing on similar legislation which I had proposed to address this issue. The testimony indicated that the most effective methods of teaching reading are not being widely used in our schools because the colleges of education are ignoring the research in this area. It was noted that many nonreaders are being given a label such as "learning disabled" when in fact they are instead victims of poor teaching methods. If this is indeed the case, I do not believe that the teachers should be blamed. Teachers do want their students to learn, but they only know what they themselves have been taught.

While it would be appropriate for the individual States to take action themselves, the report "The Nation Responds—Recent Effort To Improve Education," followup to "A Nation at Risk," makes it clear that on this particular issue they are not, in fact, doing so.

I am therefore introducing today, along with a number of my colleagues, legislation to establish a Commission to study the causes of illiteracy in the United States. I want to make it clear at the outset that the Commission would not create Federal policy with respect to reading instruction. What it would do is identify the problems and recommend solutions. The States would then have the benefit of this information to help them make informed decisions on improving the teaching of reading.

The Commission would be comprised of a broad cross section of individuals, including parents, representatives of

the education community, business and industry, the military, government, and minorities, to ensure an objective assessment. The members would serve without any remuneration, other than reimbursement for their actual expenses.

The need for an independent commission to look into the reading problem was stressed not only at last year's hearing, but as early as 1969 when the report of the National Academy of Education's blue-ribbon committee on reading stated that "an effective national reading effort should bypass the existing education macrostructure."

Mr. President, this is not another huge Federal program, but rather a relatively inexpensive effort which has the potential to result in savings of billions of dollars. After all these years of watching the literacy of the American people deteriorate, isn't it time that we face the problem squarely? Instead of spending billions of dollars on remediation, let us now begin to find out what is causing this problem in the first place. Other nations with far fewer resources than ours have managed to keep their illiteracy rate to a very low level. Surely we can and should do no less.

I thank the cosponsors of this legislation, Senators DOLE, THURMOND, HATCH, PRESSLER, SYMMS, TRIBLE, GLENN, NUNN, GOLDWATER, HOLLINGS, GARN, GORE, BAUCUS, STENNIS, MELCHER, EAST, WARNER, GRAMM, and STEVENS, and I urge our other colleagues to join us in this effort.

Mr. President, I ask unanimous consent that the text of the resolution and accompanying correspondence be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S.J. RES. 102

Whereas over 20 percent of adults in this country are functionally illiterate and another 32 percent are only marginally literate;

Whereas approximately 13 percent of all 17-year olds in the United States can be considered functionally illiterate, and 40 percent cannot draw inferences from written material;

Whereas functional illiteracy among minority youth may run as high as 40 percent;

Whereas the number of adult illiterates is growing by about 2,300,000 individuals each year;

Whereas several billion dollars are spent each year on remedial reading by schools, colleges, businesses, government agencies, and the armed forces;

Whereas illiteracy threatens our economy, our national security, and the very future of our country;

Whereas the response to the problem of illiteracy has focused primarily on remediation, but very little has been said about prevention; and

Whereas a substantial number of teachers believe that they were not trained to use the most effective methods of teaching reading: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That this joint resolution may be cited as the "National Commission on Illiteracy Act".

ESTABLISHMENT OF COMMISSION

SEC. 2. (a) There is established a commission to be known as the "National Commission on Illiteracy" (hereafter in this Act referred to as the "Commission").

(b) The Commission shall be composed of sixteen members as follows:

(1) Eight members shall be appointed by the President of the United States.

(2) Four members shall be appointed by the President pro tempore of the Senate, two upon recommendation of the Majority Leader of the Senate and two upon recommendation of the Minority Leader of the Senate.

(3) Four members shall be appointed by the Speaker of the House of Representatives, two upon recommendation of the Majority Leader of the House of Representatives and two upon recommendation of the Minority Leader of the House of Representatives.

(c)(1) The President, the President pro tempore of the Senate, and the Speaker of the House of Representatives shall, after consultation, assure that the members of the Commission are broadly representative of parents, the education community, business and industry, the military, and government, together with consideration for representation of minorities.

(2) The members of the Commission shall be individuals who have demonstrated prior understanding of and concern about the problem of illiteracy.

(d) Any vacancy in the Commission shall not affect its powers, but shall be filled in the same manner in which the original appointment was made.

(e) The Commission shall elect a chairman and a vice chairman from among its members.

(f) Nine members of the Commission shall constitute a quorum for the transaction of business, but the Commission may establish a lesser number as a quorum for the purpose of holding hearings, taking testimony, and receiving evidence.

FUNCTIONS

SEC. 3. (a) The Commission shall conduct a full and complete study of the causes of illiteracy. Such study shall include but not be limited to the consideration of—

(1) methods of teaching reading that have been proven to be most effective, as well as methods of teaching reading which may be counterproductive; and

(2) methods of teacher training relating to reading instruction in the classroom.

(b) In carrying out its functions under this section, the Commission shall—

(1) assess the factors which contribute to illiteracy;

(2) recommend programs and policies to prevent illiteracy;

(3) recommend the appropriate local, State, and Federal role in the prevention of illiteracy; and

(4) assemble, analyze, and publicize its findings.

(c) The Commission shall submit to the President and to the Congress such interim reports as it deems advisable. The Commission shall submit to the President and to the Congress, not later than twelve months after the first meeting of the Commission, a final report of the study and investigation, together with such recommendations as the Commission deems advisable.

ADMINISTRATIVE PROVISIONS

SEC. 4. (a) Subject to such rules and regulations as may be adopted by the Commission, the chairman is authorized to—

(1) appoint, terminate, and fix the compensation without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of title 5, United States Code, or of any other provision of law, relating to the number, classification, and General Schedule rates—

(A) of such personnel as it deems advisable to assist in the performance of its duties, at rates not to exceed a rate equal to the maximum rate for GS-15 of the General Schedule under section 5332 of such title; and

(B) of an executive director for the Commission contingent upon confirmation by the Commission members at an annual rate of compensation not to exceed a rate equal to the rate provided for level V of the Executive Schedule under section 5316 of title 5, United States Code; and

(2) procure, as authorized by section 3109 of title 5, United States Code, temporary and intermittent services to the same extent as is authorized by law for agencies in the executive branch, but at rates not to exceed the daily equivalent of the maximum annual rate of basic pay in effect for grade GS-15 of the General Schedule.

(b) Service as a member of the Commission or as an employee of the Commission shall not be considered service in an appointive or elective position in the Federal Government for purposes of section 8344 of title 5, United States Code, or comparable provisions of Federal law.

(c) The Commission may adopt such rules and regulations as may be necessary to establish its procedures and to govern the manner of its operations, organization, and personnel.

COMPENSATION OF MEMBERS

SEC. 5. (a) The members of the Commission shall serve on the Commission without compensation.

(b) All members of the Commission shall be reimbursed for travel, as authorized by section 5703 of title 5, United States Code, subsistence, and other necessary expenses incurred in the performance of the duties of the Commission.

POWERS OF THE COMMISSION

SEC. 6. (a) The Commission or, on the authorization of the Commission, any subcommittee thereof or any member authorized by the Commission may, for the purpose of carrying out this joint resolution, hold such hearings and sit and act at such times and places, take such testimony, have such printing and binding done, enter into such contracts and other arrangements (with or without consideration or bond, to such extent or in such amounts as are provided in appropriation Acts, and, without regard to section 3709 of the Revised Statutes (41 U.S.C. 5)), make such expenditures, and take such other actions as the Commission or such member may deem advisable. Any member of the Commission may administer oaths or affirmations to witnesses appearing before the Commission or before such member.

(b) The Commission is authorized to secure directly from any officer, department, agency, establishment, or instrumentality of the Government such information, suggestions, estimates, and statistics as the

Commission may require for the purpose of this joint resolution, and each such officer, department, agency, establishment, or instrumentality is authorized and directed to furnish, to the extent permitted by law, such information, suggestions, estimates, and statistics directly to the Commission, upon request made by the chairman or vice chairman.

(c) Upon request of the Commission, the head of any Federal agency is authorized to make any of the facilities and services of such agency available to the Commission or to detail any of the personnel of such agency to the Commission, on a reimbursable basis, to assist the Commission in carrying out its duties under this joint resolution, unless the head of such agency determines that urgent, overriding reasons will not permit the agency to make such facilities, services, or personnel available to the Commission and so notifies the chairman in writing.

(d) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(e) No officer or agency of the United States shall require the Commission to submit any report, recommendation, or other matter to any such officer or agency for approval, comment, or review before submitting such report, recommendation, or other matter to the Congress.

TERMINATION OF THE COMMISSION

SEC. 7. Ninety days after the submission to the Congress of its final report, the Commission shall cease to exist.

AUTHORIZATION OF APPROPRIATIONS

SEC. 8. There are authorized to be appropriated such sums, but not to exceed $1,000,000, as may be necessary to carry out the provisions of this joint resolution.

THE AMERICAN LEGION,
Washington, DC, March 15, 1985.

Hon. EDWARD ZORINSKY,
U.S. Senate,
Washington, DC.

DEAR SENATOR ZORINSKY: The American Legion takes this opportunity to join you in supporting your proposed legislation cited as the National Commission on Illiteracy Act.

For many years The American Legion has been actively involved and interested in the quality of education that American children receive. We are well aware of the consequences of high illiteracy rates in terms of the socio-economic costs and underdevelopment of the human potential in our nation.

Therefore, we lend the support of our organization in calling on the Congress to establish a bipartisan commission to study and assess the factors which contribute to illiteracy and recommend appropriate programs and policies to prevent illiteracy. We believe that the establishment of a commission to study the high illiteracy rate in the U.S. is both timely and necessary.

Sincerely,

E. PHILIP RIGGIN,
Director, National Legislative Commission.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

AMERICAN CIVIL LIBERTIES UNION ENDORSES THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, recently the American Civil Liberties Union wrote to every Member of the Senate urging a vote in favor of ratification of the Genocide Convention.

That letter is particularly timely. In recent statements, opponents of the Genocide Convention have warned that the Genocide Convention would in some way overturn the Bill of Rights of our Constitution, that it would undercut the free speech rights of Americans, and that it poses a threat to our constitutional system.

As we know, Mr. President, such charges are frivolous nonsense. But it is particularly reassuring to hear the same ringing endorsement of the Genocide Convention from the American Civil Liberties Union.

Why? What organization has better stood up for the protection of individual rights than the ACLU? Who, Mr. President?

The American Civil Liberties Union can hardly be called a slacker in defense of individual liberty, either by its friends or its critics. In fact, it critics charge that it protects the individual too often at the expense of the majority.

But in their painstaking review of the Genocide Convention, did they find any cause for concern? Not at all. As they point out, there is "no legal impediment to the United States' ratifiction of the Genocide Convention. The provisions of the Convention are in full accordance with the Constitution, laws and ideals of the United States."

Mr. President, there is little that I can add to the American Civil Liberties Union's excellent letter, except to say that it is time that we move promptly to initiate debate. The campaign of innuendo and half truth of the far right needs to be exposed to open and full debate here in this Chamber. It is time that we begin.

I ask unanimous consent that the letter of the American Civil Liberties Union be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AMERICAN CIVIL LIBERTIES UNION,
Washington, DC, March 15, 1985.

DEAR SENATOR: I am writing on behalf of the American Civil Liberties Union in support of the ratification of the United Nations Convention on the Prevention and Punishment of the Crime of Genocide.

Genocide is a particularly odious deprivation of human rights. It is the murder of a people; a homicide directed at the family of man. The Convention defines genocide as "acts committed with intent to destroy, in whole or in part, a national, ethical, racial or religious group as such". Ratification of the Convention merely commits each country to the enactment of laws to provide effective penalties for persons guilty of genocide.

There is no legal impediment to the United States' ratification of the Genocide Convention. The provisions of the Convention are in full accordance with the Constitution, laws and ideals of the United States. Ratification of the Convention is, therefore, a proper exercise of the treaty-making power of the Constitution.

On September 6, 1984 President Reagan announced his vigorous support for the ratification of the Genocide Convention. The passage last October of S. Res. 478 committing the Senate to the principles embodied in the Convention and to expeditious action thereon in the 99th Congress represents commendable progress. However, the time has come for the United States to ratify the Convention and join with 93 other nations to make the treaty work.

This country played a leading role in the adoption of the Genocide Convention by unanimous vote of the United Nations General Assembly in 1948. Since then the United States has continued to work for the promotion of human rights. However, the United States' failure to ratify this Convention in the thirty-six years since its adoption casts serious doubt on our commitment to protect internationally recognized human rights. Our concern about human rights abroad must be accompanied by a willingness to obligate ourselves to act in accordance with these same international standards. Ratification of the Genocide Convention would be a long overdue step in the pursuit of truly effective international human rights policy throughout the world.

Thank you for your consideration of these views.

Sincerely,

MORTON H. HALPERIN,
Acting Director.

FINANCIAL EXPORT CONTROL ACT

Mr. PROXMIRE. Mr. President, on March 28, Senator GARN introduced S. 812, the Financial Export Control Act, of which I am an original cosponsor. That bill would amend the Export Administration Act in order to give the President authority to control bank loans and other extensions of credit from American banks and corporations to the Soviet Union and its Eastern bloc allies. It is designed to ensure that credits to the Soviet bloc are more carefully reviewed in order to help achieve some of our political objectives vis-a-vis the harsh Soviet rule in Eastern Europe.

Credit controls may also help restrict the diversion of militarily critical technologies to the Soviet bloc. Two years ago, when we had hearings in the Banking Committee to guide us in crafting amendments to the Export Administration Act, we heard credible testimony regarding the Soviet Union's massive, well-managed and carefully targeted technology acquisition program.

They spend a whale of a lot of money to try to get our technology. Recent revelations of the Defense Department were that we were ahead of the Soviet Union in every technological area or equal to them. We were

ahead in 15 of the 20 most important areas, equal to them in 5, and they were ahead of us in none. They have a massive program and the resources to take our technology and are being successful to some extent.

Their program enables the Soviets to save both time and money in their military R&D program. They, in effect, illegally and surreptitiously purchase military technologies we develop at considerable expense to our taxpayers. More careful review of loans by U.S. banks to the Soviet bloc can reduce the amount of discretionary dollars they have available to bribe those in the West who clandestinely transfer such proscribed technologies to them.

I want to make very clear that I am not opposed to all bank loans or other extensions of credit to the Eastern bloc. Some loans may in fact be needed to finance the purchase by Eastern European countries of nonstrategic goods, whose purchase helps our workers, farmers, and industry, and which do not strengthen those countries militarily. What concerns me, however, are cases when our banks fall all over themselves to make loans to the Soviet bloc without regard to whether such loan extensions undermine our, or our allies' political objectives in those countries. The profit motive is very laudable, but on occassion it may need to be tempered by other considerations.

Because I believe carefully managed extensions of credit to the Eastern bloc can serve U.S. interests, I have suggested to Senator GARN that the word "could" be added to the new finding to the Export Administration Act proposed in section 3 of S. 812. That new finding would then read in its entirety:

> Loans and other transfers of capital to the Soviet Union and its allies from public and commerical sources could significantly increase the ability of the countries to obtain sensitive goods and technology thereby damaging the security interest of the United States and its allies.

This makes clearer that not all credits necessarily strengthen the Soviets.

I have also suggested to Senator GARN that the last line of section 4 of S. 812 be amended to read as follows:

> The authority contained in this subsection shall be exercised by the Secretary of the Treasury *pursuant to regulations he shall issue* in consultation with the Secretary of Defense, the Secretary of Commerce and such other departments and agencies as the Secretary of the Treasury shall consider appropriate.

Adding the italicized words is designed to make absolutely clear that the authority being given to the executive branch in this bill is to be exercised only through regulations that are first published in the Federal Register. This is to ensure that our banks and corporations have full notice of those Government controls that have an impact on their operations in Eastern Europe. It will also ensure they have an opportunity to advise Government officials about controls that may not be workable or which could be counterproductive to our political interests.

I agree with Senator GARN that it is time to address the issue of credit extensions to the Soviet bloc and am pleased to cosponsor his bill with the above considerations in mind.

S. 844—ADMINISTRATION'S BILL TO AMEND THE EXPORT-IMPORT BANK ACT

Mr. PROXMIRE. Mr. President, I send to the desk a bill that will amend the Export-Import Bank Act of 1945, as amended, and I am introducing it at the request of the Reagan administration.

The bill, if enacted, would amend three sections of the Export-Import Bank Act of 1945 (12 U.S.C. sec. 635 et seq.) namely section 2(a)(1), section 3(c)(8) and section 8, and would add a new section, section 15. In particular, this legislation would prohibit the Eximbank from making any new direct loans beginning in fiscal year 1986 while clarifying the Bank's authority, where necessary, to subsidize export loans provided by other lenders. Also in order to prevent any interruption in the operation of the Eximbank Board of Directors, the bill would make clear that a director of the Eximbank may continue to serve after the expiration of his or her term until his or her successor has been appointed. Finally, the proposed legislation would extend the life of the Eximbank from September 30, 1986, to September 30, 1991.

The most important provision in the administration's bill which I am offering is the proposal to replace the Export-Import Bank's direct loan program with an interest matching program called "I-Match" by the Bank. Under that new program, the Eximbank would discontinue its practice of borrowing money from the U.S. Treasury in order to make export loans. Instead the Bank would find a private lending institution to fund the loan and then buy down the private lender's interest rate to the minimum level permitted under international agreements where that is necessary to counter subsidized foreign competition.

During recent hearings on the President's proposal, the Chairman of the Export-Import Bank has repeatedly stated that the "I-Match" Program could be just as effective as the Bank's direct loan program in supporting export sales. In the next fiscal year the "I-Match" Program would enable the Bank to provide exporters with $1.8 billion in below market, fixed rate financing. This represents a $300 million increase over the amount of fixed rate financing the Bank authorized this past fiscal year under its direct loan program and almost a billion dollars more than the Bank authorized in 1983. The administration's proposal also calls for increasing the Eximbank's guarantee and insurance authority in fiscal 1986 to $12 billion—up from $10 billion in the current year.

The Chairman of the Eximbank has also testified that the administration's proposal to substitute the "I-Match" Program for the Bank's present direct loan program will cut more than $3.4 billion from our budget deficit over the next 3 years.

Let me repeat that.

The administration is interested in this proposal that I am making today. They are supporting it. It is their proposal, because it will reduce the deficit by over $3 billion over the next 3 years.

As I say, it will also provide for a better opportunity for the Export-Import Bank to do its job, that is to finance American export that is in competition with the subsidized financing of exports by other countries.

I believe the President's proposal deserves very serious consideration by the Senate and the Banking Committee to which it will be referred and I am pleased to introduce it at the request of the administration.

Mr. President, I ask unanimous consent that the bill and the accompaying section-by-section analysis be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 844

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SEC. 101. That Section 2(a)(1) of the Export-Import Bank Act of 1945, as amended (12 U.S.C. § 635(a)) is amended by inserting after "to guarantee, insure, coinsure, and reinsure against political and credit risks of loss;" the following: "to provide a sufficient return to commercial lending institutions or other lenders making loans in support of exports of goods and services when financing at other than market rates is necessary to respond to subsidized financing offered by foreign export credit agencies;".

SEC. 102. That Section 3(c)(8) of such Act (12 U.S.C. § 635a(c)(8)) is amended by adding at the end thereof the following: "(E) Any director whose term has expired may serve until his or her successor has been appointed.".

SEC. 103. That Section 8 of such Act (12 U.S.C. § 635f) is amended by striking out "September 30, 1986" and inserting in lieu thereof "September 30, 1991".

SEC. 104. That such Act is amended by inserting after Section 14 (12 U.S.C. § 635i-2) the following: "SEC. 15. Effective October 1, 1985, the Bank shall not approve any new loans, provided that the provisions of this section shall not be construed as (i) preventing the Bank from performing, administering, extending, rescheduling, refinancing or accounting for any obligations incurred

prior to such date, which remain outstanding subsequent to such date, or (ii) pertaining to the Bank's guarantee and insurance activities.".

SECTION-BY-SECTION ANALYSIS

Section 101 amends Section 2(a)(1) of the Export-Import Bank Act of 1945, as amended, (12 U.S.C. § 635 (a)) to make it clear that where financing at other than market rates is necessary to respond to subsidized financing offered by foreign export credit agencies Eximbank possesses the authority to assure a sufficient rate of return to commercial lending institutions and other lenders making export-related loans. In this way, the lenders would be able to provide loans at rates which are necessary for U.S. suppliers to compete with foreign suppliers receiving support from their official export credit agencies, while at the same time the lenders could be assured of receiving a sufficient rate of return. The determination as to what constitutes market rates as well as what constitutes a sufficient return would be left to the judgment of the Eximbank Board of Directors. The Board of Directors would also use its judgment in determining the existence and nature of the officially subsidized export financing.

Section 102 is intended to assure the availability at all times of a quorum of members of the Eximbank Board of Directors by amending Section 3(c)(8) of the Export-Import Bank Act of 1945, as amended, to make it clear that a director may continue to serve after the expiration of his or her term until his or her successor has been appointed. In this way, there would be no interruption in the operation of Eximbank in general.

Section 103 amends Section 8 of the Export-Import Bank Act of 1945, as amended, to extend the life of the Bank from September 30, 1986 to September 30, 1991.

Section 104 adds Section 15 to the Export-Import Bank Act of 1945, as amended, (12 U.S.C. § 635i-3) to prohibit the Bank from making any new loans beginning in FY 86. At the same time, the Bank would be able to honor legally binding commitments made in prior years that may require it to make loans after October 1, 1985.

Section 15 would not affect the Bank's ability to make disbursements under any direct loans, medium-term credits or small business credits authorized in prior fiscal years or to administer, extend, reschedule, refinance or account for such direct loans and credits.

Further, Section 15 would not have any impact upon the Bank's guarantee and insurance programs. For example, this Section would not apply to the accounting for, or handling of, claims or liabilities under these programs and the rescheduling or refinancing of indebtedness acquired pursuant to payment of any claims.

HOW A SUCCESSFUL STAR WARS COULD BRING ON NUCLEAR WAR

Mr. PROXMIRE. Mr. President, one of the shocking revelations in the recent report by the Congressional Research Service of the Library of Congress on star wars and the U.S.-NATO strategy was an astonishing concern expressed by some West German officials. The CRS reported that some West German officials expressed the view that a military attack on Germany that was conventional could be as bad for Germany as a nuclear attack.

Is that possible? Could a conventional military attack bring on an even more terrible consequence than a nuclear war? If so, how? What do these Germans fear? These Germans were concerned that the logical result of a successful antimissile defense for the superpowers would be lifting of the threat of nuclear war for both Russia and the United States. If star wars succeeded as the administration contends it can, then neither the United States nor the Soviet Union need fear a nuclear attack. Both could survive such a strike. Both sides would know this. And therefore, according to the administration scenario, there would be no nuclear exchange. Doesn't that sound like paradise? Most scientific experts do not believe star wars could begin to provide that kind of protection. But assume it did. What deterrence would remain to prevent the Soviet Union from using its massive conventional superiority to try to sweep through Western Europe?

Today they will not do so because they fear a devastating nuclear response from the United States. But if star wars works—and if star wars works as the administration proposes, as giving a technology to the Soviet Union—then that deterrence is gone.

That would seem to lift an immense fear from the hearts of all of us. Conventional war might be terrible, but how could it be as terrible for anyone as nuclear war?

Well, Mr. President, it could be. After all, in the closing days of World War II conventional war reached a level of destruction that approached nuclear war for those directly involved. And that was 40 years ago. Since that time the cruel, devestating capacity of conventional weapons has massively increased. The fire bombing of Hamburg by conventional allied air attacks is reported to have incinerated 40,000 people, and left the city a smoldering cemetery of ruin. The March-April 1945 edition of the Harvard magazine carries an article by Prof. Dieter Georgi, a former professor at the Harvard University Divinity School. Professor Georgi was born in Germany and was a 10th grade high school student living in Dresden Germany in 1945 when the allies hit Dresden with a series of conventional air raids. Here is how Dieter describes his experience:

I remember one particular incident that shows how incredibly strong the fire was. With other tenth graders, I was drafted into a new army unit in early April 1945. On the fourth of May our platoon was charged with finding a suitable place for the command post of our regiment in the ruins around Dresden's central train station. As we looked for an adequate cellar, we found chalk figures on the walls indicating the number of corpses found and removed. Some of the cellars had caved in, but as we moved into others we noticed that the temperature increased and quickly became unbearable. Not only had the stones kept the heat since February, but the fire was acutally still burning after almost a quarter of a year.

At first, the German bureaucrats painstakingly tried to identify the dead, but they quickly resorted to merely counting them and then had to give up altogether. The first corpses were buried, but the later ones were cremated on big racks by the thousands. I can still remember a pickup truck full of naked bodies with distorted stiff limbs. A young soldier was leaning with his back against the driver's cabin, overlooking his load of death with the most tired and empty look I have ever seen.

Many other terrifying visions are still with me since February 13, 1945: the victims of burns in the makeshift hospital in Klotzche; the moving and mumbling flesh where faces had been; the tiny corpses in the street, which a closer look would reveal as adults shrunk and dwarfed by the heat; the long treks of prisoners of war and Russian auxiliaries coming "home" from the city in the evening; exhausted and utterly silent; the stench of cremation and of decomposition; the glow of fire reflecting in the night sky.

Now, Mr. President, that was the kind of devestation that conventional weapons, I repeat conventional weapons—could bring to a city 40 years ago. Forty years is a millenium in the development of military weapons. Today conventional weapons—not nuclear weapons—conventional weapons could wreak far greater devestation. Do you see why many West Germans welcome the stalement of nuclear deterrence that has kept the European peace for 40 years? Do you see why even a completely successful star wars defense that would make the world safe for another conventional war in Europe would constitute a fearsome threat to many West Germans—our key NATO ally?

If the star wars defense could possibly prevent nuclear war, an increased threat of conventional war might still be a risk well worth taking, especially for those of us who live in America and not in Europe. But let us not kid ourselves. Any conventional war between the Soviet Union and free Europe would swiftly involve the United States. We would be in it promptly and fully. Star wars might then defend our country from Russian ICBM attack, but it would not even try to stop tactical nuclear weapons. We are equipped at this moment with nuclear warheads for our artillery. If the Soviets conventional superiority enabled them to break through in Europe we would swiftly go to neutron bombs. The Soviets would retaliate at first with tactical nuclear weapons.

Could star wars or any advancement of it conceivably protect the cities of free Europe from nuclear destruction from warheads carried by small vehicles or even individual soldiers? Of course not. And one way or another the nuclear war would spread to the

United States. We could expect nuclear commando raids, and coastal cities hammered by nuclear missiles launched from submarines. Certainly our adversaries would launch nuclear bombs from low-flying planes and would send nuclear armed cruise missiles under any star wars umbrella designed to protect us from Russian ICBM's. A superpower conventional war would surely, inevitable turn nuclear. It would utterly destroy both superpowers no matter how elaborate or advanced our star wars antimissile defenses. The irony is that the very promise of developing an antimissile defense that could keep the world at peace could be the prime force that upset the nuclear deterrent standoff and pushed us into the final war.

Mr. President, I yield the floor.

RECOGNITION OF SENATOR COHEN

The PRESIDING OFFICER. Under the previous order, the Senator from Maine [Mr. COHEN] is recognized for not to exceed 15 minutes.

S. 848—AMERICAN FOOTWEAR INDUSTRY RECOVERY ACT OF 1985

Mr. COHEN. Mr. President, today I and 17 colleagues are introducing the American Footwear Industry Recovery Act of 1985.

I wish to list the names of my colleagues: Senator MITCHELL, Senator SASSER, Senator KASTEN, Senator PROXMIRE, Senator PRYOR, Senator HOLLINGS, Senator HEINZ, Senator DIXON, Senator THURMOND, Senator COCHRAN, Senator EAGLETON, Senator SIMON, Senator RUDMAN, Senator EAST, Senator BUMPERS, Senator GORE, and Senator ARLEN SPECTER.

We are introducing this measure as we did last year when we introduced a similar piece of legislation last year after the International Trade Commission ruled that the domestic nonrubber footwear industry had not been seriously injured by imports under conditions set forth in section 201 of the Trade Act of 1974.

Since that incredible decision, the American footwear industry has continued to experience severe and growing distress from imports. Recently, the U.S. Department of Commerce reported that imports of nonrubber footwear reached 75 percent of the U.S. market in January. The U.S. industry currently provides only 1 of every 4 pairs of shoes purchased in this country, and yet the ITC could find no evidence of injury?

To repeat those statistics: Foreign competition now owns 75 percent of the market and yet our own ITC found no evidence of injury to our domestic industry.

Imports of nonrubber footwear increased 25 percent in 1984 alone. Last year, this onslaught of imported footwear forced over 100 U.S. factories to close down their doors forever, placing some 13,300 people out of work. Nearly every week last year, two factories shut their doors in the face of this unprecedented import surge. Unemployment levels for this industry nationwide approach 17 percent—more than twice the average manufacturing unemployment rate in the country. Yet the ITC found no evidence of injury.

Sadly, Maine is not an isolated case when it comes to the devastating effect this incredible import surge has had upon this industry. My colleagues from Missouri, Arkansas, Wisconsin, Tennessee, and other States, can attest to the equally alarming statistics regarding the effect of footwear imports on their own constituents. Factory after factory is closing throughout the Nation, no longer able to bear the unfair competition from cheap foreign imports. Unless some action is taken soon, what is left of this industry may well not survive.

While factory closings present difficulties in any industry, the closing of a footwear factory creates particular hardships. Most shoe factories are located in rural and semirural areas where they provide the primary and, in many cases, the only source of employment. In Maine, an estimated 25 percent of all shoe factories are located in towns with populations of less than 5,000 people. More than one-third of the industry workers are 50 years old or older, and almost two-thirds of them are women. When these workers lose their jobs, there is nowhere else to go for employment. They cannot vote with their feet. They cannot march off to Silicon Valley and be retrained in computer chip factories.

We cannot send them to Korea. We cannot put them off on the shores of Taiwan or Japan. They have nowhere else to go.

Despite these devastating statistics of import penetration, factory closings, and lost jobs, those in the Federal Government who should be listening to this industry have turned a deaf ear to the problem. Repeatedly, I am told that we should promote the principle of free trade, that our domestic industry should welcome foreign competition.

I have been a supporter of free trade as well as long as the expression goes there is fair trade, which there is not. The domestic footwear industry, however, is the victim of a global trade game whose rules are anything but fair. The United States is the only major market which allows virtually unlimited footwear imports. There is no nation in the world that has equally open borders as we do in this country. Most of our trading partners have restrictions ranging from formal global quotas to excessive tariffs and import licensing schemes which effectively prevent entrance to their markets.

The U.S. footwear industry is also faced with the excessively low labor costs of foreign competitors. While the U.S. shoeworker is among the lowest paid of all U.S. manufacturing workers, the industry simply cannot compete fairly with Korean labor costs under $1 per hour.

Mr. President, the U.S. industry is getting hit hard from both sides. On one hand, it is seeing its own domestic market disappear under a flood of cheap, imported shoes. On the other hand, it is prohibited from selling its goods abroad. I would not call this a system that celebrates free trade, because it is simply not fair trade.

Mr. President, it has become obvious that this industry will continue to suffer from the rising flood of imports unless we provide relief. Therefore, we are introducing legislation which I believe provides a moderate, yet crucial lifeline to the American footwear industry.

This legislation will limit imported, nonrubber footwear to a 50-percent share of the U.S. market for a period of 8 years. A 50-percent share of the U.S. market will provide domestic manufacturers with the time and opportunity to continue to recapitalize and modernize facilities, while still granting foreign importers a substantial share of our market.

This really is not asking too much. I know that the administration gets very concerned when we find that foreign auto manufacturers are penetrating our markets by 26 percent or 30 percent. We are talking about 75 percent here. We have the steel industry that gets very concerned about the loss of jobs when there is an 18-percent market penetration. We are talking 75 percent in the shoe industry.

Yet, there has been absolutely no reaction coming from the administration. To call their reaction a case of benign neglect, I think, is a very moderate statement. They have turned totally against any sort of relief for an industry which is going to die unless some relief is provided.

Recently, I visited a number of shoe factories in my State of Maine to see, once again, the extent to which these surviving companies are willing to commit hundreds of thousands of dollars to computerize, install laser cutting equipment, and employ the latest high-tech manufacturing machinery necessary to remain competitive.

One company in particular comes to mind, as it presents the stark contrast of Dickensian textile mill building that houses some of the most sophisticated computer-driven equipment existing in the industry today. Falcon Shoe Co. in Lewiston occupies the top

floors of a pre-1900 textile mill building. As you climb up the winding spiral staircase, you can almost hear the looms running, as they did some 40 years ago. When you reach the Falcon operation, however, you realize that in place of the weaving machines and looms, are the most modern computer stitching machines, data processing equipment, laser cutting machines, and injection molding equipment currently available anywhere in the world.

It is obvious to me that the survivors of this import siege are committed to modernization and excellence, and are willing to spend the money necessary to compete. But they are caught in a catch-22 situation. Why should any company take the money and invest it in modernizing their plant equipment and facilities if, in fact, the U.S. Congress or the Federal Government is simply going to provide no protection against this floodtide coming in? So they have to have some reasonable assurances that they will be an industry worth protecting if they are going to be encouraged to modernize and invest substantial sums of money. But unless they are allowed some breathing room to accomplish this goal, I fear that all of their effort may be for naught.

Mr. President, this industry deserves the chance to survive. I hope that my colleagues will help provide the means for its survival by supporting this legislation in a very vigorous way.

I again call the attention of those who may be listening in their offices that this is something that has reached a crisis proportion. We have hundreds of thousands of people who have been thrown out of their jobs with no hope. They have been told by the administration:

You have reached the stage of obsolescence. There is no need for you any more. Therefore, you will have to be put on the shelf of neglect and nonuse. Go collect food stamps. Go collect welfare checks. Go stand in the soup lines. We have nothing for you. Go vote with your feet. Go to Silicon Valley.

So we have an opportunity to save the last 25 percent of an industry which I think is very vital to our country's interest. I hope that it will have the support of my colleagues.

Mr. President, I ask unanimous consent that the text of the American Footwear Industry Recovery Act of 1985 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 848

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "American Footwear Industry Recovery Act of 1985".

SEC. 2. FINDINGS AND PURPOSE.

(a) The Congress finds that—

(1) The domestic nonrubber footwear industry is important to the national economy.

(2) The domestic nonrubber footwear industry is highly labor intensive, and footwear firms are vital to the economic health of small towns throughout the United States.

(3) The low capital requirements for entry into footwear production make it a primary target for industrializing or newly industrialized countries. As a consequence, footwear is produced in virtually every footwear consuming country in the world.

(4) Tremendous competitive pressure has been created in the world footwear market in the last decade as a result of rapidly growing production and capacity in numerous developing and developed countries. This development has resulted in the widespread erection of tariff and nontariff barriers by foreign countries designed to protect their domestic footwear industries.

(5) The United States has historically resisted the protectionist trends of other producing nations and has instead maintained a market distinguished by its accessibility. As a result, the United States market has become a focal point for world trade in nonrubber footwear.

(6) The diversion of international trade to the United States market has resulted in serious injury to domestic producers as manifested by—

(A) the loss of 140,000 footwear jobs since 1968,

(B) a decline in domestic production and production capacity, and

(C) the permanent closure of almost 500 plants during the same period.

(7) The serious injury to domestic producers poses a significant danger to the industry's supplier base as well.

(8) The domestic nonrubber footwear producers have made a significant commitment to the future of the industry through substantial capital investment.

(9) Since the termination of temporary import relief in 1981, capital investment in the domestic nonrubber footwear industry has declined as the industry struggled to battle the massive surge in imports which increased the percentage share of imported footwear in the United States market from 51 percent in 1981 to 72 percent in 1984.

(10) Without the restriction of import levels, capital investment in this domestic industry will continue to decrease.

(11) The domestic nonrubber footwear industry has twice been judged by the International Trade Commission to be seriously injured by imports.

(12) Since the termination of the four-year orderly marketing agreements in 1981, the present harm to the domestic industry is even more critical than the serious injury which triggered the Commission's two unanimous findings in 1976 and 1977.

(13) The domestic nonrubber footwear industry has not been afforded adequate and appropriate relief from imports; therefore, the Congress concludes that—

(A) the administrative process under sections 201, 202, and 203 of the Trade Act of 1984 has proven inadequate; and

(B) in the absence of an effective remedy under such process, legislative relief is essential.

(b)(1) It is the purpose of Congress in enacting this section to—

(A) promote and expand the economic health of the United States nonrubber footwear industry,

(B) preserve the jobs of American workers, and

(C) prevent the further decline of this important domestic industry.

(2) It is declared to be the policy of Congress that access to the United States market for foreign-produced nonrubber footwear should be on an equitable basis to ensure orderly trade in nonrubber footwear, reduce unfair trade in nonrubber footwear, and address United States balance-of-payments problems, of which footwear is the seventh largest component. In order to accomplish these objectives, it is deemed necessary and appropriate to limit imports of nonrubber footwear into the United States market to no more than 450,000,000 pairs per year.

SEC. 3. DEFINITIONS.

For purposes of this Act—

(1) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

(2) The term "Secretary" means Secretary of Commerce.

(3) The term "nonrubber footwear" means the following categories of nonrubber footwear products, identified by reference to the following item numbers of the Tariff Schedules of the United States (as in effect on January 1, 1985): 700.05 through 700.45; 700.56; 700.72 through 700.83; and 700.95.

SEC. 4. QUANTITATIVE LIMITATION OF NONRUBBER FOOTWEAR.

(a) During the 8-year period beginning on the day which is 60 days after the date of enactment of this Act, the number of pairs of nonrubber footwear which may be entered during any 12-month period shall not exceed 450,000,000.

(b) The Secretary shall allocate the limitation provided in subsection (a) among foreign countries, group of countries, or areas taking into consideration—

(A) average levels of imports for the period 1978 through 1982;

(B) findings of unfair trade practices with respect to nonrubber footwear exports;

(C) recent market trends; and

(D) such other considerations as the Secretary deems appropriate.

(c)(1) The Secretary and the Secretary of the Treasury shall take such actions within their respective jurisdiction as may be necessary or appropriate to enforce the provisions of this section, including, without limitation, the issuance of orders to customs officers to bar entry to merchandise if the entry of such merchandise would cause the limitations established under this section to be exceeded.

(2)(A) The Secretary and the Secretary of the Treasury are each authorized to issue such implementing regulations, including the issuance of import licenses, as may be necessary or appropriate to effect the purposes of this section and to enforce the provisions of this section.

(B) Before prescribing any regulations under subparagraph (A), the Secretary or the Secretary of the Treasury, as the case may be, shall—

(i) consult with interested domestic parties,

(ii) afford an opportunity for such parties to comment on the proposed regulations, and

(iii) consider all such comments before prescribing final regulations.

Mr. PROXMIRE. Will the Senator from Maine yield?

Mr. COHEN. I yield to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I congratulate the Senator on the state-

ment he made. I wholeheartedly support him. I congratulate him on the excellent leadership he has given in this area.

After all, I cannot think of any other industry that has suffered a 75-percent penetration. It is astonishing. If we are going to give relief to any American industry, it seems to me the shoe industry is one that certainly deserves it and has earned it.

While we all welcome foreign competition and foreign trade—and I am sure the Senator from Maine does, also—here is a situation that has gone so far that if we are going to have any shoe industry remaining over the next few years it is time we act.

So I thank the Senator for his very timely and excellent leadership.

Mr. COHEN. I thank the Senator for his comments.

Mr. MITCHELL. I join in introducing legislation to establish a 50-percent quota on imported footwear because it is obvious that drastic action is warranted.

Since 1981, when President Reagan terminated the modest footwear import relief program in effect, imports have risen from 50 percent of the domestic footwear market to virtually three quarters of it.

That is a level of market penetration that no industry can survive and no other industry has been asked to tolerate.

The reasons why imports have so massively penetrated our domestic market have little bearing on our national goal of free international trade.

Footwear production is a labor-intensive but relatively less capital-intensive industry. Nations seeking to develop their domestic economies have found it a good way to exploit well-known and readily accessible technology along with a large work force.

But the American domestic market is virtually the only significant open market for footwear in the entire world. Our competitors all impose strict limits on footwear imports; other wealthy markets such as Western Europe and Japan maintain barriers. The countries which have taken the greatest advantage of our market often have the most severe restrictions on footwear imports for themselves.

The majority of nations which export intensively to the U.S. market maintain low wage policies for their domestic workers. Footwear workers in Brazil earn less than $2 per hour. In Taiwan they earn less than $1 per hour. Our workers cannot compete with such wages, nor is there a desirable policy purpose in suggesting they should.

The theory of free trade rests on the notion of comparative advantage: A nation which has an advantage in raw materials, technology or some other factor can produce certain products more efficiently and thus at the lowest competitive price.

But the only comparative advantage in an industry such as footwear production is wages. And there is no sound basis for our trade policies to enhance the low-wage policies that other governments have decided to pursue.

The theory of free trade also rests on the notion of free market competition. But there is absolutely nothing free and very little honest competition in an industry where governments boost domestic production by artificially maintaining low prices for raw materials and protecting their own markets from competition.

The fact of the matter is that we cannot by ourselves continue to pursue free market policies in a world where trade is not free. We cannot and should not expose our working people and our manufacturers to the unmitigated onslaught of government-aided imports when their own products are barred from many other markets in the world.

Our Nation's trade laws are intended to promote free and fair trade. But they are also intended to ensure that we do not ask our working people to absorb the full costs of trade policy.

But that is what American footwear workers are being asked to accept. As the executive branch pursues its efforts to open up the Japanese market to our technologically advanced industries, the plight of people employed in an older, but equally important domestic industry, is being ignored.

The decline of employment, of operating plants, of supplier industries and production in footwear manufacturing is unprecedented.

Since 1981, when the President eliminated all import relief, over 23,000 jobs have been lost directly in footwear production. In the same 5-year span, almost 26,000 jobs vanished in supplier industries as well as manufacturing.

Since 1968, when imported footwear took just over a fifth of the domestic market, we have lost more than 400 manufacturing plants, 112,000 manufacturing jobs, and 30,000 jobs in the supplier industries.

American footwear production today has fallen to less than 300 million pairs per year, a level not reached since the Great Depression of the 1930's.

Unemployment in the industry today is over 16 percent, and despite rosy predictions of unbroken economic expansion, the plants that have already announced plans to close this year are clear indicators that the economic recovery will not reach our shoe workers unless dramatic action is taken.

This quota bill would provide that dramatic action. It is long overdue. We have worked with administrations in the past to pursue import relief. Our industry has ploughed money into capital improvements and new technology and market expansion overseas. Our workers have seen their work weeks shrink—one Maine worker last month told me that she had not worked a full week for almost 6 months.

And the flood of imports reaching our markets is no longer limited to the lower priced footwear product.

It is a significant fact that in the past 2 years, the greatest import surge has been in higher priced footwear, not the low-priced product that is cited to justify an open market.

In the first 9 months of 1984, total imports rose 34 percent. But imports valued over $8 per pair rose by 43 percent. In fact, higher priced footwear accounted for more than half of the total growth of imports during this period.

If this trend continues, as it almost certainly will in the absence of action, foreign manufacturers will not be providing a useful source of cheap shoes, or a necessary competitive spur to keep domestic shoe prices down. They will be competing more and more in the higher priced market where American production is concentrated.

A 50-percent quota would retain the competitive benefit of a substantial import component to the overall market.

The history of the industry demonstrates that even during the modest trade relief period of 1979–81, footwear prices rose far less than other components of the Consumer Price Index. There is no reason in our experience or in common sense to expect a major surge in footwear prices if such a quota were imposed.

This bill deserves attention and enactment. It would send the strongest possible signal to our trading partners that we will no longer tolerate an unbalanced and unfair international trade regime, where the American market is fair game but every other market is closed against us.

It would send the strongest possible message to all industrial and newly industrialized nations that fair competition must be the route to economic growth, not the subsidization of exporting industries.

We cannot and will not achieve a reasonable international trade regime in services or advanced technologies unless we are prepared to fight for a fair international trade regime in basic industries as well.

Our trading partners must realize that a trade regime which depends on a permanent American willingness to absorb the bulk of world exports while they preserve their domestic markets is an inherently unstable one. It cannot endure.

Our trading partners cannot rely on a permanent American commitment to

free trade as more and more of our basic industries see their work forces depleted, their investments lost, and their facilities close because other nations refuse to share the risks as well as the rewards of open trade.

This bill would be an ideal vehicle to bring home to our trading partners that Americans' commitment to free trade is contingent on the existence of fair trade. I urge my colleagues to give it their support.

Mr. SASSER. Mr. President, I am pleased to join with my colleagues in the footwear caucus in reintroducing legislation to place limits on footwear imports into the United States.

We simply must bring some relief to our domestic footwear industry. Those of us who represent States with a significant shoe industry have been concerned, indeed appalled, over the continuing injury being suffered by the nonrubber footwear industry.

As I travel around my State, I continually see the effects of shoe imports on our citizens. Seven shoe facilities were closed in Tennessee last year. In these towns, shoe workers are already out of work or will be put out of work in the near future due to plant closings. I talk to individuals who have lost their jobs in the communities where they have lived and worked for years. They face the future with no prospects of new jobs. There were over 100 communities across the Nation who shared this devastating experience in the last year.

So far in 1985, four Tennessee shoe facilities have announced plans to close. For example, in January a shoe factory closed in McKenzie, costing 300 workers their jobs. Discussing the closing in the local newspaper, the Jackson Sun, McKenzie Mayor Joe Morris spoke graphically of the effects of losing the area's second largest employer.

"Summing it all up, the employment situation in McKenzie looks very bleak right now, and things weren't really booming to begin with," the mayor said. He estimated that the closing could raise the town's unemployment rate to 10 or 12 percent. "You figure they have a payroll of about $2.5 or $3 million, then multiply that about three times for every time it changes hands in the economy and you see what kind of impact it will have on our community".

If shoe imports are allowed to continue unchecked, more and more local officials will be echoing Mayor Morris' statistics.

My own State of Tennessee is the fifth most important footwear producing State in the United States. The industry employs about 11,000 workers in 33 factories and generated in excess of $96 million in payroll dollars last year. We simply must preserve these businesses and these jobs for our citizens.

The footwear industry is the leading employer in 6 counties in Tennessee and is among the top 3 employers in another 14 counties. It is a significant industry in 28 counties. Twenty-four of these 28 counties have populations under 50,000. Sixteen of them have populations under 25,000.

These figures are more than mere statistics. They represent real people and real jobs. The closing of a shoe factory can be devastating to a local community. Many such facilities are located in rural areas. They are often the major employer in the area—areas which have few comparable jobs to which workers may transfer their skills. Many people are prevented by family obligations and ties from moving to a new area—especially when there is no guarantee that they will not face the same situation sometime down the road.

Mr. President, I believe it is time that Congress addresses this issue and offers some real hope of industrial stability to our workers. American shoe workers are the equal of any in the world for productivity and skill. The American shoe industry is among the most modern in the world, and new applications of computer and other electronic equipment are constantly coming on the market. However, factory management cannot look at the rising flood of imports and justify the investment of thousands of dollars in capital equipment.

This leaves the shoe industry in a catch-22 situation. They cannot compete with imports without modernization but they cannot justify the investment without some assurance that there will be a domestic market in which to sell their products.

This bill gives the industry that assurance. It sets a limit on imported footwear of 450 million pairs per year, about 50 percent of the American market, and retains these limits for 8 years. That will give our domestic manufacturers time to install new technology to increase productivity and allow them to compete with imports.

I do not believe that we can delay this relief to the industry any longer.

Mr. PRYOR. Mr. President, I rise once again before my colleagues in the Senate to plead the case of the domestic nonrubber footwear industry. I have made this plea here before, but unfortunately, if this important industry is to survive, it must now be made again.

I am an original cosponsor of the legislation being introduced today—the American Footwear Industry Recovery Act of 1985. As a member of the Senate footwear caucus I fully support this legislation and an committed to the goal of securing meaningful trade relief, either through legislative or executive action, so this important industry can rebuild and compete in the very chaotic world market.

A few statistics are in order to bring the import problem into perspective relative to footwear. In 1984, 71 percent of the nonrubber shoes purchased in this Nation were imports, an increase of 25 percent over 1983. At least 90 more factories closed their doors last year, taking 11,000 jobs away from workers. Unemployment stood at a sobering 17 percent, with domestic production down 10 percent from 1983 and at its lowest level since the Great Depression.

My colleagues from nonfootwear producing States may wonder why the industry is in such a fix. Several factors spring to mind immediately. First, the United States is the only major Nation in the world which has an "open door" policy with regard to footwear. All other countries protect or foster their industries with trade restrictions or subsidies. Second, U.S. manufacturers cannot compete with the cheap labor costs of much of their direct competition. This imbalance is exacerbated by the continued strength of the dollar. Finally, this administration has shown little regard or concern for the trade problems of non "information age" industries. I only hope that President Reagan doesn't want to export our Nation's shoeworkers along with our farmers, but the practical effect of his policies are doing just that.

Our bill is simple, straightforward, and reasonable: It reduces the domestic share of the U.S. market open to imports to 50 percent for a period of 8 years. This will give the domestic industry a chance to improve technology and rebuild capital bases, and do so with half of its market still open to imports.

As a matter of background, let me point out that this is the same industry with almost the same statistics that the International Trade Commission [ITC] last year found to have suffered no injury as a result of import penetration. In all my years of public service, no single administrative decision has shocked me more than this one.

Many Members of the Senate were shocked and outraged with this poorly conceived decision. In response, language was included in the trade bill Congress approved last year to instruct the ITC to include a wider range of factors in its consideration of import injury cases. Furthermore, the Senate Finance Committee—of which I am a member—approved a resolution asking the ITC to reopen the investigation using the newly approved criteria to determine the extent of damage to the domestic industry. This investigation is proceeding now and I hope the ITC will recognize the dire condition of the industry and will recom-

mend to the President some form of trade relief.

Americans are becoming more and more frustrated with the posture in which our free trade position has placed us. We cannot have truly free trade only amongst ourselves, there has to be some party to trade freely with us. However, very little free trade is actually occurring and I think it important that our trading partners understand that we are growing tired of this situation.

Mr. President, I want to extend my thanks and appreciation to Senator COHEN, the chairman of the Senate footwear caucus, for his tireless leadership and work on behalf of the footwear industry. In addition, the other members of the footwear caucus, both in the Senate and the House, are to be commended for their work in this area.

Finally, let me say I hope this will be the last speech I must make on the Senate floor advocating legislation of this kind. If that is the case, it will be a direct result of positive, concrete action the President has taken to give U.S. workers a fair chance to compete. That is all these decent, hard-working Americans have ever asked of their leaders. It is time for us to answer with some hope.

Mr. EAST. Mr. President, I rise in support of the American Footwear Industry Recovery Act of 1985.

For more than 15 years, the footwear industry has been witness to an onslaught of foreign import that today accounts for nearly 75 percent of the U.S. market. This increasing level of foreign made footwear product has had a servere impact on domestic industry. Between 1968 and 1983 there has been a loss of 402 plants. In 1984, 89 factories closed.

The job loss to Americans is staggering with a loss of over 112,000 jobs disappearing in direct manufacturing alone. The impact of imports on this vital industry is dramatic and precipitous.

The footwear industry deserves our support. They have not sat on their hands in the face of this overwhelming problem. Factories have modernized and productivity muscle bolstered. The industry and its suppliers provides employment for more than 200,000 taxpaying Americans. These workers ought not be thrown out due to imports.

In North Carolina, the 14th largest footwear producing State, 4,200 people find work in nonrubber footwear manufacturing with an additional 1,750 folks working in rubber and plastic footwear manufacturing. These threatened jobs generate supporting work in peripheral industries. And, when footwear factories close, banks, utilities, community services, insurance, and other agencies suffer as well. Prudent action by Congress will avoid this trouble.

Mr. President, the footwear industry is in deep trouble. It doesn't ask for a handout. It asks for some well deserved relief. Relief will surely give some assurance that the industry will be able to survive and compete.

I join with my fellow colleagues to urge Senate policymakers to support this legislation. The American Footwear Industry Recovery Act is a moderate, crucially important measure for the future of U.S. footwear. It would allow a 50 percent share of the U.S. market to both domestic and foreign producers. It is a realistic response that affords the industry a chance to improve its efficiency and lower its costs, invest in more modernized facilities, sponsor new research and development, enhance its market, and adopt new technologies. I support it wholeheartedly.

RECOGNITION OF SENATOR ROCKEFELLER

The PRESIDING OFFICER (Mr. KASTEN). Under the previous order, the Senator from West Virginia is recognized for not to exceed 15 minutes.

The Senator from West Virginia.

Mr. ROCKEFELLER. I thank the Chair.

S. 847—APPALACHIAN REGIONAL DEVELOPMENT ACT AMENDMENTS OF 1985

Mr. ROCKEFELLER. Mr. President, today with the cosponsorship of Senator BYRD and 12 other Senators, I am introducing legislation to reauthorize the programs of the Appalachian Regional Commission, better known as ARC.

On March 9, 1965, President Lyndon Johnson signed the original legislation creating the Appalachian program. He called it "the truest example of creative federalism of our times." We are observing 20 years in which the spirit, the energy, and the imagination of our vital region have combined to chart a new course for our courageous people. We in Appalachia are proud of what has been accomplished during the past two decades. It was been our privilege and responsibility to foster an innovative approach to community, State and regional development—an approach in which program initiatives start at the grassroots levels, involve local and State government, and then are reviewed by the States within the region and the Federal Government. Because of this unique partnership, life is better and opportunities are greater for the 20 million men, women, and children who live in the 397 counties of the 13 States of Appalachia.

There is no doubt that our region has suffered serious economic reverses during the recent recession. But the progress that our region made between the 1960 and 1980 censuses has been dramatic:

We cut the percentage of Appalachian living in poverty in half, and the figure was moving downward toward the national average.

We had created 2 million new private-sector jobs.

We slowed, then reversed, in the 1970's, decades of outmigration in search of opportunities.

Per capita income rose from 78 percent of the national average to 85 percent.

More than 57 percent of Appalachians had completed at least 4 years of high school, compared with 33 percent in 1960.

Infant mortality has halved, and by the end of 1985, basic health care will have been extended throughout the region.

The number of Appalachians getting vocational education more than doubled.

Substandard housing was reduced, critical highways and roads were constructed, and much of the region was securing modern public facilities and services. This base which has been built, including the 2,500 miles of the Appalachian Development Highway System—completed or under construction—and almost 900 miles of access roads, is in place, vastly increasing the region's capability for further economic growth.

However, our course has not been easy. We recognize that we must continue to strengthen the economic base of our region. We have narrowed the gap between our region and the rest of the Nation. But we must continue our efforts until that gap is bridged.

It is my belief that the ARC is one of the most effective programs created by the Congress in the last two decades. I served as Governor of West Virginia for two terms, for 8 years, and I can say without reservation that there was no other program which was more specifically useful to our State than the Appalachian Regional Commission Program. It is crucial to the economic development of my State of West Virginia and all of Appalachia. It is a program that has paid for itself many times over by extending economic opportunity and promoting real economic growth.

The Reagan administration appreciates neither the accomplishments of the ARC program nor how much work remains to be done. Each year for the last 4, the administration has tried to eliminate the program. They have succeeded in blocking an authorization for the program, but Congress has continued to fund the program on a year-to-year basis. Despite the repeated judgment by Congress that ARC is a vital program, the administration is again seeking to abolish the program.

Additionally, they are trying to eliminate the ARC funding for fiscal year 1985, approved by Congress last year and signed into law by the President.

The administration's position on the Appalachian Regional Commission is wrong: for fiscal year 1985 and for the future. The efforts to rescind the ARC funding of $151.3 million for the current fiscal year breaks faith with our people. Citizens in many communities have worked with State government in developing projects; they have been assured that these projects will go forward. I will continue my fight to ensure that fiscal year 1985 funds are allocated to the projects that have been approved by the Appalachian States and submitted to the Appalachian Regional Commission for final action.

At the same time, I am introducing this legislation to reauthorize the programs of the Appalachian Regional Commission. Enactment of an authorization bill would provide assurance to the Appalachian counties about the stability and future of the ARC program and strengthen the Commission's position to secure adequate levels of funding. While it will not be easy to secure enactment of authorizing legislation, given the administration's opposition, it is a fight that should be fought. The pattern of funding a program year by year without the foundation provided by a long-term authorization leaves the program's future in constant doubt, which is damaging to the counties that depend and plan on it.

Our bill would extend the Commission's highway program through fiscal year 1992 and the nonhighway programs through fiscal year 1988. It would authorize $234 million for highway construction in fiscal year 1986 and a total of $2,056,000,000 through fiscal year 1992. This would enable the States to complete approximately 470 miles of additional highway construction in the region. The nonhighway program would be extended through fiscal year 1988 at an annual authorization of $75 million. Our bill is similar to the measure reported favorably by the Committee on Environment and Public Works last year with three exceptions. It would raise the Federal cost share for prefinanced highway projects from 70 percent to 80 percent, the same ratio as for the other Appalachian projects. Also, it would permit the ARC to supplement other Federal grant programs enacted by the Congress before September 30, 1988, and it would provide for a modest increase in flexibility for demonstrations of energy development. The Appalachian Governors have made recommendations for ARC funding during fiscal year 1986; our proposal is consistent with that request. This legislation is consistent, as well, with recommendations submitted to the Congress in 1981 by the Appalachian Governors.

Mr. President, the Appalachian Regional Commission program has been a great success story. But the progress of 20 years needs to be sustained, and the setbacks of the recent recession overcome. My cosponsors and I are grateful to all the Members of Congress who have repeatedly demonstrated their understanding that the ARC program is vital and is working. We hope that other Members will join us in securing the future of the ARC by supporting the legislation we introduce today.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at the conclusion of my remarks.

I also ask unanimous consent that any Senator who requests to be added as a cosponsor today be listed as an original cosponsor of the bill.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 847

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Appalachian Regional Development Act Amendments of 1985".

SEC. 2. Section 105(b) of the Appalachian Regional Development Act of 1965 (40 App. U.S.C. 105) (hereafter in this Act referred to as "the Act") is amended by inserting before the period at the end thereof a semicolon and the following: "and not to exceed $2,300,000 for fiscal year 1986; not to exceed $2,300,000 for fiscal year 1987; and not to exceed $2,300,000 for fiscal year 1988".

SEC. 3. Section 106(7) of the Act is amended by striking out "1982" and inserting in lieu thereof "1988".

SEC. 4. (a) Section 201(g) of the Act is amended by inserting before the period at the end thereof a semicolon and the following: "$234,000,000 for fiscal year 1986; $250,000,000 for fiscal year 1987; $270,000,000 for fiscal year 1988; $289,000,000 for fiscal year 1989; $312,000,000 for fiscal year 1990; $337,000,000 for fiscal year 1991; and $364,000,000 for fiscal year 1992".

(b) Section 201(h)(1) of the Act is amended by striking out "70 per centum" and inserting in lieu thereof "80 per centum".

SEC. 5. The first sentence of section 214(c) of the Act is amended by striking out "December 31, 1980" and inserting in lieu thereof "September 30, 1988".

SEC. 6. Section 302(b)(1) of the Act is amended—

(1) by inserting "and economic" after "energy" wherever it appears, and

(2) by striking out "$3,000,000" and inserting in lieu thereof "$5,500,000".

SEC. 7. The second sentence of section 401 of the Act is amended by inserting before the period at the end thereof a semicolon and the following: "$75,000,000 for fiscal year 1986; $75,000,000 for fiscal year 1987; and $75,000,000 for fiscal year 1988".

SEC. 8. Section 405 of the Act is amended by striking out "1982" and inserting in lieu thereof "1988".

Mr. ROCKEFELLER. Mr. President, I yield the floor.

APPALACHIAN REGIONAL COMMISSION

Mr. BYRD. Mr. President, I am pleased to join with my colleague, Senator ROCKEFELLER, in cosponsoring the Appalachian Regional Development Act Amendments of 1985.

I believe there is an urgent need for the continuation of this excellent program—a program of proven worth and accomplishment for the Appalachian States.

The Appalachian States are those 13 States with the most fragile economic bases, hardest hit by economic recession, and the slowest to recover as the economy turns around.

Mr. President, in my home State of West Virginia, unemployment was 15.9 percent earlier this year, down from a high of 21 percent a few months back.

The ARC Program is urgently needed in these 13 States, not only for the construction of highways, but for nonhighway programs involving economic as well as community development, development of the infrastructure system, and the enhancement of the quality of life. Nonhighway funds from this program have been generally used in West Virginia for water and sewer system development, industrial parks, vocational education, and health care projects. There is no alternative source of Federal funding that addresses the needs of Appalachia as well as the ARC. I would note, as well, Mr. President, that even with ARC funding the people of Appalachia still get, on a per capita basis, only 80 percent of the national average in Federal funding assistance.

This multiyear reauthorization which I joined in cosponsoring, to continue the ARC Program at an effective level, can allow for the planning and implementation of a program to meet vital objectives in an orderly and effective fashion, and to assist the citizens of these States to enjoy levels of economic recovery and a quality of life approaching that enjoyed by the rest of the Nation.

I might add, as well, that due to the leveraging nature of the program, with its matching fund requirements, and the fact that program decisions are essentially made at the State and local levels, it would appear that ARC should fit well within the present administration's goals of "New Federalism."

Since 1982, when the ARC Program expired, it has been kept alive—at least at a 50-percent reduced level—through the appropriations process, by those of us who were able to recognize the tremendous benefits derived by so many of our citizens from the program and its leveraging abilities.

Of the $5 billion total spent by the ARC since 1965, West Virginia has received $829 million—$641 million of which was spent for highway development, and the remainder for nonhighway programs. This $829 million has helped to bring into the State investments from other Federal, State and local programs, and private sector investments amounting to more than $1 billion.

The President's proposal to rescind fiscal year 1985 ARC money would cost West Virginia $16 million, $12 million of which are most urgently needed to continue work on the corridor G highway system—a system which could assist in opening up the southern portion of the State for economic growth and development.

The administration's recommendation for ARC, as reflected in the fiscal year 1986 budget proposal is zero. Under the provisions of the bill which I join in cosponsoring, West Virginia's highway share would be $37 million for fiscal year 1986, an amount which could provide for continued crucial work on the corridor G project.

Mr. President, I fully agree with the need to balance the Federal budget and reduce the deficit. However, I do not believe we can afford to abandon those irreplaceable programs of proven effectiveness, which are relatively small, and leverage funds from other sources, while impacting so greatly on so large a segment of our population. I, therefore, urge my colleagues to lend support for the early enactment of this legislation to extend the Appalachian Regional Commission's Program.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 12:30 p.m., with statements limited therein to 5 minutes each.

SENATOR WARREN RUDMAN

Mr. COHEN. Mr. President, each Member of Congress brings the gift of his or her diverse heritage and experience to the halls of debate and deliberation. Senator WARREN RUDMAN has added a very special quality to this institution. Perhaps it is due to his experience as a young Army officer on Pork Chop Hill or those when he was New Hampshire's hard-driving attorney general, but when in the presence of Senator RUDMAN, you have the sense that armed combat is about to begin.

He is not impressed with power or position if it travels unaccompanied by honor and honesty. I have watched him cut down organized crime's lawyers with a blistering crossfire of intelligence and anger. Dissembling corporate presidents and chief executive officers, who suffer from cases of accommodating amnesia, have encountered the same wrath from New Hampshire's junior Senator. He worships no golden calves.

His qualities of toughness, tenacity and fierce independence were on full display during a recent hearing held by the Governmental Affairs Permanent Subcommittee on Investigations involving money laundering by organized crime.

"It was New Hampshire's Senator WARREN RUDMAN at his inquiring, persistent, incisive, confrontational best," observed an editorial in the Manchester Union-Leader following the hearings. It was Senator RUDMAN, the editorial continued, who "adroitly unraveled" the testimony of a key witness and "boiled it down to its essentials."

Mr. President, whether in a foxhole or a Senate hearing, there is one person that I would want with me.

I ask unanimous consent that the editorial described above, "Give 'Em Hell, Senator," be inserted in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

GIVE 'EM HELL, SENATOR

(By Jim Finnegan)

It was New Hampshire's Senator Warren Rudman at his inquiring, persistent, incisive, confrontational best.

The scenario: Tuesday's session of the U.S. Senate's Permanent Subcommittee on Investigations, which currently is probing money laundering by organized crime.

The interrogator: Committee Vice Chairman Rudman.

The witness: William Brown, chairman of the Bank of Boston, which last month pleaded guilty to failing to report $1.2 billion in international currency transactions and was fined a record $500,000—a development that may have pounded the final nail into the coffin of interstate banking legislation in the New Hampshire House.

Brown had just testified that he had "no explanation" of why bank officials did not realize a 1980 change in federal regulations required banks to report all cash transactions exceeding $10,000, not just those involving individuals, a dereliction of responsibility that allowed two companies owned by the family of Gennaro Angiulo, reputed head of the most powerful organized crime network in New England, to have multi-million dollar dealings with the bank that went unreported.

Visibly perturbed by Brown's casual attempt to exculpate bank officials by attributing the violation of the law designed to prevent money laundering to poor judgment and carelessness, rather than a desire to help organized crime, Rudman shot back that he couldn't believe the bank didn't know what was going on when:

". . . People who were known to everyone—including the shoeshine boy at the Boston Garden—to be notorious members of organized crime could bring literally bags of money into the bank and get them exchanged for cashier's checks, which were then deposited in another Boston institution in their own account."

Concerning which Brown could only resort to the old error-in-the-shipping-department dodge: "Senator, I must have asked that question over and over and the only explanation I can give . . . is that the branch manager thought they were entitled to remain on the list . . ."

In other words, Brown's contention is that, unlike Rudman's allegorical street-smart "shoeshine boy," the chain of command beginning with lower echelon bank employes is composed of people so street-dumb that not one of them thought to question and pursue through channels the propriety of these dealings with identified and identifiable Mafia operatives! If all involved were that naive, one wonders how they could possibly have been allowed to serve in such positions of trust, and why bank officials have stated that they intend to take no disciplinary action against anyone.

If Brown's testimony is to be accepted uncritically, the problem, then, was not one of poor judgment or carelessness but of complete incompetency—or worse.

As the testimony became even more bizarre it was Rudman again who adroitly unraveled it and boiled it down to its essentials. Dan Dorman, vice president in charge of deposit operations, testified that he didn't recall any bulletin from Comptroller of the Currency, T. Todd Conover, signifying any change in transaction reporting procedures. According to Dorman, the bulletin, which eight bank officials initialed, "sat in the bottom of an inbasket and was not reflected on for 10 months."

For his part, Conover said the bank examiner who looked at the Bank of Boston in 1982 was unfamiliar with regulations regarding the reporting of international currency transactions of $10,000 or more. He blamed it on a lack of training.

But, to his credit, Rudman wouldn't buy it:

"I suppose if a New Hampshire State Police officer passed a body in the gutter with two bullet holes in the forehead, did nothing about it, and told the State Police colonel that he didn't know there was a law against homicide, I suppose that was a lack of training too. . . . You've got examiners going into the Bank of Boston not even knowing that a billion dollars in currency transactions are required to be reported. You say that's a lack of training. I say that's gross negligence!"

The problem, we fear, is—as President Reagan is wont to say—you ain't seen nothing yet. The committee is now focusing on whether or not there was money laundering in the Bank of Boston case.

Ah yes, now will those critics who accused The Union Leader of blowing the Bank of Boston affair out of proportion during the debate on the interstate banking bill kindly step forward and repeat the charge?

THE IMPORTANCE OF PRESIDENTIAL DEBATES

Mr. EAGLETON. Mr. President, perhaps no other factor is as significant in providing the American public with information on which to base their choice for President as live, unrehearsed debates between the nominees. Jim Johnson, a thoughtful and serious student of the American political system as well as an accomplished political strategist—most recently chairman of the Mondale campaign—

argues persuasively in the Washington Post of Tuesday, April 2, 1985, that debates should be made a permanent part of each Presidential election. Because he brings a unique experience and insight to this question, I think his comments deserve the consideration of the Congress, party leaders, future candidates, the media, and all other individuals and groups interested in future Presidential elections.

I ask unanimous consent that Mr. Johnson's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 2, 1985]

MAKE DEBATES A PERMANENT FIXTURE

(By James A. Johnson)

With the second Reagan inaugural more than two months old and the next Iowa presidential caucus and New Hampshire primary nearly three years away, we are as close as we ever get to a "down" period in presidential politics. And right now is the time to institutionalize presidential debates for the 1988 general election and all future presidential elections.

The experience with presidential campaigns and debates since 1960 tells us two important things.

First, the American people value very highly the chance to catch a glimpse of the candidates for president without the producers, directors and puppeteers who always surround them. The degree of public interest is demonstrated by the massive audience for the recent debates.

Second, efforts of presidential campaigns to control their television message have intensified. The techniques of the Nixon campaigns in 1968 and 1972, which were the subject of exposés at the time, are today more and more commonplace. Each day a single prepackaged, carefully controlled image is prepared for the voters.

Debates are welcomed by the voters because they are the most effective antidote to this trend toward more and more candidate-packaging. The 90 minutes of hand-to-hand combat in a debate expose new dimensions of the candidates and provide a significant test of each candidate's knowledge, judgment, humor and ability to make an effective argument.

The value of the debates does not lie in how many votes are changed. The debates provide the best opportunity for voters to confront the strengths and weaknesses of the two candidates in a manner they may escape merely by trying to follow the day-to-day political coverage on the evening news.

Further, the debates generally give the candidate who is trailing a chance to reopen consideration of his candidacy. Events that prolong consideration of the alternatives are healthy for a democracy.

Last August and September, as chairman of Walter Mondale's campaign, I negotiated for several weeks with representatives of President Reagan over the number, timing and format of the 1984 presidential debates. Fortunately, those negotiations led to two presidential and one vice presidential debate. In 1964, 1968 and 1972 similar negotiations either never occurred or led to no agreement and no debates.

In my opinion leaving the decisions about when, whether, and how to debate to the two nominees in the post-convention period does not adequately protect the interests of the voters. In 1960, 1976, 1980 and 1984, there were 4, 3, 1 and 2 debates respectively. In 1964, 1968 and 1972 there were none.

When there were debates, the length, timing, format and venue were the subjects of endless bickering and in the end were determined by the candidate who had the least political need to participate in the debate. Surely this is not the best way to organize such important events.

Now is the time to institutionalize presidential debates. President Reagan cannot seek reelection. A large number of potential candidates in both parties is likely. The only certainty to the nominating process is that it will grow longer and longer. And perhaps most important, the candidates are more susceptible to broad-based political pressure early in the process than later. Clearly, we should take this opportunity to make presidential debates a permanent part of the political landscape.

I propose that we create a broad bipartisan effort to get all candidates for president in 1988 to declare at the moment they announce their candidacies that they are prepared to participate in general election debates if they get the nomination. In addition, each candidate would agree to participate again in 1992 if elected president in 1988.

There should be a program of three presidential debates and one vice presidential debate. The presidentials should be held on the fourth Sunday of September and the second and fourth Sundays of October. The vice presidential debate would be held during the same period. The length of each debate would be 90 minutes.

We have an unusual opportunity for the leaders of the two parties to join together, for labor and business to work together, for good-government groups of all kinds to come forward, and even for Congress through joint resolution to help guarantee presidential debates. We can build a force that is formidable indeed. We can make an offer no candidate for president can refuse. No laws need to be passed, no minor fights need divert us. This is plainly and simply a political opportunity for those of us who believe presidential debating is important. Let's get to work.

THE SMALL BUSINESS ADMINISTRATION

Mr. COHEN. Mr. President, the ability of the U.S. economy to generate new jobs is the envy of the world. While the nations of western Europe lost some 2 million jobs in the last decade, over 20 million new jobs were created in the United States. Many of these new jobs were created through the start up and expansion of small businesses, and many of these small businesses would never have gotten off the ground without assistance from the Small Business Administration.

Recently, British Prime Minister Margaret Thatcher visited our country. According to the newspaper USA Today, Mrs. Thatcher returned to Great Britain eager to start a small business agency modeled after our SBA. Interestingly, the article goes on to say that while President Reagan was calling for the elimination of the SBA, his staff and Cabinet officials were telling Mrs. Thatcher how important small businesses are in creating new jobs during a recession. I understand that Scotland, West Germany, and even Japan are studying the SBA to see if they can emulate its success in their own countries.

It is incomprehensible to me that David Stockman is advocating the complete elimination of the one Federal agency solely designed to aid, counsel, and protect small business. Mr. Stockman has even described SBA as a $1 billion rathole—a characterization that I find uninformed at best. His remarks are insulting to the dedicated employees of the SBA, and do a terrible disservice to SBA clients in Maine and the hundreds of thousands of small business people across the country.

Mr. Stockman says that less than 1 percent of all the Nation's businesses have been helped by SBA. That statement is just not true. As pointed out by my colleagues Senators WEICKER and BUMPERS, only 4.5 million businesses ever have to borrow money from commercial sources. SBA is currently servicing approximately 235,000 loans. Allowing for some businesses which have more than one loan outstanding, SBA, by my estimation, is providing financing to around 5 percent of the small businesses which will borrow money sometime during their lifetime.

SBA was not created to supplant the traditional role of the commercial banks in the country. Instead, SBA provides financial assistance to companies that have a reasonable chance of success, but are denied a loan from commercial sources. Often the typical SBA borrower may not have the necessary collateral for a commercial lender. Perhaps the business venture is new and untried, therefore discouraging traditional lenders. Maybe the bank needs a guarantee so that the loan could be sold in the secondary market. In other cases, the bank is willing to provide only short-term funding where the needs of the borrower require long-term capital.

Servicing this need for long-term capital is where SBA has proven most valuable. A recent GAO survey of 8,900 banks found that SBA was involved in 35 tp 40 percent of all long-term lending to small businesses. It is clear to me that SBA fills this role very well.

When I travel in my own State of Maine, I know the chances are good that most small manufacturing or processing facilities that I visit are receiving SBA assistance in one form or another.

Last year, Maine's SBA district director and I visited Ted Starret's Penobscot Frozen Foods plant in Belfast. Ted produces a baked, stuffed frozen

potato that you have probably seen in your local supermarket. Last year, Ted wanted to expand his facility to produce and market potato skins, once an unusable byproduct of the potato industry, but now a highly sought after appetizer. When money was needed immediately to take advantage of this booming new market opportunity, SBA provided the loan guarantees needed to convince Ted's bank to make the loan.

Twelve years ago, a young man named Roger Michaud left Georgetown University to return to this native Lewiston. Roger had little money, but an idea for a terrific device to conserve energy in homes and businesses. Again, it was SBA that provided the original backing for American Stabilis which now boasts yearly sales in excess of $20 million, including growing markets in Europe and Japan.

There are literally hundreds of success stories, in Maine, and thousands more across the country, in which the SBA stepped in and provided financial assistance at critical times. But SBA does much more than provide financial assistance. Nationally, SBA has provided management assistance to some 3 million companies in just the last 3 years. Last year in Maine, some 3,000 business people received SBA counseling, with an additional 4,000 attending SBA training seminars.

Maine's small business development center provided much of this assistance. The SBDC is headquartered at the University of Southern Maine at Portland and works through a statewide network of six development organizations. Every day, Maine's business people can go to a location nearby and receive practical guidance on how to operate their businesses more effectively and more profitably. In addition, Maine is fortunate to have some 200 active SCORE [Service Corps of Retired Executives] volunteers who are willing to lend their time and experience to help young aspiring entrepreneurs learn the ropes.

Seven Maine colleges and universities are part of SBA's Small Business Institute Program which allows teams of college students to spend a semester helping business people with specific problems. These students may do a market survey for a new product, a computer need analysis for a fledgling business, or even develop an effective cost accounting system tailored to a particular company's need.

All of these management assistance programs are coordinated by SBA personnel. SBA also provides valuable assistance in exporting, surety bonding and Government contracting.

In the State of Maine, SBA runs interference for small businesses which have problems with Government regulations and redtape. If Pete Howell of Downeast Machines in Bridgton had not received an SBA guarantee called a certificate of competency, his company would have lost eight Government contracts to higher bidders, resulting in tens of thousands of dollars in additional cost to the American taxpayer.

Mr. President, David Stockman's statements that the economy would be strengthened and the budget deficit reduced by the elimination of SBA just don't stand up. Much of OMB's savings would be accomplished by auctioning off SBA's portfolio for 19 cents on the dollar. My colleagues have already noted that this going-out-of-business sale would cost the taxpayer over $7 billion. In this time of rising budget deficits, adding $7 billion to that total just doesn't make sense.

I believe a more rational approach toward budget reduction is being taken by Senators WEICKER and BUMPERS in their bill, S. 408, of which I am a cosponsor. This multiyear authorization bill would save $725.7 million in outlays over the next 3 years by eliminating the bulk of SBA's direct lending programs, eliminating the nonphysical disaster program and freezing all salaries and expenses for the lending and management assistance programs. This approach will leave the SBA a leaner, more cost-effective agency, still capable of providing badly needed services to America's small businesses.

Mr. President, in closing, I urge my colleagues to reject the administration's ill-advised recommendation to eliminate the Small Business Administration. Instead, let's restructure this agency so that it can continue to do the job it has done so well over the years—providing needed assistance to America's small business community.

WHAT MADE AMERICA GREAT

Mr. HECHT. Mr. President, few historians will quarrel with the statement that the United States along with her sister republic, Canada, has delivered to such a large population over a period of 200 years the highest standard of living the world has ever known.

Why has Canada and the United States enjoyed such bounty and the rest of the New World from our border southward hasn't done well at all?

Some people give various answers—a long coast line, good seaports, abundance of raw materials, an energetic population, a good educational system, a temperate climate—rich soil and good rainfall, rivers for irrigation, good water transportation, capitalism, democracy, morality, and more.

But all of these things can be found elsewhere. There is only one concept that is unique to the United States and Canada that explains our prosperity.

Freedom—the capitalistic economic system coupled with freedom from an oppressive government is the secret of our success.

When your government allows its citizens to go into business and get rich, the wheels start to turn immediately. Capitalism is known in all countries south of the border but government restrictions and bureaucratic redtape has stifled their economies and the good life for all but a chosen few.

Of course things haven't always been as good in our country as they are today because the technology was not yet invented that has led to our easy life. But United States of America has always been the land of milk and honey and people proved it, indeed are still proving it by picking up their families and moving here.

But as good as things have been, it is not a perfect system. Everyone isn't rich and some people are hurting. In order to improve on our system some people want to make a law to cure these unequities. So little by little, pressure is put on government to either run the business of the Nation or tell the business how it must do certain things. It's called socialism. It's the only other economic system and for 6,000 years or recorded history socialism has never delivered to its people for very long a decent standard of living.

For 90 years now the socialists have been getting stronger in America and putting more restrictions on business. It doesn't matter whether business is restricted by a czar, or a tyrant, a madman, or a bureaucrat elected by the people, the result is just the same. The wheels start to slow down.

We may have reached that point. The purchasing power of the average American is down about 1 percent this past decade even though the dollars are worth more and we've hardly noticed the decline.

It's easy and popular to cuss business. Almost everybody has been sold a rotten cantaloupe, paid for a repair job that was faulty, or had some quarrel with a businessman. That is no reason to kill the system that lays the golden egg.

There is need for the average citizen to understand business. Socialism seems to be taught in the universities, if not actual dogma in classes then by association with most of the liberal thinkers in America.

Business needs a forum to get the other side of the story across.

The beginning of such a way surfaced last year in our State. It is called Business Week. High school juniors are invited to the campus of the University of Nevada—Reno for 1 week in June for a seminar on business. All expenses including board are paid for the student if he is accepted. He gets a taste of college, a course on American business, and the camaraderie of a

group of his peers. Those who attended from Battle Mountain last year spoke highly of their experiences.

The people sponsoring the programs—which included about 20 merchants and other interested people in Battle Mountain—would like to expand the program this year.

It does take money, as do most things nowadays. The cost per student is $195.

We believe this is a worthwhile program and urge all businesses in Battle Mountain to contribute to it. We also think for those that are not business people it is a worthy cause because we all have to live with the system—forever, I hope—and young people who will soon be our leaders should understand it.

On Monday, March 18, at 6:30 p.m., Mr. Max Chilcott from Hawthorne will be at Battle Mountain High School to make a presentation for Business Week. His presentation will include a film of last year's events.

Anyone wishing to make a contribution to this effort can contact the office at the high school, Battle Mountain Auto Parts, or any member of Women in Mining.

TENNESSEE VETERANS LOSE A GOOD FRIEND—EDWARD I. BROWN

Mr. SASSER. Mr. President, last month veterans in Tennessee and across the Nation lost a dedicated friend with the passing of Edward I. Brown of Shelbyville, TN. At the time of his death, Ed was the national vice commander of region 4 for the Military Order of the Purple Heart. He was also former Tennessee department commander for the Disabled American Veterans. He held 23 service medals, serving in the Korean conflict and in the Battle of the Bulge in World War II.

Ed Brown was a tireless worker for the American veteran. As a veteran service officer for the DAV's in Tennessee, he spent many hours each week helping his fellow veterans obtain proper benefits and medical care at the VA hospitals in Nashville and Murfreesboro.

I will miss Ed Brown as a close and dear friend, and Tennessee veterans will miss his constant voice in their behalf.

JOB TRAINING AND VOCATIONAL EDUCATION: IS IT TIME TO LOOK AT THE FEDERAL ADMINISTRATIVE SYSTEM

Mr. QUAYLE. Mr. President, in the last 3 years, Congress has revised the laws governing job training, vocational education, and the Employment Service in order to make them more responsive to the Nation's needs by increasing the investment of the private sector and by promoting coordination among related activities at the State and local level.

While these laws mandated administrative changes at the State and local level, they did not change the Federal administrative structure. It seems appropriate, at this time, to examine whether the principles that underlay these changes are also applicable to the Federal Government.

As Chairman of the Subcommittee on Employment and Productivity, I am announcing the intention of the subcommittee to explore this issue, first informally and then through hearings.

ROLE OF THE PRIVATE SECTOR

In the Job Training Partnership Act [JTPA] enacted in October 1982 as Public Law 97-300, the private sector is given a major role in decisionmaking by its majority on the private industry council as well as by its representation on the State job training coordinating council. In the contemporaneous amendments to the Wagner-Peyser Act governing the Employment Service, private industry councils are also given a role in the planning of Employment Service operations. In the Carl D. Perkins Vocational Education Act enacted in October 1984 as Public Law 98-524, the law mandates a State council with a majority of members from the private sector who may significantly influence the design and administration of programs.

Congress provided for participation by the private sector under these statutes on the basic theory that these programs are labor market oriented and that the private sector knows best what is needed in the labor market. It is the customer, not the shoemaker, who can best tell whether the shoe pinches.

The fundamental question is whether that theory is also valid at the Federal level and this is an appropriate time to examine the question of whether we should provide for private sector participation in the administration of labor market related programs at the Federal level.

Issues that deserve particular attention are: What is the appropriate role for the private sector in the Federal administration of labor market related programs? Should the private sector participate in decisionmaking as it does with the private industry councils under JTPA, should it review plans formulated by governmental agencies as it does under the Vocational Education Act, or is some other role appropriate at the Federal level?

The issue of private sector involvement in the administration of Federal programs may raise questions of constitutional law relating to delegating governmental functions to nongovernmental agencies. However, many forms of governmental private sector cooperation have been developed within this structure—from advisory councils to quasi-governmental corporations. The Subcommittee on Employment and Productivity is interested in exploring what devices might be suitable for the administration of labor market related programs.

COORDINATION

The Job Training Partnership Act, the Wagner-Peyser amendments, and the new Vocational Education Act also provide mandatory devices to promote coordination among labor market services, training, and education at the State and local level. Such devices are not provided for at the Federal level.

Again it seems to be an appropriate time to look at the issue of whether coordinating devices are necessary or desirable at the Federal level. Such devices could range from consolidation of administration in a single entity to exhortations to the appropriate departments and agencies to engage in better communications. The involvement of the private sector may, in itself, provide a coordinating mechanism if it influences these separate programs to move in a similar direction.

The basic coordination problem at the Federal level arises from the split between the functions of agencies with responsibility for related labor market programs. The Departments of Labor and Education were split by the Manpower Development and Training Act, described in the committee reports as an elaborate treaty between the employment security and vocational education systems. Regardless of the merits of that split in 1962, the subcommittee is interested in views as to whether it still makes sense to split the administration of these programs at the Federal level.

The Work Incentive Program [WIN], administered by the Department of Health and Human Services, points to a further fragmentation of the administration of related labor market programs. Education and welfare programs were separated when education was taken out of the Department of Health, Education, and Welfare and the separate Departments of Education and Health and Human Services were established.

Perhaps for a model, we should look back to 1917, to the precedent of the Federal Board for Vocational Education. This Board consisted of the Secretaries of Agriculture, Commerce, and Labor; the Commissioner of Education; and representatives of manufacturing, commerce, agriculture, and labor. It had responsibility for approving State plans for Federal funding under the Smith-Hughes Act.

FOREIGN EXPERIENCE

In examining these issues, it may be instructive to look at the experience of other industrial countries which have

experience with different forms of administration.

A number of industrialized countries have combined their job training, vocational education, and employment security systems under a single entity with a tripartite directorate consisting of representatives of Government, employers, and employees. This would appear to provide both for private sector participation and for coordination. While the basic constitutional and legal structure of these countries is different from ours, the subcommittee would be interested in finding out whether this foreign experience has lessons to offer us.

In this regard, an area which the subcommittee is particularly interested in reviewing is the way other countries finance training and vocational education and the administrative structure used to achieve coordination.

Persons having suggestions or desiring to testify are advised to contact Renee Coe at the U.S. Senate Labor and Human Resources Committee, Subcommittee on Employment and Productivity, room SD-428, Dirksen Senate Office Building, Washington, DC 20510, (202) 224-6306 or 5623.

THE ADMINISTRATION OF EMPLOYMENT AND TRAINING PROGRAMS

Mr. KENNEDY. Mr. President, I want to indicate my support for Senator QUAYLE's proposal to take a fresh look at how we administer employment and training programs. The first results are in from the evaluations of the Job Training Partnership Act, and the news is very encouraging. The partnership we envisioned between business and Government at the local level seems to be working. I believe it is now time to examine the Federal role. There currently are several agencies with responsibility for overseeing Federal training programs directed at populations similar to those served under JTPA. The Departments of labor, Education and Health and Human Services all have some responsibility. We have called for coordination and consolidation at the State and local level but have done nothing to streamline Federal operations.

I also think it is time to consider turning employment and training policy over to the experts. Preparing our work force is going to be one of the most important challenges facing our country in the years ahead. Over the last several years we have seen dramatically different approaches to dealing with this problem. We have also witnessed substantial swings in funding for employment programs. These shifts in policy and resources are the result of changes in political leadership but they do not necessarily reflect the investments or policies that are needed to prepare our future work force or retrain workers in the skills that are needed now.

I believe we must have greater involvement of industry and labor in setting our future course. The private sector is in the best position to predict skill shortages, recommend the investments that will be needed and design the training that will satisfy the demand.

I believe we should also look to the experience of our counterparts in Europe. In Germany, Sweden, England, and elsewhere, business and labor are working together with government to insure a constant supply of skilled workers who are trained in state-of-the-art programs. While Europe envies our ability to create new jobs, I believe we have a great deal to learn from them about training our work force.

I applaud the review Senator QUAYLE is undertaking and I look forward to working with him.

JOB TRAINING AND EDUCATION PROGRAMS

Mr. HATCH. Mr. President, Senator QUAYLE has a well deserved reputation for good, thoughtful ideas which challenge the established assumptions on which the Federal Government too often rests. Recently, he has found another area that could rightly use some examination by the Congress; that is, the role of the private sector in making Federal policy. We have already enlisted the assistance of the private sector as a full partner in job training and education programs. We have relied upon the private sector for advice in procurement, planning and evaluation in the form of our Federal advisory boards and commissions. The Grace Commission is a sterling example of the fact that the private sector sees flaws and pitfalls which elude the nearsighted notice of public sector planners.

As usual, Senator QUAYLE's question is a good one: If our view that the private sector improves the quality and expands the scope of local employment and education programs is correct, then why should we not increase the private sector's presence in Federal administration and policymaking? Clearly, any move to incorporate a formal system of private sector participation in any policy arena, beyond the existing advisory councils, should require painstaking consideration, including extensive hearings, to determine all the ramifications of not only the specific plan, but also the concept itself. For example, the idea raises constitutional questions which ought to be addressed. Also, the distinction must be drawn that it is one thing to invite the private sector into Government decisionmaking, but it is quite another thing to permit Government into private sector planning and decisions. The privatization of Government ought not to become the federalization of business.

However, I agree with Senator QUAYLE that the Congress often spends too much time on the minute details of Federal programs and policies and not enough time examining the larger picture. There is no better time than the present for the Senate Employment and Productivity Subcommittee and its innovatively-thinking chairman, Senator QUAYLE, to give this subject the oversight attention it deserves.

TRIBUTE TO WARREN MAGNUSON ON HIS 80TH BIRTHDAY

Mr. JOHNSTON. Mr. President, along about now in a new Congress, the pace of events begins to quicken and we grow so busy thinking about the present and the future that we are inclined to forget how the country got to this point in time.

Today, in commemorating Warren Grant Magnuson's 80th birthday, we must acknowledge that any number of the good things that have happened in the United States happened because of him: Educational television, the public accommodations provisions of the Civil Rights Act of 1964, the Animal Welfare Act, Coastal Zone Management—so important to my State of Louisiana—and most significant of all, the development of NIH and the National Cancer Institute.

During his 36 years in this body, he was a man to match the hour and we were fortunate to have him. He has been fortunate, too. Not every legislator goes home to his beloved State knowing that he has been instrumental in bringing the gifts of life and health to his fellow citizens. Thank you, Maggie. Happy birthday.

A TRIBUTE TO WILLIAM D. SELLERS, JR.

Mr. HEFLIN. Mr. President, I would like to take just a few moments today to share with my colleagues an article written about an Alabamian who describes himself as "a pretty good truck driver and a part-time banker," William D. Sellers, Jr., chairman of the board and chief executive officer of Birmingham's Baggett Transportation Co.

Bill Sellers is, in reality, much more than is illustrated by that modest description. Since 1946, only 5 years after he joined the company, he has owned Baggett Transportation. In that time, the company has grown from one that operated only in Alabama, with 19 trailers, to one that operates in 48 States, with 900 trailers. Besides hauling explosives, ammunition and blasting supplies for the De-

fense Department, and for commercial manufacturers, Baggett also own the Hertz truck rental and leasing operation for the Alabama and gulf coast areas.

Under Sellers' leadership, Baggett has built an outstanding record in their operations. They are extremely conscious of safety and service. This belief has been adopted from Bill Sellers, for his personal philosophy of success is predicated on the importance of good service.

In addition to his work with Baggett, Sellers is chairman of the board of First Alabama in Birmingham and a director of its statewide holding company, First Alabama Bancshares, Inc.

Bill Sellers is also a tireless fundraiser and alumnus of his alma mater, the University of Alabama. He was one of the founders of the university's chair of transportation, and, although he was a chemistry student, he has engaged in multiple endeavors on behalf of the College of Commerce and Business Administration.

Bill Sellers' major recent activity on behalf of the university has been his service as general chairman for the Sesquicentennial Campaign, conducted in conjunction with the university's 150th anniversary in 1981. The campaign, which ended in September of 1984, had a fundraising goal of $38.4 million. Under Sellers' leadership, the total raised was $61.8 million. For his efforts, he was honored as the outstanding civic leader for 1984 by the Alabama chapter of the National Society of Fundraising Executives, and was named a distinguished alumnus at the university.

William Sellers has also been involved in civic work on behalf of the Eye Foundation Hospital in Birmingham, of which he is a trustee and past board member. Among the many other organizations he has worked with are the Boy Scouts, the Crippled Children's Clinic, and the Charley Boswell Celebrity Golf Classic.

Mr. President, it is easily apparent that Bill Sellers is a man who makes things happen. From his days as an undergraduate at the University of Alabama, when he simultaneously held down jobs as a building monitor, a grocery store representative, a furniture store representative, and one in the athletic department, he has been an overachiever. His success in recent years with Baggett Transportation and his other ventures has only been a byproduct of his hard work and determination. It is a pleasure to be able to count on him as a friend, and to share some details of his story with my colleagues.

Mr. President, I ask unanimous consent that an article from the Alabama Trucker magazine be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A PRETTY GOOD TRUCK DRIVER, A PART-TIME BANKER: WILLIAM D. SELLERS, JR.

(By Nancy Callahan)

Typically, trucking magnates get their start with this proverbial one-truck fleet. They scrimp and save for that second truck and the one after that, till they rise to the top with their own personal empires.

The background on William D. Sellers, Jr. is far different. As chairman of the board and chief executive officer of Baggett Transportation Company in Birmingham, the highly-regarded Sellers may well be the only big-time trucking figure in the state who did not start at rock bottom.

"I guess I was the first one around this part of the country with a college education that got into the trucking business," says Sellers from behind the desk in his Magic City office. "I don't believe there are any others. I started with a company that was already going, took over its management and operation, and developed it to where it is today."

This is not to say Sellers started at the top. Neither are his origins of the silver spoon variety. True, his father was a doctor, but Depression times were hard and the elder Sellers was paid mostly in foodstuffs and other material goods rather than with hard cash. Maybe that's why young Sellers developed earlier than most his abilities as a visionary, someone who can combine creativity with hard work to make immediate money.

Born in Anniston on June 13, 1913, Sellers moved to Birmingham at age four.

"My father was a general practitioner and a surgeon," he begins, "and in those days, people didn't have money to pay doctors' bills. We had plenty of food and clothing and a roof over our heads, but there wasn't any money."

When time came for Sellers to enter college and fulfill his father's dreams by studying medicine, it was 1931 and the heart of the Depression. He entered The University of Alabama on a scholarship played on the same freshman football team with Paul "Bear" Bryant, and worked his way through school. As a pre-med chemistry major in Arts and Sciences, William was the busiest young man in Tuscaloosa.

"I was a monitor of Gorgas Hall," says Sellers, whose soul literally sparkles when he talks of his days at the UA. "I had to take care of the building, see that they had hot and cold water, and that the furnace was fired. I got free room for that.

"And then I was campus representative for the Atlantic and Pacific Tea Company, the grocery store chain. They had a big store right on the edge of the campus. I solicited business from the fraternities, the sororities and the boarding houses. They would buy their groceries and meats from A and P.

"I worked for the Athletic Association and I represented a furniture store downtown. I would sell furniture to fraternity and sorority houses. I also represented a florist, selling corsages to all the parties."

Having received his pre-med degree in 1934, Sellers spent the next year in medical school at Tuscaloosa, continuing his industrious role as a student working his way through college. At year's end, he transferred to med school at Tulane. He stayed all of two weeks, dropped out and broke his family's heart, but set the stage for what ultimately would lead to one of the most impressive business enterprises anywhere.

Sellers became involved with White Motor Company, a Cleveland, Ohio-based business that manufactured trucks and buses; and the Coca Cola Company, which at that time owned White and Studebaker. The father of one of Sellers' Birmingham friends was a vice president of White and close to the Coca Cola network.

"So when the Rose Bowl Special rolled out of Tuscaloosa in December, 1934, going to California, I had an advertising contract giving away free Coca Colas."

When he came back, he completed his stint in medical school in April, 1935, then transferred to Tulane the following September. But Sellers was broke. He knew he couldn't work, make a living and stay in school, so he took a job in New Orleans selling trucks and buses for White Motors.

He came back to Birmingham and continued with White as an Alabama salesman, a two-year activity. He was transferred to Houston but wouldn't go, so the up-and-coming salesman signed on with Pan American Petroleum, a division of Standard Oil of Indiana. He called on cities, counties and education boards across the state, selling a host of petroleum products.

BAGGETT CHANGED HIS LIFE

One day in 1941, Sellers happened to call on one of his customers to whom he had been selling tank cars of gasoline. The event changed his life, because the customer was Baggett Transportation Company.

He not only was offered a job but part interest in the company. Just before Pearl Harbor, on December 1, 1941, Sellers' name was added to the Baggett payroll.

"And I've been here ever since."

Only five years after he joined Baggett, William Sellers bought full control of the company.

"When I went with 'em, they only had about 19 trailers and 15 or 20 power units. And I only did business intrastate, in Alabama."

Today, Baggett operates in 48 states, hauling explosives, ammunition and blasting supplies for the U.S. Defense Dept., and for commercial manufacturers. It also hauls general commodities. Currently, the company operates 900 trailers with an equivalent number of power units.

It now has only 76 employees, but uses several hundred independent contractors.

"They lease to us under long-term lease, pull our trailers, operate under our flag and we direct the safety of their operation nationwide."

Sellers says this approach is not unique.

"A lot of the carriers today—Deaton, Malone and various others—resorted to independent contractors because it gives a man an opportunity to be in business for himself, owning his own unit, driving and operating it."

TRUCK LEASING BUSINESS

Since Sellers took the helm, all Baggett has done is grow and prosper. In December, 1981, for instance, Baggett purchased the truck rental and leasing operation of Hertz from RCA for the State of Alabama. Then in 1983, Baggett purchased the Hertz truck rental franchise and operation from Hertz-Penske, which included New Orleans, Baton Rouge, Biloxi, Gulfport, Mobile and Pensacola.

These two corporations—Truck Rentals of Alabama, Inc., and Truck Rentals of Louisiana, Inc.—are now leasing and maintaining a total of 1,350 trailers and power units. As

part of these rental operations, the company has 15 service facilities scattered across the Southeast.

In addition to the leasing facility, Baggett operates TRA Truck and Trailer Company, Inc., in Dothan, a sales and service company. Its major manufacturer is Trailmobile.

But enough about Baggett and more about the man in charge. He boasts of no special philosophy but strongly believes in proper service.

"Give good service and satisfy your shippers and you'll continue doing business with them. You'll continue to grow with them. If you don't give them good service, you won't get the business. So we've tried to do a good job of delivering promptly and on time.

"A lot of these explosive ammunition deliveries have to be time deliveries. It takes good supervision and good teamwork to get the job done."

Sellers takes the most pride in Baggett's service record with commercial explosive manufacturers and the U.S. Dept. of Defense. In September, Defense ranked Baggett fifth nationwide in sales and service.

As Sellers tells it, "That covers a lot of ground—the Army, Navy, Air Force, Marines, and the Coast Guard."

The Baggett offices at 2 South 32nd Street ar brimming with awards: Red Cross blood drives, other charities and safety commendations. Sellers is very safety conscious.

"Our people have been well-trained and they've done an excellent job. Consequently, we've been self-insured with our own insurance for several years now. We give bonuses to our drivers for safe operations, and we encourage them not only to protect themselves, their cargo and equipment, but the public at large, because if we allow an accident to occur, we're paying the bills."

Thanks to Sellers' leadership Baggett turnover is virtually nil. Most of his people have been with him from the start. Howard Durden, former vice chairman of the board, who once was president of ATA, retired in July after 39 Baggett years. Sellers' secretary, Lucille Thomas, has been on board 41 years while company president and chief operating officer Tom Sinclair came in 1952.

"We've got a good retirement program and a good profit-sharing program," says Sellers, whose calm soft-spoken manner belies his honor-roll accomplishments. "Once our employees get involved and realize what they've accumulated for their personal accounts, they don't want to leave. They stay."

A lot of them stay because they like William Sellers, or "Mr. William," as he is called by many.

("I don't know why they put that 'Mister' to it. I guess it's because of my gray hairs.")

There is Miss Thomas, for example, who likes her job so much that she wonders where the years all went.

"He is very even-tempered and a gentleman of the first order," she says of her long-time boss. "He is well-respected by all of the personnel and members of the executive body, a man who tries to be fair with everyone. He is very meticulous in his person, and in the properties and equipment he owns. Everything has to be top drawer."

CONCERN FOR EMPLOYEES

President Sinclair adds that Sellers has intense compassion for all the Baggett employees.

He's always interested in the personal well-being of us all. On every occasion where I can recall anyone has had a personal problem of any kind, he was one of the first ones there to lend his assistance. He's just a concerned person."

One of the newest additions to the Baggett roster is Joe Donald, a recent graduate of Wofford College in South Carolina, who is "in training" with the company. Sellers and his wife, Virginia, have two daughters, Forsyth Donald and Mary Crommelin—both married to doctors—and seven grandchildren. Joe Donald is one of the grandchildren, so Sellers is waiting with special interest to discover the talents and possible company commitments that may be unleased by this young man.

Owning Baggett would be plenty for most folks. Not William Sellers. He's a banker, a golfer, a fundraiser and a tireless alumnus of his alma mater—all of which could be perceived as full-time jobs.

Not only is he a director of First Alabama Bank of Birmingham and First Alabama Bancshares, Inc., but Sellers is chairman of the board of the Birmingham banking entity. He says he evolved as a banker through mutual needs: He could help them and they could help him.

"I had to have a place to borrow money," he smiles. "So I got involved with 'em that way. I paid all my debts over there and I guess that's the reason they took me on their board. They figured I could help them, which I've tried to do. I'm now chairman of the board of the First Alabama Bank in Birmingham.

BEGINNING BANKER

"Many years ago I bought stock in the old Exchange Bank, started at Five Points South. That was the beginning of First Alabama Bank of Birmingham. Of course, now it belongs to the statewide holding company, First Alabama Bancshares."

And now about the golfing. If you didn't know Sellers but were to read his resumé, you'd find out quickly what golf means to this former three-term president of ATA (1948–51). Sandwiched between all those professional activities, honors, directorships and charity work is the fact that he has acquired five holes in one, the last of which was in 1978, on the 13th hole of the West Course of the Birmingham Country Club.

It is told on Sellers that once a week he leaves his duties at the office in exchange for "golf day" at the club. They say that on golf day, he is so far removed from the goings on at Baggett that he might as well be on the moon.

WORTHWHILE PROJECTS

At 71 and looking a decade younger, William Sellers hardly is an "old man". Maybe it's because he's involved in so many positive and worthwhile projects.

Tulane should feel badly that it didn't try to keep Sellers longer than two weeks, for his allegiance to Alabama has profited the school by millions of dollars. He has done some of everything out of loyalty to the school.

Back when 'Bama needed a new football coach, Sellers helped to persuade Byant, his close friend and fellow teammate, to come home and take the job. And when Bryant was ill in California, it was William Sellers who sent his company plane to fetch the coach and bring him to medical treatment in Alabama.

Sellers was one of the founders of the UA's Chair of Transportation, and although his college background was chemistry, he has engaged in multiple endeavors to boost the College of Commerce and Business Administration.

But the big one which has commanded his time since 1981 has been the Sesquicentennial Campaign, conducted in conjunction with the University's 150th anniversary in that year and concluded in September of this year.

According to John Blackburn, vice president for educational development at the University, "When you're selecting a general chairman for a campaign, you talk to people about the right sort of person to head it up. Several said, 'The best person to do this is William Sellers, but he won't do it.' So some of us called on him and he not only agreed to do it but to be a leader and work with it, and he's just done a tremendous job."

$61.8 MILLION CAMPAIGN

The fact it, the campaign was to raise $38.4 million, but under Sellers' quiet but deliberate guidance, the total garnered was $61.8 million.

"But I didn't do all that myself," says the modest, almost self-effacing trucking executive. "A lot was done by the staff and alumni scattered all over the country."

Still, as Dr. Blackburn sees it, "He's a 'Lets do it' guy. When he makes up his mind, he does it, and he keeps a tight schedule. One of the things that often causes volunteer people like him to fail is that they keep putting off getting out and doing it. He worked on the campaign every day and did whatever had to be done. And even though the campaign's over, he's still helping us raise some money."

Word of Sellers' talent as a fundraiser has gotten around. So much so, that the unassuming, good-natured trucker was honored as Outstanding Civic Leader for 1984 by the Alabama chapter of the National Society of Fund-raising Executives. And appropriately, he is a 1984 Distinguished Alumnus at the University. Three years earlier he had been applauded there with an honorary doctorate of law.

Not all of "Doctor" Sellers' fundraisers have brought in big bucks, but they've made life brighter for lots of people. One is the Eye Foundation Hospital in Birmingham, of which Sellers is a trustee and past board chairman.

"I got interested in the eye hospital because my mother had a glaucoma," says Sellers, who in 1973 was recipient of ATA's H. Chester Webb Award for Distinguished Service.

As Foundation president Alston Callahan gives perspective to Sellers' contribution, because in 1974, while the hospital was in good shape, it needed a clinic building for its Alabama Sight program.

"We have the only organized clinic for indigent eye patients in the state. We had a place to operate on them but we really didn't have any place to examine and treat them."

While he was Foundation chairman, Sellers led the drive to raise one and one-half million dollars to erect a building known as the Alabama Lions Eye Clinic.

"A number of people made big donations, but Sellers led the way personally with a big donation, and in less than a year, the money was raised and the building dedicated in 1975."

"Ever since, it's been serving about 75 men, women and children a day who come and are treated by the resident physicians. In comparison to what he raised for the University, that million and a half was not so much, but it was just another one of the many things he did."

From the crippled children's clinic, to the Boy Scouts, to the Charley Boswell Celebri-

ty Golf Classic, the "things he did" just keep on flowing.

But it is Dr. Callahan who accurately capsules the Sellers psyche: "He's very straightforward and fixes the conversation directly on the main issues. There's not a lot of small talk.

That's William D. Sellers, Jr., ready every time, whether it's helping his employees, his beloved University, or the myriad human need projects which occupy his action-packed and highly-organized time. Right now, he's getting ready to raise some more money for the eye people to have a parking deck and office building. And he's thinking about the next "dog fight" at the club.

Meanwhile, Baggett Transportation adds to its distinguished reputation for service.

"Everything I've done, I've enjoyed doing," says the man himself in retrospect. "The old saying is, 'If you like your work, you can be successful at it and if you don't like it, you'd better find something else to do.'"

After 43 years, Sellers obviously likes it; he has no plans to stop, ever.

Given the entire spectrum of his people-oriented life, what would Sellers say if he could write his own story?

"I'd just tell 'em I was a pretty good truck driver and a part-time banker."

Enough said.

ELVIN WRIGHT: 1984 MAN OF THE YEAR IN SERVICE TO ALABAMA AGRICULTURE

Mr. HEFLIN. Mr. President, I would like to take just a few moments to commend the man selected as the Progressive Farmer 1984 Man of the Year in Service to Alabama Agriculture, Elvin Wright.

Mr. Wright, the Soil Conservation Service District Conservationist in Hale County, is one of the leaders helping Alabama's catfish industry to become a $200 million business. More than 20 years ago, he set a personal goal of establishing a viable catfish industry in west Alabama. Today, largely through Elvin Wright's effort, catfish producing acreage in Hale County alone has grown from only 1½ acres then to the current total of nearly 5,000 acres.

During those 20 years, Mr. Wright has become widely recognized as an expert in fish farming. People now come from throughout the Southeast to seek his advice and counsel. His expertise has come mainly from hard work and self-education.

When Mr. Wright started promoting fish farming, there were few proven methods for managing production. He developed his own pond design and construction guidelines, and he has changed these designs to better suit commercial fish ponds. Wright's designs are now used by all of Alabama's Soil Conservation Service employees.

Elvin Wright was also instrumental in proposing a State fish farm center. Located in Hale County, the center has been instrumental in helping a great deal of Alabama's fish ponds.

During his years in fish farming, Wright has personally designed over 4,000 catfish ponds, and has done all of this while carrying out his normal job-related duties.

Largely because of Elvin Wright's efforts, Alabama's catfish production is second only to Mississippi's. Catfish farming has a bright future in Alabama.

Mr. President, I believe Progressive Farmer had made an excellent choice in naming Elvin Wright as their 1984 Man of the Year in Service to Alabama Agriculture. I commend him on his selection, and thank him for his outstanding service to Alabama.

I ask unanimous consent that an article from Progressive Farmer be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ELVIN WRIGHT: 1984 MAN OF THE YEAR IN SERVICE TO ALABAMA AGRICULTURE

Alabama's catfish industry may become a $200 million business in the near future, thanks primarily to the efforts of one man.

In 1964, Elvin Wright set a goal to bring more income into economically depressed West Alabama by establishing a viable catfish industry.

Since that time, pond acreage devoted to catfish production in Hale County, Ala., alone has leaped from a meager 1½ acres to nearly 5,000 acres.

This industry now supports processing plants, a manufacturing plant, repair shops, and pond construction businesses. In an area where jobs are hard to come by, these businesses now employ about 250 people.

Farmers are grateful for the added income from catfish. Alabama has about 750 catfish farmers who are growing 25 million pounds of fish each year.

And Elvin Wright, SCS district conservationist in Hale County, has become the man with the answers for farmers who raise catfish in Alabama. He has as much working experience with fishponds and pond management as any person in the state.

Prospective fish farmers as well as experienced producers from throughout the Southeast seek Wright's advice. Many potential producers will not enter fish farming until they have talked with him.

Wright takes the time to talk with each farmer and evaluate his situation. After talking, Wright may or may not encourage him to enter fish farming. And even when Wright suggests that a farmer look to other enterprises, he renders a service. Not everyone has the resources needed to manage fish for profit.

When Wright started promoting fish farming, there were few proved steps for managing catfish in farm ponds. From scratch, Wright developed pond design and construction guidelines. Recognizing that SCS designs would not work on commercial fish ponds, he changed the design so that fish could be harvested with seines. Processors who harvest the fish say that Wright's changes have reduced harvest costs from 5 cents to 1 cent per pound. His design improvements are now used by all SCS employees in Alabama.

Early on, Wright recognized the importance of water quality. His designs and construction guidelines help assure water quality high enough to support a growing fish population with few losses from diseases and parasites.

He helped establish further improvements in water quality through his work with paddle wheel aerators and pond destratifiers. By encouraging the development of these two tools, Wright has helped reduce the disastrous fish kills that are common in stale pond water.

Wright has worked with Auburn researches in testing these and other new fish pond management ideas. He helped Auburn Extension officials gather cost-and-return information on fish farming. And he put this information to even greater use when he talked with leading farm lenders on the economics of raising catfish.

Bringing farmers and processors together in a spirit of cooperation is another of Wright's achievements. This cooperation helps to ensure adequate suplies of catfish to meet the growing demand.

With the Hale County Soil and Water Conservation District, Wright was instrumental in proposing a State Fish Farm Center. Since opening in 1982, the center has been staffed by Auburn University and SCS fish experts. A biologist, a fish disease specialist, and an engineer are working from the center at Greensboro. From there, 90% of Alabama's fish ponds are within a 50-mile drive for the experts.

Wright has personally designed over 4,000 catfish ponds, and fish farmers in Hale County are building about 300 acres of ponds each year. He has been able to accomplish all of this while continuing to carry out his other SCS duties.

E. W. Shell, head of Auburn University's Department of Fisheries and Allied Aquaculture, once said, "This man has laid a solid foundation for a potential $200 million industry for the state of Alabama."

Alabama's catfish production is second only to Mississippi's. Catfish farming has a bright future in the state, thanks in large part to Elvin Wright. *Progressive Farmer* is pleased to name him 1984 Man of the Year in Service to Alabama Agriculture.

A TRIBUTE TO JUDGE JOHN B. TALLY

Mr. HEFLIN. Mr. Speaker, it is with a great deal of sadness that I note the recent passing of John B. Tally, Sr., of Scottsboro, AL, a retired Jackson County circuit court judge. Judge Tally passed away on March 27, at the age of 71.

John Tally was a native of Scottsboro, born on March 2, 1914, the fifth Tally to carry the name of John B. in a family that for generations has had members in the legal profession. After being educated at Rice Institute and Houston Law School, he returned to Scottsboro. There, he practiced law from 1937 until 1942, and also served in Birmingham as an assistant U.S. attorney before entering the Navy during World War II.

After the war, Judge Tally served as circuit solicitor for Alabama's ninth judicial circuit from 1947 to 1955. He then returned to private practice until 1968, when the voters elected him circuit judge. John would continue as circuit judge until 1982, when he joined his son in private practice.

In addition to his outstanding service on the bench, Mr. President, John

Tally was a devoted family man and community leader. He served for 13 years on the Jackson County Hospital Board, and as a trustee of the Cumberland Theological Seminary. He was an elder, choir director, and Sunday School teacher in his church.

I recall attending a retirement party for Judge Tally when he stepped down from the bench in 1982. A large crowd gathered to honor him that night, and I was greatly impressed with the admiration and respect with which he was awarded. I do know from my personal experience on the Alabama Supreme Court that he was an exceptional trial judge, one who was respected by his colleagues, and the prosecutors and attorneys who appeared before him. He was an outstanding leader in the court reform movement in Alabama during the 1970's.

Mr. President, the citizens of Scottsboro and of Alabama have lost an outstanding person. I join them in mourning the passing of Judge John B. Tally, and wish to extend my most sincere personal sympathy to his wife, Blanche, and his children, Nancy, John Jr., and William.

I as unanimous consent that three articles from the Daily Sentinel be placed in the RECORD in full.

Thank you, Mr. President.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LOCAL AND AREA DEATHS

SCOTTSBORO.—John B. Tally Sr., retired Jackson County Circuit Court judge, died Wednesday in Jackson County Hospital. He was 71.

The funeral will be Friday at 2 p.m. at the Cumberland Presbyterian Church in Scottsboro with the Rev. Roy Hall officiating. Burial will be in Cedar Hill Cemetery with Scottsboro Funeral Home in charge.

Visitation will be tonight from 7 until 9. In lieu of flowers, the family requests that contributions be made to the church's building fund.

A native of Jackson County, Tally practiced law in Scottsboro from 1937-42 and also served as assistant U.S. attorney in Birmingham before entering the Navy during World War II.

He served as circuit solicitor for the Ninth Judicial Circuit of Alabama from 1947-55 and was in private practice until his election as circuit judge in 1968. He remained in that post until his retirement in 1982.

Tally attended high school in Scottsboro and in Houston, Texas and was the fifth Tally to carry the name John B. in a family that for generations has had members in the law profession. He attended college and law school at Rice Institute and Houston Law School.

Tally served for 13 years on the Jackson County Hospital Board and was county attorney for eight years. He was an elder, choir director and Sunday School teacher in his church, and served as a trustee of the Cumberland Theological Seminary. His biography appears in Who's Who in America.

He is survived by his wife, Mrs. Blanche McCutchen Tally; a daughter, Mrs. Nancy Loper of Opelika; two sons, John B. Tally Jr. of Birmingham and William W. Tally of Scottsboro; and five grandchildren.

SERVICES SLATED FOR FORMER JUDGE TALLY

Retired Judge John B. Tally Sr. of Scottsboro died Wednesday morning in Jackson County Hospital. He was 71.

Funeral services will be conducted at 2 p.m. Friday at Cumberland Presbyterian Church with the Rev. Roy Hall officiating.

Burial will be in Cedar Hill Cemetery with Scottsboro Funeral Home directing. Visitation will be from 7 until 9 p.m. Thursday at the funeral home. In lieu of flowers, contributions may be made to the Cumberland Presbyterian Church Building Fund.

Tally was born in Scottsboro on March 2, 1914, the son of John Benton Tally and Irene Blackmon Tally.

He practiced law in Scottsboro from 1937 until 1942 and also served as assistant U.S. attorney in Birmingham before entering the U.S. Navy during World War II.

He served as circuit solicitor for the 9th Judicial Circuit of Alabama from 1947-55 and was in private practice until his election as circuit judge in 1968. He continued as a circuit judge until his retirement in 1982 when he returned to the private practice of law with his son, William W. Tally of Scottsboro.

Tally had served as a member of the Jackson County Hospital board of directors and the Alabama Bar Association. He was an elder at Cumberland Presbyterian Church and had served as a trustee of the Cumberland Presbyterian Theological Seminary.

He was given a retirement party on October 18, 1982, at the Holiday Inn in Scottsboro. Some 85 persons attended and he was presented a gold watch. Among those present were his longtime friends, retired Congressman Bob Jones of Scottsboro and U.S. Sen. Howell Heflin of Tuscumbia.

Tally's biography is in Who's Who in America.

He attended four post-graduate sessions of the National Judicial College and two courses at the American Academy of Judicial Education plus courses offered by the Alabama Judicial College.

His administration received a commendation from the Chief Justice of the Supreme Court of Alabama.

Tally was a member of the Alabama Association of Circuit Judges, the Alabama State Bar, and American Bar Association.

Circuit Judge Robert L. Hodges, who succeeded Tally, took a short break in court upon learning of the death. He made the following statement about 10:40 a.m.:

"Ladies and gentlemen, I have just received a message that Judge John B. Tally has passed away this morning. Judge Tally served as a judge of this Circuit for more than 12 years and before that was a Solicitor of this Circuit. He was a dedicated public servant.

"This court extends its sympathy to the members of his family. The bench and the bar of this Circuit, and the citizens of Jackson County whom he served, will mourn his passing."

Tally is survived by his wife, Mrs. Blanche McCutchen Tally; three children, Nancy Loper of Opelika, John B. Tally Jr., an attorney in Birmingham, and William Tally, a Scottsboro attorney; and five grandchildren.

LETTER TO THE EDITOR

EDITOR, DAILY SENTINEL:

To the family and friends of the late John B. Tally:

As I join a host of citizens across this land in offering words of condolence to you during your hour of bereavement, I also am confronted with a great sense of loss.

Recalling days prior to the late Judge John B. Tally's judgeship, law practice and school days, I knew him as a small boy. Born less than a year apart, I became acquainted with him while we were still barefoot boys. This event marked the beginning of a life-span of friendship and trust.

Because he was reared a short block north of the courthouse, lived most of his adult life two blocks east of the courthouse and virtually worked in the courthouse for almost five decades Judge Tally, in essence, became a fixture there.

I know first-hand that when Judge Tally retired from his judgeship, he was at peace with himeslf and that he was happy in his family life and proud of the achievements of his children.

Judge Tally was a man of deep religious convictions who strived to maintain law and order and to sustain a just society always guided by the quotation, "Here on earth, God's work must truly be our own."

It is my firm belief that when Judge Tally stands before God the almighty and Eternal Judge of all, he will be judged as he had judged and that he will be vindicated by a Just God!

Yours in tribute to a well spent life.

WILEY T. SNODGRASS, Sr.,
A concerned friend.

THE CENTENNIAL OF SHEFFIELD, AL

Mr. HEFLIN. Mr. President, as a U.S. Senator from the State of Alabama, I am pleased and proud to congratulate my neighbors in Sheffield, AL, on their upcoming centennial celebration. I am especially happy to commend them upon this occasion since Sheffield is a vital part of my home county of Colbert.

Sheffield is located in extreme northwest Alabama, just a few short miles from the Tennessee line. Named after Sheffield, England, the town grew from a different type of development than most southern towns. Rather than starting as an agricultural center, Sheffield was founded by a group of enterprising men who invested their money to build a city with industries and institutions from which they could reap a profit. Even in this, Sheffield was different from most typical "boom town" developments, in that it was located on the Tennessee River, providing water transportation as an alternative to railroads.

Although settlers has been present for some time, Sheffield was officially incorporated on February 17, 1885. During the next several years, the town would prosper as an industrial center, largely because of the plentiful raw materials and ease of transportation. New industries and blast furnaces were frequently moving into Sheffield, bringing people and economic growth with them.

Early in Sheffield's history, the closest available railroad was located in Tuscumbia. Efforts were made by Sheffield leaders to convince the railroad to extend their tracks into the city. These efforts were so successful

that the railroad chose Sheffield as the site for their new north Alabama maintenance location. A few years later, Southern Railway System took over operation of the existing railroad and expanded their facilities to the point where Southern became Sheffield's largest employer, giving the city the reputation of being a "railroad town." Even today, Southern Railway System continues as a major industry in Sheffield.

One major aspect of Sheffield's history which cannot be ignored or forgotten concerns the development of hydroelectric power in the area. Early in Sheffield's development, people viewed the rushing flow of the Tennessee River over the rocks of Muscle Shoals and realized the tremendous waiting to be utilized.

As early as 1898, the Muscle Shoals Power Co. was organized. Congress approved legislation authorizing the company to construct a hydroelectric dam and canal, as long as construction began within a year. The authorization and two extensions expired without construction starting, leaving development open for other companies.

In 1902, another company, including Thomas Coleman DuPont, was organized and asked for congressional authorization. DuPont said he would spend more than $3 million to build textile mills in the area when they obtained this authorization. In 1903, however, President Theodore Roosevelt vetoed the legislation, killing another opportunity.

In 1906, the Muscle Shoals Hydroelectric Power Co. was organized. Their proposal for authorization never got out of the House committee to which it was assigned and, in 1912, the company merged with the Alabama Power Co.

Finally, in 1917, President Wilson selected Sheffield as the site for nitrate plants to be built to help furnish munitions for World War I. To help furnish the power needed by these plants, hydroelectric dams were also to be constructed. Wilson Dam as partially completed when the Harding administration failed to appropriate funds for continued construction.

With work suspended and hundreds of employees laid off, automobile magnate Henry Ford made an offer to complete construction and purchase the nitrate plants to produce fertilizer. Soon, other firms made competing offers.

In light of these offers, Congress appropriated funds to complete Wilson Dam and work resumed. Then in 1928, after Ford and the other companies had withdrawn their offers, legislation providing for governmental operation of the dam was approved, but pocket vetoed by President Coolidge. In 1931, this legislation was again approved, but vetoed by President Hoover.

Finally, after the election of President Franklin Roosevelt, this legislation, which would become an important part of the Tennessee Valley Authority Act, became law in 1933. This came after Roosevelt visited the Sheffield area and promised that government development and operation of the hydroelectric facilities was assured. As we all know, even today TVA is an important and functioning part of the Sheffield economy.

In more recent years, Mr. President, with industrial activity declining, a small industry has succeeded in making the Muscle Shoals area well known. Of course, I am referring to the music industry. Sheffield can be proud of its role in this development, since the earliest recordings in this trend were made in Sheffield. Now, music studios are located all around the area, and have helped write much of the area's rich musical history.

At the present time Sheffield and all of northwest Alabama is suffering from serious economic problems, including high unemployment. However we are hoping for a turnaround of these conditions.

Mr. President, the city of Sheffield has scheduled elaborate plans to celebrate its centennial. I am extremely proud to represent these fine citizens, who face the future with a commitment to greater growth, increased productivity, and community spirit. In celebrating a centennial, a town is, in reality, congratulating all of its citizens, past and present, and I believe all of the people of Sheffield can be proud of their city's significant history. I know that with their continued civic dedication, Sheffield can look forward to a bright future.

NATIONAL CORRECTIONAL OFFICERS WEEK

Mr. MITCHELL. Mr. President, I am pleased to join in cosponsoring Senate Joint Resolution 64, which designates the week beginning May 5, 1985 as "National Correctional Officers Week."

The work of our Nation's correctional officers in our jails and correctional centers is often overlooked and undervalued. The quality of service they provide is the cornerstone of our criminal justice system. Correctional officers nationwide are currently responsible for containing over 600,000 prisoners.

Under highly stressful conditions, where exposure to dangerous situations is a daily part of the job, these men and women try to encourage inmates to develop skills and attitudes which will let them become productive members of society upon release.

The job requires flexibility and firmness allied with patience. It takes a special kind of person to persevere in this type of work in an environment as hostile and unpredictable as our jails and prisons often are. The work not only demands inner resources of strength and stability, it is all too often a thankless task and unappreciated.

I hope the Judiciary Committee will act on this measure promptly so we can focus attention and recognition to these too often overlooked individuals.

THE ALARMING GROWTH IN ILLITERACY

Mr. GOLDWATER. Mr. President, Senator ZORINSKY is to be commended for his efforts to address the growing rate of illiteracy in this country. The Department of Education, in its own report, A Nation at Risk, listed the alarming statistics. They are listed here for your review: A 20-percent functional illiteracy rate among adults and 13 percent among 17-year-olds; a 32-percent marginal illiteracy rate for adults; a minority youth illiteracy rate that may run as high as 40 percent, and an increase of 2.3 million adult illiterates each year. These statistics should prompt each of us to ask, "Why are our young people not learning to read in our schools?"

The ramifications of the above statistics impact on each of us directly. For example, it has cost the military close to $40 million from fiscal years 1982–84 to teach reading to recruits. It should be noted that these programs include basic math and English skills, also. According to military statistics, the cost is expected to rise into the 1990's. The enrollment in these programs is not limited to the student who dropped out of high school, as there are high school graduates as well. Reading and basic skills programs like the ones in the military can be found in Government agencies and programs; for example, the Job Training Partnership Act [JTPA] at the Department of Labor.

Those individuals who cannot read in our society become those individuals who are unable to find or hold a job, who are drug and alcohol abusers, who find themselves in trouble with the law, and who are unable to get off the welfare rolls. It is a crime against these individuals that they are allowed to graduate, no matter how clever they are in covering up this disability, without being identified and helped. They are being asked to perform in a very complex society without the most basic of skills.

Looking at the problem from another perspective, it is the American taxpayer who is also being cheated from a fair return on his tax dollars. I have said it often enough lately, but I think it is worth repeating here; I believe we should get more bang for the buck. This should be a policy promoted in all Government agencies. It cer-

tainly is applicable with respect to the illiteracy problem as there has been no shortage of Federal funds for remedial programs.

What I find particularly disturbing is that there are instructional reading programs which are cost effective and the results are more than noteworthy. These programs were described during hearings last year on a similar bill by Senator ZORINSKY. If something works, you don't fix it or change it. Both teachers and students are frustrated when instruction and learning fails. I am pleased to support this bill, which intends to identify for all concerned parties, those successful instructional reading programs that are working in various classrooms across our country. It is my fervent hope that, armed with concrete information, reading programs can be initiated in those classrooms where the success rate in reading has been poor.

TRIBUTE TO REPRESENTATIVE JOHN MURPHY

Mr. LEAHY. Mr. President, there are times when I feel overwhelmed by the influence exerted upon this body by very powerful special interest groups.

It seems that every group that does business or contracts for services with the Federal Government has a lobbyist in this town.

In fact, as my good friend and fellow Vermonter, John Murphy of Ludlow, says: "Everybody's got their lobbyist but the poor people."

"Murph" has spent 17 years in the Vermont Legislature as a self-appointed spokesman for the underrepresented little guy in our society, and I suggest my fellow Senators here today could learn a lesson or two from a Vermont representative who has made his reputation by defending the poor and the powerless.

Mr. President, there is not a harder worker, or a tougher bargainer, or a fairer arbiter than the chairman of the Vermont House General and Military Affairs Committee.

I would like the rest of the Senate to read this tribute to Representative John Murphy that appeared in the March 4, 1985, edition of the Burlington Free Press, Vermont's largest newspaper, and an editorial which appeared on March 6 in the Rutland Herald.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Burlington Free Press, Mar. 4, 1985]

LUDLOW DEMOCRAT JOHN MURPHY IS AN ALLY TO THE DISADVANTAGED

(By John Donnelly)

MONTPELIER.—House Speaker Ralph Wright remembers Rep. John Murphy's running around the Statehouse in a frenzy a few years back, trying to pursuade fellow lawmakers to keep state jobs for nine blind people.

"He rifled around here for nine blind people the way that some people did for the Equal Rights Amendment," Wright said. "That's just like him. The big issues with Johnny Murphy are those that help the little guy."

It is year number 17 in the Legislature for Murphy, a Ludlow Democrat who is the long-serving chairman of the House General and Military Affairs Committee.

It is an important year for him as his committee has several closely watched bills, including the Murphy-sponsored minimum wage bill and drinking age legislation. Both bills should come before the House within the next two weeks.

Murphy, 62, also is sponsoring a bill to dramatically shift state funding from the University of Vermont to the Vermont Student Assistance Corp., and legislation to take 2 percent of a ski tax and applying it to recreational initiatives such as stocking streams with fish.

"I've got some exciting legislation," Murphy said one day last week on the House floor. "I have some legislation that I hope will help the underprivileged, those unfortunate folks who can't find well-paying jobs."

Murphy's friends and foes alike say the former machinist is always honest and has uncanny political instincts.

"John has never tried to pull any fast ones on me," said Christopher Barbieri, executive vice president of the Vermont State Chamber of Commerce and a regular foe of Murphy's during his 10 years of lobbying in Montpelier.

"He taught me one thing very early on: learn the art of compromise. While we are adversaries from time to time, he is always fair," Barbieri said. "He doesn't play games with you."

House Minority Leader Paul Poirer, D-Barre, said Murphy has "an allegiance to issues, not people. He is the type of man where one minute you love him the next minute you hate him."

Perhaps the strong feelings on Murphy arise because of the lawmaker's power. Wright said, "If you had to name three of the most powerful people in the House, John Murphy would have to be included in the top three."

How did a man with a trade school education who spent more than three decades working as a machinist and a truck driver, a man who admits to "speaking plainly," and who wins as many enemies as friends, become so powerful?

Murphy thinks he knows.

"I fight for a cause. I don't fight people," Murphy said. "I always stay within a handshake of everyone in the House."

Politicians liken Murphy to a bulldog, partly because of his stout build, mostly because of the way he can fight. "It's wonderful to have him in your corner," said House Majority Leader Susan Auld, R-Middlesex.

Murphy's top priority this session is his minimum wage bill. The bill would raise Vermont's minimum wage above the federal level a dime per hour each year for three years. The wage now is $3.35.

"It's a bread-and-butter issue," Murphy said. "People don't understand what 10 cents means to people. Remember the saying in the '30s, 'Brother, could you spare me a dime?' This bill reminds me of that.

"Their lot, the poor and the disadvantaged, is not one to be proud of. Those people who crusade against a dime-an-hour raise drive up here in a big Buick or Cadillac. Those fat cats will fight this bill. I think I'm going to have a fight on my hands," Murphy said.

Murphy also is working against raising Vermont's drinking age from 18 to 21. His reasoning is consistent with his philosophy: He believes the bill discriminates against young people, an underrepresented group. Murphy's stance has pitted him against Gov. Madeleine Kunin, Wright and Poirer.

Another Murphy bill this year would take about half the state's appropriation to UVM and give it to the Vermont Student Assistance Corp. Murphy, whose six-year term as a UVM trustee ended last year, called the bill his "going away" present to the school. He said the school has become increasingly one for the rich.

Murphy has been honored by labor unions for his fights. One union, the Assembly of Governmental Employees, named him one of the top 10 state legislators in the country in 1981.

He said he will continue the fight for the poor, the labor unions, the veterans, the blind, and "any disadvantaged group there is."

"It's not hard to distinguish ways of life in Vermont," Murphy said. Poverty is right beside the road. When I drive along the road, I can see proverty. It makes you think.

"The poor are the least remembered. Those folks who can do for themselves hire lobbyists. The lawyers got their lobbyists, the real estate got their lobbyists, the Chamber of Commerce got their lobbyists. Everybody's got their lobbyists but the poor people," Murphy said. "I want to help them."●

[From Rutland Daily Herald, Mar. 6, 1985]

DON'T UNDERESTIMATE

Ludlow's spitfire, Rep. John F. Murphy, may not get his own way on everything that comes before the State's legislature, but he gives it a good try. And those on the opposite side always know they've been in a battle.

It was nice to see the Ludlow Democrat get a bit of recognition in Monday's profile by John Donnelly of the Associated Press. Murphy may not be as powerful as the Speaker of the House or its Appropriations Committee chairman, but nobody underestimates him for very long. A couple of sessions ago a freshman legislator was assigned to the General and Military Affairs Committee, which Rep. Murphy heads. As committee discussion started, the freshman asked if the committee followed Robert's Rules. Rep. Murphy retorted swiftly: "We follow Murphy's Rules."

In fact, it is a bit difficult to imagine a proposal becoming law if Murph really sets his mind against it. He is effective because he sticks to the issues. It is hard to argue against an issue-oriented person who is so dedicated that nothing will turn him or her aside.

It's going to be interesting to see what the lawmakers do with the proposal to raise Vermont's legal drinking age to 21. Quite correctly, Ludlow's "friend of the little guy" wants no part of such a move.

To him, it smells. It smells because it's so political. Murph is a superb politician, but there are issues that he considers above politics.

The public is clamoring for action against drunken driving, so the logical political move is to clamp down on those who are 18,

19 and 20 years old. Most of them don't vote.

Being no fool, the Ludlow Democrat knows there are older folks aplenty who hate to see a breathalizer coming their way. Undoubtedly, some of them are amongst his peers in the Legislature.

Why, then, try to make the voting public think the problem is being nicely handled by merely clamping down on those under 21? To him, this is a cop-out intended to make lawmakers look like saviors.

The Ludlow man has other issues this year, but it is quite possible his political weight will be most influential in the battle over the drinking age. Vermonters who care about their money shouldn't lay any heavy bets on that issue when Murph is pulling against them.

As Donnelly said in his profile of Rep. Murphy, the Ludlow man has uncanny political instincts. He knows that Vermont legislators don't relish a follow-the-leader role, and just might refuse to join their neighbor states in raising the drinking age.

When the chips are down, he'll be unleashing his considerable gifts of persuasion in pursuit of that goal. Before placing their bets, his foes should remember that his persuasiveness comes wrapped in an Irish grin that has won him election nine times.

GIVING: AMERICA'S GREATEST NATIONAL RESOURCE

Mr. CHILES. Mr. President, in a recent speech, David Rockefeller provided some unique insights into the role of charitable giving in America. In those remarks, delivered on February 6, 1985 in Fort Worth, TX, he spoke candidly about some of the challenges currently facing philanthropic activity. The points that he makes are indeed thought provoking and worthy of our attention. I ask unanimous consent that David Rockefeller's comments be printed in the RECORD.

There being no objection, the comments were ordered to be printed in the RECORD, as follows:

REMARKS BY DAVID ROCKEFELLER, UNDER THE AUSPICES OF THE SID W. RICHARDSON FOUNDATION

GIVING: AMERICA'S GREATEST NATIONAL RESOURCE

Thank you so much, Sid Bass, for that warm and generous introduction.

Visiting Texas always has been an enormous pleasure for me, and I am particularly grateful for this opportunity to meet with such a distinguished group.

I have always felt very much at home in Texas, and, in the course of some 30 trips here over the past 34 years, I have consistently carried away with me far more in the way of insights and knowledge than I have left behind. There are many reasons for this, but perhaps most important is the renewed sense I have found on each visit of vision, energy, and the ability to think big.

Texans, of course, are world renowned for thinking big, and I thus am especially pleased to be here once again to discuss a subject which I am convinced demands big thinking—private giving in America.

I certainly do not come with any divine wisdom on the subject, and I often suspect that we in New York are isolated—either through geography or innate provincialism—from exceedingly creative programs being undertaken throughout other parts of our Nation.

To help initiate a dialogue, however, I thought it might be useful if I did three things. First, I will mention some of the more personal and fundamental axioms that have shaped my family's and my own involvement with philanthropy over the years. Second, I will underscore the enormous importance of the non-profit sector as a force in this country. And third, I will suggest some of the challenges I see facing philanthropic activity at the present time.

A first and most obvious axiom of philanthropy is that you can't give away what you don't have. Thus it is vital that our Nation and its localities preserve and further strengthen a policy framework that encourages the generation of wealth. It is equally vital that our citizens maintain the entrepreneurial spirit which has made America great—and which continues to be especially evident here in Texas. A favorable climate for private initiative and economic growth is key to our Nation's well being. Without it, private philanthropy cannot exist.

Is is heartening that the current administration in Washington is dedicated precisely to these ends—to encouraging the private sector and to lessening the role of government. To reduce taxes is fully consistent with such a program and is to be applauded. On the other hand, some of the specific proposals which have been advanced to achieve tax reduction give me concern because of the direct and indirect impact they would have on the volume of charitable giving. Specifically, in the interest of tax simplification (again a laudable objective), it has been proposed that a very low income tax ceiling be placed even on the highest tax brackets. To offset resulting revenue lags, however, many deductions presently permitted to achieve other social objectives would be eliminated, including several directly related to charitable giving.

A low ceiling on the maximum income tax paid by any individual could be stimulating to growth and investment, but it is likely to have an adverse impact on charitable giving. At a 50% tax rate, each dollar given costs the donor only 50 cents. As that rate declines, the net cost of giving goes up. One recent study at Duke University concluded that individual contributions could fall 20% as a result of a substantial cut in income tax rates—measured in dollar terms this would mean a cut of over $12 billion annually. That is nearly six times what is contributed annually to all this country's United Way campaigns, and the impact on many organizations dependent on private philanthropy would be very serious. If at the same time the structure of charitable deductions is undermined, the adverse effect could be magnified.

This proposed tax program which would erode incentives to giving comes, of course, at a time when direct Government support for nonprofit institutions is being sharply cut. In short. privately supported not for profit institutions are facing a triple threat which must be of grave concern—lower marginal tax rates, the loss of direct incentives, and a decrease in Government support. I will return to this problem late under the heading of challenges.

A second key axiom of giving is also a simple one—namely, "you can't take it with you." Hence, you had better use it intelligently while you are on this Earth.

This was in essence the advice the late Dr. Frederick Gates gave to my grandfather, and I believe it remains as valid today as it was then. One associate recently phrased it somewhat differently, saying, "you'll never see a hearse with a luggage rack!"

This advice is reinforced by two further considerations. One is that, because present estate and gift taxes are so high, the amount one can leave or give to one's children or family is very limited. The other is that—for most people at least—there are diminishing returns in satisfaction from spending money on oneself. Just how many expensive cars, airplanes, houses, or yachts can a person enjoy? Furthermore, valuable jewelry and other such beautiful objects today seem to produce more anxiety about security than delight about possession.

Now I should add quickly that I do not subscribe to the "Oh poor me!" or "oh what a burden it is!" School of thinking about being affluent. There is no doubt in my mind that having money is more desirable than not having it! On the other hand, my grandfather and my parents always taught that the opportunities of possession of wealth carry with them comparable responsibilities. This is not only a moral issue, but also a question of basic self-satisfaction.

This brings me to two other axioms which, again, I will touch on more fully under the heading of challenges. One is that successful giving demands the same care, creativity, and energy as does any successful business enterprise. The other, and perhaps the most important, is that giving, if it is well done, can be deeply rewarding and a lot of fun.

It should be noted that giving in America is not limited to persons of substantial inherited wealth or high income. It is a surprising fact that about 85% of the some $60 billion Americans give each year comes from people earning $50,000 or less. Americans without a doubt are, as President Reagan has said, "the most generous people on Earth."

The tradition of charitable giving does not exist in any other country of the world to anything like the extent it does here. This has shaped the structure of our society. Part of this is due to our cultural tradition, but it is also importantly the product of tax policies designed to encourage charitable giving. Similar policies do not exist in other countries.

Examples of the generosity of private individuals on both a large and small scale are multitudinous. During just the last two months of 1984, for instance, Americans contributed over $40 million to help those starving in Ethiopia. Earlier last year, 10 youngsters in California organized a drive that raised over $90,000 to save Giant Pandas in China. Closer to home, the establishment of Rice University is a good example of what one person's generosity can create. And even more close to home, institutions such as TCU and SMU would not exist had it not been for massive gifts made by many individuals over an extended period of time.

And, of course, we all can be inspired by the work of Lady Bird Johnson—who I am delighted is with us—in beautifying our nation.

No one seems to know exactly what causes Americans to give generously, but I suspect it has something to do with the origins of our Nation. The United States was, of course, founded largely by persons who had suffered from oppression and poverty elsewhere, and our country has continued to be a haven for millions from around the globe. Those who benefited from the freedom and opportunity they found here wished to

share it with others. Given this background, it is no wonder that so many are rallying to support the restoration of the Statue of Liberty, at the base of which are the ringing words, "Give me your tired, your poor, your huddled masses yearning to breathe free."

Americans in general seem to have two deeply held values. One is a strong belief in self-reliance and initiative. The other is a strong belief in the interdependence of mankind, and in the fact that, as John Donne said, "No man is an island, entire unto himself." These beliefs may seem to be in conflict, but, in fact, I am convinced they complement each other. The worth of the individual and the worth of the community are one and the same. One is not viable without the other.

Whatever the reasons for the generosity of Americans (and much more research needs to be done on that subject), it has produced a very large and important nonprofit sector in this country—and that's the second point I would like to touch upon.

Excluding religious congregations and professional associations, a recent study by Lester Salamon at the Urban Institute found that in 1982 there were nearly 125,000 non-profit organizations in the United States. These organizations had total expenditures of $131 billion and employed some 6.5 million people. This is fully five times the number of people employed in the entire automobile industry. And, if religious congregations and professional associations are included, the dollars involved and employment figures are far higher.

Many nonprofit institutions depend to a considerable extent on public sector funding. Even well-endowed institutions such as Harvard and the University of Texas never would have existed without initial public funding and they continue to require public support. Today, however, with growing budget restraints, public funding is declining rapidly in real dollars, and private givings has only been able to make up for about one-fourth of Federal retrenchments which have taken place from 1980 to 1983. If the Federal administration's current proposals for budgetary reductions are adopted, it is estimated that Federal support to nonprofits other than hospitals will have declined 38 percent from 1980 to 1987. The hardest hit are smaller organizations—frequently those serving the most needy. This constitutes a serious threat to the highly successful public-private partnerships which characterize many nonprofit institutions in our society.

As with most organizations during periods of budgetary constraint, there have been some very positive results from Government cutbacks. Much fat has been cut out. A new emphasis has been placed on management and controls. And many institutions with similar roles which for years engaged in friendly, or not so friendly, competition are now developing joint ventures. My brother, Laurance, and I, for instance, long have been interested in two great medical institutions across the street from each other—Memorial Sloane Kettering and the Rockefeller University. They, as we, also have long enjoyed rather intense sibling rivalry. Now, however, they are working closely together on a number of projects to the mutual benefit of both institutions. Budgetary restraints may have contributed to more effective cooperation.

I must admit, though, that in one area I have found it difficult to compete with Laurance. Much to our envy at Rockefeller University, he has been able to recruit Sinatra and Pavorotti as star performers for their annual fundraiser. We have not yet been able to identify equally enticing substitutes.

Another positive development of forced belt tightening has been the generation of nonphilanthropic sources of funding. In 1983, I spoke on this subject in San Diego before the American Association of Museums, and mentioned a number of very creative examples such as the Denver Children's Museum which is raising funds from projects including a book, called "Kids and Pets," which is marketed by a cat food company and returning 75 cents a copy to the museum.

Those interested in this overall subject might want to read a book called "Enterprise in the Nonprofit Sector" which was published in 1983 by "Partners for Livable Places" and the Rockefeller Brothers Fund. It costs $7, and I promise this is the only commercial pitch I will give you this evening!

One of the more fascinating ventures along these lines has been the actor Paul Newman's venture into salad oil. Some three years ago—as a lark—he and a friend started a company to market his homemade salad oil and other products such as "Newman's own industrial strength Venetian spaghetti sauce," and then donate any profits to charity. Last year the company netted some $1.2 million which it gave to support 80 different nonprofit groups!

These signs of increased creativity, better cooperation and sharper management are encouraging. Despite them, however, the gap between need and available resources is deep, and promises to grow deeper. This brings me to the third point I would like to touch upon—the challenges facing philanthropy and the nonprofit sector.

There are many, many issues involved here, but I would like to mention just a few major challenges in three broad categories: First, public policy; second, the need for yet more management improvement; and third, the need for heightened public awareness of the importance of philanthropy and of the desperate need for more of it.

With respect to public policy, I already have mentioned the potentially detrimental impact on giving of some tax simplification and reduction proposals.

In this regard, there are three pieces of the proposed Treasury tax package that I consider sheer folly in light of the administration's emphasis on private initiative and public-private partnerships.

First is the proposal to limit itemized deductions for contributions to amounts that exceed 2% of adjusted gross income. Since some 61% of all taxpayers currently donate less than 2% of their income, this provision would essentially remove deductions for most taxpayers—and have an especially unfair impact on smaller givers who now itemize their taxes.

Second is the proposal to completely repeal the charitable deduction for nonitemizers. Again, this would be most harmful to those with lower incomes who currently give generously but would not ordinarily itemize their taxes.

In effect, these two proposals say that you get no recognition for the first 2% of your income that you give, and that—to add insult to injury—you must go to the trouble of itemizing if you give over 2% even if there is no other reason to do so. Certainly I doubt if the Internal Revenue Service will be very happy if many more people are encouraged to itemize.

Third is the proposal to limit deductions for gifts of appreciated property to actual cost plus an inflation factor, or to current market value, whichever is less. As it stands, the current market value can be deducted, whatever the original cost. Appreciated property comprises over 40% of gifts to universities, and it is a substantial factor in funding cultural institutions and medical facilities, as well as in the formation of new foundations. The proposed change would be a major disincentive to such gifts. Indeed, I consider this proposal to be perhaps the most counterproductive of all.

There are some proposed incentives as well, but it is estimated that they would be outweighed 25-to-1 by these disincentives. To my mind, there is neither rhyme nor reason to this approach if the aim of our public policy is to encourage philanthropy and the private sector. Indeed, it seems to me that the effort should be in exactly the opposite direction. With Government reducing its role, we should be seeking new incentives to stimulate increased private giving, not the reverse. Furthermore, the role of Government in public-private partnerships cannot disappear entirely without jeopardizing some very important projects now primarily financed by private funds, but still dependent on some public support.

In New York City, for example, we are leveraging a $50 million Federal urban development action grant into 5,000 units—or $350 million worth—of new moderate-income housing which could not otherwise have been possible. Programs such as the Urban Development Action Grant or "UDAG" and public sector challenge grants are a powerful trigger to private Philanthropy and investment. Indeed, in the low and middle income housing field there can be little or no construction in most parts of the country without a modicum of public subsidy. Yet the administration is proposing to end the UDAG program, which in turn may well mean the death of our New York public-private initiative, and of many others as well. Government budget cuts which failed to recognize this would have the effect of emasculating a vital program in our urban communities.

I already have mentioned the challenge of improving the management of nonprofits so as to make grants more effective and efficient. I will not dwell on this, but I do believe that current management training activities in this very large sector of our economy are woefully inadequate. I would hope that "the independent sector"—an organization focusing on philanthropy and nonprofit—would make this a major priority. I also would hope that business leaders serving on the boards of nonprofits would give it higher priority, and not leave their business skills outside the nonprofit boardroom just because the "product" is culture or social service rather than cars or oil or consumer credit. Since so many business executives eventually serve on nonprofit boards, perhaps our business schools should make nonprofit management a meaningful part of their curricula. A few schools, such as the Yale School of Organization and Management, are beginning to do so.

The final challenge I will touch on is public awareness. I doubt if many people appreciate the importance and the full extent of the nonprofit sector and private giving in the United States. Indeed, though I have been involved in the area for years and am chairman of a foundation, I was not really aware of how much is involved until I began working on this speech.

We need, to my mind, a massive public education and activation campaign to increase citizen awareness of what is being done, how important it is, and how much more is needed. Perhaps this is something "the independent sector" should spearhead, but it should enlist all groups, including business, labor, religious organizations and government. What is needed is not just information, but active involvement on the part of each and every one of us. Only with this will we see the progress in giving we so badly need.

One possible component of such a program that a number of concerned people and I have been discussing is the creation of a "Nobel Prize in philanthropy" to honor outstanding examples of where private giving has met public needs. The key to the effectiveness of such an award would be an unstinting insistence on creativity and excellence, and it would have to have the highest backing—including that of the President of the United States. Properly conceived and implemented, I believe an award program of this sort could do much to increase giving and increase awareness of its importance at all levels. Certainly children who support such efforts as the UNICEF Halloween collection should be fully as deserving candidates as large foundations or more fortunate individual philanthropists.

I put forth these ideas—and I am certain there are many other good ones—for the simply reason that the potential of private giving is enormous. If Americans were only to increase their average giving from 2 percent of 3 percent of income, this would produce $30 billion more each year for philanthropic purposes.

Facts, figures and new program ideas all are important, but they mean little without some understanding and feel of the intangibles of the giving process—the joy and meaning it gives to the donor's whole life, as well as the benefits flowing to the recipients.

There is nothing wrong with perpetuating one's name by endowing an organization or building, but truly satisfying philanthropy usually includes significant personal involvement, time and effort. Certainly that has been my own experience in relation to several institutions with which I have been identified including, for example, Rockefeller University, the Business Committee for the Arts, the International Executive Service Corps, the New York City Partnership and even a clean-up project on 125th Street in Harlem. In each case I believe my personal involvement of time has been as important as the money I have contributed. A worthwhile enterprise in just about any field can give one satisfaction if it meets a real need and causes one to be fully committed.

Different people are attracted by different causes. My wife Peggy, who is with me, raises cattle and is very concerned with the preservation of American farmland. She derives enormous pleasure from working on this cause and contributing to it. My son, David, and members of his generation recently completed a planning review for the future of the Rockefeller Brothers Fund. This resulted in priorities that probably would not have been as high on the original list of my brothers and me—but times have changed and these are their priorities in which they have ownership. They are proud of them and will work hard on them. I support them with enthusiasm because they represent new priorities which are of great importance in the world today.

If I were fortunate enough to live in your community, I am sure I would feel similar pride and satisfaction if I could be involved in such projects as Wilson Block, which was spearheaded by the Meadows Foundation, or the Keystone Project, which was spearheaded by the Richardson Foundation. Both are splendidly deserving projects that have demanded not only money, but substantial vision, time and personal involvement. The Pyramid Project, also sponsored by the Richardson Foundation, is an excellent example of the very real benefits of long-term commitment to the careful development of a worthy concept.

It is important, above all, that giving remain a spontaneous, vibrant and dynamic action. The process and understanding of giving certainly can be sharpened, but, in the final analysis, one cannot teach people out of textbooks why, how and where to give. Giving, when it has real meaning and is truly fun, is largely a question of spirit, and, as the Taoist adage goes, "that which can be learned is not worth teaching."

The aggregation of millions of giving spirits and millions of individuals feeling the joy and rewards of giving is an impressive force indeed. It can and must, I believe, be an even more impressive force in the years to come. I believe the impetus of the present administration in lessening the role of Government in many aspects of life is sound. If this process is to be successful, however, the private sector must take up the slack. This means among other things that incentives for giving must be preserved, the volume of giving must increase, and private-public partnerships must if anything be enhanced.

America is rich in natural resources. Beyond minerals and food, beyond technology and management superiority, however, we are now at the brink of discovering and developing what I am convinced is our greatest natural resource—our generosity of spirit and substance. It is, to my mind, a unique opportunity for each and every one of us to lead in this exciting and important exploration and development.

RESOLUTION OF THE BOSTON BAR ASSOCIATION CONDEMNING U.S. WITHDRAWAL FROM JURISDICTION OF THE WORLD COURT

Mr. KENNEDY. Mr. President, as congressional attention is increasingly focused on renewal of aid to the Contras, we must not forget another topic related to this administration's policy toward Nicaragua—the withdrawal of the United States from jurisdiction of the International Court of Justice. This action, more than any other taken by this administration, underscores the administration's disregard of international law when it comes to our dealings with Nicaragua.

On February 20, 1985, the Boston Bar Association adopted a resolution condemning "the decision of President Reagan that the United States will not participate in the further proceedings before the International Court of Justice in Nicaragua's case against the United States." The United States declined to make its case that it was only exercising its right of collective self-defense against an "armed attack" by Nicaragua and gave the shameful excuse that "much of the evidence * * * is of a highly sensitive intelligence character." It is unfortunate that the administration jeopardizes respect for international law by carrying out policies which it is unwilling to defend before the world.

The Boston Bar Association resolution rejects "the notion that the United Nations Charter prescribed limitations on the use of force should be the exclusive preserve of the veto-hobbled Security Council." The association also rejects "the notion that legitimate political or diplomatic objectives or approaches require a suspension of charter limitations or of the exercise of the court jurisdiction." It calls "upon the President to honor in deed as well as in word this Nation's historic commitment to the rule of law among nations."

As we enter the Central American debate, I ask that my colleagues remember this gross violation not only of international law but also of all that America stands for.

Mr. President, I commend the Boston Bar Association for its worthwhile resolution, and I ask unanimous consent that it may be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION OF THE BOSTON BAR ASSOCIATION—FEBRUARY 20, 1985

Resolved: The Boston Bar Association regrets the decision of President Reagan that the United States will not participate in the further proceedings before the International Court of Justice in Nicaragua's case against the United States.

The Court in November rejected arguments by the United States and held by a vote of 15 to 1 that the Court has jurisdiction in the case. By a vote of 16 to 0, in a decision in which the United States member of the Court joined, the Court also rejected argument by the United States that the Court is precluded from hearing the case as one involving armed conflict, for which the proper forum is the United Nations Security Council.

The actions taken by the United States against Nicaragua have been claimed by the United States and by El Salvador to be legally justified as measures taken in the exercise of the right of collective self-defense in a case of armed attack by Nicaragua against El Salvador. The inherent right of individual and collective self-defense if an "armed attack" occurs is affirmed by Article 51 of the United Nations Charter. However, in boycotting further proceedings in the case in the International Court, the United States declines to make its case in or out of court as to the facts claimed to constitute an "armed attack" by Nicaragua against El Salvador. Presumably the State Department in saying only that "much of the evidence that would establish Nicaragua's aggression against its neighbors is of a highly sensitive intelligence character" does not mean to contend that it is a case of "armed attack" so invisible that it can be proved only by evidence too sensitive to reveal.

The fundamental law of the United Nations Charter is that "All Members shall refrain in their international relations from the threat or use of force against the territorial integrity or political independence or any state, or in any other manner inconsistent with the Purposes of the United Nations." We reject the notion that the Charter prescribed limitations on the use of force should be the exclusive preserve of the veto-hobbled Security Council. We reject also the notion that legitimate political or diplomatic objectives or approaches require a suspension of Charter limitations or of the exercise of Court jurisdiction. We affirm the right of the United States and of other nations to take legitimate and effective countermeasure to oppose violations by others—countermeasures in accordance with law and in support of law.

A great nation does not need to hide from law. When it does so it weakens law and diminishes itself. The United States by action of the President and the Senate accepted the compulsory jurisdiction of the International Court of Justice under Article 36 of the Statute of the Court, which provides that "In the event of a dispute as to whether the Court has jurisdiction, the matter shall be settled by the decision of the Court." The Court has decided. The protestations of our government that we boycott the Court out of concern for the "enormous harm to it as an institution and to the cause of international law" which would follow from the Court's decisions will not avoid the damage done—not in a case where the United States boycotts the Court in repudiation of decisions by the Court in which distinguished judges from all segments of the international community, including our closest allies, have joined. We call upon the President to honor in deed as well as in word this nation's historic commitment to the rule of law among nations.

ELMORE LEONARD

Mr. LEVIN. Mr. President, Michigan's Elmore Leonard has hit the best seller list with his novel "Glitz."

His extraordinary talent has long been known to aficionados of great writing and to movie buffs. It is now being enjoyed by wide audiences.

His eye for interesting detail and unusual characters, his ear for dialog and dialect, his pace, his humor, his style and economy of words are extraordinary and almost uncanny. The columnist George Will captured Elmore Leonard's talents in a recent article headlined "The Dickens of Detroit." I ask unanimous consent that it be printed in the RECORD at this time.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE DICKENS OF DETROIT

(By George F. Will)

NEW YORK.—Thirteen months ago I bought my first Elmore Leonard novel, in Cleveland, his kind of place. Since then I have read 10 others. Recently a newspaper story announced his new novel, "Glitz." I put down my sandwich and drove to a bookstore. It was a peanut butter and pickle sandwich, so you know Leonard is good.

Today he is taking lunch in style, at the Manhattan Ocean Club. You say good news never gets into newspapers? Read on. Last week, after publishing 23 novels in 32 years, he finally made the New York Times best-seller list, just barely, in 15th place. This week he is seventh. His good luck is good news because luck had nothing to do with it. Craftmanship has been rewarded.

Leonard lives in Birmingham, Mich., a suburb of Detroit, the city where some of his stories are set. The description of Detroit as "Cleveland without the glitter" could come from his novels. Detroit is not Bloomsbury but Leonard, 59, with a gray beard and a wardrobe consisting mainly of a tweed jacket, says he is not an artist, just an entertainer.

His books are not exactly crime novels, although crimes occur and guns go off. The novels are about marginal people, small people incompetent at petty crime, or quite professionals who, like Leonard, are underestimated for a long time. There are no verbal flourishes, no arresting descriptions, but his style is as strong and personal as Van Gogh's brush strokes. He has perfect pitch for the street talk you might hear from armed robbers who are not very good at armed robbery.

Assistant professors being what they are, there are turgid essays thick with coagulated paragraphs about such novels as sublimations of the class struggle. I recently read (well, started to) an essay that says detective stories are popular because secret crime and subsequent discovery are associated in the reader's subconsciousness with (I am not making this up; I could not) the "primal scene," a psychoanalytic term referring to a child's imagining of sexual intercourse between his parents.

Leonard, too, has suffered overinterpretation. A reviewer once said of him: "The aesthetic sub-text of his work is the systematic exposure of aesthetic pretension." Leonard retaliated. In his novel "LaBrava," the protagonist, a photographer, refers to an exhibition of his pictures: "The review in the paper said, 'The aesthetic sub-text of his work is the systematic exposure of aesthetic pretension.' I thought I was just taking pictures."

Leonard's insistence that he is just a story-teller expresses pride, not humility. He has a craftsman's pride that being a fine craftsman is good enough, thank you.

He sold his first fiction in 1951, to Argosy magazine, and his first novel, a western, in 1953. His mother wishes he were still writing westerns because the language would be less gamy. Until he sold his novel "Hombre" (voted one of the 25 best westerns of all time by the Western Writers of America) to Hollywood, he had to work full-time writing advertising copy. Well, Wallace Stevens worked in an insurance office, T.S. Eliot at a bank Anthony Trollope at the post office.

After "Hombre," Leonard stopped writing westerns and started making books the way a custom cobbler makes shoes: steadily, with no wasted motion. He writes from 9:30 a.m. to 6 p.m.

He has been called the Dickens of Detroit because of the colorful characters he creates from the seamier side of life. But he reminds me of Trollope. This is not, Lord knows, because of his subjects—there are no Pallisers in his pages—but because of his approach to his craft.

Trollope kept a meticulous diary of the pages he wrote. He noted that such discipline is considered beneath a man of genius. But, he said cheerfully, not being a genius, he had to be disciplined. You say that anyone who works with his imagination should wait for inspiration? Trollope said it would be just as absurd to say that a shoemaker should wait for inspiration. Writers, he said, should sit themselves at their desks as though they were clerks, and should sit until their daily writing quota is filled. If they adopt his quota, they will produce a book in four months.

Leonard's a "sudden" success—he is an "overnight sensation" after 32 years of hard plugging—is a tribute to America, where people are not homogenized, and cream rises. If you want a sip of the cream, start with his novel "Swag" and then read "Stick." Then, if you are not hooked, go watch television. It will serve you right.

Mr. COHEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GRASSLEY). Without objection, it is so ordered.

REPEAL OF CONTEMPORANEOUS RECORDKEEPING REQUIREMENTS

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of H.R. 1869, the repeal of the automobile records requirement.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H. R. 1869) to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oregon?

There being no objection, the Senate proceeded to consider the bill.

Mr. PACKWOOD. Mr. President, does the Senator from Michigan wish to ask a question right now about unemployment?

Mr. LEVIN. Is this bill now the pending business?

Mr. PACKWOOD. It is now the pending business. It is my hope we can go back-to-back with the supplementary compensation bill right after this.

Mr. LEVIN. That will be coming up?

Mr. PACKWOOD. That is my intention. If something intervenes, it may not, but I would like to get to it back-to-back.

Mr. LEVIN. It is the Senator's intention to do that?

Mr. PACKWOOD. Yes.

Mr. LEVIN. I thank the Senator.

Mr. PACKWOOD. Mr. President, this is a very, very simple bill. Everyone in this body is aware that after we passed the 1984 Tax Act and the Internal Revenue Service issued regulations, there was a great outcry—justifiable outcry, in my estimation—about the burden placed on a great many

people in this country concerning the recordkeeping requirements. A great many honest, decent people, who have never cheated on their taxes in their lives and wouldn't, thought this was an unjustified and undignified burden.

All this bill does is to go back to the status of the law, as far as recordkeeping is concerned and as far as tax preparers are concerned, to what the law was prior to the passage of the 1984 law. So that if you knew how to keep your records then, and kept them for years with no difficulty, you would be able to keep your records now with no difficulty.

There is no other change. There is no other sleight of hand. There has been a legitimate public outcry and we have tried to simply go back to where we were in the law on those two points: recordkeeping and tax preparers.

There are some other changes in the law that were made in 1984 that are less controversial, and those we have not attempted to repeal. But the two I mentioned, that is the sum and total substance of the bill as it came out of the Finance Committee.

I would like to give great credit to Senator ABDNOR, who was the first person to introduce a bill to repeal these regulations. He grasped immediately the injustice we had done. It was his bill that we sent out of committee. He is entitled to a lion's share of the credit for calling to the attention of the Senate this very egregious problem.

Mr. LONG. Mr. President, I am pleased to support the Finance Committee's action on automobile recordkeeping. The committee amendment would repeal the burdensome requirement that business users of automobiles keep daily logs in order to deduct any part of their expenses.

I opposed this provision when it was proposed for inclusion in the 1984 tax bill, but I did not prevail at that time. When I returned for the 99th Congress, I cosponsored legislation to repeal the provision.

I believe that the outrage expressed by my constituents over the 1984 recordkeeping rules was completely justified. The requirement of daily logs was extremely burdensome to comply with. It also would have unfairly denied deductions to many taxpayers having undisputable proof of business use, merely because that proof was not in the form of a daily log or other similar daily record.

Let me emphasize that the Finance Committee amendment does not allow unjustified or fabricated automobile deductions. The amendment simply recognizes the common sense fact that a daily log is not the only acceptable way to prove business use. We would still require adequate records or other sufficient evidence to justify a business deduction for use of a car.

I am pleased that the committee has acted promptly in this important area. I urge my colleagues to support the amendment.

Might I ask the distinguished manager of the bill, the chairman of the committee, is it his purpose to ask for a rollcall on this bill?

Mr. PACKWOOD. I think we will have a rollcall on the bill.

Mr. LONG. I would suggest then that we ask that the yeas and nays be ordered so everyone would be on notice.

Mr. PACKWOOD. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 23

(Purpose: To amend the Internal Revenue Code of 1954 to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984)

Mr. PACKWOOD. Mr. President, I send amendment No. 23 to the desk on behalf of the Finance Committee and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Oregon [Mr. PACKWOOD] proposes an amendment numbered 23 in the nature of a substitute.

The amendment reads as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. REPEAL OF CONTEMPORANEOUS RECORDKEEPING AND RELATED REQUIREMENTS.

(a) CONTEMPORANEOUS RECORDKEEPING REQUIREMENTS.—Section 274(d) of the Internal Revenue Code of 1954 (relating to substantiation requirements for certain deductions and credits) is amended by striking out "adequate contemporaneous records" and inserting in lieu thereof "adequate records or by sufficient evidence corroborating the taxpayer's own statement", and the Internal Revenue Code of 1954 shall be applied and administered as if the phrase which was stricken had not been added to such subsection (d).

(b) PROVISIONS RELATING TO RETURN PREPARERS AND NEGLIGENCE PENALTY.—Paragraphs (2) and (3) of section 179(b) of the Tax Reform Act of 1984 are hereby repealed, and the Internal Revenue Code of 1954 shall be applied and administered as if such paragraphs (and the amendments made by such paragraphs) had not been enacted.

(c) REPEAL OF REGULATIONS.—Regulations issued before the date of the enactment of this Act to carry out the amendments made by paragraphs (1)(C), (2), and (3) of section 179(b) of the Tax Reform Act of 1984 shall have no force and effect.

SEC. 2. EFFECTIVE DATE.

The amendment and repeals made by subsections (a) and (b) of section 1 shall take effect as if included in the amendments made by section 179(b) of the Tax Reform Act of 1984.

Mr. PACKWOOD. Mr. President, again I would like to thank my colleague from South Dakota, Senator ABDNOR, for his leadership in repealing the contemporaneous recordkeeping requirements of the Tax Reform Act of 1984. My good friend from South Dakota introduced the first bill dealing with contemporaneous recordkeeping requirements and has worked with many of us on developing other similar legislation.

His bill, S. 245, is the bill that is being offered as a substitute to the House-passed bill, H.R. 1869. I would also like to thank my colleague from Pennsylvania who introduced S. 260, the objectives of which are accomplished by S. 245, and my friend from Wyoming, Senator WALLOP, who introduced S. 639. Some of the objectives of S. 639 are accomplished by S. 245. Many others have contacted me on the contemporaneous recordkeeping requirements and have had input on the development of this committee amendment.

EXPLANATION OF PROVISION

REPEAL OF 1984 ACT PROVISIONS

First. Repeal of "Contemporaneous." The amendment repeals the words "adequate contemporaneous records" from the code as if those words had never been a part of the 1984 act. The amendment replaces the substantiation requirements of the 1984 act with the requirement that all taxpayers must keep "adequate records or sufficient evidence corroborating the taxpayers own statement." This is one of the substantiation standards that had been in effect prior to the Tax Reform Act of 1984 and has been interpreted in long-standing Internal Revenue Service regulations.

Second. Repeal of return preparer provision. The amendment repeals the provision of the 1984 act requiring that a return preparer must specifically advise the taxpayer of the recordkeeping requirements and must obtain written confirmation from the taxpayer that the requirements were met.

The Revenue Code shall be applied and administered as if the provision had never been enacted.

Third. Repeal of Special Negligence Penalty. The amendment repeals the provision of the 1984 act providing a special negligence penalty rule to an underpayment of tax attributable to failure to comply with the recordkeeping requirements. The amendment provides that the Internal Revenue Code shall be applied and administered as if this provision had never been enacted.

Fourth. Repeal of Certain Regulations. The amendment repeals all Treasury regulations (temporary or proposed) which carryout the contemporaneous recordkeeping requirements of the Tax Reform Act of 1984. These revoked regulations are to have no force and effect whatsoever.

EFFECTIVE DATES

The provisions of the bill repealing certain provisions enacted in the Tax

Reform Act of 1984 take effect as if included in the amendments made by the Tax Reform Act of 1984.

REVENUE EFFECT

The provisions of the bill are estimated to reduce fiscal year budget receipts by $48 million in 1985, $150 million in 1986, $222 million in 1987, $247 million in 1988, and $259 million in 1989.

Mr. President, I hope my colleagues join me in supporting this amendment in the nature of a substitute to the House-passed bill H.R. 1869.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I am not familiar with the language of this amendment. Until I have time peruse it, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I have no objection to this amendment, as such. I do intend subsequently to address myself to the committee direction that is provided in the committee report having to do with the use of airplanes which is a totally different issue, and in my opinion does not belong in this bill at all. I will do that. But I have no objection to the adoption of the Packwood amendment at this point.

Mr. PACKWOOD. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. Is there objection? Without objection——

Mr. METZENBAUM. Mr. President, reserving the right to object.

The PRESIDING OFFICER. Will the Senator suspend for a minute?

The question is on the adoption of the substitute.

Mr. METZENBAUM. Mr. President, reserving the right to object.

The PRESIDING OFFICER. Is there further debate?

Mr. METZENBAUM. The answer is "Yes."

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, parliamentary inquiry. If the substitute is adopted, will further amendments be precluded?

The PRESIDING OFFICER. The adoption of the substitute does preclude further amendments.

Mr. WALLOP. Mr. President, I object.

The PRESIDING OFFICER. There is no unanimous-consent request pending, Senator.

Mr. METZENBAUM. Mr. President.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. The Senator from Ohio has no objection to the basic thrust of this legislation but I have very strong concerns about the fact that there is a committee report attached to it having to do with the giveaway of I do not know how many millions or hundreds of millions of dollars because I have no way of determining that in connection with a totally different subject. Until I get some opportunity to offer an amendment which can be voted up or down by this Senate as to how this Senate feels about the issue, I do not intend to give up the floor nor permit this matter to come to a vote.

I am perfectly willing for the chairman of the committee to offer a substitute amendment to the pending legislation but not in the form of a substitute. He can take the same action as I understand it by merely amending the original bill. There is no reason under the Sun why the Senator from Wyoming, who I gather is on his feet with respect to another amendment, or the Senator from Ohio, who is on his feet with respect to this airline direction, should be precluded from offering an amendment.

Mr. PACKWOOD. Mr. President, I did not mean to preclude the Senator from Ohio, and I will withdraw my request for the adoption of the amendment because as I understand it, other amendments can be offered to the amendment. Is that correct?

Mr. METZENBAUM. Mr. President, I do not wish to interrupt my colleague from Oregon.

The PRESIDING OFFICER. If the Senator will suspend, it will take unanimous consent to withdraw the substitute.

Mr. METZENBAUM. If the Senator from Oregon wishes to withdraw his substitute, the Senator from Ohio would certainly not object to that. I doubt that anyone else would.

Mr. PACKWOOD. Mr. President, I am not asking to withdraw. I just withdrew my request for adoption of the amendment. I am not withdrawing the amendment.

Mr. METZENBAUM. The Senator from Oregon does not have to ask for it to be adopted because, just in the normal course of events, it would be the pending business and would be adopted unless some effort were made to discuss the subject.

The PRESIDING OFFICER. Amendments are now in order to the substitute but once it is adopted, amendments are precluded.

Mr. METZENBAUM. In other words, any amendments to the substitute are in order at this point?

The PRESIDING OFFICER. That is correct.

Mr. METZENBAUM. Mr. President, under those circumstances let me explain what this is all about. In the Tax Act that we passed in 1984, there was an effort to pick up some revenue by closing some tax loopholes, and one of those that was given the attention of this body had to do with the use of corporate aircraft by corporate executives. Under the law as it is at the present time, my understanding is that when a corporate executive uses a plane he or she is expected to pay the value of that trip in the corporate plane. So that if you took a Lear Jet and you went from St. Louis to Atlanta, GA, on a round trip for recreation, you would be expected to report on your tax return $4,335 or if you took a C-90 King Air, it would be $3,335, or if you took a smaller plane, a Beechcraft Baron, it would be about $2,000.

So the Congress determined that if you want to use the corporate aircraft for your own personal use, the very least you ought to do is to pay taxes on the value of that trip. That was one of the moves that the Congress made so that corporate executives would not use corporate planes running all over the country. There is not any argument in anybody's mind that the use of a corporate jet or a corporate plane costs a lot more than the cost of commercial travel.

But what the Finance Committee is attempting to do is not by a legislative proposal but by the audacious act of directing the Internal Revenue Service how to handle this matter. They are doing it not in the legislation that is before us, but in the committee report. Let me read the language:

> The committee also intends that the Treasury is to substitute the following safe harbor valuation rules with respect to employee flights on employer-provided, noncommerical aircraft that constitute taxable fringe benefits for the valuation rules with respect to such benefits that are currently set forth in temporary regulations.

That is bad enough. What they are doing is saying,

> Treasury, you have to do it this way. We are directing you to do it. It does not matter whether you think it is right or wrong. We are telling you what to do.

It goes on to indicate the committee's thinking.

> The committee believes that these substitute safe harbor rules reflect the intent of the Congress concerning the valuation of personal use of noncommercial aircraft under the fringe benefit rules in the Tax Reform Act of 1984.

What they say in this committee report is that, "If the aircraft weighs more than 10,000 pounds, the includable value for controlled employees" meaning the executives "would be first-class fare and the includable value for other employees" would be some percentage of that amount, a lesser amount.

I am frank to say that I am not as concerned about the includable value for other employees, but I am very concerned about corporate executives having another opportunity to rip off

the Federal Treasury. What kind of a U.S. Senate are we when we are coming to a bill this afternoon and we do not have the money to take care of unemployed workers and we are going to put them off and phase them out, but we have to come here on the floor of the U.S. Senate and provide a new way of treating our corporate executives so they do not pay too much taxes?

We had some courage in 1984 and we acted properly. We said, "If you want to use the corporate aircraft, go ahead and do it. But if you go ahead and do it, then you ought to at least figure the value of that corporate trip in your taxable income." This would change that.

Then this whole committee report indicates that if the plane is more than 6,000 and up to 10,000 pounds, you report only the value of the coach fare, and if it is 6,000 pounds or less you report only half the coach fare.

What we are talking about is a giveaway. It is a sheer attempt on the part of the Finance Committee to see to it that the corporate executives of this country are protected; that they can use the corporate aircraft to go the World Series games, to go on a vacation trip, or to take their family wherever they want. They can use it, but they do not have to pay what the Senate thought they should pay in 1984.

Treasury came before the committee and they testified. Assistant Treasurer for Tax Policy, Donald Bergherm, indicated that the proposal was more liberal than Treasury would like, saying that the value of a personal trip on a corporate luxury plane was worth more than a first-class flight on a commercial flight.

What is wrong with us? Have we lost our heads? I understand that the party on the opposite side is spending a lot of time trying to figure out how to balance the budget, and we on this side are attempting to figure out how to balance the budget.

Well, this is not going to balance the budget, and I am not going to kid anybody about it. I do not know how much money is involved. I do not know whether it it $100,000 or $10 million. My guess is that the Finance Committee does not know.

I do know this: This is as wrong as wrong could be. This is just the matter of playing to the corporate executives. This is a matter of treating them as a special group of people.

We said to them in the past, "Go ahead and use the corporate aircraft, but you better report in the value of that trip."

Now we are saying, "Report in the value of the first-class trip."

I would love to have it that way. So would every Member of this body, to be able to have our own plane, be able to travel on it at the taxpayers' expense, and all you had to report or figure out was the value of the coach fare or the first-class fare.

Come on now, who are we kidding? This is the kind of thing that causes Congress to lose respect. This is the kind of thing that does not even come to the floor as an amendment on the floor. This is not even in the bill. So we have to figure out some way to draft an amendment to knock out the committee report language.

Why is it not in the bill? Why does it not come up and indicate that which it is? Why do we have to dig through the committee report in order to find out what is going on?

Mr. PACKWOOD. Will my colleague yield?

Mr. METZENBAUM. I will yield without losing my right to the floor.

Mr. PACKWOOD. What we have before us is the amendment. The report language to which the Senator alludes is attached to the Senate bill, which would have had to lay over 3 days before we could bring this subject up. If we pass this amendment, if we attach it to the House bill, there will be no Senate report language. We will not be passing the committee language. I do not mind going on with the debate. Senator DOLE will be here in a few minutes.

The report language, if we adopt the amendment, will not be part of the Senate action.

Mr. METZENBAUM. Mr. President, I appreciate that explanation. Now I will ask the Parliamentarian whether or not he would be good enough to confirm for me whether or not, if we adopt the substitute amendment, the committee report language thereby falls?

The PRESIDING OFFICER (Mr. BOSCHWITZ). The committee report language is not before the body.

Mr. METZENBAUM. Is not what?

The PRESIDING OFFICER. Is not before the Senate.

Mr. METZENBAUM. It is not before the Senate?

The PRESIDING OFFICER. That is correct.

Mr. METZENBAUM. Therefore, whether it is still viable or is not becomes an open question, as I see it. In other words, the committee report language is still the committee report but it does not ever get to the floor even whether we pass the original bill or whether we pass a substitute. Is that not correct?

The PRESIDING OFFICER. The Chair will say the committee report is not before the body.

Mr. METZENBAUM. I understand that. The committee report is not before us. So the bill itself or a substitute does not affect the validity, the impact, of the committee report language. Is that not correct? The Senator from Oregon, as I understand it, suggests that if we adopt the substitute, the committee report language becomes inoperable. Am I stating it correctly?

Mr. PACKWOOD. Not quite inoperable. It is not before us. We reported out the Senate bill with report language. We also reported out an amendment which we have called up which is an amendment to the House bill, which is before us. So we are not considering the Senate bill to which the report language is attached, which the Senator finds offensive. There is no report language on the pending amendment and the report language on the other Senate bill is not part of what we are considering.

Mr. METZENBAUM. I am not quite certain that is the way it would be interpreted.

AMENDMENT NO. 25 TO AMENDMENT NO. 23

Mr. METZENBAUM. For that reason, Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Ohio [Mr. METZENBAUM] proposes an amendment numbered 25 to amendment numbered 23.

Mr. METZENBAUM. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment add the following new section:

SEC. . AIR TRANSPORTATION FRINGE BENEFIT REGULATIONS.

Notwithstanding any other provision of this Act or any language in the Committees' Report, it is the sense of Congress that the existing regulations that impute income to corporate executives (so-called "key employees") for the use of noncommercial aircraft shall not be amended or altered in any manner that would reduce the amount of income imputed to such employees.

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I ask the manager of the bill if he will yield for a question.

Mr. PACKWOOD. I shall be happy to yield, Mr. President.

Mr. METZENBAUM. Is it not the fact that this same report language is in the House bill that came over, the House report?

Mr. PACKWOOD. No, Mr. President.

Mr. METZENBAUM. Mr. President, is it not part of the House report?

Mr. PACKWOOD. It is not part of the House bill as currently before us.

Mr. METZENBAUM. Mr. President, I did not state the question accurately. I think the Senator's answer is correct, but I shall state the question differently.

When the House reported the bill out, did their report language not include the same language?

Mr. PACKWOOD. No, Mr. President, they do not have this issue in their report.

Mr. METZENBAUM. May I say that I do not have the House bill before me, but I am told that the Wall Street Journal reported that Mr. GLICKMAN offered a similar proposal. Would the staff be good enough to be certain that the manager of the bill and the Senator from Ohio are correctly informed?

Mr. PACKWOOD. Mr. President, I hate to admit this, but the Wall Street Journal article is wrong.

Mr. METZENBAUM. It is wrong?

Mr. PACKWOOD. Yes, Mr. President, it is in error.

Mr. METZENBAUM. Mr. President, although the Senator from Oregon hates to admit the Wall Street Journal article is wrong, nothing pleases this Senator more.

Notwithstanding that, we do find ourselves with the fact that we are at issue. If the Treasury Department follows the committee report language, which is very specific and which I think it is entirely likely it will do, it is directed to change the rules with respect to the imputed value of these corporate charges. My amendment is short. It provides that notwithstanding any other provision of the act or any language of the committee's report, it is the sense of Congress that the existing regulations that impute income to corporate executives—so-called key employees—for the use of noncommercial aircraft shall not be amended or altered in any manner that would reduce the amount of income imputed to such empolyees.

I have tried to make it clear in that simple language that, although the committee report directs the Treasury to act in a particular manner, the Senate does not agree and that if Members of this body want to come on the floor today and vote to let corporate executives get off paying their fair taxes on the value of corporate flights, that is their privilege, but I think that everybody ought to understand that is what we are doing. Because while we are refusing to extend unemployment compensation for unemployed workers who have been out of work for a lengthy period of time because we do not have enough money to do it, we are doing the flip side of that and we are saying to corporate executives, who are making good salaries and good incomes or else they would not have the privilege of riding on the corporate jets, "Well, we are going to take care of you. You may not have enough tax shelter, you may be called upon to pay taxes on the value of the corporate trip; and we do not care about the fact that it will impact on the Federal Government's income; this is a day in which we feel very generous and we are going to take care of the corporate executive."

Mr. President, why? Why? What crying need is there? I do not understand this. I do not understand how anybody can ask the Senate, when we have so many problems, monetary problems, why they come here—this is one of the earliest bills on tax issues that we have seen and the first one that comes down the pike is to clarify a matter with respect to driving of automobiles and keeping of records. I have no problem about that change. But I sure have a lot of problems with giving away Treasury dollars. You do not have to fly in a corporate jet if you do not want to. You can take a commerical flight if you want to.

Why does the corporate executive have to go to the World Series in California in a corporate jet? Why does he have to go in a corporate jet to a football game in some particular part of the country? Why does he need to take the corporate jet in order to go on a vacation?

If he wants to do that, that is OK with me; I do not want to prohibit him from doing it. But I do say we ought to change the law that presently is the law and say to the Treasury, "Look here, Treasury, don't you impute any interest over and above the value of a commercial flight first-class fare."

You know, Mr. President, those planes that are 6,000 to 10,000 pounds, those are not to be underestimated, either. Those are pretty nice planes. You take one of those and you only have to pay so much fare. That is not too bad.

All I can say is, is this the day of ripoffs? I think a week from next Monday or Tuesday is the day when people file their tax returns. Every American who files his tax return on April 15 should be concerned about the vote of every Senator here this afternoon because, when you reduce the taxes of the corporate executives, you have to get the money somewhere else, and that means that the rest of the taxpayers of this country are called upon to pay it.

We should have had this bill come up on April 15. Maybe it would be more dramatic. But it is good enough for me that it has come up in the week before April 15 so that the people of this country can understand what a deal they are getting.

I have offered an amendment; I am not at all certain I shall get enough votes to pass the amendment. But I will say this: That every Senator who does not vote for this amendment is being a party to a giveaway to the corporate executives of this country. He or she is impacting upon the Federal income—and I cannot tell you how much, Mr. President, but I can tell you, the difference between a corporate jet at around $4,000 value and a first-class coach fare at about $400 is what we are talking about.

I have some other figures here. If you want to take an executive DC, from Washington, DC, to Miami round-trip, to go down for a vacation, a weekend or a sports event, under the current law, if you took a Learjet, you would report taxes and include in your income $6,470. Under this proposal, you would report $752, or about one-ninth of the amount.

If you took a C-90 King Air, you would report $6,070. Under this proposal, you would report $218.

For a Beechcraft Baron, you would report $3,110. Under this proposal, you would report $109.

Giveaway of the week: This is it. This is the one that you want to take care of the corporate executives with on the same afternoon that you turn down the unemployed of this country and phaseout extended unemployment benefits. This is the day and the way to do it.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PACKWOOD. Mr. President, this issue is not before us in any way, shape, or form—it is not before us in any report language in the House bill, it is not in the House bill, and it is not in the amendment before us—it is not in any report language that is before us. There is nothing that we have done or are going to do that has any effect, at the moment, on the Treasury regulations that impute the value of flying on airplanes. The committee report that contains that language is not part of the pending committee amendment. I therefore move to lay on the table the amendment of the Senator from Ohio and I ask for the—I withdraw that.

Mr. BOREN addressed the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. BOREN. Mr. President, I am very pleased that the Senate is moving to repeal the ridiculous IRS record-keeping regulations for tax deductible vehicle expenses. While I certainly feel abuses of our tax system should be eliminated, I believe there are better alternatives for preventing abuse of business vehicles than this unreasonable sea of redtape. One can only wonder how the records of the estimated 30 million vehicles involved could ever be reviewed by the IRS.

Farmers, salesmen, and other small businessmen and their employees have sent me copies of their voluminous records from the beginning of this year. When you look at these records, you can't help but be impressed by how much time and effort has been diverted from productive enterprise toward satisfying the ridiculous demands of the IRS.

I believe we will be much better off under the new proposed law which will only require that adequate records be maintained to back up the taxpayer's claim for deductions. I feel this rule can curb the abuses without overburdening the owners of all those 30 million vehicles brought under the IRS regulations we are now attempting to repeal.

I urge my colleagues to support this repeal measure.

The requirement to withhold Federal income tax and FICA on the imputed value to the taxpayer of being able to drive his employer-owned vehicle home which is to begin July 1, 1985 needs our attention. Taxing this commuter vadue against the policeman, fireman, and other public safety officials who need to have the tools of their trade readily unavailable is very unfair. Likewise, workmen who, by the nature of their job, and the special equipment necessary for their job, are required by their employers to take their assigned vehicles home with them at night, should not be subjected to an onerous imputed income tax.

I feel that the amendment to be offered by Senator WALLOP, which I have cosponsored, deserves our support. The waste that has resulted from requiring all of America to gear up for contemporaneous recordkeeping, which today we are finally attempting to repeal, should not be followed with another unnecessary investment of time and money in preparation for compliance for July 1 deadline for fringe benefit taxation. Let us not delay, but take action today.

Mr. PACKWOOD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that we temporarily lay aside the amendment of the Senator from Ohio so that we might consider an amendment of the Senator from Wyoming; that when we have finished disposing of the amendment of the Senator from Wyoming, we will return to the pending business, the amendment of the Senator from Ohio.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 26

(Purpose: To amend the Internal Revenue Code of 1954 to clarify the tax treatment of the personal use of automobiles, and for the other purposes.)

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. WALLOP. Mr. President, I thank the chairman of the Finance Committee. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wyoming [Mr. WALLOP] proposes an amendment numbered 26.

Mr. WALLOP. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out section 2 of the amendment Number 23 and insert in lieu there of the following:

SEC. 2. TAX TREATMENT OF PERSONAL USE OF VEHICLES.

(a) REPORTING REQUIREMENTS.—

(1) IN GENERAL.—Section 24 of the Internal Revenue Code of 1954 (relating to disallowance of certain entertainment, etc, expenses) is amended by redesignating subsection (i) as subsection (j) and by inserting after subsection (h) the following new subsection:

"(i) SPECIAL RULE FOR USE OF CERTAIN VEHICLES.—

"(1) IN GENERAL.—This subsection applies to—

"(A) any emergency vehicle described in section 4064(b)(1)(C), or

"(B) any vehicle with respect to which the only use other than any qualified business use (within the meaning of section 280F(d)(6)(B)) is a qualified personal use.

"(2) QUALIFIED PERSONAL USE.—For purposes of this subsection—

"(A) IN GENERAL.—The term 'qualified personal use' means—

"(i) personal use of a vehicle by an employee if—

"(I) the employer requires the employee to commute to and from work for bona fide business reasons including protection of the vehicle or equipment stored in the vehicle (but not including commuting solely for the protection or regular transportation of the employee), and

"(II) no other personal use (other than de minimus personal use) is allowed by the employer, or

"(ii) any personal use of a vehicle by an individual who is required to use such vehicle as an integral part of the performance of the trade or business of such individual or his employer, including use of the vehicle to make calls on customers or clients, to make deliveries, or to visit job sites.

"(B) NO QUALIFIED PERSONAL USE IF BUSINESS USE IS LESS THAN 75 PERCENT.—The term 'qualified personal use' shall not include any personal use for any taxable year unless the taxpayer establishes that the qualified business use (within the meaning of section 280F(d)(6)(B)) of the vehicle is 75 percent or more of the total use of the vehicle for such taxable year.".

(2) CONFORMING AMENDMENT.—Paragraph (4) of section 274(d) of such Code (relating to substantiation requirement) is amended by inserting "other than property to which subsection (i) applies" after "280F(d)(4))".

(b) INCLUSION IN INCOME OF EMPLOYEES.—Section 132(e) of the Internal Revenue Code of 1954 (defining de minimis fringe) is amended by adding at the end thereof the following new paragraph:

"(3) PERSONAL USE OF AUTOMOBILES.—The personal use of a vehicle shall be treated as a de minimus fringe if—

"(A) such vehicle is an emergency vehicle described in section 4064(b)(1)(C), or

"(3) such use is qualified personal use (within the meaning of section 274(i)(2)).".

(c) DEDUCTIONS AND CREDITS.—Section 280F(d) of the Internal Revenue Code of 1954 (relating to definitions and special rules for limitation on luxury automobiles and personal use of property) is amended by adding at the end thereof the following new paragraph:

"(11) SPECIAL RULE FOR EMERGENCY VEHICLES AND QUALIFIED PERSONAL USE.—

"(A) EMERGENCY VEHICLES.—This section shall not apply to any emergency vehicle described in section 4064(b)(1)(C)(iii).

"(B) QUALIFIED PERSONAL USE.—This section (other than subsection (a)) shall not apply to any vehicle with respect to which the only use other than any qualified business use (within the meaning of section 280F(d)(6)(B)) is a qualified personal use (within the meaning of section 274(i)(2)).".

SEC. 3. EFFECTIVE DATES.

(a) IN GENERAL.—The amendment and repeals made by subsections (a) and (b) of section 1 and section 2 shall take effect as if included in the amendments made by section 179(b) of the Tax Reform Act of 1984.

(b) SPECIAL RULE FOR SECTION 2(c).—The amendment made by subsection (c) of section 2 shall apply to property placed in service after June 18, 1984, in taxable years ending after such date.

Mr. WALLOP. Mr. President, I offer this amendment on behalf of Senator BOREN, Senator MOYNIHAN, and Senator SYMMS, as well as myself.

Yesterday, in the Finance Committee, we reported this legislation which would repeal the contemporaneous recordkeeping requirements for the deduction of business vehicles against income tax liability. Make no mistake, I applaud Senator ABDNOR's efforts and agree completely with what he did and the Finance Committee's result so far as it went.

However, I am constrained to offer an amendment to Senator ABDNOR's bill because I believe that the Finance Committee as a body failed to address other important aspects that are involved. Yesterday we took care of the problems of valuation regarding the burdensome recordkeeping of all Americans who use business cars. Our results in that process seemed to favor the very people Treasury told us were the reason that contemporary records should be required in the first place.

Law was initiated to stop an abuse perceived by the Treasury to be worth hundreds of millions of dollars; that being that people and companies were deducting vehicles which were not

really being used for business purposes.

Mr. President, my concern is really very simple; that is, that we in Congress are gaining the same miserable penny-pinching attitude which Treasury has that all Americans are cheats and they are lucky we permit them to keep as much as we do.

Mr. President, in my life in business, the associates that I had there and the people that I have known all my life who are in business are not inherent cheats. Treasury has applied to this amendment a most mystical sum of money which they cannot substantiate under any set of circumstances, except the sort of inherent desire to stay as miserable and as mean-hearted as they were with the contemporaneous recordkeeping requirements of automobiles.

I should like to point out, Mr. President, that there was a cartoon forwarded to me by a constituent in Wyoming which sort of demonstrates the futility of trying to rely on Treasury for reasonableness in the application of tax principles the Finance Committee sends them. This cartoon showed a man and his wife in a little car and on top of it was a humongous tree trunk and the wife having a rather startled expression on her face is looking at the husband, who is explaining that after the first of the year they had to "keep a log" on the car.

Well, Mr. President, that is just exactly what we did. We had suddenly this mystical requirement laid on a whole lot of people who were paying their taxes and doing their duty. Now, to stop this perceived abuse, we allowed Treasury to develop a massive, intricate set of rules not only to substantiate a business deduction but also to value, report, and withhold on the income imputed to employees who use business cars.

We make a note here that without this amendment we now require in this country very sophisticated payroll systems which would be capable of imputing value, which in many cases is not really there, and withhold from one's wages the taxes thereon. This would place a new requirement on America's business; a sophistication beyond the capability of most of America's businesses. Also, we would withhold this imputed income because Treasury has convinced us that the American taxpayer is so dishonest that, but for the withholding, we would never see the money.

Mr. President, my ranchers are not like that, my plumbers are not like that, my druggists are not like that, my lumber owners are not like that, Americans are not like that.

Yesterday, with the help of quite a few of our constituents, we were finally able to perform a reasonable ballance regarding the recordkeeping burden, for which I salute the Senator from South Dakota, and which will set the appropriate standard for justifying a deduction for a business vehicle; but we failed, at the same time, to fully address the problem. I am concerned that if we do not take it up now, it will be lost among the more pervasive issues coming before us, such as Superfund and tax reform.

I am not here, Mr. President, to make the case of the corporate manager who is given a company car as a perk and has no real business needs. Tax it—and my amendment permits that to take place. This is the value we were trying to tax last year. That was what we were doing. But I am here to ask that we insert in this process some reasonable cutoff.

Most Members of Congress do not have business experience; but, loath as we are to recognize business needs, we have to recognize that there are and there will be and there remain legitimate cases where it goes beyond the bounds of reason to impute a value to the employee or to require the employer to go through this complexity of recordkeeping, taxation and withholding.

In a time when the President has asked us for—and many in both parties have bravely taken up the cause of—tax simplification, it seems paradoxical to value, tax and withhold on minute personal value of some business vehicles. I doubt very seriously that such microscopic taxation is required in fairness.

Part of the reason why Chairman PACKWOOD led us away from the question of value, withholding and taxation relating to business vehicles was to prevent confrontation with Chairman ROSTENKOWSKI. He insists that we should be dealing with a revenue-neutral fix to this problem. I question whether we ever had the revenue that would be lost by my amendment and, indeed, whether it was ever really rightfully ours.

The amendment now before the Senate exempts from income taxation, and therefore withholding and recordkeeping, small amounts of personal use of business vehicles, which are actually required to perform one's services or where the employer requires, for bona fide business reasons, that the vehicle be taken home.

I suggest that there are two kinds of circumstances where this would be the case. The first is where the business vehicle is actually required to perform one's services. That does not mean using one's car to commute to work. That does not mean taking a salesman from home to a salesroom. It means a traveling salesman's automobile. That is what it means. The test of this is that it is actually required for the business performance for which the employee is hired, or where the employer requires, for bona fide business reasons, that the vehicle be taken home.

One of the things we overlooked last year, and the Treasury never could conceive of, is the fact that in my hometown of Sheridan, WY, a plumber requires his employees to go home with their pickups, especially in the wintertime. The idea is that somebody called to fix a furnace in the middle of the night would not have to go 20 miles to Sheridan and back 30 miles to the country. It would provide a convenience both to the employer and the person requiring assistance. There are legitimate reasons, despite what Treasury thinks, and this is the second test required under our amendment.

These situations are not the abusive areas we sought last year and cannot be, no matter what Treasury says; and we will hear, in a little while, a projection of astronomical figures, large revenue losses.

The amendment also recognizes that people who drive marked or unmarked emergency vehicles are really always on duty, servicing the public's good, and I do not wish them to contemplate whether they are driving business or personal miles when they are called to serve the public safety.

This amendment, which I cosponsor with Senators MOYNIHAN, SIMPSON, and BOREN, is an attempt to define to the appropriate limits of IRS involvement in the taxation of relatively insignificant fringe benefits and, more important, to limit the significant intrusion into the lives of Americans caused by attempts to tax such benefits for minuscule amounts of money from individual taxpayers.

My amendment today, as did S. 639, seeks only moderation in the taxation of personal use of business vehicles. I have made the cutoff more objective and have not provided the preference for agricultural vehicles and require them to meet the same standard and burden and complexity of recordkeeping, withholding, or taxation, as any other business.

I think my friend from South Dakota would badly want that for his farmers.

The American tax burden is high enough that we should not tax, as well, the American spirit with a pervasive tax system which seeks to tax, without regard to the reasonableness of that tax, every conceivable benefit in life. I agree with the poem of a constituent which was read by Senator BENTSEN during the markup, that it would make a lot more sense to raise the tax rates than to use such disruptive methods of taxation, such as taxation of minute personal use of predominantly genuine business vehicles.

The IRS failed to make a reasonable balance the first time they tried this, and I am not now willing to allow

them to negotiate beyond these levels of reasonableness.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter of endorsement from that National Federation of Independent Businesses, and I rest my argument, at least temporarily.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL FEDERATION OF INDEPENDENT BUSINESS,
Washington, DC, April 3, 1985.

DEAR SENATOR: NFIB would like to commend the Senate Finance Committee for taking prompt action to repeal the "adequate contemporaneous recordkeeping" requirements of the Tax Reform Act of 1984, the provisions which authorized the IRS "auto log" regulations.

While we applaud the action of the committee regarding the repeal of the recordkeeping requirements, we believe that the committee's bill leaves open several important issues. It fails to provide any clear statutory definition of the type of substantiation which is adequate to meet the requirements of the proposed legislation. It also fails to deal with the question of valuation of minimal personal use of a vehicle, which otherwise would be attributed as income to the employee.

These unresolved issues are of vital concern to small business owners. We believe that the amendment to the committee bill proposed by Senator Wallop would clarify them, and we urge your support of his amendment.

Sincerely,

JOHN J. MOTLEY III,
Director of Federal Legislation.

Mr. SYMMS. Mr. President, I am pleased to support the Wallop amendment that will address the imputed income and valuation portion of the recordkeeping provisions.

This issue has been a hotbed of debate and a thorn in the side of most of our constituents from the moment that they became aware of it. They were asked to abide by cumbersome and detailed mileage recordkeeping and to have income imputed to them for using a business vehicle for business purposes.

Both the recordkeeping and the imputed income are major problems. I would like to commend the work that was done in the Finance Committee yesterday. In adopting Senator ABDNOR's bill we alleviated the recordkeeping half of the problem. Senator ABDNOR's bill goes a long way toward meeting the concerns of the public, and I support that wholeheartedly.

However, it still leaves a major concern unaddressed. That is the valuation and imputed income of business vehicles.

Over the past few months, it has become clear that working men and women will not stand for this type of burden. I can understand their dismay.

I think the original intent of the provisions that were enacted last summer in the 1984 tax bill were aimed at catching abuses. That is fine with me. But let us not make honest, hardworking people feel like abusers of the system.

Our measure will provide guidelines for the valuation of business vehicles that are sensible, practical, and within the lines of responsible Government.

The Wallop measure incorporates the fine work that Senator ABDNOR has done on recordkeeping and also takes a practical approach to the valuation side of the problem.

This is a solution to the many concerns and questions that have been plaguing farmers, salesmen, policemen, and many other groups and allows them to move on to their normal course of business.

Basically, the Wallop amendment would:

First, allow income tax exclusion for emergency and utility vehicles. As Mr. WALLOP has pointed out, there are vehicles that have specific public services to perform, and they should not be taxed. I do not believe that it was the intention of Congress to impose unnecessary restrictions on these categories.

In many cases, these vehicles provide protection and service to communities 24 hours a day and are equipped with instruments that can provide a vital communication in an emergency situation.

Second, there is also income tax exclusion for any vehicle that is used more than 75 percent for business and is not within the luxury car definition.

This includes instances such as farm vehicles and general utility trucks, where the employer requires the employee to commute to and from work for bona fide business reasons, including the protection of the vehicle or equipment stored in the vehicle.

This also takes into consideration the individual who is required to use his vehicle as an integral part of his trade or business. An example might be a realtor or salesmen who, by calling on clients and making deliveries, is spending vast amounts of time in their vehicle.

I think that these exemptions would take care of problems that the average businessman is facing without being too broad and opening the door for abuses.

This amendment is a simple, straightforward approach that would not impose defeating and disheartening restrictions on our citizens. These are hard-working people that do not need any discouragement—and judging from the outcry since these old provisions were made public, the citizens of this Nation are not going to stand for any more complicated laws coming out of Washington.

I think we need to remember the American dream. There is nothing wrong with incentives and rewards for working hard. That is the notion that this country grew and prospered on and it infuriates me when those incentives are snatched away.

Many small businessmen take much lower salaries than an executive in a big corporation might and he should be allowed to use his car for business, without having to pay additional taxes.

I do not think that any of us want to impose heavy-handed restrictions that will break the spirit of hard-working men and women. They are only asking for a sensible approach that will let them continue to concentrate on their business. If we want them to continue to prosper, we must not bog them down with unnecessary paperwork and taxation.

Mr. PACKWOOD. Mr. President, I ask whether my good friend from Wyoming is going to ask for the yeas and nays on this amendment.

Mr. WALLOP. Not if the Senator from Oregon is willing to accept it.

Mr. PACKWOOD. No; the Senator from Oregon cannot accept it.

Mr. WALLOP. In that case, Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PACKWOOD. Mr. President, much as I am in sympathy with the plight described by the Senator from Wyoming, I have to oppose his amendment, for two reasons.

One reason is that we have tried in this bill to remedy an error that was made; perhaps by us, perhaps by the Internal Revenue Service—they can blame us for passing the bill, and we can blame them for the regulations—on recordkeeping.

For the people who were required to keep records, this will satisfy them. They will go back to the status of recordkeeping prior to the passage of the 1984 law, and if they could keep adequate records then, they can keep adequate records now.

Again, as I say, Senator ABDNOR deserves the lion's share of the credit for calling this to our attention, and the amendment we have before us is his language.

The issue raised by my distinguished colleague from Wyoming is another issue. It is an issue of valuation. It is an issue of fringe benefits, and that is an issue that we have been up and down the hill on many times; but it is an issue we tried to avoid directing ourselves to in this bill, because there are all kinds of requests from different groups to take care of a particular valuation or fringe benefit problem that they have. This is not a recordkeeping issue.

Now it is an issue of value. We made no exceptions in our bill. The House bill does have exceptions for marked police cars, marked utility trucks, obvi-

ously the kind of vehicles that you do not drive back and forth to the convenience grocery store to pick up milk, bread, or for other personal purposes.

The money involved is de minimis. There is not a great deal of money involved.

Treasury estimates that if the amendment of the Senator from Wyoming is adopted, we will lose approximately $1 billion. It is a very expensive amendment.

I can assure my good friend from Wyoming that the Finance Committee is going to have hearings on the issue of valuation, on airplane flights, and on variety of other issues.

But considering that the Treasury estimates that this is a $1 billion loss and that we have attempted to avoid getting into the issue of valuation on all other kinds of transportation and even auto transportation, I would have to urge my colleagues to vote against the amendment of my good friend from Wyoming.

Mr. President, I yield the floor.

The PRESIDING OFFICER [Mr. HEINZ]. The Senator from Wyoming.

Mr. WALLOP. Mr. President, if I thought that there was anything but pettiness in the Treasury's estimate, I would be very much inclined to withdraw the amendment and work with the Senator from Oregon, the chairman of the Finance Committee; but there is absolutely zero justification for that estimate. They cannot begin to make a substantiated case for it. They pulled it out because they do not like this.

But let me focus on what really is at issue here. The chairman of the Finance Committee said that we tried to remedy an error, whether it was ours or Treasury's, that caused an undue burden on the working people, the earning people of this country, and we did part of that; but let me suggest that we did not do the part that is the most complex. American small business does not have the capacity to impute minute amounts of value in the personal use of required business vehicles that meet these two demanding tests.

Treasury's revenue estimate is something that they pulled out of the sky. They think this amendment would address all kinds of fringe benefits, and I agree with the Senator, the chairman of the Finance Committee; but we are not talking about all kinds of fringe benefits. We are talking about two very specialized classes of vehicles, plus those in the emergency levels, which I believe we should do under any set of circumstances, that are not covered by the Abdnor bill.

I believe that people who are volunteer firemen or policemen or ambulance drivers, or anything else, who take ambulances home at night, are in fact permanently on duty. Whether they go out to a friend's or not, they must respond for emergencies from wherever it is they happen to be. So that much cannot be troublesome to Treasury.

The second part of it, though, is that these vehicles—and we are not talking about anything but cars, vehicles that are required for the performance of your employment. We are not talking about a car that is used for commuting back and forth. And who would tell me that the average company can impute without complex recordkeeping requirements any amount of money to these things? It is a burden on the taxpayer. It is a burden on the taxpayer's employer which we still have not come to grips with.

The second requirement that we have is that the vehicle be a necessary part of the function of your job.

So you have two requirements.

One, that the employer requires you to have it for the purpose of taking sophisticated tools or for the purpose, as I mentioned my plumber people, who take those vehicles home at night to be able to service the public that they serve at night in off-hours. It is a requirement of the employer as part of the employment that this person be able to respond as the emergency people are at all times, or that it be an integral part of the performance of employment.

These cannot be $1 billion because to impute them as the Treasury says $1 billion would be something in the neighborhood of $4 billion worth of driven miles. I mean the value of what has been driven would be about $4 billion. We are talking about limited exceptions from imputed value. So it cannot be.

This is Treasury telling us, "We want to remain as spiteful as we have been," and mark my words, my fellow Senators, you will not be off the public hook by passing only this piece of legislation as the Finance Committee passed it out yesterday.

This is not an argument that can be substantiated. Treasury has massive computers. I might point out that massive computers cannot process the income tax returns of Americans. Why are we expected to believe that they can process overnight a revenue estimate of $1 billion to something that was only supposed to raise $100 million when it was in toto?

Somehow or another we have achieved magnificent revenue gain out of something that was only supposed to bring us as a Nation $100 million.

So I suggest that Treasury is doing something that Treasury is only capable of doing and that is begging to be permitted to remain spiteful.

Mr. President, I yield the floor.

Mr. PACKWOOD. Mr. President, the $100 million alluded to by my good friend involved only the recordkeeping part of the 1984 act.

The issue he is talking about now is 75-percent business use, and then you get the car free which is genuine fringe benefit.

Mr. WALLOP. Under two very narrow sets of circumstances. I must say it is not as the chairman has stated, and forgive my interruption. I should have addressed the Chair. But it is very narrow. It is not just any old car.

Mr. PACKWOOD. The second part of the "or" is "or the vehicle is required by the employer to perform the job."

Let us assume, first, that the employer gives the car to the employee and it is for the performance of employee's work. You do not give it to him for the fun of it or personal use.

Mr. WALLOP. That is not the case.

Mr. PACKWOOD. I understand.

So let us assume if every employer gives the car to an employee. We presume it is for purposes of employment, do we not?

Mr. WALLOP. Clearly, that just cannot be the case. There are those who are given cars for reasons of compensation for employment, and there is a very big difference.

Mr. PACKWOOD. What does the Senator mean "compensation for employment"?

Mr. WALLOP. Many employers give an employee a car and a membership to a country club, right? Those are not what we are talking about.

Mr. PACKWOOD. Then they have to pay taxes on it.

Mr. WALLOP. That is right, and they would under mine.

Mr. PACKWOOD. All right. If the employer provides you a car for business purposes and you use it 75 percent of the time for business purposes, then whatever personal use it is used for is not counted as income under the Senator's amendment.

I said Treasury estimates $1 billion a year. The joint committee, which is the professional committee that advises——

Mr. WALLOP. After 75 percent.

Mr. PACKWOOD. Yes, after 75 percent. The 25 percent is personal use.

The joint committee estimates that for the 4 years, 1985 through 1988, it is $3.8 billion. So we are not that far off from Treasury. Can I guarantee they are right? No. Do we have anything better to go on? No.

So we are talking about, by honest estimates of decent people, a billion-dollar-a-year loss. And when we are talking about deficits that we are trying to shave, I just do not think we, in good conscience, can adopt this amendment with that kind of a loss, to deal with an issue that we did not intend to deal with when we were simply trying to undo the recordkeeping requirements.

Mr. WALLOP. If my chairman will yield, the thing that makes one feel just grossly cynical about estimates like this is that since about the first of the year we have tried to get such an estimate and it was said not to be possible and all of a sudden, in 24 hours, it is possible. Now, there is something that is not very up to snuff about that. In point of fact, it was considered to be miniscule until we considered to raise it as an issue.

Mr. KASTEN. Mr. President, I am very pleased that we are voting here today to repeal the Federal regulations—and the underlying law—that requires taxpayers to keep complicated and detailed daily records of the business use of personal cars and trucks.

As a cosponsor of S. 260—a bill to repeal the proposed regulations and thus restore prior law—and S. 281—a bill to repeal the proposed regulations for public safety vehicles—I am especially glad that we are taking quick and definitive action now.

Judging from the mail I have received on these issues, the American people are adamantly opposed to the IRS regulations. I do not blame them.

This recordkeeping regulation was threatening to drown farmers, small businessmen, and other taxpayers in a sea of paperwork.

It would have required farmers to keep a written record of every trip to town for supplies, every time feed is hauled to livestock, and every chore performed with the pickup.

It would have required small businessmen to keep track of all the deliveries and errands made—and by each employee.

Mr. President, there's no doubt that this is a prime example of an over regulating Federal bureaucracy at its worst. It's about time we came up with a better approach.

The measure we are voting for today would repeal the regulations that call for taxpayers to keep detailed records of the use of business vehicles or the business use of personal vehicles. The records had to include the name of the user, the date, odometer readings at the start and end of each trip, and the purpose of each trip.

Under prior law, the such detailed recordkeeping was not required, and taxpayers could back up tax deductions with other evidence—such as appointment calendars and sales records.

This legislation would allow the prior law to stand until the end of the year. Beginning next year, written evidence—such as logs, diaries, expense reports, or other documents—would be required to justify the business use of company cars and personal vehicles.

This bill also expands the list of specialty vehicles that are not subject to the new recordkeeping and imputed interest requirements. The list includes marked police cars, single-seat delivery trucks, and ambulances, and others.

As a cosponsor of S. 281, I am pleased to see that this legislation takes care of the proposed regulations that would apply to most public safety vehicles. I hope that later this year we will be able to completely solve this problem.

Mr. President, the Senate Finance Committee should be commended for voting out this bill—S. 245. It both repeals the recordkeeping requirements and partially solves the problems for public safety vehicles. I applaud the committee and the leader for bringing it to a quick vote in the Senate today. The House of Representatives acted on this matter yesterday, and I urge that we follow their lead.

Mr. HEFLIN. Mr. President, I rise in support of Senator WALLOP's amendment to H.R. 1869. This amendment exempts from taxation the personal use of a business vehicle if either of two requirements are met.

First, an employee is exempt from taxation if he is required to drive a vehicle in the performance of his responsibilities.

Second, an employee is exempt from taxation if the employer requires him to take a vehicle home as part of his job.

Last year's Deficit Reduction Act made several changes in the area of fringe benefits. Specifically, the bill added a new section to the Tax Code—section 132—that provided four general fringe benefit categories. If any employer-provided benefit fits into one of these categories, then the employee does not have any income to the extent of the benefit provided. Not included within those categories, however, is the use of a vehicle by an employee in the performance of his business responsibilities or the use of a vehicle by a public safety employee, such as a State trooper's use of his patrol car. Clearly, it was not the intention of Congress to impose a tax on these categories of employees, who must use a vehicle as an integral part of performing their duties.

Mr. President, to place this burdensome tax on the people charged with protecting and caring for our citizens, and on business people who legitimately must use a vehicle in the performance of their responsibilities is an inequity and an outrage. I, therefore, urge my colleagues to support this amendment, which will correct this very serious flaw in the Tax Code.

Mr. PACKWOOD. Mr. President, I am ready to vote, if my good friend is.

Mr. WALLOP. I am ready to vote.

The PRESIDING OFFICER. Is there any other Senator seeking to be recognized? If not, the question is on agreeing to the amendment of the Senator from Wyoming [Mr. WALLOP]. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Utah [Mr. GARN], the Senator from Oregon [Mr. HATFIELD], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Alaska [Mr. MURKOWSKI], are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon [Mr. HATFIELD], would vote "nay."

Mr. CRANSTON. I announce that the Senator from New York [Mr. MOYNIHAN], is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 51, nays 42, as follows:

[Rollcall Vote No. 23 Leg.]

YEAS—51

Abdnor	Hatch	Nunn
Andrews	Hawkins	Pressler
Baucus	Hecht	Pryor
Boren	Heflin	Quayle
Bumpers	Helms	Riegle
Burdick	Inouye	Rudman
Cohen	Kassebaum	Sarbanes
D'Amato	Kasten	Sasser
DeConcini	Laxalt	Specter
Denton	Leahy	Stafford
Dixon	Lugar	Stevens
Dodd	Mathias	Symms
East	Matsunaga	Thurmond
Exon	Mattingly	Wallop
Ford	McClure	Weicker
Goldwater	Melcher	Wilson
Gore	Nickles	Zorinsky

NAYS—42

Bentsen	Evans	Long
Biden	Glenn	McConnell
Bingaman	Gorton	Metzenbaum
Boschwitz	Gramm	Mitchell
Bradley	Grassley	Packwood
Byrd	Harkin	Pell
Chafee	Hart	Proxmire
Chiles	Heinz	Rockefeller
Cochran	Hollings	Roth
Cranston	Johnston	Simon
Danforth	Kennedy	Simpson
Dole	Kerry	Stennis
Domenici	Lautenberg	Trible
Eagleton	Levin	Warner

NOT VOTING—7

Armstrong	Hatfield	Murkowski
Durenberger	Humphrey	
Garn	Moynihan	

So Mr. WALLOP's amendment (No. 26) was agreed to.

Mr. WALLOP. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. THURMOND. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 25

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Ohio.

Mr. PACKWOOD. Mr. President, did I hear the Chair say we are now on the amendment of the Senator from Ohio?

The PRESIDING OFFICER. The Senator from Oregon is correct.

Mr. PACKWOOD. Let me assure those who voted on the last amendment that in the House bill there is a provision relating to exempting from income unmarked police cars, utility trucks, cherrypickers, and a variety of vehicles that are not likely to be used for personal purposes. It would be our intention in this amendment to permit the Treasury to exempt unmarked police vehicles or vehicles that you want to have unmarked for obvious law enforcement reasons, such as stakeouts, where you do not want people to know that it is a police vehicle.

The vote on the last amendment was a close vote. The Senator from Wyoming won. It was a benefit valuation vote, but I can assure the Senate that we have every intention of agreeing to the House provisions on the marked vehicles and that the Treasury would be instructed to include the unmarked police vehicles or vehicles that the police do not want to mark for law enforcement purposes.

Mr. PRYOR. Will the Senator yield?

Mr. PACKWOOD. Yes, I yield.

Mr. PRYOR. Mr. President, I appreciate very much the Senator's accommodating the concern many of us have had not only about regular and marked police vehicles but the unmarked vehicles used for certain missions. I deeply appreciate the Senator's accommodating those concerns.

Mr. PACKWOOD. I thank the Senator from Arkansas for calling that to our attention. He remembers yesterday in the markup, it was simply an oversight and called it to my attention and we have taken care of it.

Now we are on the amendment of the Senator from Ohio, I believe.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. PACKWOOD. Yes.

Mr. DOLE. Mr. President, the Finance Committee report language would establish realistic valuations for personal flights on company planes. I want to point out that what we tried to do in the report language is not subject to amendment as far as I know—it is not before us.

I know that some taxpayers would like to have no income imputed to them for these flight benefits. But Congress said that this was not fair. It is a view I shared; in fact, as chairman of the Finance Committee, I brought this legislation to the floor. There is an economic benefit which should be included in income.

However, the Treasury regulations which the Senator from Ohio would endorse provided very inflated valuations which did not reflect an appropriate discount for limitations on use of the benefit. Treasury recognizes that this is a defect in the regulations which should be corrected. Similarly, as I pointed out yesterday in committee, the regulations make no distinction among different types of planes. No one would argue that the economic benefit of flying in a small plane that travels at barely 100 miles an hour is equal to three times first class fare on a commercial airliner. But that is what can happen under the Treasury regulations. Treasury recognizes that this also is a defect in the regulations. Yet Senator METZENBAUM would not allow Treasury to correct their mistakes. That just does not make sense.

I can understand the Senator's concern and, certainly, I want to protect the tax base against erosion. We have agreed many times when that was at issue. I assume we agreed on the last vote. However, protecting the tax base does not mean that we should overstate poeple's income. Treasury recognizes that the temporary regulations do just that and would like to correct the problems.

The Senate should not stop them from correcting this error.

I might also indicate that there are a number of aircraft companies in rather deep recession at this time, including several in Wichita, KS, that this Senator has some interest in.

They are very concerned about this. They think that without some clarification, the overvaluations required by the regulations can have a potential impact on the entire industry.

I hope the amendment will be defeated. I apologize for not being here when the Seantor raised it, but I was unavoidably absent from the floor.

Mr. METZENBAUM. Will the Senator from Kansas, the majority leader, yield for a question?

Mr. DOLE. If I can do it quickly. I have a person waiting to see me.

Mr. METZENBAUM. Is it the fact that in the present law, Treasury merely requires the reporting of imputed income based upon the value of the cost of chartering a similar plane? Is that not what the present law is?

Mr. DOLE. Only in certain circumstances.

Mr. METZENBAUM. But in the main, that is the rule that is used, Mr. President.

Mr. DOLE. Not in the main, only in certain limited circumstances.

Mr. SYMMS. Would the distinguished majority leader yield?

Mr. METZENBAUM. I think the Senator from Ohio has the floor.

The PRESIDING OFFICER. The Senator from Kansas has the floor.

Mr. DOLE. Only when you control the use of the plane, and there is no business purpose does the charter rate apply.

Mr. METZENBAUM. I think that is fair enough. I understand that.

But I assume the corporate executives who have the right to use the plane control the use of it. My amendment—rather, the committee report directs itself first at the personal use of the plane. All I am trying to do is keep Treasury from being forced to do something that Treasury itself does not want to do. I was not at the committee meeting but, according to one of these reports of the Bureau of National Affairs, they said the Assistant Secretary of the Treasury for Tax Policy, Ronald Pearlman, indicated that DOLE's proposal was more liberal than Treasury would like, saying that the value of a personal trip on a corporate luxury plane was worth more than a first-class flight on a commercial flight.

I think the Treasury therefore indicated that they are not for it at all.

Query: The Senator from Kansas, the majority leader, has the principal responsibility for trying to balance the budget in the U.S. Senate. He works with the chairman of the Committee on the Budget. Will this committee language not, indeed, affect the income of the Federal Government and diminish it?

I cannot figure out the amount, I do not know how many corporate jet trips are taken for personal purposes. But whatever the amount, is it not a fact that on the very day that we are terminating supplemental unemployment compensation, there will be a decrease in Federal revenue the amount of which is unknown to me?

Mr. DOLE. Mr. President, let me first correct one thing. We are not terminating it, we are going to phase it out, which I think is an extension of benefits.

Second, there are a lot of jobs connected with the aircraft industry.

Third, I think the cost would be less than $10 million per year at least, we are advised it is $10 million.

I am reminded of a story told by a friend of mine, Robert Strauss. When he was told in the Carter administration, everybody was going to fly tourist, they asked Mr. Strauss, "Are you going to continue to fly first class?"

He said, "Yes, until they come up with something better."

Mr. President, I am not certain a corporate jet is better than first-class fare. It seems to this Senator that we have given some pretty good guidelines. We did not adopt the position set out by the industry. They had even other ideas that this Senator could not endorse.

Mr. METZENBAUM. I would like to say that all my amendment does here today is emphasize the amendment that was enacted by this body under the direction and aegis of the man who is the proponent of this, Senator DOLE. It was he who authored the 1984 bill.

Mr. SYMMS. Mr. President, I would like to ask the Senator from Ohio a question if he would like to yield.

The PRESIDING OFFICER. The Senator from Kansas has yielded the floor.

The Senator from Idaho.

Mr. SYMMS. Mr. President, I did not get to hear the presentation that the Senator from Ohio made about why his amendment was a virtue—which I am sure he believes it is—but I do think there are a couple of points that need to be made. Then I would like to pose a question to my colleague from Ohio.

No. 1 is, we talk about the lavish comfort of flying in corporate jets, however, I think sometimes we should remember that some of these corporate jets, such as one I am familiar with in Idaho that a food processing company owns, that will barely seat eight people. They are jammed in the airplane. I am sure that is one of the types of airplanes that the Senator from Ohio is referring to when he talks about lavish accommodations.

Say, for example, the head of Corporation A is taking six of his employees somewhere with him on a business trip and somebody from another company or a "hitchhiker" rides along. That passenger is then supposed to be imputed at first-class accommodations.

I think the Senator should also be reminded that the corporate leader, whether it is the personal owner or head of the company, is in charge of the flight. The people who are riding along have to go at the whim of the other person's schedule. If you are riding on a commercial airliner, you can choose the flight that is most agreeable to your schedule. If you are riding with someone else, you may not be able to control the time.

There is the queston I want to pose. I have a letter from a fellow Idahoan who happens to own a company airplane for his business.

DEAR SENATOR SYMMS: I have become very concerned in regard to the IRS regulations valuing non business transportation on employer provided aircraft. In our business, which is very family oriented, I find that it is extremely valuable to our organization to take spouses along where there are empty seats. The cost is nil to the company. I feel that the new regulations are totally unfounded. Representative Dan Glickman, Democrat from Kansas, has introduced new legislation, HR 1392, which we feel is a satisfactory resolution to the problem. I certainly would appreciate any support that you could give to this proposed legislation.

It is rather interesting to me that the IRS regulations permit airline employees to fill an empty seat without tax obligation but that privilege is not extended to employees of companies that own their own aircraft.

With that in mind, the question I ask of the Senator from Ohio—I know he is concerned about compliance with the Internal Revenue Service Code in general—doesn't he think that by rigid application of the amendment he offers he is making an open invitation for noncompliance of the Tax Code? I think what you will find is that for somebody who owns a small plane, say, a Cessna-180, or a Piper Comanche-250, not a lavish corporate jet, who is a small business person—it will be very easy for them to not keep track of the passengers and there isn't anything the IRS can do about it. It seems to me you are making an open invitation for noncompliance, even if you want to go up to a bigger, heavier aircraft as is in the amendment of more than 10,000 pounds, and so forth.

Doesn't the Senator think he is making an open invitation for noncompliance and really ridicule the Internal Revenue Service Code by imposing these unrealistic, rigid provisions on the taxpayer?

Mr. METZENBAUM addressed the Chair.

Mr. SYMMS. I have the floor. I yield for an answer to the question.

Mr. METZENBAUM. Let me say that the Senator from Ohio is not imposing anything. What the Senator from Ohio is doing is saying that by this committee report language you should not be telling the Treasury how to interpret the law, and this is the law at the moment. The regulations are enacted under the law at the moment. If you want to change the law, you ought to come in with an amendment to change the law. But what you are doing here by a committee report is attempting to change the direction of the Treasury's interpretation of the law. So that is the first point. I am not trying to change anything.

Mr. SYMMS. Will the Senator—I have the floor.

Mr. METZENBAUM. I am going to respond to the Senator.

Mr. SYMMS. I thank the Senator for his answer.

Mr. METZENBAUM. No; I have not finished my answer. I want to finish my answer if my colleague will permit me to do so.

What I am saying is, this is the law. And I shed tears for the fact that the corporate jets in the Senator's State are not as big as he would like them to be. My constituents are unemployed. They are concerned about that.

Mr. SYMMS. I clearly make the point to my colleague, he misstates the case.

Mr. METZENBAUM. I will be very happy to restate it just as soon as I give back the floor, but the Senator asked me a question. I think I now have the floor to respond to his question. I want to say to him that this is not a question of any inequity. This is a question of keeping the law as it is. And if Treasury or Senator DOLE or Senator SYMMS or anybody wants to come in and change the law, do it. Come in with the legislation.

Mr. SYMMS. I thank my colleague very much.

Mr. METZENBAUM. But that is not what we are talking about.

Mr. SYMMS. Mr. President, do I have the floor?

Mr. METZENBAUM. So I just say to the Senator——

Mr. SYMMS. Mr. President, I believe I have the floor.

Mr. METZENBAUM. I have the floor.

Mr. SYMMS. I thank the Senator for his answer.

Mr. METZENBAUM. Mr. President, will you be good enough to tell the Senator——

Mr. SYMMS. Mr. President, I have the floor.

The PRESIDING OFFICER. The Senate will be in order.

Mr. SYMMS. I have the floor, I think.

The PRESIDING OFFICER. The Senator from Idaho had been recognized and he may yield only for a question.

Mr. SYMMS. I thank my colleague very much for his answer. What Senator DOLE is trying to do is to get the Treasury and the bureaucrats at Treasury to interpret the law the way Senator DOLE intended it to be last summer when it passed the Congress. That is one thing that should be said.

I think Senator DOLE is perfectly in order to offer committee report language, Mr. President, which tries to direct the bureaucracy at Treasury, which is very simple minded in its purpose to try to extract the last ounce of blood from a turnip—the American enterprise system. What our colleague from Ohio is saying is that he does not want Congress to direct the bureaucracy to do what we said they should do in the first place. I would appeal to my colleagues to vote down this amendment. Then I would be one of the first to say that as a matter of principle, whether it be an automobile, an airplane, a pickup truck, at some point in time I think we should foreclose the Internal Revenue Service putting its nose into the last order of business of every single thing that takes place in the United States of America. That is what we are talking about. If a person is flying somewhere on legitimate business, this Senator finds it rather difficult to believe that it is truly any business of the Federal Government as to who rides in the empty seat.

Now, it has already been ruled that it is the business of the Government, but I pose that as a philosophical question. I think Senator DOLE's committee report language is certainly better than the current interpretation that Treasury has of the bill that passed the Congress last summer. So I urge my colleagues to vote down the Metzenbaum amendment.

Mr. METZENBAUM addressed the Chair.

Mr. SYMMS. I yield the floor.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I want to repeat to my good friend

from Idaho that which I told him on the floor of the Senate, and that is that I do not believe his constituents would agree with him on this point, and I have offered to contribute to his campaign if he will let me come to his State to debate this one issue because I am convinced that his constituents would not agree with him. The fact is, I said to him—and I say it publicly since he wanted to neogtiate $2,000—"I will give you $500 for your campaign if you let me come to your State and debate this one issue with you during the campaign."

Mr. SYMMS. The Senator is underrating himself.

Mr. METZENBAUM. Mr. President, I have the floor, and I do not wish to be interrupted. Let us talk about what this amendment is about, what this issue is about. If you are traveling on a legitimate business trip, there is no problem; the committee report language does not affect that and my amendment does not affect it. If you are taking with you other employees for business purposes, the committee report language does not affect that and my amendment does not affect it. If you are taking your wife with you and it is for legitimate business purposes, the same thing is applicable.

The committee report language and my amendment do not affect it. But if you are taking her along for pleasure and for the privilege of having her company, I am not saying you should not take her, nor am I saying you should not make the personal trip, nor am I saying we ought to in any way preclude your using the corporate jet for that purpose. All I am saying is that the law now says you ought to pay the reasonable market value. And nobody, nobody, even my friend Senator DOLE, can really believe that the reasonable market value of taking a trip by a private corporate jet is the same as taking that trip first class in a regular commercial airliner. As a matter of fact, if you do not take one of the big superjets, if you go out there on the field and you weigh the plane and it is between 6,000 and 10,000 pounds, you do not even pay for the value of the first-class flight. All you do is report on your income half of that amount. If the plane is a smaller plane, if it is 6,000 pounds or less, all you report on your income tax under the committee report is half of the coach fare.

Now, I see my colleague from North Carolina, who is one of the staunchest supporters and proponents and spokesperson for conservatism in the U.S. Senate. I am not about to say anything nasty about my friend at all because I never would; I do not have any problem with him. What I am saying is you can be the most conservative Member of the U.S. Senate or the most liberal Member of the U.S. Senate and not agree with what the committee has done in this instance. You can be the strongest budget balancer in the U.S. Senate and disagree with what the committee report does; it is wrong. Senator DOLE says, "Oh, all we are talking about is $10 million." I am frank to admit we tried to find out the figures. I do not know where he got the figures, but he said it is only $10 million. I do not know whether it is $10 million, or $20 million, or $50 million. What difference does it make? Is there any logical reason, on a day we terminate unemployment compensation, or phase it out, which is the phrase that Senator DOLE would prefer we use, on that very afternoon we have this giveaway to corporate executives in America?

So I say to my colleagues, give me one good reason why, if somebody wants to change this law, they do not come before us with a legislative proposal and make their case. How can you possibly make a case by doing it in a committee report? The committee report is not even on the floor of the U.S. Senate.

I admit that my amendment is worded in an unusual manner so that I can get at this issue, but I had no choice. You cannot amend a committee report. You cannot strike a committee report. So we have attempted with this amendment to zero in on the issue.

If you vote with me, then it means that you do not believe that the Senate should be directing the IRS to change their present rules with respect to the matter of imputed income by personal usage of corporate or other kinds of aircraft. That is all that is involved. Corporate jets or smaller. It always has to be the corporate planes. That is all that is involved.

There is no reason under the Sun for the Senate to turn down this amendment. I say to anyone who turns down this amendment—and there are many on that side and probably some on my side—that I am willing to come to your State and debate the issue. I am so positive that I can prevail with the American people that I do not care which State it is or how they vote. I am convinced that they would not believe that the Senate this afternoon should enact a provision which is a giveaway to the corporate executives of America.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. METZENBAUM. I yield to my friend from North Carolina.

Mr. HELMS. I thank the able Senator.

Mr. President, I would ask the Senator, this is a sense-of-Congress amendment? Is that correct?

Mr. METZENBAUM. The Senator from North Carolina is correct.

Mr. HELMS. And for the purpose of the record and for the purpose of having the able Senator from Ohio make legislative history, he being a sponsor of the amendment, will he state for me what is the intent of the amendment?

Mr. METZENBAUM. I will be very happy to do so, and I appreciate the question.

The purpose of this amendment is to deal with the fact that in the committee report it is stated as follows:

> The committee also intends that the Treasury is to substitute the following safe-harbor valuation rules with respect to employee flights on employer-provided noncommercial aircraft that constitute taxable fringe benefits, for the valuation rules with respect to such benefits that are currently set forth in temporary regulations. The committee believes that these substitute safe-harbor rules reflect the intent of the Congress concerning the valuation of personal use of noncommercial aircraft under the fringe benefit rules in the Tax Reform Act of 1984.

There then follows, in the committee report, "Weight of aircraft: More than 10,000 pounds; more than 6,000 pounds but no more than 10,000 pounds; 6,000 pounds or less."

Then there is "includible value for control employee:" first-class fare, coach fare, one-half coach fare. They have to report it as part of their income tax. There is also "includible value for other employees."

My amendment does not deal with the other employees. It deals only with the corporate executive rule.

Mr. HELMS. What records would be required to be kept?

Mr. METZENBAUM. There is nothing under my amendment, nor under the committee report, as I understand it, that would require any reports to be kept other than those that are presently kept. It is my opinion, although I am not certain of this, that under FAA rules it is required that reports be kept as to who flies on that plane and when and where and how much time is consumed. I am not certain about that. There is nothing in this amendment that would affect that matter.

Mr. HELMS. Let me tell the Senator why I am intrigued with his amendment.

This morning, a visitor to my office described an episode that occurred not long ago at White Sulphur Springs, WV, at the famous and expensive resort, the Greenbrier. A meeting there was attended by, among others, the president and chief executive officer of one of the three major television networks in this country. I am not going to indicate which network, but I will say that the eye is watching you, Senator METZENBAUM. [Laughter.]

It was a rainy morning. The chief executive officer of the television network was lamenting the fact that it was a rainy day outside, in White Sulphur Springs, WV. So he said to a group of his friends: "I would like to

play golf today. I have my company plane here. Let's fly down to Florida and play a round of golf, and we'll be back here in time for cocktails this evening."

The Senator from Ohio and I sometimes differ on legislation, but I think that he and I are equally revulsed by activities such as this.

I am sure that the chief executive officer of the television network—which I have not identified—has indicated on his financial reports that this was a business trip. I submit to the Senator from Ohio and others that this is an abuse of the system. The stockholders of the network should be up in arms—and would be, I suspect, if they were aware that this kind of thing is going on.

I intend to vote for the Senator's amendment because, as I heard him explain for the purposes of legislative history, the Senator from Ohio is simply saying, "Stop that kind of stuff." Is that what the Senator is saying?

Mr. METZENBAUM. That is right.

Mr. HELMS. I thank the Senator.

Mr. SYMMS addressed the Chair.

The PRESIDING OFFICER (Mr. HECHT). The Senator from Idaho.

Mr. SYMMS. Mr. President, I should like to ask the Senator from Ohio another question. I ask him this: What would his interpretation be of this situation? An owner of a airplane took off, let us say, in Cleveland, OH, and flew to the west coast, to San Francisco, on business. He had to attend a 3-day meeting. He had two pilots in the airplane who flew out with him. The meeting went on 3 or 4 days, and they had an opportunity to hitch a ride back to Cleveland, to spend some time in Cleveland with their families, and then to hitch another ride back to San Francisco, to fly the executive back home. They left the airplane in San Francisco and flew back to Cleveland.

How would that be interpreted under the Senator's amendment, and how would it be interpreted under the Dole amendment?

Mr. METZENBAUM. I apologize to the Senator from Idaho. I was speaking to the Senator from North Carolina.

Mr. SYMMS. The question I am asking is this. A friend of mine called me up and posed this question. He said his company has an airplane. Let us say, hypothetically, that it is based in Cleveland, OH, and it flies to the west coast, for the executive to attend a business meeting, and the meeting is going to go on for a few days. The two pilots have an opportunity to hitch a ride back to Cleveland with another company's airplane, in available empty space, spend some time in Cleveland, and hitch a ride back to San Francisco, to fly the executive back to Cleveland.

How does the Senator's amendment treat that particular person?

Mr. METZENBAUM. I must tell the Senator from Idaho that I do not know the answer to that. Current law applies. If the Senator from Idaho wants a clarification, I suggest that he take it up with the IRS. I do not stand here as the IRS. I stand here saying that the U.S. Senate should not change the law this afternoon.

Mr. SYMMS. I heard the questions of the Senator from North Carolina and the Senator from Ohio, but I think that before Senators vote on this, they should recognize that we are not just talking about the head of XYZ broadcasting company. We are talking about people who are pilots of airplanes, who use a little ingenuity and hitch rides in available space.

Do we really think that the only way we are going to balance the Federal budget is to do so on the back of somebody who is making $20,000 and hitches a ride home for the weekend?

And I think that is what the Senator's amendment does.

Mr. METZENBAUM. I am prepared to answer.

Mr. SYMMS. I think the answer to the question is, if we really want to bring about a balanced budget we need to cut spending and not just look to this particular area of the Tax Code.

Mr. METZENBAUM. I want to explain to my friend that, although I answered that, I now have pointed out to me that my amendment would not have anything to do with the two pilots flying back and forth because my amendment only applies in the case of control of executives of the company. Those two pilots would not be in that category, and my amendment particularly stays away from that issue. They would not have to do anything as far as I am concerned.

Mr. SYMMS. I think where the Senator is incorrect in that answer is it would apply to the two pilots because the IRS is going to come back and say, "We are going to impute income on the basis of a first class ticket because you are riding one of the plush corporate jets that belong to a neighboring company that rode you back to Cleveland and you rode back the end of the week and flew the boss back home."

Mr. METZENBAUM. The Senator is going to confuse the issue. I want to point out to him, look at the amendment. The proposal I made, the sense of the Congress says: ". . . The existing regulations that impute income to corporate executives (so-called key employees) . . ."

No one can argue that those are executives or that they are key employees, so I think that the Senator would only be confusing the issue. There is certainly nothing in this that tells the IRS what to do or not to do.

Mr. SYMMS. I think I am not confusing the issue. I hate to stand here and counter my dear friend from Ohio. I tell him I am not confusing the issue. One has to go back and look at what the IRS has proposed, and they are proposing in the regulations that the Senator is saying in his amendment he wants to comply with, that that is how they have to treat it.

They are also carrying it one step further. They are saying that if an employee of the company takes along a spouse, as I pointed out in the letter that I have from a constituent of mine in Idaho—one of his employees, if he takes along a spouse, then the income is to be imputed. And this thing goes a lot further. If I understand the Senator's amendment correctly, his amendment speaks to what IRS proposed for regulations on this subject.

I think that there is a point here that is being missed. I think the answer to the question both the Senator from Ohio and the good Senator from North Carolina brings up is, if in fact there is flagrant abuse taking place by the executives of any corporation, it is up to the board of directors and the stockholders to correct, and they have an obligation to them.

What we are trying to do is put the long arm of the Federal Government in and have them direct every single thing that happens and who rides on that airplane. We do not know what each situation is.

If the Senator would carefully examine what the amendment does, it goes too far and I advise my colleagues to stay with the former chairman of the Finance Committee and the distinguished majority leader, Senator DOLE, on this issue.

I yield the floor.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I thank the Chair.

Mr. President, before the Senator from Ohio leaves——

Mr. METZENBAUM. I am sorry.

Mr. HELMS. I thought the Senator might be leaving the floor. I did not want him to leave yet.

I do not read into the Senator's sense-of-the-Congress amendment what the distinguished Senator from Idaho sees in it. If he is correct I would oppose the amendment. That is why I have suggested to the Senator from Ohio that he be as precise and specific as possible in stating the intent of the amendment—which incidentally does not have the force of law in any case.

I am supporting the amendment because I am opposed to what I have seen personally in terms of abuse of aircraft.

Now, I hope the Senator from Ohio will specifically state to the Senator from Idaho that the intent of this amendment is not at all related to the apprehension stated by Senator SYMM's constituent. If he will do that

I will have no problem at all in supporting the amendment.

Mr. METZENBAUM. I thought I had already done that, but I will again state that there is nothing intended by my amendment, by implication or otherwise, that would affect the situation as described by the Senator from Idaho, and I wish to point out that in the committee report they do have two categories.

We have addressed ourselves only to the one category, and that is to the executive employee, so-called key employee.

There is no intention to affect the committee report language in the committee action with respect to anyone other then corporate executives, period.

Mr. SYMMS. Mr. President, will the Senator from North Carolina yield?

Mr. HELMS. I yield.

Mr. SYMMS. The point I am getting at is the way the proposed Treasury regulations were written, does the Senator from Ohio want to put into the RECORD to state that that is what we will do, that if employees from one company ride in a company airplane of another company if space is available—the plane is going anyway—they will be imputed first-class airfare for them, and I happen to know some of those corporate jets that are not nearly as comfortable as first-class accommodations, and the people just simply want to get home or get to another city to do business, that the income will be imputed against those persons legally.

That is what the regulations say, and I am saying to my colleagues if that is what we want to do here in Congress then stand by noncompliance because we are making an open invitation of people to say, "Well, Joe, we are going to let you ride along here, and you appreciate it, but we have to write something down because we do not want you to have to have $800 extra income from the price of a ticket from San Francisco back to Cleveland. It might cost you up to $300 on your income taxes. Rather than have you pay that, we will put someone else's name there."

We are just opening the door for noncompliance, and there are other factors with respect to aviation because of insurability, and so forth. It is very important that they keep track of who is on airplanes in case of a tragic accident so the people will know who the victims were if the airplane crashes.

I think it is just a mistake to somehow focus in on this. We miss the whole point of what is wrong with the Federal budget. What is wrong with the Federal budget is that this Congress refuses to reduce spending across the board. It is not this great field of tax compliance. That is one of the problems, but it certainly is not as abused. There are mechanisms in the marketplace that do restrict extensive flagrants with respect to ripoffs, as the Senator from North Carolina talked about.

I happen to know of one executive in the Pacific Northwest of a large company, which I will leave unnamed, who lost his job because of excessive use of a corporate airplane, and the stockholders and the board of directors decided that this particular chairman was overstepping his bounds on what was proper and they hired a new chairman and the guy lost his job.

So I think that what we are doing here with the Senator from Ohio we are getting involved in a trap here that somehow it is the old Treasury Department doctrine that we are going to go out there and find every single thing that is out there in our society and we are going to tax it. We are going to tax the American dream.

First, they want to limit what kind of car you can drive and say you can only have so much of an automobile. Then they are going to make regulations on this and the next thing and the next thing.

I just think we are going in excess and I think what the former chairman, Senator DOLE, is suggesting to this Senate is a good suggestion, and I appeal to my colleagues that if we vote for this amendment do not be surprised to find out that you have people who are not million dollar a year corporate executives riding around in plush airplanes. They are people who are flying in small airplanes in many cases of small family businesses, and they take along an extra person in a family, or someone who is a key employee to ride with them, and legally you are going to be expected to impute income at a very high rate to ride in that airplane.

It may not be a big plush airplane. It may be an open cockpit spray plane, or something. But they will be expected to impute income, and they will probably not comply with it. It makes a mockery of the IRS and makes people call them quite aptly, instead of the Internal Revenue Service, the infernal revenue service.

I yield the floor, and I thank the Senator.

Mr. HELMS. Mr. President, I believe I have the floor

The PRESIDING OFFICER. The Senator from North Carolina has the floor.

Mr. HELMS. Mr. President, there is not one in the Senate for whom I have more respect or affection than the distinguished Senator from Idaho. Perhaps it is my lack of understanding. I do not want to delay the Senate in its vote on this amendment, but I wonder if I might impose on the distinguished chairman of the committee to help me a bit with the amendment of the Senator from Ohio.

Mr. PACKWOOD. I will do the best I can.

Mr. HELMS. Let me read the amendment out loud. That helps me to understand it a little better.

Notwithstanding any other provision of this act or any language in the committees' report, it is the sense of Congress that the existing regulations that impute income to corporate executives (so-called "key employees") for the use of noncommercial aircraft shall not be amended or altered in any manner that would reduce the amount of income imputed to such employees.

Now, I am trying to understand the point that my friend from Idaho made that this will somehow add to the income of those two hypothetical pilots who flew.

Will the Senator from Oregon help me with that? Is the Senator from Idaho correct about that?

Mr. PACKWOOD. I am not going to try to interpret what the amendment means. All I can say to my friend from North Carolina is that as we started this in the committee yesterday, we considered it, and we had no desire or intention at this time to get into valuation for purposes of income. We had complaint upon complaint upon complaint on contemporaneous recordkeeping, and I think these complaints are justifiable.

Yesterday, in committee, we managed to keep off all amendments relating to valuation for income tax purposes. We were attempting to do that today, also. We had one added on the floor a few minutes ago from the Senator from Wyoming.

I do not want to interpret the amendment of my good friend from Ohio. I am going to oppose it because I do not want to get into valuation for purposes of income tax at this time.

He is right. This is not a recordkeeping issue, because when you fly, you are required to keep track of who is in the plane and where you have flown. So this is not an additional recordkeeping issue.

Mr. HELMS. That was my understanding.

Mr. PACKWOOD. It is not a recordkeeping issue. It is a valuation issue.

Mr. HELMS. So what the Senator is saying is that this is a nongermane amendment.

Mr. PACKWOOD. Well, everything is germane in our body except under extraordinary circumstances. But it is not in keeping with what we said in committee yesterday that we had hoped we could pass a bill to repeal the onerous recordkeeping burdens for automobile use and other business assets that impact millions and millions of people. That is all.

This is an amendment regarding valuation. It is a fringe-benefit amendment, the value for income tax purposes of an employer-provided goods or service.

Mr. HELMS. Of course, I support the committee and the distinguished chairman in what the committee and the chairman are attempting to do. But I do not quite understand why the amendment of the distinguished Senator from Ohio is so offensive and I do not know how it would be harmful to the innocent.

The statement was made, "We will let the board of directors look after this," and this, that, and the other. If you try to get a board of directors to go through the travel records of chief executive officers, you have a problem.

Mr. PACKWOOD. Well, as a matter of fact, the case to which the Senator from Idaho made reference was a Portland company and indeed the board of directors removed the president, as he indicated they did.

Mr. HELMS. He was speaking in terms of one episode of which he is aware.

Mr. SYMMS. Mr. President, I have to apologize. I did miss the earlier part of the debate and was not here when the Senator from Ohio made his presentation. We were in hearings in the Public Works Committee. He is talking about key employees.

Mr. METZENBAUM. That is correct.

Mr. HELMS. That is what threw me.

Mr. SYMMS. I have to say to my colleague from Ohio that I may have broadened it. I thought he was trying to impose this on everybody.

Mr. METZENBAUM. I am not.

Mr. SYMMS. But I would say that there is one aspect of this that the Senator from North Carolina should give very serious consideration to. What about the small business—and I mean a small business—that has a small airplane and they have several key people who are partners in the company and they are using the airplane for some reason and one of them goes along? Do you think they are really going to comply with this? This is the question.

Mr. HELMS. I do not think the Senator from Ohio, in fairness to him, is addressing himself to that.

Mr. METZENBAUM. That is right.

Mr. HELMS. He specifically refers to "key employees."

Mr. METZENBAUM. That is correct. That is the language used in the IRS regulations. There was a definition of "key employees."

Mr. SYMMS. I come back to this question to both of my dear colleagues: We have all agreed in the Congress of the United States that if an airline employee rides on an airplane, space available, there is no income to be imputed.

Mr. METZENBAUM. That is fine. We are doing the same thing here.

Mr. SYMMS. What happens if an employee of a corporation or a key employee, whatever the case may be—what difference is it whether someone rides on that as space available?

Mr. METZENBAUM. There is nothing in my amendment that affects those employees. My amendment—and I want to emphasize it eight times over—my amendment is directed only at corporate executives, key employees, who are in a position of control or own more than five percent of the stock. I am told that is the appropriate definition under the regulation.

Mr. PACKWOOD. For purpose of clarification, let us take United Airlines. If the president of United Airlines flies on this United Airline plane on a regular flight from Chicago to Los Angeles, is that income to him?

Mr. METZENBAUM. I would guess he would be checking that flight. If he just goes on a regular flight, that would definitely not be income to him. We are talking about corporate charter aircraft. We are not talking about the president of United Airlines flying on a United Airlines plane.

Mr. GRASSLEY. Mr. President, my vote today for Mr. METZENBAUM's amendment is not an endorsement of the current valuation under the Treasury's regulations, they are unreasonably high. However, post legislative history adopted several months later in a committee report without discussion is not the best way to deal with the fringe benefit valuation problems that are more wideranging than the personal use of corporate aircraft by key employees.

Mr. PACKWOOD. The definition would not apply to a commercial flight?

Mr. METZENBAUM. Absolutely not.

Mr. PACKWOOD. Even though he was an officer or key employee of the company.

Mr. METZENBAUM. You are absolutely right.

Mr. HELMS. I am satisfied. I thank the Chair.

Mr. METZENBAUM. I am ready to vote.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from Ohio (Mr. METZENBAUM). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio. On this question, the yeas and nays have been ordered, and the clerk will call and the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Utah [Mr. GARN], the Senator from Oregon [Mr. HATFIELD], the Senator from New Hampshire [Mr. HUMPHREY], and the Senator from Alaska [Mr. MURKOWSKI] are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon [Mr. HATFIELD] would vote "nay."

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] is necessarily absent.

The PRESIDING OFFICER (Mr. WALLOP). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 46, nays 47, as follows:

[Rollcall vote No. 24 Leg.]

YEAS—46

Baucus	Ford	Melcher
Biden	Glenn	Metzenbaum
Bingaman	Gore	Mitchell
Bradley	Grassley	Moynihan
Burdick	Harkin	Nunn
Byrd	Hart	Pell
Chafee	Heflin	Proxmire
Chiles	Helms	Riegle
Cohen	Inouye	Rockefeller
Cranston	Johnston	Sarbanes
Danforth	Kennedy	Sasser
DeConcini	Kerry	Simon
Dixon	Lautenberg	Trible
Dodd	Levin	Warner
Eagleton	Mathias	
Exon	Matsunaga	

NAYS—47

Abdnor	Hatch	Pressler
Andrews	Hawkins	Pryor
Bentsen	Hecht	Quayle
Boren	Heinz	Roth
Boschwitz	Hollings	Rudman
Bumpers	Kassebaum	Simpson
Cochran	Kasten	Specter
D'Amato	Laxalt	Stafford
Denton	Leahy	Stevens
Dole	Long	Symms
Domenici	Lugar	Thurmond
East	Mattingly	Wallop
Evans	McClure	Weicker
Goldwater	McConnell	Wilson
Gorton	Nickles	Zorinsky
Gramm	Packwood	

NOT VOTING—7

Armstrong	Hatfield	Stennis
Durenberger	Humphrey	
Garn	Murkowski	

So the amendment (No. 25) of the Senator from Ohio [Mr. METZENBAUM] was rejected.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PACKWOOD. Mr. President, I yield the floor to Mr. ABDNOR.

Mr. ABDNOR. Mr. President, I appreciate the Senator's yielding to me on this matter.

Mr. President, last summer, Congress enacted the Deficit Reduction Act, containing hundreds of provisions and over 1,400 pages.

Although the law already required taxpayers to provide adequate documentation for their deductions, the Deficit Reduction Act added the requirement that for vehicles, those records must be "contemporaneous."

On the basis of this one word, the Internal Revenue Service [IRS] issued 15 pages of regulations requiring taxpayers to document each business trip in a vehicle by recording its date, des-

tination, mileage, operator, and purpose.

On January 3, I introduced the first bill in Congress to modify these requirements and followed up on January 22 with a bill for total repeal. I have had numerous conversations and meetings with top Treasury Department and IRS officials as well as with the distinguished majority leader and the chairman of the Finance Committee.

In addition, I have gone to the White House and called to the President's personal attention the difficulties millions of honest Americans are having as they attempt to comply with these burdensome rules. I take this matter pretty seriously, because this ludicrous rule is exactly the sort of thing which the people of South Dakota sent me to Washington to fight.

By now, every Senator has received hundreds and probably thousands of letters from irate farmers, businessmen, and professionals describing the tremendous paperwork burden created by these regulations. Several farmers and businessmen provided me with copies of the records they were attempting to keep. It is not unusual for a day's log on a single vehicle to run the length of a legal size page, with a separate, detailed entry for each of 20 or more trips.

Not only is it time consuming to comply with these requirements, but there are many practical problems and important privacy concerns involved. If a farmer goes to town to pick up a part at the implement dealer but also drops his wife off at the local grocery to pick up a few items, is he supposed to log his trip as business or personal use? If a minister visits the home of a couple having marital difficulties, he has no choice but to list the destination of his trip. But how is he to document it as business unless he lists marriage counseling as the purpose of his visit?

One of my constituents, a refugee from Poland, tells me that he is now keeping records almost identical to those he was forced to maintain behind the Iron Curtain. Congress had better think long and hard before we ever let an agency require millions of ordinary Americans to submit detailed accounts of their everyday lives to the Government. Latest estimates indicate that it may take as many as 79 million man hours per year to comply with this single requirement—that is simply mind boggling.

I doubt anyone here understood these ramifications of adding the word "contemporaneous" to the law. While the IRS has issued some modifications to their original rules, those changes fail to come anywhere close to solving the probem for the majority of ordinary, basically honest Americans.

Farmers, ranchers, businessmen, professionals, and even clergy are still drowning under paperwork. Literally hundreds of South Dakotans have taken the time to write personal letters describing their frustrations as they attempt to comply with a rule which makes no sense and which everyone admits will do little to prevent cheating. For this reason, I have continued my efforts to abolish this bureaucratic mass of redtape.

I am concerned about what the House Ways and Means Committee has done with their bill. The truth is, they have tried to enact a tax increase under the guise of repealing the recordkeeping regulations. By limiting the investment tax credit and stretching out the depreciation period for vehicles, they are acting in a way that is going to increase taxes on businessmen. If the House want to increase taxes, they should be honest enough to admit that is what they are doing and not try fool the American people into thinking that the are doing them a big favor.

Mr. President, I am also concerned about the fact that the House added a new requirement that vehicle records must be "written." I may be wrong, but I thought the whole idea here was to solve this mess. By inserting that word, they leave the door wide open for the IRS to do the same thing they did with the word "contemporaneous;" that is, make a nightmare for millions of Americans by requiring detailed written records. If we pass legislation in this area, I want to be sure that we take care of the problem for once and for all; I do not want to make the taxpayers go through this all again.

It is good to see prompt action by the finance committee to repeal these rules. I appreciate the work they put into this. I thank Mr. PACKWOOD, the chairman, who was so willing to help me and to work with me on this. The fact that the committee approved my bill, which is a straight and simple repeal of the mileage log rules, and did so by a unanimous vote, demonstrates the groundswell of opposition to this latest example of a bureaucracy gone out of control. It is my hope that we will promptly pass this legislation and that Congress will not delay in responding to the will of the people.

Mr. PACKWOOD. Mr. President, I indeed thank the Senator from North Dakota. America is in his debt for helping remove these onerous requirements.

I hope there are no other speakers. I believe we are ready to vote.

The PRESIDING OFFICER. Are there further amendments?

Mr. PACKWOOD. Mr. President, are the yeas and nays ordered on the amendment?

The PRESIDING OFFICER. The yeas and nays have not been ordered.

Mr. PACKWOOD. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SASSER. Mr. President, I support efforts on the floor today to repeal the offensive and burdensome IRS regulations requiring extensive recordkeeping for business travel in company cars. As I have noted in the past, this episode has been a classic example of the Internal Revenue Service going far beyond congressional intent when implementing new tax laws. It is situations such as this which undermine the faith that many Americans have in our Tax Code.

This is particularly true for our small business owners. I chaired field hearings of the Small Business Committee in Tennessee in early January of this year to examine the topic of tax reform. The No. 1 recurring theme sounded at these hearings was the need to repeal these new log requirements.

The complaints which these men and women raised were very legitimate. If every one of us in this body had to stop and make log entries for all the points on our constituent visits, we would have much less time to see the people we represent. The same is true for the business person. Time spent logging mileage, date and time information is time which could be better spent in business pursuits.

And as we all know, time is money, especially for small business. These small, often struggling, firms cannot sustain this valuable loss of time as well as larger companies. Moreover, many small firms operate with high overheads and slim profits to begin with. To burden them even further as these new documentation rules do is to place an even greater strain on this often fragile foundation.

That is why I joined as a cosponsor of S. 260, along with a majority of this body, to repeal the new documentation rules. I am pleased to see the Senate take action today on legislation which parellels the language of that measure and commend my colleagues on the Finance Committee for bring-

ing this matter before the Senate in an expeditious manner.

I know that the small business people in Tennessee applaud the efforts of all who have joined in this effort to repeal what the majority leader has aptly described as a "turkey." My office has been flooded with letters and phone calls protesting the new rules from the day they were announced. These letters put in very frank terms what the real life impact these new documentation rules are having on small businesses. I would like to share some of these views with my colleagues. I ask unanimous consent that several letters protesting the new log requirements be included in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 1.)

Mr. SASSER. I would also like to applaud the efforts of my good friend from Arkansas, Mr. PRYOR, to incorporate into the report language on this bill many of the provisions of S. 281, which I cosponsor. As some of my colleagues know, this bill deals with the changes made in the 1984 tax bill which resulted in some public safety officials being taxed on a portion of the use of their patrol car.

Senator PRYOR rightly saw that our State troopers, sheriff department officers, police personnel, and emergency medical workers are never really off duty as they are ready to respond to emergency situations 24 hours a day. Yet, under the new rules they would be hit with additional income for the use of their patrol car or other vehicle at certain times. I concurred with Senator PRYOR that, faced with this prospect, many of our public safety officials would be forced to leave their emergency vehicles at their station at the end of a shift. In rural areas such as much of Tennessee, this could have devastating consequences should an emergency arise and these public safety officials would have to return to their station to get their emergency vehicle before responding.

I commend Senator PRYOR for bringing this problem to the attention of the Senate and providing what we believe will be a workable solution.

I urge my colleagues to join with us in our efforts to reduce the burdens associated with these new rules and join in supporting passage of this measure today.

EXHIBIT 1

A/C SERVICE
& INSTALLATION, INC.
Nashville, TN, March 13, 1985.

Reference: New Tax Laws
Hon. JIM SASSER,
U.S. Senate,
Russell Building,
Washington, DC.

DEAR MR. SASSER: The new tax laws regarding the personal use of company vehicles is causing detailed and costly record keeping and paperwork reporting requirements for our personnel.

We are a small heating, refrigeration & air conditioning company. We have 8 trucks, and our service technicians have to drive their trucks home simply because heating and refrigeration systems have to be fixed when they break down 24 hours a day. Likewise, with our construction department personnel, they have to be on the job site at 7:00 a.m. ready to work, therefore they load their trucks in the afternoon with their supplies and go straight to the job site every morning from home. We also must consider security of the mens tools. The average service technician carries approximately $5,000.00 worth of tools in his truck. These could not be kept overnight unattended in our company parking lot.

Do you really think that the average construction worker will keep up his paperwork? I ask you, does the average individual in this category have the ability to do this paperwork? What's going to happen when this man falls behind in his paperwork and I give him a 1099 that's over half his bring home pay for the expense of operating our truck?

I am for simplifying the tax system. I am also for a balanced budget and I will live with this record keeping requirement for myself and my management staff. I don't like it and I feel a more simple method could be created. I realize that we must tighten our belts if we are going to lick this deficit problem. I don't feel we should penalize a person for doing what he is required to do. As far as these people abusing the privilege of having a company truck parked in their driveway and using it for personal use, insurance companies have very strict guide lines. In this area, both the company and individual have a great deal of exposure and liability for using that truck for non-business purposes.

If this law is not modified I feel that our political representatives will begin to see a whole new segment of American population that has not traditionally voted in the past start going to the polls to express their opinions and it probably will not be in your favor.

Yours truly,

LYNN CAWTHORNE,
President.

DIXIE FOODS INC.,
Lewisburg, TN, March 4, 1985.

Senator JIM SASSER,
Senate Russell Office Building,
Washington, DC.

DEAR JIM: The most critical item that a small business person has faced with government encroachment in recent years surely has to be the new rules regulating the use of vehicles. If the Internal Revenue Service is thinking that we are using the vehicle for personal use, then have them decide the amount and lets say it is 30 percent for personal and 70 percent for business. A business owner can show 30 percent of depreciated cost and operating cost on his income.

If I understand the rules as they presently exist, I will spend more effort addressing the vehicle project than the purpose of the trip. I am opposed to this new ruling and I believe that 100 percent of small businesses feel the same way. If the rules can't be relaxed, I would urge you to vote to repeal the new ruling.

Sincerely,

JACK ADAMS,
President.

P.S. I have seen the recent update and it doesn't help us.

RED WING
PEST CONTROL, INC.,
Chattanooga, TN, March 11, 1985.

Hon. JIM SASSER,
U.S. Senate,
Russell Building,
Washington, DC.

DEAR JIM: In January 1985 Senator J. Heinz (R-Pa) and Senator David Pryor (D-Ar) introduced a Senate bill (S. 260), and Representative Charles Roemer (D-La, 4th) introduced a House Bill (H.R. 600) of which would repeal the burdensome and unreasonable contemporaneous recordkeeping requirements. I am writing to urge you to support passage of these bills.

The extent to which logs and records must be kept on a daily basis is too laborious, impractical and in many ways is in conflict with sensible reasons in support of the use of business vehicles by employees which are for business reasons or benefit the business.

For these reasons and for other reasons which I know are being submitted by other businessmen and their employees, I respectfully urge you to support S. 260 to repeal this onerous burden.

Sincerely yours,

DAN MAYFIELD,
Vice President.

COLUMBIA MACHINE
WORKS, INC.,
Columbia, TN, March 8, 1985.

Hon. JAMES SASSER,
U.S. Senate,
Russell Building,
Washington, DC.

DEAR SIR: The "auto-log" requirements of the IRS are causing me a lot of inconvenience and expense with little or no benefit to anyone. It has been said that "time is precious, for it is the stuff that life is made of." It takes me an average of 15 minutes per day to keep up the log—15 minutes per day times 1 hour times 1 working day times 365 days a year equals 11.4 working days per year just to keep up the "auto log." This is a very onerous burden.

I know that I could pay for 30% of the auto's use and get around keeping a log, but I use the station wagon for personal use a much lower percentage than that, and I don't think it is fair to have to pay taxes I don't owe.

If you will use your influence to get this despicable regulation rescinded, I would be most grateful.

Sincerely,

J.K. LANGSDON, JR.,
President.

JOE PADAWER CO.,
Memphis, TN, March 4, 1985.

Senator JIM SASSER,
Russell Senate Office Building,
Washington, DC.

DEAR SENATOR: The writer would like to go on record as being violently opposed to the new IRS ruling about the use of my automobile in my business.

I am in the Advertising Specialty Business and my car is like a rolling sample room. The trunk is full, the back seat is full, the front seat is full with samples except for the space taken up by the driver.

I am a firm believer in the axiom that "you can't do business from an empty wagon." I started my career with the largest firm in the industry in 1948 and was in-

structed to work from a car full of samples. It is hard to break a successful habit after 36 years.

I would honestly say that my car is used 99 and 44/100% for business. We have a family car and when I am through with my business day you can rest assured that I am anxious to get out of my "truck" and get into the clean family car.

We have a fight with IRS everytime they check me about my car being used for business, only and everytime I show the investigator my car they go along with my claim that it is strictly business. If I take a customer to lunch we either walk to a restaurant or go in the customer's car, they cannot get into my car. It is parked on the weekends and not used.

I have so much detail involved in operating my small business that the bookkeeping that I must do to incriminate myself is my valuable time wasted. I am sure that there are thousands of other businessmen that operate with a full burden of recordkeeping that share my faults. I'd appreciate your efforts to have section 179(B) repealed.

Cordially,

JOE PADAWER,
President.

Mr. STEVENS. Mr. President, I rise today in support of Senator ABDNOR's legislation. I commend him and the Finance Committee for addressing this issue promptly this session.

This certainly is an issue on which most of our constituents have varied their views loud and clear. The flood of letters and telegrams from all sectors was reminiscent of the backup withholding issue that many of my colleagues will remember.

Since January I have listened to my colleagues relate their own views and those of their constituents on the IRS regulations dealing with contemporaneous regulations. Overall, they have reflected those that I have heard from Alaskans.

The other day I ran across a letter to the editor of the Fairbanks Daily News-Miner that puts the whole issue into perspective. The letter poignantly illustrates what so many of our constituents tried to relate to us—that the regulations promulgated in this case are cumbersome to the point of absurdity. I hope both elected and appointed officials alike will take note of the message contained in it.

Mr. President, I empathize with the author of this letter and share the frustrations he has experienced with the new auto recordkeeping requirements. I commend the Senator from South Dakota for his leadership on this issue and urge my colleagues join him in passing this legislation.

I ask unanimous consent that the letter from the Fairbanks Daily News-Miner of March 16, 1985, be inserted in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

FAIRBANKS, AK,
March 7, 1985.

To the EDITOR: The Internal Revenue Service's new record keeping requirement of my business truck is confusing me. I have asked the IRS to advise me as to how I should record yesterday's trip, for example:

First, my wife, our son, and I drove to Pay 'n Pak. The mileage reading was 106,240 miles. On the way there, plus about 1,000 feet extra I dropped my wife off at the beautician to have her hair done. She has been very depressed lately working long hours getting our '84 taxes ready plus preparing for an audit on Friday. I felt that she would never pull through without a little pampering. Would this be a business trip?

My son and I went to Pay 'n Pak—mileage reading 106,253—time 10:15 a.m.—where I bought a screwdriver ($1.39) for work, a six-pack of Coke (I planned to give three cans to my employees) for $2.39. I bought one box of drywall nails for $39. The box was broken and I got $5 off since we couldn't tell whether anything was missing. Do I calculate the mileage on the potential value of $39, in case nothing was missing or the price I paid? I also bought a broom for $7.95 for which I will have to start an independent log to determine how much use will be private versus business. How do I use it to calculate the mileage now?

We drove on to pick up my wife, but since she wouldn't be ready for 15 minutes, I stopped by our church, where I silently prayed (no records available), asking for blessing of my personal friends (approx. 30 seconds) and then prayed that I'm doing my truck record-keeping correctly (approx. 6 minutes). At 11:22 a.m., mileage 106,260, we left to pick up my wife. We arrived at the beauty shop at 11:27 a.m.—mileage 106,267.

On the way home we stopped at the post office to mail one business letter and 14 private ones. The mileage was then 106,273. My son stepped on the six-pack of Coke at 11:31 and broke one can. I don't know whether it was a business or personal one. I helped a man start his car by tightening the battery post with the screwdriver which was intended for business, and then I left it behind by mistake. Do I now deduct the cost of the screwdriver from the Pay 'n Pak mileage for business use, or is it the undocumented intent that counts? I arrived back at the shop at 1:01 p.m.—106,284. It turned out that the employees didn't like Coke, so I drank it myself. Again, should this be tranferred to the private mileage?

I would sincerely appreciate assistance from the IRS. I want to do the right thing.

Respectfully,

LARS W. EHRLANDER.

Mr. DECONCINI. Mr. President, I rise in support of repeal of the automobile recordkeeping regulations. Frankly, this is one of those controversies that never should have occurred. I certainly wasn't aware of this provision when we passed the 1,500-page Deficit Reduction Act last summer, and I doubt that many, if any, of my colleagues were. This provision was one more of those little items that Treasury seems to slip into every tax bill which comes back to haunt us. What amazes me is that the Ronald Reagan U.S. Treasury would devise such an outrageous proposal. This administration has given wonderful lip service to the notion of reduced paperwork and redtape. But when it comes down to it, they are just as bureaucratic as previous administrations.

I congratulate the IRS on the steps they took to alleviate the burden created by this regulation. But their changes did not go far enough. We in Congress have been forced to act to repeal the automobile recordkeeping provisions. That is why I am a cosponsor of this legislation.

Let me make it clear that this Senator does not endorse abuse of the tax system. I do not doubt that there has been abuse of this section of the Tax Code in the past. But as was the case with the withholding provisions proposed a number of years ago, we cannot punish the entire taxpaying public for the illegality of a few. I am sure that there are bright people at IRS and Treasury who could have come up with a better way to catch the cheaters without subjecting honest citizens to this unnecessary bureaucratic redtape.

I urge the Senate to now move swiftly to pass this repeal legislation.

(By request of Mr. DOLE, the following statement was ordered to be printed in the RECORD:)

● Mr. DURENBERGER. I appreciate the opportunity to add my commendations to the distinguished chairman of the Senate Finance Committee and the majority leader for bringing this automobile recordkeeping legislation to the floor in an expedited fashion.

The Tax Reform Act of 1984 contained a provision requiring contemporaneous recordkeeping for the use of dual purpose property, such as automobiles which are owned by a company and which also are used by an employee for personal use.

The provisions were designed to clarify previous law concerning the personal use of business property—taxpayers always have been required to substantiate their business use of a company automobile, and to include in their annual income the value of using the company car. The objectives of the new law were to set legislative standards for the records a taxpayer must keep; assure that employers were withholding taxes on the estimated value of the use of the car to the employee; and to set limits on the amount of a luxury car that a business could deduct.

However, the temporary regulations issued last fall by the IRS went too far. They required all taxpayers driving dual use vehicles to maintain logs, diaries, or journals with individual entries specifying the dates, names, purposes, mileage, and time of use of vehicles.

Farmers, small businessmen, and others throughout Minnesota have written to tell me of the confusion they have suffered in trying to understand this new requirement and how much trouble they have in trying to comply. Repeal of this onerous provision will be a welcome relief.

Frankly, when the IRS came out with their first regulations on this

issue, I thought the Treasury Department had lost its marbles, and I and a number of other Senators met with Treasury Department officials in an effort to get the regulations changed.

The Treasury Department did change the regulations, but they did not go far enough. At one time was the law meant to impact so adversely vehicles such as farm trucks and trade and service vans. For them to have to log every step in a busy work day would cost a lot in terms of productivity.

I am pleased to support this legislation. It's about time, these unconscionable, burdensome regulations were repealed.●

Mr. HOLLINGS. Mr. President, today's Senate debate on legislation to repeal the Internal Revenue Service's onerous contemporaneous recordkeeping requirement for business vehicles has been much too long in coming for this Senator. When the legislation setting this bureaucratic outrage was before the Senate last year, I opposed it and voted against it. I suppose those of us who took this course can enjoy a measure of satisfaction in today's action. But, for me, I wish we would have heeded the call last year and avoided this mess entirely.

Nothing in my recent memory has been so universally opposed in South Carolina. Across-the-board, physicians, realtors, business persons, law enforcement officers, public servants, have come forward to question the logic behind the IRS's regulation. The goal of trying to prevent taxpayers from taking advantage of the Tax Code with respect to vehicles used primarily for personal rather than business use is warranted. The method selected to achieve this was totally beyond reason. Let me give you an example, Mr. President.

One company from South Carolina sent me a copy of the record they kept on one vehicle for 1 month. It contained 1,253 entries. Now, Mr. President, if each one of those entries took 1 minute to record—and surely it would since the regulations require you to record the date, the name of the driver, the purpose of the trip, and the odometer reading—that would be 20.8 hours per vehicle per month of nonproductive employee time just to make the entry. If you have a fleet of cars or trucks the cost is just multiplied. And this doesn't include the cost for shuffling and storing all this paper. The fact is, Mr. President, this provision will cost more than it will return to the Treasury. This burden is so onerous it will put people out of business.

Compliance with the Tax Code is a necessity all of us recognize, but this regulation has crossed the threshold into counterproductivity. In my view, this regulation seems likely to deprive businessmen of legitimate deductions and encourage dishonesty among the taxpayers and disrespect for Government in general.

As a cosponsor of this bill, Mr. President, I urge my colleagues to join with me in promptly passing it so we can get it to the President for signature and obtain the relief for those burdened by this bureaucratic overkill as quickly as possible.

Mr. PRYOR. Mr. President, today the Senate is finally correcting a provision contained in last year's Deficit Reduction Act dealing with substantiation of certain business expenses, including business use of an automobile. The provision, which amended section 274(d) of the Internal Revenue Code, provides that a taxpayer must keep adequate contemporaneous records before any deduction or credit can be claimed for business use of property, like an automobile. The bill before the Senate today repeals that standard, and takes us back to where we were prior to last year's change. That standard was adequate records or other sufficient evidence corroborating the taxpayer's own statement. In my opinion, the substantiation requirement under prior law was sufficient, and therefore, I strongly support the bill that will take us back to that test.

Mr. President, the short history of the adequate contemporaneous records test shows very clearly why we should know what we're doing before we pass a statutory change and give the Internal Revenue Service [IRS] the authority to issue regulations. When this new test was enacted, I think most people thought we were getting at the so-called luxury car matter. However, the statutue and IRS regulations went beyond that, and applied to all business use of an automobile. The IRS regulations required each taxpayer to keep a detailed travel log stating the purpose of the trip, the number of miles driven, the taxpayer making the trip, and other things. In short, it was an enormous recordkeeping burden on businesses and their employees. I talked with many, many people who told me they were spending an enormous amount of time filling out these forms when they could be spending their time in a more productive manner. I saw some statistics that showed businesses would spend a tremendous amount of money complying with the new statute, but the Treasury wouldn't have gained substantially. In short, some people thought there was a problem, but the changes went too far.

This bill, Mr. President, gets us back on track. It provides a uniform standard for deductibility of business expenses, and more importantly, will get people out of the formfilling out business, and allow them to do their jobs. I appreciate the support of many of my colleagues for the bill Senator HEINZ and I introduced, S. 260. The support for this effort was broadbased, and bipartisan. I also commend and thank the chairman of the Finance Committee [Mr. PACKWOOD] for bringing this matter before the committee. I hope the pending bill is overwhelmingly adopted, and I hope that we can have this matter to the President within the next day or so.

Mr. NICKLES. Mr. President, it is hard to believe that three words, "adequate contemporaneous records" could cause such a stir. This was the language that was tucked away in the Tax Reform Act that gave the Internal Revenue Service the license to impose horrendous recordkeeping requirements upon the taxpayers for vehicles and other types of property.

The recent changes proposed by the IRS to relax the recordkeeping requirements were a step in the right direction, but did not go far enough. For that reason, I have supported full repeal of this new requirement, and I support and cosponsor the repeal bill now before the Senate, S. 245.

Particularly hard hit by the auto-log rules was the farm and small business sector. Over 2 million farmers filed individual tax returns during 1983. Because of the nature of their business, most, if not all, of these individuals were affected by the recordkeeping requirements. Adding to the difficulties now faced by the farm community would be entirely inappropriate. The regulation by the IRS, which is repealed by this legislation, to allow exceptions for certain farm vehicles and provide a "safe harbor" use level still imposed substantial paperwork on the farmer.

To comply with the law, the farmers had to determine if, in fact, they are farmers under the IRS definition. Then they had to determine which of their vehicles are required to have contemporaneous records.

After that, they had to decide whether it is more profitable to forgo the recordkeeping requirement and take the safe harbor amount or go to the trouble to maintain the records and take in excess of this level. The regulation, in essence, was an attempt to buy off the taxpayer and presume that they will be coerced into accepting the safe harbor amount and forgoing their rightful deduction in excess of this level. Similar rules were in effect for nonfarm taxpayers.

I have before me several letters which describe the problems this created for the farm and small business community. Wayne Winsett of Altus, OK, sent me a copy of his log which he kept from January 14 to January 19, 1985. He made 112 entries and took a substantial amount of time for posting the log. The IRS did make changes which reduced the need for this particular type of log. But even if only

the personal use of the vehicle were required to be kept, not only for the owner but other employees, the paperwork would reduce the time they need to tend to their business.

I know the Senate will vote today to repeal the auto-log because it is far too complicated and burdensome paperwork requirement with little if any value. I strongly support the repeal and hope it goes to the President as soon as possible.

Mr. BUMPERS. Mr. President, I rise to emphasize my strong support for this legislation to repeal the mileage reporting requirements which were included in the Deficit Reduction Act of 1984. Those requirements were a mistake, and the Senate should correct that mistake now.

Although Congress must always be certain that the tax laws require adequate recordkeeping, it must also make sure that those requirements are in proportion to the amount of additional revenue that can be raised by whatever additional requirements are imposed. In this case, the National Society of Public Accountants estimated that the mileage recording regulations, as originally proposed, would cost the Nation's small businessmen as much as $7 billion.

Because the IRS subsequently changed the proposed regulations to reduce the burden, the cost of compliance may be as low as $1 billion. This reduction may appear impressive until you realize that these requirements will only increase revenues by about $100 million each year.

When the Senate considered this issue, the Joint Committee on Taxation did not even bother to estimate the revenue of this particular requirement. Instead, it lumped that estimate with several other related provisions and estimated that they would only increase revenues by $150 million in 1985 and $233 million in 1986.

Roscoe Egger, the Commissioner of the Internal Revenue Service, testified before the Treasury and Postal Service Subcommittee of the Senate Appropriations that the revenues anticipated from this requirement alone might increase revenues by $100 million per year, but he was not confident of even that figure. In any event, it is clear that the costs of compliance are far out of proportion with the possible revenues to be added.

Furthermore, it is quite possible, or even likely, that these recordkeeping requirements will increase cheating, rather than reducing it. Some exasperated taxpayers have told me that they will have no problems with the new requirements, because they have already filled out their log books up to midyear. These people were joking, but their comments still point out the caustic cynicism which these requirements can breed. It is a cynicism which can undermine our voluntary tax system, so it is very dangerous.

Some people might argue that the Senate should not repeal a law simply because it is unpopular, but we should be honest enough to recognize a mistake when it occurs and correct it. It is important to realize that repealing these requirements does not free taxpayers from an obligation to justify their deductions. It merely returns to prior law, which required that adequate records be kept.

Mr. President, I have introduced separate legislation to repeal these requirements, and I had announced my intention to offer that proposal as an amendment to other legislation at the earliest possible time. I am very pleased that both the Senate Finance Committee and the House of Representatives have acted so expeditiously that I have not even had to wait for that opportunity.

The Finance Committee has responded by reporting a bill to repeal the contemporaneous recordkeeping requirements. The House passed legislation which would also do that and which will also repeal the requirement of the Deficit Reduction Act of 1984 that an employer withhold from an employee's paycheck the value of that employee's personal use of company-provided transportation.

This change is also welcome, but I regret that the House did not go further and entirely repeal the provision treating it as income. I realize that using a company car or the corporate jet may be a substitute for other income, but the limited nature of any abuse and the difficulties in determining the fair market value of such "perks" do not justify the intrusion into the affairs of private individuals.

The Senate should applaud these actions and pass this bill immediately.

Mr. MATTINGLY. Mr. President, a little known provision of the Deficit Reduction Act requires taxpayers to maintain "adequate contemporaneous records" in order to qualify for a deduction or credit for the use of business automobiles or trucks. Since that time, a groundswell of opposition has developed, both in the private sector and in Congress. Such opposition is well founded, because conforming to the regulations created a paperwork burden and an administrative nightmare. Requirements of this type reinforce the need for tax simplification.

I am extremely pleased that the Senate will consider today legislation to repeal the automobile recordkeeping rules. In fact, I am an original cosponsor of S. 260, a measure calling for the repeal of those onerous logging requirements. However, I feared a legislative vehicle to repeal those provisions would not be available as soon as I, and others, would prefer. Therefore, I announced at an Appropriations Committee hearing last month that if repeal legislation was not considered by the Senate before the upcoming supplemental appropriations bill, I would offer an amendment to that measure to prevent any appropriated money to be used by the IRS to implement or enforce any regulation to implement the "adequate contemporaneous records" requirement. It is unfortunate, but sometimes it takes a threat to cut off an agency's funding before you can get someone's attention on an issue or get the legislative wheels moving. As I told IRS Commissioner Egger at that appropriations hearing, "the new regulations (vehicle logging requirements) with my amendments (to stop funding to implement such regulations) will be dead as a possum on a highway centerline." With such threats from myself and others, repeal legislation is now before us.

I strongly opposed the "adequate contemporaneous records" requirement because I came to Congress to get Government off the backs of the private sector, not to increase the paperwork requirements. I am opposed to tax cheats, but this regulation is like trying to kill a fly with a shotgun; it is excessive. Let's return to the eligibility criteria that existed prior to the Deficit Reduction Act. That criteria required taxpayers to maintain adequate records or have other sufficient evidence corraborating their statement. Such requirements are sure to catch cheaters if the IRS does its job. This can be done without penalizing every honest taxpayer who takes a business deduction for his or her vehicle.

Mr. President, I only hope we do not find in the future other taxpayer booby traps created by the Deficit Reduction Act. However, I am afraid that others will eventually raise their head. In any event, I am pleased the Senate is finally given the opportunity to vote to repeal the business vehicle logging requirements.

Mr. BAUCUS. Mr. President, President Dwight D. Eisenhower once said: "Farming looks mighty easy when your plow is a pencil, and you're 1,000 miles from the cornfield."

The Internal Revenue Service would do well to heed these words today.

The mileage logkeeping requirements that the IRS issued in January may have looked good on paper, but they are a recordkeeping nightmare for our farmers and ranchers.

An editorial in the January 30 issue of the Mission Valley News, a western Montana newspaper, described a day in the life of a rancher who is keeping his daily mileage log. I ask consent that the article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Mission Valley News (St. Ignatius, MT), Jan. 30, 1985]

RIDICULOUS REGULATION

Senator Baucus, Senator Melcher, the National Chamber of Commerce and everyone else joining the battle against the new IRS mileage log regulation are all correct. It's an imposition on taxpayers. It's bureaucratic busywork at its best and it's a power play by the Internal Revenue Service that should immediately be cut short. As the matchbook covers protesting tobacco taxes say, "When is enough, enuf?"

For our view it is more than enough when the government requires every businessman, farmer and rancher to carry a large log with each vehicle which lists date of trip, starting point, destination, beginning mileage, ending mileage, purpose of trip, verification, personal miles and business miles notations.

Ridiculous. Never mind our own miles spent hustling up and down this lengthy valley to do business at three different locations and with dozens of news and advertising prospects. Think of an eastern Montana rancher, with his log bouncing around on top of everything else that's decorating the top of his pickup's dashboard:

"Starting at 50676.3 miles to go to other side of ranch to look at cow with bad feet.

"Arrived at 50691.7 miles. Found cow considerably better. Chased 3.2 miles.

"Got stuck in coolee at 50694.9 miles. Spun wheels. Added 1.3 miles.

"Got loose and headed back. Then at 50704.8 miles found section of fence down. Drove to ranch for staples, posts and fence stretcher. Arrived at 50712.1 miles.

"Couldn't find staples. Left for town at 50712.2 miles. Got there at 50763.9."

And that's only his day up to 11:47 a.m. Now who is going to verify it all, the cow? It'd take another 4.2 miles to catch her.

The whole business is preposterous. The original plan for the income tax was based on "honest disclosure." If that's going to be changed, it should be done by some higher and better enfranchised arm of government than the IRS.

Mr. BAUCUS. Mr. President, we need to change these logkeeping rules so our farmers and ranchers can spend their time farming and ranching, not generating a lot of unnecessary paperwork.

I fully support the bill before us today. It is similar to a bill which I cosponsored in January—S. 260.

This bill will repeal the requirement that farmers and ranchers keep detailed, daily records of the use of the vehicles for business purposes.

Under this bill, the logkeeping requirements would return to the way they were prior to January 1, 1985. That means, a taxpayer could take a business deduction for the use of a vehicle, as long as he or she maintained "adequate" records.

This bill will make sure that our compliance rules are based on common sense and practicality.

I urge the Senate to act quickly on this legislation so our farmers and ranchers can get back to what they do best—pulling plows, not pushing pencils.

Mr. THURMOND. I am very pleased that the Senate is today considering legislation, of which I am a cosponsor, to eliminate the onerous Internal Revenue Service [IRS] contemporaneous recordkeeping regulations. I strongly support swift enactment of this much needed measure, which will relieve millions of taxpayers across the Nation from the excessive burden of maintaining records detailing the destination of each trip taken in a business vehicle, its purpose, time, date, mileage, and driver.

It is absolutely ridiculous for the Federal Government to impose such a burden on the citizens and businesses of this country. The IRS contemporaneous recordkeeping requirements were ill-conceived, and are certainly not consistent with the goals of reducing unnecessary paper work and reporting requirements.

Mr. President, I commend Senator ABDNOR for supporting this important legislation. I also commend the Senate Finance Committee and our distinguished majority leader, Senator DOLE, for taking action on this matter early in this Congress. I am particularly pleased that the Finance Committee report accompanying S. 245 contains language directing the IRS to also modify its position with regard to the taxability of so-called off-duty use of public safety vehicles. It makes little sense to me to impose additional taxes on police and other public safety officers who, as a part of their job, are on 24-hour call, and therefore, are frequently required to take home with them the same vehicle which they use while officially on duty.

Mr. President, I hope that my Senate colleagues will join me today in supporting swift enactment of this important legislation.

Mrs. HAWKINS. Mr. President, I rise today in support of this legislation to repeal the provisions in the Deficit Reduction Act that requires contemporaneous recordkeeping in order to qualify for a business tax deduction or credit for the business and personal use of automobiles and trucks.

The initial interpretation of this legislation by the Internal Revenue Service created nothing more than endless bureaucratic redtape for the businesses of our communities. Each time the vehicle is used for business or personal reasons, a separate and detailed entry must be made in a log. The entry must specify the date the property was used, the name of the user, the number or miles and the purpose of the use. Unless all of this information is provided, the tax deduction or credit will not be allowed. It was absolutely unrealistic, Mr. President, to expect widespread compliance with these time consuming requirements.

It's clear to me that this law is one of the biggest roadblocks to have ever been put in the path of the small businessmen and women in our country and would severely prohibit their efforts to operate in an efficient and profitable manner. It is my intention to facilitate the survival of these businesses in America by the decisions we make in this Congress—we should not be a major obstacle, I have joined several of my colleagues in cosponsoring legislation to repeal this paperwork nightmare and return to the requirement in effect prior to 1984.

In response to our concerns, the IRS issued a second set of regulations intended to modify the onerous requirements. Although the modifications were certainly an improvement, I do not believe they go far enough. The exceptions provided by the modified regulations seem to have little practical value and do not provide adequate relief to farmers and sales professionals who divide their time between the office and elsewhere.

Mr. President, I have received countless letters and phone calls in my office from hard-working Floridians protesting this unfair and burdensome requirement—even after the modifications were announced. One business even reported that after close monitoring, it was discovered that it cost them 1 working hour per employee each day to comply with these regulations. Obviously, this has been an expensive program for the U.S. Treasury as well. I cringe to think of the loss revenue to these companies, and the subsequent loss in Federal taxes, caused by this requirement. Mr. President, it is ridiculous to expect our work force to spend 1 hour per day to make their entries. I am certain this is not the case for every company, but even if one company is finding this to be true, it is one too many.

I urge each of my colleagues today to respond to the needs of the farmers, realtors, florists, and thousands of working men and women affected by supporting this legislation.

Mr. BINGAMAN. Mr. President, I am pleased to add my support to this measure to repeal the contemporaneous recordkeeping requirement of current tax law. This would address a serious problem created by impractical IRS regulations promulgated following the 1984 Tax Act.

I am also pleased to be a cosponsor of similar legislation, S. 260, which would amend the Internal Revenue Code to provide that the substantiation requirements of section 274(d) of the code be met, in the case of passenger automobiles and other transportation property, if the taxpayer provides substantial evidence other than contemporaneous records.

I commend my colleagues on the Finance Committee for their efforts to repeal these unnecessarily burdensome IRS guidelines.

Like my colleagues, I am concerned that the IRS has interpreted congressional intent to include the need for detailed contemporaneous recordkeep-

ing for the use of business-related automobiles. Clearly, this is impractical and in need of revision.

The people of my State have also been concerned by these regulations. I have heard from many individuals from all over New Mexico. Some work for large corporations, others for small businesses. Some live in cities, others in rural areas. All are unanimous in their assessment of these regulations, believing that in this instance the IRS regulations are not realistic, are overly burdensome, and cannot be enforced. I agree with them and for this reason support repeal.

The system envisioned by the IRS regulations is not realistic, because it is impossible to expect employees to keep the kind of log that the IRS regulations contemplate. I have heard from some individuals such as farmers whose farm vehicles do not even have accurate odometers. Clearly such detailed recordkeeping would result in a decline of productivity.

The paperwork required to comply with the current regulations is overwhelming. The kind of detailed minute-by-minute, mile-by-mile recordkeeping they call for is as impractical as it is time consuming. No one questions the need for honest and accurate accounting of vehicle use for tax deduction purposes. Such records are, of course, needed. I do not believe, however, that the onerous system of mileage recordkeeping envisioned by the IRS is necessary. If such recordkeeping is kept in force we will be setting ourselves up for failure because, enforcement would be next to impossible. Our Tax Code is already frought with needless complexities that make problems for enforcement. This regulation just adds to the list.

Today the Senate has an opportunity to respond to the concerns of business owners across the Nation. This measure will reinstate previous IRS policy requiring adequate substantiation of business-related use of automobiles, but not the detailed, time-consuming procedures mandated by current regulations. I believe that we must act now to eliminate this unreasonable provision of our tax laws. I urge my colleagues to support this legislation.

Mr. MITCHELL. Mr. President, I am pleased to cosponsor and support this legislation to repeal the contemporaneous recordkeeping requirements established in the 1984 tax bill. The changes we are making today will remove an unintended burden from the Nation's taxpayers and restore a proper balance between what is necessary to ensure compliance with our tax laws and what is an unreasonable burden to impose on the taxpaying public.

This legislation removes the requirement that taxpayers keep adequate contemporaneous records to support the business use of their automobiles for tax purposes. It does not affect other rules established in the 1984 act that require contemporaneous records for listed personal property such as planes, computers, recreation, and entertainment property. Nor does this legislation take us back to prior law standards for establishing the deductibility of transportation vehicles used in business. Instead it imposes a reasonable standard of substantiating the business use of vehicles by requiring the taxpayer to keep adequate records or other evidence corroborating his own statement.

This standard of substantiation, together with proper Internal Revenue Service enforcement efforts, will be sufficient to ensure compliance with our tax laws.

This is a sensitive and delicate matter. Congress is properly concerned about maintaining compliance with the tax laws and to achieve that objective the IRS necessarily has a certain intrusive presence in all our lives.

However, there is a limit to that Government presence and a point beyond which acceptance of our voluntary system of taxation becomes threatened by heavy-handed Government intrusion.

As we all know, the 1984 contemporaneous recordkeeping statute and the regulations thereunder crossed that point of reasonableness. The hundreds of thousands of letters received in Congress from the American people is testament to that. The message we received is that people are not adverse to complying with tax laws; they agree on the need to substantiate business expenses. But to thrust the IRS into each and every movement during a hectic business day, requiring records of every use of a transportation vehicle goes too far.

The contemporaneous recordkeeping rule was enacted to prevent a minority of taxapayers from abusing the law. But the result was to place a burden on all taxpayers who use business vehicles. It would have created a perception of unfairness in our tax laws that would in the long run have reduced rather than increased taxpayer compliance.

I am pleased we have been able to work this problem out. I only regret that it occurred in the first place. In the long run the steps we take today will strengthen public acceptance for and compliance with our tax laws.

Mr. CHILES. Mr. President, I am pleased that today we will be repealing an unnecessary and overburdensome requirement for businesspeople, farmers, and others. Many Floridians have rightly been outraged by the contemporaneous auto log requirement which requires drivers to log the date, the exact distance traveled, and the reason for the trip immediately upon completion of each stop.

A realtor from Homossa wrote to me:

> I have considered buying a business vehicle equipped with a taxicab meter, voice activated tape recorder and video surveillance camera so that I can document my business activities in the detail that the IRS wants.

A small business owner from Sarasota wrote:

> We have one truck, a one-ton pickup displaying the company name in large lettering across the side. This, really is not conducive to private use. Yet, since this truck is used for numerous short trips around Sarasota each day, we have the nuisance of a multitude of entries in a little book that already has been lost once and forgotten on several occasions.

I have also received countless phone calls from business persons whose records, for only 3 months, are already larger than a telephone directory.

Yes, Mr. President, it is time to do away with this requirement once and for all. While the original intent of Congress may have been good—to prevent individuals from writing off personal use of such equipment as business-related, the contemporaneous rule is simply unwieldy and impractical for the average taxpayer. Due to the public outcry, the IRS backed off from its original regulations, but I believe that the only sure way to bury this provision for good is to pass this legislation.

Mr. DOLE. Mr. President, I am pleased to join the distinguished chairman of the Committee on Finance in urging favorable Senate consideration of this legislation repealing the contemporaneous recordkeeping requirement for substantiating business use of vehicles and other property. While Congress meant well last year in trying to improve tax compliance by adding this statutory requirement, it is obvious that the level of recordkeeping required by the temporary Treasury regulations interpreting the new law is unacceptable to the American taxpayer. Unfortunately, we cannot improve compliance by enacting new requirements if the American public finds the new requirements too much of a burden to accept.

EFFORTS TO IMPROVE THE REGULATIONS

As a little background, I would like to take a few moments to discuss the history of the temporary recordkeeping regulations. It is fairly obvious to me, as well as most of my colleagues, that the first version of the temporary regulations was a classic case of overkill. Early in January I invited Assistant Treasury Secretary Pearlman to meet with me, Senators ABDNOR, SYMMS, GRASSLEY, and other interested Members, to explain how unrealistic the regulations were and how great the risk of repeal would be if the regulations were not substantially revised. That meeting was followed by several

staff level meetings and culminated in late January with a meeting in my office with various interested Members, Assistant Secretary Pearlman and Commissioner of Internal Revenue Egger. At that time, we were told that the temporary regulations would be significantly revised to reduce the recordkeeping burdens on farmers, sales and delivery personnel, and other businessmen. I commended the Assistant Secretary for making a good faith effort to make compliance with the law easier. I really do believe that substantial improvements were made addressing much of the valid criticism of the earlier regulations.

Unfortunately, when the revised temporary regulations finally were published, they were in a form that could not have been more confusing to taxpayers even if the Treasury Department had consciously tried. Instead of restating the rules and telling taxpayers to ignore the earlier draft, the regulations were in the form of amendments to the earlier regulations. The rules actually may not have been too bad, but I doubt that many taxpayers were able to understand them.

IMPACT ON TAX COMPLIANCE

Nevertheless, I think it is fair to say that repealing the contemporaneous record standard will not be a disaster for tax compliance. The underlying law remains unchanged: The taxpayer continues to have the burden of showing that a business deduction is appropriate if challenged by the Internal Revenue Service.

Mr. President, the courts have held in numerous cases that, even where the special substantiation rule set forth in section 274 did not apply, a taxpayer must be able to justify any deduction or credit claimed for business use of a car or other property, including deductions under section 162 for local travel expenses. The determination of whether a particular use of property qualifies as a business use is a question of fact, with the burden of establishing that fact imposed on the taxpayer pursuant to general tax law principles. And as expressly required by section 6001 of the Code, a taxpayer must keep such records as will be sufficient to enable the IRS to determine correctly the taxpayer's income tax liability.

I would like to describe a few illustrations of how the substantiation rules in effect prior to the 1984 act were applied by the courts. If a taxpayer keeps no record of the particular uses of a car, and accordingly the extent of business use cannot even be estimated with reasonable accuracy, no deduction is allowed. The courts have held that a taxpayer's testimony as to the extent of business use, without any corroborating evidence of that testimony, is not sufficient proof under section 162 to allow any deduction for local automobile expenses. Of course, such testimony of the taxpayer could not by itself satisfy the express substantiation requirements under section 274—as in effect prior to the 1984 act—applicable to automobile expenses incurred in travel away from home.

Numerous cases have been made clear that a taxpayer's statements as to business use of a car are not sufficient alone to substantiate any deduction. For example, in one case, the taxpayer produced a diary that he claimed proved his business use of his car. The diary showed no wear after a full year's purported use as a record, and all the entries looked uniform. The court called the diary a fabrication, and denied the deductions. In another case, a taxpayer kept weekly records on his business use of his car so that he could be reimbursed by his employer. The taxpayer claimed on his tax return that his business use was 14 times as much as his records showed. The court permitted the taxpayer to deduct only the amount he could prove from his records.

FLIGHTS ON BUSINESS AIRCRAFT

Mr. President, I would also like to comment on a related issue which is discussed in the Finance Committee's report accompanying this legislation. In addition to the recordkeeping regulations, the Treasury Department has also published temporary regulations providing guidance on how to value the amount of income that is imputed to an employee when the employee flies for personal reasons on his company's plane.

The temporary regulations do not distinguish among various types of business aircraft although I am sure everyone would agree that there are substantial differences in comfort and convenience between the largest corporate jets and more modest aircraft. In addition, as a general matter, the values provided in the regulations were unrealistically high despite restrictions on the terms of the travel and an employee's ability to ask for compensation in some form other than a free flight of the company plane.

The Finance Committee agreed yesterday that the temporary regulations do not accurately reflect congressional intent and included in its report valuation guidelines which I suggested based on the weight of the aircraft and on whether the employee receiving the benefit of the flight on the company plane controlled the use of the aircraft for that trip.

Assistant Secretary Pearlman at that time informed the committee that the Treasury Department would follow these valuation guidelines if that was the will of Congress. He has subsequently assured me that the guidelines will be followed, assuming there is no subsequent legislative history to the contrary on this legislation.

EMPTY SEAT PROBLEM

Some of my colleagues have asked if this addresses the so-called empty seat problem. Some have suggested that no amount should be included in income when an employee hitches a ride on a company plane on a space-available basis. Others have suggested that the amount imputed should be based on the operating cost of the plane, with or without taking depreciation into account.

The guidelines in the Finance Committee follow a different approach which will significantly reduce the amount imputed to company plane hitchhikers. In essence, the guidelines would equate employees who fly on a space-available basis on a company plane with parents of airline employees who also fly on a standy basis. The temporary regulations now provide that a flight of this kind should be valued at one-half the value of an unrestricted coach flight to reflect the standby nature of the flight.

Of course, a seat on a smaller plane should be discounted further to reflect reduced comfort and convenience. Thus, the guidelines would provide that flights on planes weighing between 6,000 and 10,000 pounds would be valued at three-fourths of the amount imputed to an airline employee's parent and flights on planes weighing less than 6,000 pounds would be valued at half the amount imputed to an airline employee's parent.

CONCLUSION

Mr. President, this measure will have the overwhelming support of the Senate. It should because it addresses the concerns of the American Public without significantly reducing the ability of the Government to assure compliance with the tax laws. It is a good compromise.

Mr. FORD. Mr. President, I rise in support of S. 245 (H.R. 1869), legislation repealing provisions of the Tax Reform Act of 1984 which requires taxpayers to maintain "adequate contemporaneous records" to substantiate the business use of motor vehicles that are susceptible to personal use.

In the short 3-month lifespan of this provision, I have heard from literally hundreds of Kentuckians who have been saddled with this burdensome requirement. The IRS regulations implementing this provision of the Tax Reform Act of 1984 requiring daily logs and records to be kept to substantiate business use are a textbook example of bureaucratic overkill. The outrage I have heard from Kentuckians is well founded and it is past time that this requirement was repealed.

While I agree that it is necessary and desirable for the IRS to have adequate enforcement tools to prevent tax evasion, the contemporaneous records requirement goes much too far. It simply does not make sense to

penalize everyone to catch those few who are stretching the law. The vast majority of taxpayers who claim deductions for the business use of motor vehicles are well within compliance and this requirement simply harasses those who are acting in good faith.

The legislation we are considering today will return the law to the pre-1984 provisions which require adequate records or sufficient evidence corroborating the taxpayer's own statement. This bill will also repeal the IRS regulations implementing the contemporaneous records requirement.

I am particularly pleased that my colleague from Arkansas [Mr. PRYOR], was successful in including report language which encompasses his bill, S. 281, which would exclude safety vehicles from taxation as a fringe benefit by treating such vehicles as nontaxable working condition. Regulations issued by IRS would impute $3 per day in taxable income for the commuting value of the safety vehicle, or in the alternative, would tax the personal use of the vehicle based on the contemporaneous records requirement. Clearly, this was not the intended result of section 132 of the 1984 act.

This provision has particularly onerous results for the Kentucky State Police and numerous sheriffs, city police, and emergency medical personnel who use their employer-provided vehicle on a 24-hour basis. The Kentucky State Police are strictly prohibited from using their vehicles for private purposes and are considered to be on duty whenever they are riding in the vehicle. There can be no doubt that such a policy has significantly deterred crime by making law enforcement more visable. Congress did not intend that section 132 threaten the efficient workings of public safety officials. Such use of an employer-provided vehicle is clearly a working condition, not a fringe benefit, and, therefore, should not be taxed.

Mr. President, I congratulate the Senate Finance Committee for bringing this issue before the Senate for consideration in such an expeditious manner. The contemporaneous records requirement and the IRS regulations implementing it are an unnecessary and unintended burden and I urge my colleagues to repeal it.

Mr. McCONNELL. Mr. President, I will cast my vote in favor of this bill to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984. These requirements have created an outrageous imposition on taxpayers and have had the effect of making compliance with IRS reulations virtually impossible for even the most diligent taxpayer. The legislation we are voting on today will remove these burdensome demands on the farmers and small business people of America and will provide more reasonable, understandable rules for taxpayers as to the kind of records which must be maintained. My constituents who have suffered from confusion and great difficulty in complying with the current requirements will feel well-deserved relief when these requirements are repealed. Passage of this legislation will not only encourage taxpayer compliance and remove undue Federal Government interference in the lives of the taxpaying public, but will enable business people to get on with the business of making a living and generating revenue. I urge my colleagues to join me in voting in favor of this bill.

Mr. GRASSLEY. Mr. President, I rise to offer my support for the repeal of the contemporaneous recordkeeping requirement for all business vehicles. What was an attempt by the last Congress and the Treasury Department to address the abuses of business automobiles used essentially for personal purposes, and untaxed employer provided fringe benefits, clearly struck a raw nerve of honest taxpayers in my State of Iowa and all across the country. Either everyone should be required to keep the records and have the imputed income or a loss of the deduction if they personally own their business vehicle, or no one should be required to do it. Our tax laws and the regulations administering them should not create a cost in time, and energy, and busy work for honest, hardworking taxpayers that clearly outweighs the revenue benefits. Asking all taxpayers to meet the same standard of substantiation of business use with adequate records is a rule which farmers, salesmen, and many others have lived with, and by which they can continue to abide.

The PRESIDING OFFICER. Are there further amendments?

Mr. PACKWOOD. Mr. President, I withdraw the request for the yeas and nays on the amendment. The yeas and nays are ordered on final passage.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment, as amended, was agreed to.

The PRESIDING OFFICER. The question in on the engrossment of the committee amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Utah [Mr. GARN], the Senator from Oregon [Mr. HATFIELD], the Senator from New Hampshire [Mr. HUMPHREY], and the Senator from Alaska [Mr. MURKOWSKI] are necessarily absent.

I further announce that, if present and voting, the Senator from Alaska [Mr. MURKOWSKI] would vote "yea."

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS], is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 92, nays 1, as follows:

[Rollcall Vote No. 25 Leg.]

So the bill (H.R. 1869), as amended, was passed.

Mr. PACKWOOD. Mr. President, I send an amendment to the title to the desk and ask unanimous consent that it be agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The title, as amended, is as follows:

A bill to amend the Internal Revenue Code of 1954 to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984, and for other purposes.

Mr. PACKWOOD. Mr. President, with respect to H.R. 1869 I move that the Senate insist on its amendments and request a conference with the House of Representatives on the dis-

agreeing votes of the two Houses and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer [Mr. WALLOP] appointed Mr. PACKWOOD, Mr. DOLE, Mr. ROTH, Mr. DANFORTH, Mr. LONG, Mr. BENTSEN, and Mr. MATSUNAGA as conferees on the part of the Senate.

UNANIMOUS-CONSENT REQUEST

Mr. HEINZ. Mr. President, I ask unanimous consent that it be in order to send to the desk a bill relating to the Export Administration and ask for its immediate consideration, and that it be considered under the following time agreement:

The time on the bill to be equally divided between the chairman of the Finance Committee and the ranking minority member; that no amendments be in order, that no motion, appeals, points of order be in order; and further, that the bill be in the usual form.

Mr. BYRD. Mr. President, reserving the right to object, it is my understanding in talking with the majority leader that the Senate was going to take up next the Federal Supplemental Compensation Act.

Mr. HEINZ. The Senator from Pennsylvania would be willing to sequence his unanimous-consent request accordingly, but what he would like to be sure of is that while we might modify the unanimous-consent request so that FSC or the resolution by the Senator from Massachusetts might precede the Export Administration Act measure, the Senator nonetheless would like to have a unanimous-consent time agreement cleared now so that we have an orderly progression.

That is what the Senator would like to achieve.

Mr. BYRD. Mr. President, perhaps that can be done.

As I see it, there is Mr. KENNEDY, who wishes to get some assurance that the South Africa resolution will be called up, and Mr. LEVIN and others of us want to be sure that we have an opportunity to offer an amendment on the unemployment compensation measure, and then there are those, like the distinguished Senator from Pennsylvania, who want to be sure that, if we do these other things, the Export Administration Act extension will be called up.

Will the distinguished Senator yield to me for the purpose of putting in a quorum call so maybe we can work all of this out?

Mr. HEINZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. HEINZ. Mr. President, I am going to propose a unanimous-consent request that thas been discussed with the majority leader, the minority leader, and with, I believe, all interested Senators. But I urge all Senators to listen carefully so that they understand it in every particular.

Mr. BYRD. Mr. President, may we have order so that we can hear the request; not only hear it, but understand it.

The PRESIDING OFFICER. The Senator is correct.

Mr. HEINZ. Mr. President, it is the understanding of the Senator from Pennsylvania that we are going to proceed to take up the Federal supplemental unemployment compensation bill, H.R. 1866.

At the conclusion of our debate and floor action on that measure, I ask that it be in order to proceed immediately to Senate Joint Resolution 96, dealing with apartheid in South Africa, as modified, and that it be considered without any amendment being in order, that no motions, appeals, or points of order be in order, and that the agreement be in the usual form, and that there be no debate, no time for debate permitted on the resolution.

Further, I ask unanimous consent that immediately upon the disposition of that measure, the Senate proceed immediately to the consideration of the Export Administration Act extension and that no amendments be in order and no motions, appeals, or points of order be in order, and that the agreement be in the usual form and that there be no time for debate on that measure.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object, and I do not think I will, may I just have an understanding as to the first of the three measures.

Mr. HEINZ. Mr. President, I say to my good friend, the minority leader, that the first of the three measures is the extension of Federal supplemental unemployment compensation. I would yield to the Senator from Oregon to describe that further.

Mr. BYRD. No, the Senator does not need to do that, as far as I am concerned. I just want to make sure. The second and third items were put into the form of a unanimous-consent request. I did not understand that the first item was put into that same form.

Mr. HEINZ. The Senator is correct. I did not put it into the form of a unanimous-consent request because the understanding of the Senator from Pennsylvania is that we are going to proceed to that right now. But I would be happy to put it in the form of a unanimous-consent request.

Mr. BYRD. If the Senator would.

Mr. HEINZ. Mr. President, I further ask unanimous consent that the Senate proceed immediately to the consideration of the Federal supplemental unemployment compensation measure, which I understand is H.R. 1866, and then, upon the disposition of that, proceed immediately to the resolution of the Senator from Massachusetts and then to the Export Administration Act, the latter two be disposed of without amendment and debate.

Mr. BYRD. As stated earlier by the distinguished Senator from Pennsylvania. I have no objection.

Mr. KENNEDY. Mr. President, reserving the right to object, and I will not object, I want to first of all express the appreciation of Senator WEICKER and myself for the work that has been done by the majority leader and minority leader in helping us to have an opportunity to address this issue of the killings in South Africa.

I hope that those Members who want to make a comment on this would have the opportunity to do so prior to the conclusion of the debate on the unemployment compensation measure. We have worked out this procedure for an immediate vote after the unemployment compensation measure for the convenience of Members of the Senate.

But it would be my hope that those who do have comments on this issue would have the opportunity to speak briefly on this matter which is of such importance.

I again wish to thank the leadership and the chairman of the Foreign Relations Committee and the chairman of the African Subcommittee, as well as the minority Members for helping us reach this point.

Mr. BYRD. Mr. President, may I say to the distinguished Senator that I think there are those of us—and I am sure the distinguished Senator from Massachusetts is included—who hope that the unemployment compensation matter can be passed in a reasonably short time. If there is an amendment, I think that measure would have to go back to the other body. We hope that we can get the measure over to the other body, if it has to be sent, in time that we can get the final action there and again here if need by before the day is over. There are many of us who do not want to be in session tomorrow for that purpose.

The only reason I inject this at this point is to get some understanding, if I could, from the distinguished Senator from Massachusetts as to how long there might be some debate on the Af-

rican famine relief measure which might, if it goes on, delay us in getting action that we want on the unemployment compensation matter.

Mr. PACKWOOD. Mr. President, I did not understand that whatever debate we wanted to have on either of these other measures that you wanted to do it on the Federal supplemental compensation measure. The House might go out tonight. Frankly, if we do not get it there is time, there is going to be no extension, period. I do not know how long they are going to stay in, but i do not think they are going to stay in while we are debating some other subjects.

Mr. BYRD. Mr. President, could we get some limitation of debate on the African famine relief?

Mr. KENNEDY. Mr. President, this is the South African resolution condemning violence. I do not believe there would be any extended comments. I would be glad to limit it, if that is more satisfactory to the leadership, to a very brief period of time. I think those who wanted to speak on the subject have done so previously. So I would be willing to have it limited to a period of 10 minutes.

Mr. HEINZ. Mr. President, I would like to amend my unanimous conseft request with respect to Senate Joint Resolution 96, dealing with apartheid in South Africa, as modified, without amendment. I would ask that there be permitted a period of not to exceed 10 minutes of debate, to be equally divided on that resolution, to follow the disposition of the Federal supplemental unemployment compensation matter.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, the Senator said "in the usual form," did he not?

Mr. HEINZ. Yes, that was previously stated.

Mr. BYRD. I thank the Senator.

Mr. KENNEDY. I thank the minority leader.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HEINZ. I thank all Senators.

Mr. President, I am asked by the majority leader to advise that there will be rollcalls not only on the measure involving Federal supplemental unemployment benefits, but also on the two measures just discussed, the South African resolution and the Export Administration Act extension.

Mr. BYRD. Mr. President, before the clerk reports, action under the rules should be considered to have been taken on the South African resolution which would therefore rule out Mr. KENNEDY's right to modify that resolution, and I hope that we would not consent that even though action will have been taken on the South African resolution the distinguished Senator from Massachusetts would be allowed to modify that resolution if he so wishes.

Mr. HEINZ. Mr. President, if I can have a unanimous-consent request, I referred to the modified resolution so that it is clear, and I think I might have stated it better because I thought the resolution had been modified. Let me amend my unanimous-consent request to permit the Senator from Massachusetts to modify his resolution in accordance with the agreement reached earlier.

The PRESIDING OFFICER. The Senator has to make that in the form of a new request.

Mr. HEINZ. Yes, the Senator from Pennsylvania propounds that in the form of a unanimous-consent request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BYRD. Mr. President, I thank the distinguished Senator from Pennsylvania.

APPOINTMENT OF THE SENATOR FROM SOUTH DAKOTA [MR. PRESSLER] TO THE PRESIDENT'S EXPORT COUNCIL

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, pursuant to Executive Order 12131, signed by the President on May 4, 1979, as extended, appoints the Senator from South Dakota [Mr. PRESSLER] to the President's Export Council.

FEDERAL SUPPLEMENTAL COMPENSATION PROGRAM

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 1866), to phase out the Federal supplemental compensation program.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its consideration.

The Senate proceeded to consider the bill.

Mr. PACKWOOD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon is recognized.

Mr. PACKWOOD. Mr. President, this is a bill to extend unemployment benefits for those who are currently—I emphasize who are currently—receiving them under the Federal Supplemental Compensation Program. In this country, we have 26 weeks in most States, with one or two exceptions, of what we might call regular unemployment benefits. Those are funded by a payroll tax payable to the Federal Government. The Federal Government rebates it to the States. The States pay the 26 weeks of benefits with slightly varying standards from State to State.

There is then an extended benefit program, 13 weeks in duration, that is funded out of the unemployment trust fund. But that is paid half by the Federal Government out of the trust fund, and half by the States. There is then the program that we are now considering that goes beyond the extended benefit program, the Federal Supplemental Compensation Program. This is entirely funded by the Federal Government out of general funds. This is not funded out of any trust fund. And it is this program that this bill seeks to extend for those who are currently collecting the benefits—about 340,000 of whom 5,000 are in my State.

I want to emphasize once more that this bill does not extend benefits to any new claimants. It extends it only to those who are currently claimants under the Federal Supplementary Compensation Program and that program expires this Saturday, 3 days from now. And if the program is not extended to phase out those who are currently on it they will go off of the benefits on Saturday night. The House has passed a bill which will extend those benefits for those on it. Let us assume you are in a State where you would have 14 weeks of benefits.

The length of the benefits varies from State to State depending upon the unemployment in a State. But let us assume you are in a State where you are eligible for 14 additional benefits and you are in your 5th week of benefits collection as of this Saturday night. You would be entitled to 9 weeks more. The average nationwide is about 7 weeks. The cost of the extension is estimated to be about $160 million.

The reason for the extension, Mr. President, is one of compassion. It is unfair to yank the rug out from under people who are currently collecting benefits and had hoped or expected that they could at least run out the duration of the benefits.

I have no guarantee that the President will sign this bill. And this is the minimum bill to be expected. There is not one that is going to be less than this. I cannot guarantee that the President will sign this one. I can guarantee that if any amendments are added to this bill that expand the program, it will be vetoed, period.

And as it will be vetoed, we will have no other chance to act on any other bill, the benefits will run out Saturday night and we go out for a recess for a week. When we come back the program will have been expired for a week or 10 days, and I doubt that there will be any benefit extension at all. As a matter of fact, the House has indicated that if we offer any amendments to this bill at all—they may go out tonight and recess tonight—there

is not going to be a conference. And the benefits will not be extended.

So pleading as the arguments may be for a 6-month extension or 3-month extension or changing of triggers or amendments to alter the extended benefit program in some way, all I can say to those who will offer those amendments is that they may make a record that they choose to make. But if their amendment is adopted, what they will succeed in doing is cutting off all benefits for those who are currently collecting and probably cutting them off permanently.

Mr. LONG. Will the Senator yield? I would like to make a brief statement to support the Senator's position.

Mr. PACKWOOD. Yes.

Mr. LONG. Mr. President, over the past few years, the country has experienced a serious recession. More recently, the economy has been improving. But there are still a great many people out of work. In many areas of the country, the unemployment levels remain unacceptably high. In my own State, the insured unemployment rate is 4.6 percent and the total unemployment rate in January was over 11 percent. This means that unemployment levels in the State are still higher than at any time during the 20 years prior to this recession.

The best answer to unemployment is not benefit payments but jobs. We can and must do more to assure that employment is available for all those who can work. But until the economy makes more jobs available, those who remain unemployed must look to the unemployment compensation system for the wherewithall to live.

The pending bill is necessary to provide some continuing aid to a large number of individuals who have been out of jobs for 6 months or more and who are currently drawing benefits under the Federal Supplemental Compensation Act. Without this legislation, all of these individuals—about 340,000 nationally and about 13,000 in my own State—will find themselves without any benefits after this week. The bill will not solve the problem of long-term unemployment. It is not as much as some other proposals might have done. But, under the circumstances, it appears to be the most that can be achieved right now. And for those affected, it is of vital importance.

Mr. President, I believe the bill is well justified. I intend to vote in favor of this legislation, and hope the Senate will approve it.

Mr. PACKWOOD. I thank my distinguished colleague from whom I have learned so much. He was chairman of the Finance Committee.

Mr. President, I have nothing else to say on this bill. I hope all those who are intending to offer amendments, if amendments are accepted the House will probably not go to conference, and if there are amendments to extend the cost of the program, the President will veto it, if we ever go to conference. We might as well consider this situation. Either we pass this bill the way it is before us and extend the benefits for those who are on it until they run their benefits out which is about $160 million worth, or nothing. Those are the choices that we face.

AMENDMENT NO. 27

(Purpose: To extend the Federal Supplemental Compensation Act of 1982 until the end of fiscal year 1985)

Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I send an amendment to the desk, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Pennsylvania [Mr. SPECTER], proposes an amendment numbered 27.

Mr. SPECTER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That (a) EXTENSION OF PROGRAM.—

(1) Section 602(f)(2) of the Federal Supplemental Compensation Act of 1982 is amended by striking out "March 31" and inserting in lieu thereof "September 30".

(2) Section 505(2) of such Act is amended by striking out "April 1" and inserting in lieu thereof "October 1".

(b) MODIFICATION OF AGREEMENTS.—The Secretary of Labor shall, at the earliest practicable date after the date of the enactment of this Act, propose to each State with which he has in effect an agreement under section 602 of the Federal Supplemental Compensation Act of 1982 a modification of such agreement designed to provide for the payment of Federal supplemental compensation under such Act in accordance with the amendments made by this Act. Notwithstanding any other provison of law, if any State fails or refuses within the three-week period beginning on the date the Secretary of Labor proposes such modification to such State, to enter into such modification of such agreement, the Secretary of Labor shall terminate such agreement effective with the end of the last week which ends on or before the close of such three-week period. Pending modification (or termination) of the agreement, States may pay Federal supplemental compensation in accordance with the amendments made by this Act for weeks beginning after March 31, 1985, and shall be reimbursed in accordance with the provisions of the Federal Supplemental Compensation Act of 1982.

Mr. SPECTER. Mr. President, the amendment which I have just submitted is identical to Senate bill 749 which I introduced on March 26, 1985, which provides for a 6-month extension on the Federal supplemental benefits.

At the outset, let me express my appreciation to the distinguished chairman of the Finance Committee, Senator PACKWOOD, for his efforts on behalf of the unemployed. I have listened carefully to what Senator PACKWOOD has had to say concerning the bill which has been reported and what Senator PACKWOOD considers to be the prospects if there is an amendment. And I understand that full well. When I introduced Senate bill 749 which, as I say, this is an exact duplicate of, I had conferred with Senator PACKWOOD and the distinguished majority leader, Senator DOLE, concerning what proceedings might be expected in this body before the recess. I express my appreciation to both of them for their expeditious treatment of this matter as a bill has been reported out continuing the benefits for those who are currently on the rolls.

It seems to me that the action which has been taken, while helpful is realistically viewed not sufficient, and there should be a supplemental effort to get benefits beyond those which would be in effect for the men and women who are on the rolls at the present time.

It is not an infrequent occurrence that when an amendment is offered as these bills come to the floor on the brink of a recess or when the other body is about to adjourn, there are considerations that the matter may not be heard by the other body or there is insufficient time for conference, or that the bill may be vetoed if it is added to by an amendment such as this one. Notwithstanding those considerations, I believe this is an amendment which ought to be considered by this body.

In proposing this amendment, I do so without illusion about its likelihood for success, but I believe it to be very meritorious and that it ought to be debated and deliberated upon by this body and voted upon.

In sending my amendment to the desk I do so on behalf of Senators LEVIN, HEINZ, METZENBAUM, MATHIAS, RIEGLE, and ROCKEFELLER. I ask that they be added as original cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. Mr. President, approximately 8 million people who are unemployed by and large are not unemployed because they choose to do so. Unfortunately, some 501,000 of these unemployed live in Pennsylvania, and again unfortunately Pennsylvania has not been the beneficiary of economic recovery to the same extent as other States.

In Pennsylvania there are large numbers of people who are unemployed as a result of predatory foreign trade practices in imports, which is a subject which has received considerable attention in this body and the

House of Representatives during the past few days.

In holding a series of open house town meetings, some 22 in number in the past 6 weeks in Pennsylvania, I have found double-digit unemployment in many, many areas of my State—in Midland, Sharon, Johnstown, Bethlehem, Scranton, Wilkes-Barre, and other locations. Many, many people are unemployed.

Significantly, steelworkers are unemployed as a result of dumped and subsidized steel which has come into the United States. Many textile workers are unemployed as a result of imports. Coal miners are unemployed in large numbers in western and southwestern Pennsylvania as a result of economic problems beyond their control.

These unemployed workers, Mr. President, really have little interest in unemployment compensation. What they have great interest in is jobs. They have a great interest in stimulating the economy of the United States to provide an opportunity for them to work and to have gainful employment. But facing the stark conditions which they do, it is my view that there has to be a response by the Congress and by the executive branch to do more than retain the program for those who are currently on the rolls.

I agree with the distinguished chairman of the Finance Committee that it would be unfair and unfortunate to strike them from the rolls, but similarly someone who would be eligible for these benefits today and after, she or he, too, ought to be entitled to these benefits.

I realize that this is a program which is expensive. CBO has estimated it at some $1.08 billion. I full well realize the budget constraints that we are operating under in trying to deal with a proliferating and expanding deficit.

These are men and women who, by and large, are not to blame for their status on the unemployment rolls. These are men and women who need these benefits to put bread on the table. That is why I believe this amendment ought to be adopted by this body today.

Mr. President, the hour of truth has arrived. This is our final opportunity to act on the extension of the FSC, Unemployment Benefits Program, before beneficiaries are left without support. To this Senator, some 320,000 unemployed beneficiaries, and many more not yet eligible for this essential program, this extension is a No. 1 priority.

I am grateful that the Senate Finance Committee, as well as the other body, have moved expeditiously to show the unemployed some sensitivity. I appreciate the cooperation of my distinguished colleague, Senator PACKWOOD.

But we must do more to meet the needs of those who only now are exhausting their unemployment insurance and who would just now enter the FSC Program were it not for the expiration date.

I remind my colleagues again that there are over 8 million unemployed persons in the United States. Some 501,000 reside in my Commonwealth of Pennsylvania. Over 241,000 of these jobless workers receive no assistance at this time. Senators have heard from thousands of them. And their message is: Do not break faith with us, just as we have not broken faith with our country, despite our present difficulties. These unemployed are Americans who want to work for a living and provide for their families. They are persons, neighbors, who have paid their share of taxes and who by no fault of their own lost their jobs to the ravages of poor international trade policies and a lack of adequate retraining programs.

Mr. President, I refuse to abandon these Americans simply because the Federal Government has spent far too much more than it has taken in, causing our inexcusable national debt, an overvalued dollar, and thus a flood of imports that has undermined domestic industry.

Mr. President, the amendment I offer today is the same legislation that I introduced on March 25, 1985, and attempted to have placed immediately on the calendar.

Specifically, this amendment will extend for 6 months the unemployment benefits provided in the Federal Supplemental Compensation Act of 1982 [FSC] and provide Congress with obviously needed time to act appropriately to reform and improve this vital program for hundreds of thousands of Americans. We have extended this program in the past, most recently in October 1983, and it is necessary to extend it again as soon as possible. Unemployment has not gone away with the economic recovery. Many Pennsylvanians do not know what the economic recovery is because they have yet to see one. As just one example, as I have stated previously, unemployment in the Mon Valley is estimated to be 30 to 40 percent. Large pockets of unemployment can still be found not only in Pennsylvania but throughout the United States. It is my sense, therefore, that we all must support an extension of benefits in order to provide another chance for many to find employment.

The Department of Labor estimates that 1.34 million persons have been unemployed for 27 weeks or longer. And approximately 1.5 million persons would not receive extended benefits if the FSC Program is terminated.

As I have stated, in my own Commonwealth of Pennsylvania, 8.2 percent of the civilian work force is still unemployed. As of March 2, 1985, there were 28,868 Pennsylvanians utilizing the FSC Program and by April 6, 1985, they will all be cut from this lifeline program. The urgent need for this timely legislation may be demonstrated by a glance at our unacceptably high level of unemployment. This figure—8.2 percent—underestimates the problem because it does not take into account those who have exhausted Federal benefits yet still actively seek employment.

Mr. President, I urge my colleagues all of whom have unacceptable levels of unemployment in their States, to act now to extend the vital FSC Program for 6 months.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SPECTER. I thank the Chair and I yield the floor.

Mr. PACKWOOD. Mr. President, as I indicated before, it is very unlikely that the House is going to go to conference in any event. I suppose it is possible, but it is unlikely. There is no possibility, however, that the President would sign this bill if this amendment was adopted by the Senate and adopted by the Congress.

This program would cost about $1 billion. I well know the heartache of unemployment of which my good friend from Pennsylvania speaks. My State has the same problem. We consistently run 2 to 3 percent above the unemployment rate for the Nation. We have pockets of unemployment which are as severe as any other pockets of unemployment in the steel industry, the coal industry, or any other hard-pressed industry of this country.

As much as I empathize with what he wants to do, we have to say once more that if Members of this body want to help those 340,000 people who are currently on benefits, including those in his State, then they must defeat the amendment of the Senator from Pennsylvania.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, in an address to the Nation on February 5, 1981, President Reagan deplored the fact that there were at that time "7 million Americans caught up in the personal indignity and human tragedy of unemployment. If they stood in line," the President said, "allowing 3 feet for each person, the line would reach from the coast of Maine to California."

Today, the line of which the President spoke is much longer than it was in 1981; 20 percent longer.

A total of 8,339,000 Americans are standing in it today. And the line of the jobless now stretches from Maine to California, and on out for approximately 800 miles into the Pacific Ocean.

And that is precisely where this administration wants to leave the unemployed—stranded far from shore, without help and without hope.

This President, who said not long ago that we should keep the grain and export the farmers, wants to keep the unemployment benefits and ignore the unemployed. And he says that it would "make his day" to veto any legislation that we pass to assist millions of needy families.

That veto threat seems to have had its effect.

But there is spending, Mr. President, and there is spending.

We have plenty of money, it seems, to pay for weapons we do not need and that often do not even work.

We have money to pay for $900 screwdrivers, money to subsidize the lobbying activities of defense contractors, money to build multi-billion-dollar bargaining chips.

We have so much money that we do not require the most profitable corporations in the country to pay even a minimum Federal tax.

But when it comes to loans for struggling farmers—when it comes to college loans and grants—when it comes to helping those who are suffering from what the President called the personal indignity and human tragedy of unemployment—then, it seems, we just cannot afford it.

We have acted before, on three separate occasions, to extend the Federal Supplemental Unemployment Program.

We should do so again.

The legislation before us will not suffice.

It will allow those who now receive Federal unemployment benefits to continue receiving them. But it will cut off, without 1 cent, those who in the future exhaust their State benefits.

It is not enough. We owe more to those Americans who have played by the rules, who have worked hard all of their lives, and who now stand to lose their cars, their homes, and their dreams.

The amendment that I join the Senator from Pennsylvania in offering today would extend the program for 6 months. That is the fair and decent thing to do for the unemployed and I hope that the Senate will have the courage and the compassion to adopt this amendment.

Mr. ROCKEFELLER. Mr. President, I urge support of this amendment to continue the Federal Supplemental Compensation [FSC] Program for another 6 months. A phaseout, while preferable to an abrupt termination of benefits to persons now receiving them, will still mean substantial hardship for large numbers of unemployed people with little immediate prospect of finding jobs.

I wish I could argue, like the supporters of a phaseout, that improved economic conditions have made this program unnecessary. The civilian unemployment rate was 7.3 percent in March—lower than it was in the midst of the last recession, but otherwise still quite high. For the last 10 months, there has been virtually no improvement in unemployment, and 8.4 million people across the country remain on the jobless rolls.

The economy's recovery, besides being incomplete, has been highly uneven. West Virginia, with an unemployment rate of 15.9 percent, obviously still suffers from a devastating shortage of jobs, and it is not alone. In large part, geographic differences in unemployment reflect industrial composition: The manufacturing sector has recovered only about three quarters of the jobs lost during the recession, and major industries, like steel, have barely grown at all. Mining, another key industry in my area of the country, provides fewer jobs now than it did during the recession. Unemployment in areas dependent on such industries also tends to last longer, since there are fewer alternative sources of jobs.

I do not consider the additional weeks of benefits offered by the FSC Program a solution to the problem of high unemployment. But this income support is making a difference to hundreds of thousands of people who have sought jobs, without success, for at least 6 months. Other steps, including better training and adjustment assistance programs, will be required to hasten the reemployment of these workers. But the proposal to phase out FSC is not being accompanied by any such effort. In fact, the administration is trying once again to slash funds for job training, economic development and other activities that could improve employment opportunities. Under these circumstances, the program deserves to be extended.

Mr. GLENN. Mr. President, this administration has been boasting about recovery. But it is a wonderously selective kind of recovery which promises renewed prosperity for some, but continued misery for others. It is a recovery in which over 8 million still can't find work—and millions more are underemployed. While I share the concern over huge budget deficits, I do not believe that the budget should be balanced on the backs of those least able to afford it.

The hard truth is that President Reagan has conveniently forgotten about our unemployed workers. The fortunes of my home State of Ohio are closely tied to the fortunes of basic industries like steel, autos, and mining—industries which continue to suffer from economic and technological change. And let there be no mistake, the problems faced by today's auto, steel, and textile workers are neither easy nor temporary. Economic change is going to continue, and today's plant closings are only a foretaste of the upheaval we can expect as technology continues to advance.

President Reagan seems to think that people become unemployed by choice. But you and I know that most of today's victims are people with proven work histories who can't find jobs because their industries are in decline. To them, the administration's only message is: "Vote with your feet."

Vote with your feet. Just pack up and move someplace else where your prospects might be a little brighter. Well, I say that true prosperity always flows up from the people, and never trickles down from the powerful. I say working people don't need anyone telling them to vote with their feet. What we need is to ensure the continuation of Federal supplemental compensation and to provide training so that these citizens can also be included in the economic recovery.

In order to achieve these goals I have supported and cosponsored legislation to extend Federal Supplemental Compensation which expired at the end of last month. Ohio currently averages 18,000 weekly recipients of FSC benefits. Each week 2,000 Ohioans submit new FSC claims. This extension would allow for the continuation of benefits to 320,000 Americans.

Mr. President I understand that this is not a permanent solution to the problem of unemployment, but this extension will ease our problems in the short term. I have introduced measures in the past which attempt to deal with the long-term problems of unemployment and continue to support programs to provide new solutions to this problem. The question before us, however, is whether or not to extend these benefits. I remind my colleagues that we are not asking for new money for this extension, merely a continuation of the current program to ensure that those who are most affected by the serious problems of our economy will be helped in this time of need.

I ask for the full consideration and support of my colleagues in behalf of this measure. Thank you very much.

WE MUST EXTEND THE SUPPLEMENTAL COMPENSATION PROGRAM

Mr. BYRD. Mr. President, several times during recent weeks I have spoken in this Chamber concerning the nearing expiration of the Federal Supplemental Compensation Unemployment Insurance Program, and steps I believe the Congress should

take to strengthen our unemployment insurance [UI] system.

With the cosponsorship of several other Senators, I have introduced a comprehensive bill to reform the portion of our UI system beyond the basic State programs. That bill, S. 699, while replacing both the Federal Supplemental Compensation [or FSC] Program and the Extended Benefits [or EB] Program with one consolidated program, recognizes that its reforms cannot be implemented overnight. Some form of the FSC Program must be preserved in the meantime. My bill contains such a transition program.

I also cosponsored a bill introduced by the distinguished junior Senator from Michigan, Senator LEVIN, that would extend the FSC Program for 18 months.

Last week, I cosponsored S. 749, introduced by the junior Senator from Pennsylvania, Senator SPECTER, and the junior Senator from Michigan, Senator LEVIN, and other Senators, which does precisely what the amendment of the distinguished Senator from Pennsylvania would do: Extend the FSC Program for an additional 6 months.

I ask unanimous consent, Mr. President, that I be listed as a cosponsor of the amendment.

Mr. President, the Congress of the United States must act to assure that the long-term unemployed workers of this Nation are not left high and dry by the expiration of the FSC Program. A number of States—and a number of areas within other States—have not emerged from the recession that began in 1981 and brought us to the highest level of national unemployment since the end of the Great Depression 50 years ago. My own State of West Virginia currently has a total unemployment rate of over 16 percent, not counting those workers who are so discouraged at their inability to find work that they have ceased looking altogether.

The people receiving benefits under the FSC Program want to work. But they have been unable to find jobs.

At a time when unemployment remains so severe in so many locations, to me it is unthinkable that the Congress would allow the FSC Program to expire.

I am hopeful that during the coming months both the House and the Senate can direct some attention to needed reforms of the entire unemployment insurance system. I believe the bill I introduced earlier this year, S. 699, offers an excellent way to do this—but others may have even better ideas and I stand ready to hear them, to talk with them, and to support the best ideas to emerge. I am very encouraged that the House Subcommittee on Unemployment Compensation already has reported such a bill, very similar to the one I introduced.

But until we have accepted and acted on our responsibility to do something affirmative with the UI system, I believe it is irresponsible just to cut the FSC Program off at the knees. We owe jobless workers more than that. They have every right to expect more responsible treatment from their Federal Government than that.

The 6-month extension of the FSC Program proposed by the pending amendment will buy enough time to allow the careful consideration of longer range and more fundamental improvements. It does not establish a new program. It does not provide new benefits. It does nothing that is not now being done. It simply prevents the disappearance of a very vital program providing lifesaving assistance to the victims of our economy's malfunction.

I urge all Senators to support the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Utah [Mr. GARN], the Senator from Oregon [Mr. HATFIELD], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Alaska [Mr. MURKOWSKI], and the Senator from Alaska [Mr. STEVENS] are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon [Mr. HATFIELD] would vote "yea."

Mr. CRANSTON. I announce that the Senator from New Jersey [Mr. LAUTENBERG] is necessarily absent.

The PRESIDING OFFICER [Mr. ABDNOR]. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 34, nays 58, as follows:

[Rollcall Vote No. 26 Leg.]

YEAS—34

Biden	Harkin	Melcher
Bradley	Hart	Metzenbaum
Burdick	Heflin	Moynihan
Byrd	Heinz	Pell
Cranston	Inouye	Riegle
D'Amato	Johnston	Rockefeller
Dixon	Kennedy	Sarbanes
Dodd	Kerry	Sasser
Eagleton	Leahy	Simon
Glenn	Levin	Specter
Gore	Long	
Gorton	Mathias	

NAYS—58

Abdnor	Cochran	Ford
Andrews	Cohen	Goldwater
Baucus	Danforth	Gramm
Bentsen	DeConcini	Grassley
Bingaman	Denton	Hatch
Boren	Dole	Hawkins
Boschwitz	Domenici	Hecht
Bumpers	East	Helms
Chafee	Evans	Hollings
Chiles	Exon	Kassebaum
Kasten	Packwood	Symms
Laxalt	Pressler	Thurmond
Lugar	Proxmire	Trible
Matsunaga	Pryor	Wallop
Mattingly	Quayle	Warner
McClure	Roth	Weicker
McConnell	Rudman	Wilson
Mitchell	Simpson	Zorinsky
Nickles	Stafford	
Nunn	Stennis	

NOT VOTING—8

Armstrong	Hatfield	Murkowski
Durenberger	Humphrey	Stevens
Garn	Lautenberg	

So the amendment (No. 27) was rejected.

AMENDMENT NO. 28

(Purpose: To allow States the option of a 5-percent trigger for extended benefits)

Mr. LEVIN. Mr. President, I send an amendment to the desk and ask for its immediate consideration. It is an amendment on behalf of myself, Senator SPECTER, and others.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Michigan [Mr. LEVIN], for himself and Mr. SPECTER, Mr. RIEGLE, and Mr. METZENBAUM, proposes an amendment numbered 28.

Mr. LEVIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new section:

EXTENDED BENEFITS OPTIONAL TRIGGER

SEC. . (a) Section 203(d) of the Federal-State Extended Unemployment Compensation Act of 1970 is amended—

(1) by designating the last sentence thereof as paragraph (4);

(2) by striking out the sentence which begins with "Effective with respect to"; and

(3) by inserting after paragraph (2) the following new paragraph:

"(3) Effective with respect to compensation for weeks of unemployment beginning after April 30, 1985 (or, if later, the date established pursuant to State law), the State may by law provide that the determination of whether there is a State 'on' or 'off' indicator shall be made as if paragraph (1) did not contain subparagraph (A) thereof.".

(b)(1) Except as provided in paragraph (2), the amendment made by subsection (a) shall apply to weeks beginning after the date of the enactment of this Act.

(2) If the Secretary of Labor determines that State legislation is required in order for a State to comply with the amendment made by subsection (a), the State's unemployment compensation law shall not be found to be out of compliance under section 3304(c) of the Internal Revenue Code of 1954 solely by reason of a failure to comply with such amendment for any taxable year which begins prior to—

(A) in the case of a State whose legislature is in session on the date of the enactment of this Act and remains in session for not less than 25 calendar days thereafter, the date such session ends; or

(B) in the case of a State not described in subparagraph (A), the date of the close of the first session of the legislature which

begins after the date of the enactment of this Act.

Mr. LEVIN. Mr. President, it is clear, after the vote on the Specter amendment, that the Senate intends to see the Federal Supplemental Compensation Program expire after the phase-out period provided for in the committee bill.

It is just as clear, however, that unless we do something, what we will be left with is an inadequate unemployment insurance system. In opposing the reauthorization of the FSC program, the administration argued before the Ways and Means Committee that the program was unnecessary because of the general improvement in the unemployment situation and because the 13-week extended benefits program would still be available for States with high unemployment. The costs of the extended benefits are shared 50/50 by the Federal Government and the States.

While it is undeniable that on a nationwide basis, the unemployment situation has improved from what it was during the depths of the recession, not all States have shared in that recovery. In my home State of Michigan, unemployment still exceeds 9 percent. In other States, it is even higher. Mississippi, Louisiana, and Alabama all exceed 11 percent. Oregon, Washington, and Indiana all exceed 10 percent.

Similarly, a blanket reliance on the current extended benefits program as a safety net for high unemployment States is unjustified in light of the fact that only three States—West Virginia, Alaska, and Idaho—currently qualify for that program. That means that none of the other high unemployment States which I have just mentioned currently qualify.

It is clear, then, that if the extended benefits program is to be a meaningful safety net for high unemployment States, it must be modified. At this time, however, I am not proposing any massive modifications with any massive costs associated with them. What I am proposing is a minor change with a relatively minor cost associated with it, but which would have an important implication for strengthening the unemployment insurance safety net. This change would reduce from 6 percent to 5 percent the insured unemployment rate [IUR] at which a State could trigger on to the extended benefits program. The insured unemployment rate is the number of people in a State who are receiving unemployment benefits compared with the number of people who are covered by the unemployment insurance system in that State. The cost of this change has been estimated by the Congressional Budget Office at $20 million for the remainder of fiscal year 1985 and $40 to $45 million for fiscal year 1986. I emphasize that. I think it is important and in sharp distinction from the amendment we just defeated. The Department of Labor estimates are only somewhat higher, but we are using the CBO estimates. Even the CBO figures probably overstate the cost to an extent, because States would have to enact conforming legislation if they are to qualify, and that could take some time, if it is done at all. But at least here, today, we would have gotten the ball rolling for a more effective and secure unemployment insurance safety net, at an extremely modest cost.

Let me note this point that if States did have conforming legislation, the lowering of the optional State trigger which we are proposing, from 6 percent to 5 percent, would affect at least the following States and benefit the following States: Oregon, Wisconsin, Washington, and Montana. Even the States which it would not immediately affect would stand to gain from a strengthening of the safety net.

For my home State, for instance, it would mean that unemployment would not have to reach totally disastrous levels again before the extended benefits program triggered on. Unemployment would still have to be high, higher than it is today, but it would not have to reach a level of total destitution. That is far less than we should expect from a meaningful unemployment insurance system. But it is all that I am asking the Senate to consider today.

Mr. President, let me reiterate the three points.

First, the Federal Supplemental Compensation Program is about to end.

Second, if we do nothing else, then we are going to be left with a woefully inadequate safety net for unemployment insurance.

And, third, with a minor change at a minor cost, we can go part of the way toward reinvigorating that system and partially rethreading the safety net.

The four States that would immediately be able to trigger on, Oregon, Wisconsin, Washington, and Montana, are the four States that would benefit at this point.

My own State would not benefit at this point. And a number of other high employment States, such as Pennsylvania and Ohio, would not immediately benefit.

But at least that net would be there in the event that unemployment goes up again to disastrous levels, and at a very, very modest cost I think this Senate could feel a little better that we have not totally decimated the unemployment benefit safety net which was in place prior to the end of this month.

Mr. President, again, finally, I have been assured that this would not create a problem in the House of Representatives. To the best of my knowledge, that is so. I hope that information continues to be accurate, but I think we could add this very minor safety net provision without creating a problem in terms of House acceptance.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. Mr. President, my information from the House of Representatives, and all of this is an hour ago, is they are going out tonight, as far as I can tell, and there is not going to be any conference on this bill. That means the benefits are going to run out on Saturday night and we will come back 10 days from now, and my hunch at this stage is there will be no program, period, not this program, not any other program passed or at least signed by the President.

Second, I can say to my good friend, and I certainly sympathize with him, I have to make a decision in my State between roughly 5,500 people who now collect benefits and more who could collect benefits if the Senator's amendment passed; but I know full well that no one will collect benefits if the Senator's amendment passes, because the President will veto the bill and both of us are fully aware that the veto will be sustained.

I cannot even guarantee, as I said in my opening statement, that the President is going to sign the simple extension for those who are currently on benefits. I hope he will, but I have no promise that he will.

So I must reluctantly oppose the amendment of my good friend from Michigan in the hopes of saving benefits for those who are now currently on them.

the PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I urge the adoption of the amendment proposed by the distinguished Senator from Michigan [Mr. LEVIN].

On the earlier amendment which was not successful, although some 34 Senators voted in favor of extending unemployment compensation benefits as opposed to 58 who voted against, I stated in some detail my reasons for urging an extension of unemployment compensation benefits.

It is my belief that the amendment offered by Senator LEVIN is a constructive amendment, one which I have cosponsored. It does not go as far as the amendment which I had introduced, but I think it is worthy of adoption by this body, worthy of being enacted into law. It provides the safety net which Senator LEVIN has noted. It does not benefit the State of Michigan and the Commonwealth of Pennsylvania. But notwithstanding the fact that it does not at this moment take in my own State, I believe it is something we should adopt, and I therefore urge my colleagues to vote aye.

I thank the Chair and yield.

SEVERAL SENATORS. Vote.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I first of all thank my friend from Pennsylvania for the leadership on his amendment in this area and in general his support for the amendment that is pending.

I only wish that other business had permitted me to come to the Chamber to speak on behalf of his amendment. I do not think it would have made any difference. But he has been leading a valiant effort to try to preserve a safety net.

Mr. SPECTER. Mr. President, will the Senator yield for a question?

Mr. LEVIN. I am happy to yield for a question.

Mr. SPECTER. How many additional votes does the Senator think we would have gained had he been in the Chamber to urge the adoption of my amendment, given his very persuasive powers of advocacy?

Mr. LEVIN. As I indicated, I am afraid not too many.

Mr. SPECTER. Not more than 50?

Mr. LEVIN. Relative to the amendment before us, let me just say briefly this: I have spoken with a Member of Congress who has in turn spoken with DANNY ROSTENKOWSKI.

Now, the Member of Congress I spoke to has the same last name I do. I have a lot of trust and confidence in him.

Congressman LEVIN did speak to Congressman ROSTENKOWSKI about this bill and Congressman ROSTENKOWSKI felt that this would not create a problem with the House of Representatives. It is a small amendment. It is a $20 million amendment, which gives us a little better safety net in the Extended Benefits Program if unemployment goes up. It benefits again only four States. My State is not one of them. But if unemployment goes up, we have to have something there.

The Extended Benefits Program right now only helps Alaska, Idaho, and West Virginia.

At a very modest cost, without any derailing of this legislation in the House of Representatives, we could do a little bit today as we are burying the Supplemental Benefits Program. We are burying it today. We are phasing it out. We are saying those who are on it are going to continue to get benefits but people as they become unemployed are not and people as they exhaust their 26 weeks are not.

I think it is only decent that at that burial we take some modest step to preserve some safety net for America's unemployed. When we can do that for 20 million bucks, it seems to me that that kind of contribution should be readily acceptable.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. Mr. President, I am trying to remember when I last talked to the chairman of the Ways and Means Committee on this subject. I have talked with him several times on mileage recordkeeping and timing on tax reform. The last time I talked with him, and it was not today—I have been in the Chamber most of the day—he simply said, "I want nothing added to it. We had a tough enough vote getting it clean as it is."

But I have not talked with him today. However, I talked with the White House and the White House will veto it. I want to emphasize again I have not any promise they are going to sign what we send them as a simple extension. They will not even say that. Anything beyond that, $1 beyond that, as far as I can tell, it is a veto.

Mr. LEVIN. The Senator said a simple extension. He meant a simple phaseout.

Mr. PACKWOOD. A simple phaseout of those currently on it. I appreciate my good friend correcting me.

The PRESIDING OFFICER. If there be no further debate, the question is on agreeing to the amendment of the Senator from Michigan.

[Putting the question.]

Mr. LEVIN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Michigan. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON announced that the Senator from Colorado [Mr. ARMSTRONG], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Utah [Mr. GARN], the Senator from Oregon [Mr. HATFIELD], the Senator from New Hampshire [Mr. HUMPHREY], and the Senator from Alaska [Mr. MURKOWSKI] are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon [Mr. HATFIELD] would vote "yea."

The PRESIDING OFFICER [Mr. GRAMM]. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 32, nays 62, as follows:

[Roll call vote No. 27 Leg.]

YEAS—32

Baucus	Harkin	Mathias
Biden	Hart	Melcher
Bradley	Heinz	Metzenbaum
Burdick	Inouye	Moynihan
Byrd	Johnston	Pell
Cranston	Kasten	Riegle
Dixon	Kennedy	Rockefeller
Dodd	Kerry	Sarbanes

Exon	Nickles	Zorinsky
Ford	Nunn	

NOT VOTING—6

Armstrong	Garn	Humphrey
Durenberger	Hatfield	Murkowski

So Mr. LEVIN's amendment (No. 28) was rejected.

The PRESIDING OFFICER. Are there further amendments?

Mr. HART addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

AMENDMENT NO. 29

(Purpose: To require a study relating to alternative uses of unemployment compensation)

Mr. HART. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Colorado [Mr. HART] proposes an amendment numbered 29.

Mr. HART. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new section:

STUDY OF ALTERNATIVE USES OF UNEMPLOYMENT COMPENSATION

SEC. . (a) The Secretary of Labor shall conduct a study with respect to alternative ways in which unemployment compensation might be used to assist unemployed workers. Such alternatives shall include the use of unemployment compensation (in lump sum payment or otherwise) as—

(1) payments to assist unemployed workers in starting self-employment; and

(2) payments to fund education, retraining, or relocation for unemployed workers.

(b) The Secretary shall report the results of the study to the Congress not later than August 31, 1985. The report shall include any recommendations and proposals for legislation.

Mr. HART. Mr. President, my amendment directs the Department of Labor to study proposals to more creatively use the unemployment compensation system. These proposals derive from the premise that the unemployment compensation system can

and should offer options to the unemployed worker beyond its traditional provision of short-term income maintenance.

Specifically, the Department of Labor would be directed to examine the feasibility of two proposals. The first would allow unemployment compensation recipients to use unemployment benefits to support themselves during the startup phase of a small business or to defray the costs of establishing the business. The second would give unemployment compensation recipients the option of using benefits to fund retraining or education expenses.

Fundamental shifts in our economic base have resulted in massive layoffs in many of our traditional manufacturing industries. Double-digit unemployment rates afflict several of our industrial urban areas. No easy answer exists to eradicate the geographical disparities in unemployment rates. But it is becoming increasingly apparent that the devastation caused by long-term unemployment in large pockets of our population cannot be resolved by an unemployment compensation system that serves only to provide temporary income support payments.

Unemployment compensation can and should do more. At a minimum, it should allow the unemployed worker to create a means of self-sufficiency. For the unemployed worker in Pueblo, CO, faced with little hope of reemployment in the declining steel industries within the city, the best prospect for self-sufficiency lies in taking steps to gain or create employment outside the steel industry.

The worker seeking to gain or create new employment is faced with several impediments. Many unemployed men and women lack the skills required by an increasingly technological society. And many of these workers cannot afford retraining or education programs to acquire necessary skills. Further, regulations in effect often restrict the unemployed worker's use of unemployment compensation benefits while attending a retraining program.

Unemployed individuals with entrepreneurial talents also face overwhelming obstacles. Such individuals often lack the funds required to establish a small business or the means of self-support during a business startup phase. Again, regulations prohibit the unemployed worker from receiving unemployment compensation benefits while establishing a small business.

If one aim of the unemployment compensation system is to promote rather than discourage self-sufficiency, then the unemployment compensation system should seek to remove obstacles to self-sufficiency. The amendment that I am introducing simply directs the Labor Department to study proposals—several of which are currently before Congress—to remove impediments to retraining and self-employment that current by exist in the unemployment compensation system.

Mr. President, this amendment creates no new programs and requires no funding. But it offers us an opportunity to examine two exceptionally promising proposals to modernize and improve our unemployment compensation system.

The unemployment compensation system of this country does sustain workers during periods of enforced idleness when the factory whistle grows silent or the shift size is diminished. But it can, and should, do more. We must discover new approaches to provide opportunities to workers faced with the prospect of long-term unemployment—opportunities to become self-sufficient and productive participants in our Nation's economy.

Mr. President, unemployment compensation is income maintenance for short-term unemployed. The bill under consideration phases out the existing supplemental compensation scheme for the long-term jobless. This amendment does not create a new program in this bill. We are not asking the expenditure of any new funds. We are asking the Senate to recognize that 40 percent of the more than 5 million workers displaced from their jobs between 1979 and 1983 were still jobless as of January 1984. Half of those were displaced because of factory closings.

Mr. President, we can do more with unemployment compensation than promise workers sustenance during periods of enforced idleness. We can retrain them, or permit them to establish their own businesses. We can simply, as a society, do better by them.

Mr. President, this amendment asks the Department of Labor to study changes in regulations which presently prohibit workers receiving unemployment compensation from using those funds to begin their own businesses or to receive training for additional jobs. If that is, in fact, what our economic system is all about, if we are in fact at a tremendous economic transition, then we ought to build bridges from the economy of the past to the economy of the future instead of living in the past. This amendment simply asks the Department of Labor to study those two alternatives and, no later than August 31, 1985, report back to us as to what changes in regulations could be made to accomplish these two goals.

I hope, Mr. President, that the managers of the bill will accept this amendment and we can get on with making these adjustments.

Mr. PACKWOOD. Mr. President, I hope that my good friend from Colorado—and I share the goals of his amendment—would be willing to withdraw the amendment on this condition: Again, since the last amendment was offered by members of the Ways and Means Committee, we are not going to conference on this bill. Unless we pass the bill as it is, unemployment benefits for those now collecting them will terminate this Saturday. I would like to join with my good friend in cosigning a letter to our soon-to-be new Secretary of Labor, Bill Brock, who, I know, is a friend of both the Senator and me, asking him on behalf of both of us and others who may want to sign, to carry out identically the study he has asked for in this amendment. If he would be willing to withdraw his amendment, I should be happy to cosign the letter.

Mr. BENTSEN. If my friend will yield, I say to my friend from Colorado, I think what he is proposing is excellent. I think the idea ought to be explored, and I think a study should be made. I think though, that the manager for the majority has stated well how best to accomplish what the Senator from Colorado intends. I shall be pleased to join him.

Mr. HART. Mr. President, I thank the managers of the bill, the Senator from Oregon and the Senator from Texas, for their assistance in directing this request and inquiry to the Department of Labor and the Secretary. I am sure that it will draw his attention as he enters this position and he will give us some speedy information as to what can be done. I particularly appreciate the indication of support for the philosophy of this amendment and what it is attempting to do.

With that understanding, Mr. President, I shall be more than pleased to withdraw the amendment.

The PRESIDING OFFICER. The Senator has that right.

The amendment (No. 29) was withdrawn.

The PRESIDING OFFICER. Are there additional amendments to be submitted?

Mr. PACKWOOD. Mr. President, I thank my good friend from Colorado. I know of no additional amendments. I shall be happy to have the vote.

Mr. BENTSEN. Mr. President, I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, I believe it is highly appropriate that we expedite action on this very reasonable proposal to phase out the Federal Supplemental Compensation Program of extended unemployment benefits. This legislation has two major virtues: It safeguards the concerns of those unemployed who counted on receiving benefits for the number of weeks guaranteed, and it does bring the program to a final end. I want to congratulate the distinguished chairman of the Fi-

nance Committee, BOB PACKWOOD, working out this agreement and getting it to the floor so promptly. It is also very helpful that the House of Representatives saw the light and yesterday passed the identical phaseout proposal that the Finance Committee approved yesterday.

I know, as Chairman PACKWOOD has indicated on a number of occasions, that many Members have an interest in a longer extension of FSC, or in some modifications of the program. But we have to face the fact, as the House did, that the President is very reluctant to accept any extension of FSC. I believe he will accept this bill, but no more. And in any event, time is running out. In fact, time already has run out: This program expired on March 31, and the last benefits are being paid out right now.

COMMITTEE PROPOSAL

Mr. President, the proposal agreed to by the Finance Committee would guarantee benefits for all those who come on to the FSC Program through April 6. Those individuals would keep receiving benefits up to the duration available in their State under the terms of the FSC Program as in effect on March 31. Benefits would range from 8 to 14 weeks in duration depending on the State.

At the same time, this phaseout would bring the FSC Program to an end at a relatively modest cost: about $180 million, according to CBO.

Proceeding with this phaseout will not completely satisfy anyone, which is probably the mark of a good compromise. But this is very much consistent with the history of emergency, extended unemployment benefits. In earlier recessions such programs ended with the recession that spawned them, and we are now 28 months into a strong recovery. When FSC began, unemployment was 9.6 to 9.8 percent. Now it is just 7.3 percent, less than when President Reagan took office, at which time we managed to survive without FSC.

Mr. President, we should take this low-cost route for phasing out FSC and get on with our main task of reducing the deficit so that we can keep unemployment down over the long term. Every previous extension of FSC has also included a benefit phaseout, so there is plenty of precedent for going this way. To do more than a phaseout at this time would, frankly, be fiscally irresponsible; and it would jeopardize the benefits of those who are now on the program, because the President just would not accept it.

I hope we can reach swift agreement on this bill and send it on to the President.

(By request of Mr. DOLE, the following statement was ordered to be printed in the RECORD:)

● Mr. DURENBERGER. Mr. President, I wish to express my support for the Senate Finance Committee's proposal which is before us today. This proposal appropriately speaks to those 340,000 persons, of whom approximately 3,800 live in my State of Minnesota, who are in danger of abruptly losing all supplemental unemployment benefits. These citizens deserve our best efforts to address their legitimate needs.

At the same time, simply extending the current program of unemployment benefits will not treat the larger issue: This funding is not being targeted to many areas of our Nation that need it most.

Currently, the law treats a State as a single entity for the purpose of determining eligibility for extended unemployment benefits. This ignores the reality that specific areas within a State, such as Minnesota's Iron Range and counties in the northwestern part of the State, suffer from extremely high and prolonged unemployment—despite the fact that the State's overall unemployment rate may fall below the "trigger" level for extended benefits.

Without being overly dramatic, Mr. President, I think it is fair to point out that an unemployed family in Eveleth, MN, has no less need for food and clothing than an unemployed family in Pittsburgh or Little Rock. The fact that Minnesota's overall unemployment rate is lower than that of Pennsylvania or Arkansas will not put food on the table or shoes on children's feet. If we are interested in providing a program to truly aid the long-term unemployed—and I hope we are—then we must acknowledge the need to send the funding where it will do the most good.

For this reason, in April 1983 I introduced legislation to provide a new program of emergency unemployment compensation for areas experiencing high rates of unemployment. The bill would have modified the eligibility trigger requirements by permitting States to designate areas of high unemployment as eligible for extended benefits, even if the State as a whole did not qualify.

Because the Congress failed to pursue that or any other alternative, I again bring this proposal before you today. Developing a formula to implement such an area trigger may be complicated. But I believe sincerely that as long as the need exists, and exists in a number of States, the effort is warranted.

I am pleased to see so many Americans benefiting from what is truly an economic recovery. But like many of my colleagues, I also recognize that millions of Americans, jobless for many months through no fault of their own, are not fully reaping the benefits of our recovery. The extinction of entire industries has precipitated high unemployment in many areas of the country that depended heavily on those industries for decades. Our reluctance to contend with the issue of unfair imports has helped create this acute condition.

While I believe we must improve our assistance to the long-term unemployed, and I believe that an area trigger is the best approach, I would also like to impress upon this body that we will not get to the heart of the long-term unemployment issues until we address the crisis facing many of the basic industries in this Nation due to the high cost of the dollar and competition abroad.

Mr. President, I am most grateful to Senator PACKWOOD for his commitment to hold hearings on the area trigger proposal in the Finance Committee this summer. The proposal is a first step in the process of redeeming a huge and tragic loss of human potential.●

Mr. SIMON. Mr. President, I rise in support of S. 1866, as reported by the Committee on Finance and commend my colleague, the distinguished chairman of the Committee on Finance, for bringing a bill to the Senate floor. While this bill does not do all that we should to support working Americans—many of whom have been victimized by the adverse impact of our growing trade deficit, the value of the dollar versus competing international currencies, and the arbitrary decisions of companies to close plants and move without notice—it is better than no response from Congress at all. This bill will simply phase out the extended unemployment compensation program over a 3-month period.

As an original cosponsor of S. 509, along with my colleague from Michigan, Mr. LEVIN, and other Members of the Senate, I would rather see the Senate debating the merits of the case—providing unemployment compensation to those who need it, providing work and retraining options to those willing and able to earn a living. Most of the people in Illinois, who are about to lose their benefits want to work. For many reasons, including:

Failure to keep pace with developing technologies and employment trends;

Lack of cooperation between industry and higher education to enlarge Illinois research and development efforts;

Inability to get a fair return on the Federal tax dollars that Illinoisans pay, especially from the Department of Defense; and

The need to turn on the creative juices and develop new ideas which create growth, development and new business opportunities.

In many ways, Illinois has been left out of the Nation's apparent attempt to achieve an economic recovery. Between 1969 and 1983, Illinois lost 449,000 manufacturing jobs and 26,000 transportation jobs. The replace-

ments—where they have existed—have largely been in lesser paying areas. Over the past decades, Illinois' average income has dropped from 127 percent of the national average to 106 percent. The Illinois unemployment rate has gone from 72 percent of the national average in 1970 to 121 percent in 1984, According to the Bureau of Labor Statistics, the February unemployment rate in Illinois was 9.4 percent—a full 1.6 percent above the national average—7.8 percent.

In Illinois, the need for extended unemployment benefits is great. We cannot turn our collective backs on the people who built America.

I must reluctantly support the committee bill, but I urge my colleagues to look carefully at the problem we face. Should we continue to pay people not to work, or should we put people to work and build a better, stronger America for our children. The legislation we vote on today is not a solution, it is barely a band-aid. I hope to take an active role, in the very near future, in focusing the attention of the Congress, this administration and the American people on putting America back to work.

After meeting with the Secretary of Labor-designate today, I am confident that we can develop a legislative solution to the problem of prolonged unemployment, welfare dependency and lack of hope which plagues our society.

I hope all of my colleagues will join me in supporting S. 1866, but only with the understanding that this is a half-step in a long walk of 1,000 miles.

Mr. METZENBAUM. Mr. President, I rise to discuss an issue which is causing me a great deal of concern.

Quite frankly, I am confused by the administration's position on unemployed workers. The President has repeatedly said that he opposes extending Federal unemployment compensation benefits. In fact, he may veto the very bill we are considering today.

Why?

In part, the President has said, because he believes that many of the long-term jobless are better served through retraining programs. According to President Reagan, the better route—and I am quoting him directly now—"for people who are having problems is our job-training program directed at those who have to be relocated because something has happened to the industries they formerly worked in."

But, this very job-training program—the JTPA displaced workers program—which the President claims he favors over the Federal Unemployment Compensation Program—is also a program he would like to cut. The President has asked Congress to rescind $119 million out of a total of $222 million already appropriated for program year 1985. He has also recommended reducing the funding level for 1986.

Once again, this administration is saying one thing yet acting in a completely different manner.

It makes no sense at all.

For the long-term jobless, many of whom have permanently lost their jobs because of changes in the economy, getting back on their feet is an elusive goal. That is particularly true for those who were formerly employed in the smokestack industries—and it is increasingly becoming true for the many thousands who have lost or who stand to lose their family farms.

Look at the domestic auto industry. Despite high profits last year, this industry employs 25 percent fewer workers than it did in 1978.

Employment in the steel industry has gone from 449,000 in 1978 to a current level of approximately 155,000.

In the textile industry, more than 240,000 workers lost their jobs between 1980 and 1983, and that number continues to decline.

Two hundred thirty-eight family farms are failing every day.

It has become obvious that many hard-working Americans will be unable to go back to their old jobs. The simple truth is that their jobs no longer exist. The reasons for this are plentiful.

Foreign imports have captured increasingly larger shares of the domestic market—30 percent in steel, 25 percent in autos, and 50 percent in textiles.

Plants are shutting down, and as American companies shift to new technologies, they use fewer workers for production. And, like it or not, American businesses are going overseas to reap the benefits of cheaper labor and to take advantage of lucrative investment tax policies.

Make no mistake, Mr. President, an unfettered marketplace and a free-wheeling economy do not come without cost. And, in this instance, that cost is permanent job loss for thousands of American workers.

These Americans, who through no fault of their own have been put out of work, deserve a second chance. They deserve to have the opportunity to develop new skills for the new economy. But due to the circumstances in which they find themselves, they often lack the means to get that second chance. They need help in making a difficult transition—and it is very much in the national interest to give them that help.

Title III of the Job Training Partnership Act, known as the Dislocated Workers Program, recognizes this critical problem and the Nation's responsibility in solving it. The program, which was enacted into law last year is designed to provide training and assistance to workers who have no hope of returning to their previous jobs. Like the umbrella program of JTPA, title III relies on a private-public partnership in educating and retraining workers.

More than 100,000 unemployed workers have already participated in the title III program. Thousands more are signing up.

And that is no surprise because title III is working. Under title III, for instance, United States Steel Corp., with matching Federal funds, set up eight dislocated workers centers at plants United States Steel scheduled to close. These centers helped steelworkers identify new career skills, provided counseling to ease the stress associated with job loss, and offered a network to help workers find new jobs. And judging from most accounts, these centers were a real plus.

This is just one example. In every part of the country, State governments are working together with business and labor and are providing dislocated workers with real hope and real jobs.

In justifying its rescission request, the administration has claimed that title III is currently overfunded. Many States, they say, have not utilized the funds available.

At best, this is a misrepresentation of the facts. As I understand it, some States have simply spent their own funds first in establishing training programs under title III and have yet to tap into the Federal appropriation. Also, considering the newness of the entire program, some States may have been slow in starting up any title III effort.

In other words, the administration is presenting statistics which conveniently serve its own purpose, ignoring the fact that the title III money that we have already appropriated is committed and will be properly spent.

Contrary to what the administration would have us believe, unemployment is still a very serious problem in this country, and many unemployed workers will never have the chance to go back to their old jobs. This is no time for us to rob them of their opportunity for a second chance.

I urge my colleagues to resist any attempt to rescind funds for the displaced workers' program.

Mr. RIEGLE. Mr. President, yesterday, the Finance Committee acted to provide a phaseout period for those unemployed currently receiving benefits under the Federal Supplemental Compensation [FSC] Program. That legislation is before us this afternoon. The action is significant because, as my colleagues know, the FSC Program expired on Sunday. The phaseout period will ensure that the approximately 18,000 Michigan unemployed and the 325,000 unemployed across the Nation will receive the remaining weeks of FSC benefits for which they

have qualified. These long-term unemployed remain unable to secure employment despite improvements in the economy and they faced the bleak prospect of receiving their last check this week. Consequently, I would urge my colleagues to support the phaseout period which is so critical for these unemployed workers.

Before we congratulate ourselves for passing a simple phaseout, however, let me suggest that this action does not address the need for an adequate unemployment insurance [UI] program for the long-term unemployed. Too many people forget that nearly 8½ million American workers remain unable to secure employment despite their job search. Some 3.2 million workers currently receive regular State UI benefits. In my State of Michigan, nearly 145,000 unemployed qualify for the regular benefits. These unemployed will not benefit one iota when we simply pass a phaseout provision. Even if they remain unemployed after exhausting their regular benefits, they will have no Federal unemployment insurance system to rely on because we are effectively killing that system today. The Center on Budget and Policy priorities has noted that, in 1984, the unemployment insurance system benefited the lowest percentage of unemployed in the program's history. With the expiration of the FSC Program, that percentage will drop even lower. Since most predictions indicate that unemployment will not decrease significantly in future months, where will these unemployed turn?

The American people should know why both the House and the Senate Finance Committees have acted to provide only a phaseout period. The President has made it clear that he opposes the extension of the FSC Program and that he will veto any attempt by Congress to pass an extension. He claims that the strong economy and job training programs will provide the panacea for the long-term unemployed. What the President fails to tell the American people, however, is that his budget proposes a 55-percent cut in the job training programs for these dislocated workers, and a 29-percent cut in general employment and training programs. These cuts would be in addition to the cuts of 35 to 40 percent in job training programs enacted during Mr. Reagan's first term. Our Nation's unemployed thus face the prospect of an elimination of Federal unemployment benefits and a severe cut in job training programs. I find this approach to be terribly shortsighted for the economic health of our Nation, and terribly callous to the needs of our workers who remain unable to find jobs.

Mr. President, I am cosponsoring the amendments offered by my colleagues from Pennsylvania [Mr. SPECTER] and Michigan [Mr. LEVIN]. Senator Specter's amendment extends the FSC Program for 6 months to reflect the fact that many long-term unemployed will require these benefits during 1985. The FSC Program has worked well and, as the statistics indicate, a need continues to exist for the program. We should not discontinue FSC benefits now simply because the administration would prefer to spend taxpayers' dollars on a new space weapons system and in other areas.

The amendment offered by Senator LEVIN strengthens the Extended Benefits [EB] Program by undoing some of the misguided technical changes enacted during the 1981 Budget Reconciliation Act. The EB Program was enacted to provide temporary extensions of UI benefits during periods of high unemployment. Despite this rationale, six States with unemployment rates greater than 10 percent do not qualify for the program. My State of Michigan triggered off the program in May 1983 despite having an unemployment rate of almost 15 percent. Michigan has remained off the program while suffering double-digit unemployment during 20 of the past 21 months. With the expiration of the FSC Program, the need for a strong EB Program has become even greater. Senator LEVIN's amendment provides a safety net for the long-term unemployed.

Mr. President, while I commend the Finance Committee for acting to ensure that present FSC beneficiaries will not suddenly lose their benefits this week, we must do more. Too many American workers remain unable to find jobs. Too few of those unemployed receive aid to help them and their families survive the painful period without wages. We cannot turn our backs on these individuals now. I strongly urge my colleagues to support the amendments offered by Senators SPECTER and LEVIN.

Mr. CHILES. Mr. President, in his news conference on March 21, President Reagan urged the 340,000 Americans about to lose their unemployment benefits with the expiration of Federal supplemental compensation to enroll in Government training programs. President Reagan referred specifically to the dislocated workers' program, which is authorized under title III of the Job Training Partnership Act and provides employment and training assistance to the long-term unemployed and those who have been laid off due to plant closings.

It seems ironic when President Reagan refers FSC recipients to job training programs at the same time that his budget proposes a 29-percent reduction in funding for JTPA. It no longer appears ironic, but cynical, that he should specifically refer them to title III training activities, a program whose funding he proposes to more than halve from its present level of $223 million. Under the President's budget, $120 million would be rescinded from the fiscal year 1985 appropriation; in fiscal year 1986, the new funding level would be $100 million.

The Department of Labor bases its recission request for title III funding on the existence of unanticipated large carryovers of funds from prior fiscal years. But a new study, conducted by the Westat Corp., for the Department of Labor, suggests these carryovers are far less than the expenditure data would indicate.

According to the Westat study, the carryovers are partly an artifact of how States are contracting for the provision of services to dislocated workers. In many cases, States use performance-based contracts, with payment to providers following only the placement of trainees in jobs. In other cases, expenditures from some projects are reported only after the completion of the project. The Westat investigators conclude, "These two factors, along with the general problems some States are experiencing with attempts to develop centralized management information systems, have resulted in artificially low expenditure rates."

If the Westat investigators are correct, then the proposed recissions and cutbacks in funding for title III programs would not be cushioned by the carryovers from prior years. As a consequence, the effectiveness of this program could be seriously undermined. Such cutbacks would be unfortunate in view of the early reports of the success of the program. The Westat study, for example, shows that the dislocated worker program has achieved a job placement rate of 72 percent.

And clearly, the problems of dislocation remain unabetted by the recovery. The manufacturing sector has recovered only about 70 percent of the jobs lost during the 1981–82 recession. Many of these jobs are in the heavy durable sector which we typically associate with dislocation—such as steel and automobiles. Yet, the problems of dislocation extend far beyond the manufacturing sector—from the Rust Bowl to the Dust Bowl. Several Midwestern States, including Iowa, Minnesota, and Kansas, have extended the criteria for title III participation to include farmers who, because of bankruptcy or an inability to obtain credit, are being forced off their land.

Cutbacks in title III funding, combined with the termination of WIN and drastic cutbacks in other training programs, will place additional pressure on the title IIA grants to States for the training of disadvantaged youths and adults. It would be unfortunate to further strain the resources of a program whose funding, relative to the population it serves, is extremely limited. According to a study by Grinker, Walker & Associates, most

service delivery areas find they can serve less than 5 percent of the eligible population.

Despite the limited funding, the early performance of title IIA projects have far exceeded expectations. The Grinker-Walker study finds that placement rates were on average much higher than anticipated or as set forth in Federal standards: 70 percent versus a 58-percent standard for adults, and 68 percent for youth versus a Federal standard of 41 percent. Costs were much lower than anticipated: For adults, cost per placement was $3,324, versus the Federal standard of $5,900; for youth, cost per positive termination was $3,145, compared to the Federal standard of $4,500. The Westat study found similar laudable results.

The high placement rates and low-training costs have helped nurture the enthusiasm of the private sector—the new partners in the job training venture. Over the past 1½ years, the involvement of the private industry councils has greatly increased. A National Association of Business study shows that the local private industry councils have become actively involved in the selection of types of training and service providers. Because the jobs for which participants are trained are ultimately to be found in the local business community, the active participation of the PIC's is requisite for the continued success of the program.

But, can this enthusiasm continue if we reduce funding for title IIA programs or further increase the pool of eligibles? To a business community used to associating success with increased profits, do cutbacks in training resources send the right signal?

It is unfortunate that the recent action of the Senate Budget Committee has not reversed these adverse signals. Most of the President's cuts were approved by the Republicans on the Senate Budget Committee when they accepted Senator DOMENICI's package last month. The Domenici package accepted 80 percent of the President's original cuts, recommending that job training programs be cut by $937 million. In the area of employment service, whose mission is to place unemployed workers in new jobs, the Domenici package went even further than the President, by proposing that funding be reduced by 25 percent.

I am hopeful that funding for these programs will be restored when the budget resolution is considered on the Senate floor. At that time, I intend to reoffer my committee mark which adds some inflation protection for JTPA activities. Only by truly offering a training alternative to the long-term unemployed can we safely allow FSC to expire at this time.

(By request of Mr. DOLE, the following statement was ordered to be printed in the RECORD:)

● Mr. HATFIELD. Mr. President, the Senate has before it a measure responding to the March 31, 1985, expiration of the Federal Supplemental Compensation Program. This measure will allow the estimated 340,000 individuals and families whose benefits were terminated as of this week to continue to receive their remaining payments. In my view, this bill represents the bare minimum response by Congress on this matter. If the Extended Benefits Program effectively provided the needed safety net to the long-term unemployed, then even this action today may not be necessary. However, the sad fact is that it doesn't and that action is necessary.

Proponents of termination of the FSC Program argue that improved economic conditions have rendered it unnecessary, particularly given the necessity for Congress to reduce the Federal deficit through reductions in Federal spending. That existing job training programs are able to provide the necessary assistance to the long-term unemployed. They point out that the FSC Program was intended to provide emergency aid during a period of time when unemployment reached a post-war high of 10.7 percent and that the crisis has subsided now that our Nation's unemployment rate has fallen to 7.3 percent.

Well, Mr. President, there is no denying that economic conditions have improved since 1982. The national unemployment rate has fallen significantly and our economy is continuing to grow at a modest pace.

However, while this may be true nationally, serious unemployment and economic stagnation continues to be present in numerous States and communities. Oregon, for example, is still suffering the effects of the past recession which was brought about by national economic problems that were not of its own making. The State unemployment rate for February was 11 percent with 17 of 36 counties reporting an unemployment rate of 15 percent or more. Also in February, 7,300 additional individuals were added to the list of those without employment.

I point this out not to debate whether or not there has been an economic recovery, but to make clear that unemployment has not disappeared. Several States and hundreds of communities across our Nation are still burdened by serious unemployment. Our actions today to enable those already on the FSC rolls to receive their weekly payments up until their eligibility expires is the minimum action that equity demands. To abruptly terminate benefits to those individuals and families expecting and depending on full payments would be grossly unfair.

Let me say, also, that I continue to be deeply concerned about administration and Congress' willingness to terminate a program which would provide needed assistance to the close to 1.5 million unemployed persons who will exhaust their regular benefits in the months ahead while at the same time providing the Pentagon with a virtual blank check. We argue that extending or reforming the program would be too costly, that it would jeopardize deficit reduction efforts. Well, Mr. President, I am a strong supporter of deficit reduction. The persistence of $200 billion annual deficits requires immediate action by Congress. To not take any action threatens any economic recovery achieved thus far. However, I do not believe that the budget should be balanced on the backs of the poor and unemployed. How can we argue this week that the FSC program is too costly and then in the weeks ahead not take action to curb the insatiable appetite of the Department of Defense. It is unconscionable to say no to the unemployed and say yes to more bombs, to chemical weapons, and to an endless arms race in space.

This is not just a matter of consistency in our budgetary priorities, it is a matter of fairness and equity. Congress desperately needs to ensure needed assistance is available to the long-term unemployed and that efforts are undertaken to reduce the unacceptable numbers of unemployed in struggling communities across the country. One step may be for Congress to reexamine the Extended Benefits Program. Presently, only two States are eligible for extended benefits because of the triggering level of the program. Thus, in many States, the expiration of the FSC program will mark the end of assistance to unemployed persons beyond the 26-week period. For this reason, I supported Senator LEVIN's amendment lowering the triggering threshold.

I recognize, however, that merely adjusting the assistance formulas to create new handouts is not the answer. We need to put people back to work. In my State, those who have been squeezed out of employment by our struggling economy are not content to collect checks and sit around. They are looking for work and they want work. Concerted efforts in job retraining to assist Oregon's growing dislocated work force are underway. But even these efforts are threatened by the administration's budget proposal for an across-the-board cut in funding for JTPA training programs.

In my view, Mr. President, both targeted job training and extended benefit assistance, along with sound budgetary practices that reduce deficits and return a measure of sanity to our defense spending practices, are the most reasonable solutions.●

The PRESIDING OFFICER. Are there further amendments to be proposed? If there be no further amend-

ments to be proposed, the question is on the third reading of the bill.

The bill was ordered to a third reading, and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall the bill pass? The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Utah [Mr. GARN], the Senator from Oregon [Mr. HATFIELD], the Senator from New Hampshire [Mr. HUMPHREY], and the Senator from Alaska [Mr. MURKOWSKI] are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon [Mr. HATFIELD] would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 94, nays 0—as follows:

[Rollcall vote No. 28 Leg.]

YEAS—94

NOT VOTING—6

Armstrong	Garn	Humphrey
Durenberger	Hatfield	Murkowski

So the bill (H.R. 1866) was passed.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONDEMNATION OF VIOLENCE OF APARTHEID IN SOUTH AFRICA

Mr. KENNEDY. Mr. President, under the previous agreement, I believe it is now in order to vote on the resolution on condemning the killings in South Africa, and I ask for the yeas and nays.

The PRESIDING OFFICER. The Senator from Massachusetts is correct.

Under the previous order, the Senate will now proceed to the consideration of Senate Joint Resolution 96, which will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 96) condemning the violence of apartheid in South Africa and requesting an investigation by the Secretary of State.

Mr. KENNEDY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. There is 10 minutes of debate. Who yields time?

Mr. KENNEDY. Mr. President, I am quite prepared to yield back, but, as I understand it, the consent resolution included a revised joint resolution to conform with the language changes which have been agreed to by the chairman of the Foreign Relations Committee and other interested Senators.

I now send to the desk for consideration a revision of the joint resolution.

The PRESIDING OFFICER. The revision has been authorized.

The revision is as follows:

S.J. RES. 96

Whereas apartheid is a system of institutionalized racism that oppresses 23 million black people in South Africa;

Whereas apartheid is a system that can only be maintained by the activities of the South African security forces;

Whereas on March 21, 1985, the South African police opened fire on a crowd of black people in the Eastern Cape area of South Africa, killing at least nineteen individuals and wounding many more;

Whereas these killings have brought the death toll in South Africa during the past year to a total of 244; and

Whereas the Congress desires a full and impartial report on the circumstances of the recent violence;

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. The Congress of the United States endorses the statements of the Secretary of State on March 21, 1985, that

(a) the system of apartheid in South Africa is "totally repugnant to the people of the United States;"

(b) these most recent killings "underline how evil and unacceptable apartheid is;" and

(c) this most recent act of violence by the South African police is "deplorable" and the people of the United States "have nothing except denunciation to say for it."

SEC. 2. The Congress requests that the Secretary of State conduct a study of the violence in the Eastern Cape during the period of March 21 through 24, 1985, and submit a report to the Congress by June 15, 1985, on the circumstances relating to the violence, including, but not limited to, the number of people killed and wounded.

SEC. 3. The Congress requests that a copy of this resolution be transmitted by the Secretary of State to the Government of South Africa.

Mr. KENNEDY. Mr. President, on Thursday, March 21, 1985, a massacre occurred in South Africa. At least 19 people were shot down in cold blood by the South African police; scores more were wounded. It appears that police fired indiscriminately into an unarmed crowd of black people.

Within hours of that massacre, Secretary of State George Shultz testified before the House Appropriations Subcommittee on Foreign Operations chaired by Congressman BILL GRAY. The Secretary was asked for his reaction to the attack. He said that apartheid is "totally repugnant to me, the administration, and the President," and that this most recent killing was "deplorable." He said that he had "nothing except denunciation to say for (the violence)."

When Secretary Shultz spoke these words, he spoke for the American people. The Congress of the United States should now add its voice to the worldwide chorus of condemnation that this massacre in South Africa has inspired. This resolution quotes the words of Secretary Shultz and makes those words our own.

This resolution also asks the State Department to conduct a study of the violence in the Eastern Cape and to report back to the Congress. We agree with the statement issued by the Southern African Catholic Bishops Conference that "no amount of provocation, if indeed there was any, can justify such bloodshed." But we also believe that a report to the Congress on this event is desirable for a number of reasons.

The initial reports from the South African authorities as to what happened in Uitenhage have conflicted with more recent evidence that has come out of South Africa during the past few days. This raises questions as to the reliability generally of information that comes from the Government of South Africa.

The South African Ambassador to the United States, for example, stated on national television 2 days after the shooting that the victims were not going to a funeral but were instead marching on a white township with a sinister purpose in mind. But, according to virtually all news reports, the crowd had gathered for the purpose of attending funeral ceremonies in a nearby township for three blacks killed in a clash with the police 10

days earlier, and that the crowd was traveling on foot because the authorities had forbidden them to go to the funeral by car.

In addition, the Minister of Law and Order in the Botha Cabinet stated to the South African Parliament that a single police patrol had come under attack and been surrounded by a crowd armed with stones, sticks, and gasoline firebombs. President P.W. Botha repeated that version. But, according to sworn affidavits of eye-witnesses gathered by a group of six members of the South African Parliament, the crowd was unarmed and the shooting was unprovoked. According to the findings of these parliamentarians, the first casualty was a boy on a bicycle. They also found no evidence of incendiary bombs. On the contrary, the parliamentarians report that the police sought to alter the scene of the shooting by planting rocks in the hands of the victims after the incident.

The greatest concern to us, however, is the question of the number of casualties. The South African authorities have stated that 19 individuals were killed in the shootings. But we have heard many reports from a variety of individuals inside South Africa who traveled to the Eastern Cape area after the shooting that the death toll from this incident is actually much, much higher. The South African authorities have continued to prevent access to the hospitals to allow independent observers to verify the official casualty reports.

We think that it is important that there be an accurate and reliable and independent accounting of the casualties, that the full dimension of this massacre be known, and that there be no successful coverup by the South African Government.

It is true that the South African Government has already ordered its own investigation, and it is also true that this investigation, chaired by a distinguished judge, Mr. Justice Donald Kannemeyer, has already begun taking testimony in the Magistrate's Court in Uitenhage. Much of the testimony has already contradicted the official version of the incident as presented by President Botha, Minister of Law and Order LeGrange, and Ambassador Fourie.

I am submitting for the record a series of questions that I hope can be answered by the study produced by the State Department. It is important for the Members of the Congress, as we debate our national policy toward South Africa, to have a full understanding of this event.

The massacre at Uitenhage is a tragedy that does not seem to end for the people of South Africa. I would like to submit for the RECORD an article in today's Chicago Tribune giving examples of the continuing violence in South Africa. This article contains eyewitness accounts of additional, unprovoked, unwarranted, gratuitous attacks by the South African police upon innocent South Africans—incidents that involve chasing and beating of youths, throwing tear gas into homes, and shooting residents with birdshot. As one resident stated, "It is as if the police have declared war, and we are under siege."

Mr. President, it is important that Congress speak out swiftly and strongly on this issue. It is important that our words be heard by the people of South Africa and by the Government of South Africa. On the question of apartheid, the United States of America should speak with one voice. For these reasons, I urge my fellow Senators to vote for this resolution.

Mr. President, I ask unanimous consent to have printed in the RECORD an article published in the Chicago Tribune of April 3, and a list of questions for the State Department's study.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SOUTH AFRICA BLACKS TELL OF "POLICE SIEGE"

(By Nathaniel Sheppard, Jr.)

UITENHAGE, SOUTH AFRICA.—It had begun like any other Saturday morning, Thozama Peter said. She was nursing her 8-month-old daughter, Pumeza, in the kitchen of her home in nearby Despatch at 8 a.m.

Suddenly there was a crash, the sound of glass and the house began to fill with smoke. It was tear gas, she said, tossed into the house by police passing through the neighborhood on an armored-personnel carrier.

There were no demonstrations or groups of people on the street, Peter said, so she did not know what had prompted the police.

Peter began to choke. Her baby began to jerk, then lost consciousness. When she took Pumeza to the hospital here, the baby was given pills and a sucrose solution, Peter said, and she was told to return Sunday with the child if her condition did not improve.

The baby's condition worsened during the night and Peter returned to the hospital Sunday when the child began to convulse violently. Pumeza died within minutes of their arrival.

At 8 p.m. Saturday, Ronnie Booysen, his four children and two other adults were eating supper at Booysen's home in Despatch. His aunt, Queenie, was in her bedroom.

There was a thud in the front room and the house filed with smoke. It was tear gas, thrown from a police vehicle, Booysen said. They doused the tear-gas canister with water, but by the time the fumes subsided, the aunt, who had respiratory problems, was dead.

"It was an unprovoked attack," Booysen said. "There was no trouble outside and no protest activity in the community."

Booysen and Peter were among about a dozen residents of black townships between Uitenhage and Port Elizabeth who said police launched unprovoked attacks on their communities during the weekend, chasing and beating youths, throwing tear gas into homes and shooting residents with birdshot.

"It is as if they have declared war, and we are under siege," said one resident who asked not to be identified because the fate of his missing son is not known.

Authorities have said a strong police presence in black townships is required to maintain law and order. They maintain that turmoil has arisen from black leaders who do not want a peaceful solution to South Africa's problems. Inquiries for a police response to residents' allegations of unprovoked attacks were unanswered Monday.

Residents lined up at the Catholic church in Uitenhage on Monday to give affidavits to attorneys and representatives, while human-rights organizations tried to gather information on any deaths, injuries, arrests and disappearances in the black townships. Residents say incidents have occurred since police opened fire on a group of mourners headed toward a funeral, killing at least 19 people and touching off three days of violent unrest.

Almost daily since the shootings on March 21, the anniversary of the slaying of 69 blacks by police in Sharpeville, township residents have come to the church for help. About 80 families have sought help in learning the fate of relatives missing during the unrest, while dozens more have sought assistance in getting bail for teenagers arrested in the disorders.

On Sunday, police sprayed a group of mourners returning from a funeral in Zwide with birdshot, tear gas and rubber bullets. One man was killed when he was hit in the throat with birdshot.

Theo Brian, of Langa, said he and friends were returning from a funeral in Zwide for victims slain by police when a helicopter began to circle overhead. Police in a "hippo," as residents sometimes refer to the armored vehicles, drove by and began firing tear gas, he said.

"They fired indiscriminately," he said, "in yards and on top of houses. People in their homes were confused and did not know what was happening. It seemed that everywhere the helicopter stopped the police in the hippos would come and fire tear smoke."

Wilson Pityana, a service station owner in Kwanobuhle, said the unrest in black townships seemed to occur when there was a police presence. "The police are to the community as a red tag is to a bull," he said.

QUESTIONS FOR THE DEPARTMENT'S STUDY

I believe that the study conducted by the State Department of the March 21 shootings in Uitenhage should endeavor to answer the following questions:

(1) How many people were killed in the shootings? How many people were wounded?

(2) What are the names, ages and sex (male/female) of the victims (dead and wounded)?

(3) Were any of the victims armed? If so, with what sorts of weapons?

(4) With what kind of weapons were the police armed at the time of the shootings? What weapons were used? Did the police have tear gas available? If so, why was it not used? If not, why not? Were other less drastic riot control measures available?

(5) How long did the firing last?

(6) Why had the people gathered in a crowd, and what was their intention?

(7) How many people were in the crowd at the time of the shootings?

(8) How many police were present at the time of the shootings?

(9) How far away from the police were the people when the first shot was fired?

(10) Was a warning of any kind given by the police to the people in the crowd?

(11) What were the circumstances surrounding the firing of the first shot?

(12) What instructions or orders were given that day to the police involved in this incident?

(13) Was there any attempt by the South African government to cover up the circumstances or the magnitude of this event?

Mr. WEICKER. Mr. President, I rise in strong support of the resolution before us, which condemns the recent violence in South Africa and directs the Secretary of State to seek a full factual account of the incidents in the Eastern Cape of South Africa last month.

For the United States, there can be no ambiguity with respect to apartheid. It is particularly repugnant as it elevates to the level of law the dehumanization of 23 million black South Africans. It crushes human life with violence, such as occurred in Eastern Cape, and snuffs out life with oppressions of poverty, starvation, and disease. One in two children born in the segregated black homelands dies before the age of 5. As advocates of the dignity of mankind and the rule of just laws, we must be more than sympathetic to the tragedy of South African blacks. We must stand with them.

I appreciate the efforts of the majority leader and chairman of the Foreign Relation Committee to expedite the consideration of this matter, so that it can be done in the most timely manner possible. I especially want to commend the leadership of the Senator from Massachusetts in drafting and putting this urgent and important matter before the Senate.

Mr. President, throughout my career in Congress, the Government of the United States—and that includes both Congress and successive administrations—has been the silent ally of the apartheid by our inaction. I am proud that we are beginning to find our tongue on this matter. I hope that the days ahead will find us using our voice in support of peaceful change and acting to back up our words.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. KENNEDY. I am glad to yield.

Mr. PROXMIRE. Mr. President, I cosponsored Senator KENNEDY's joint resolution because I agree that the March 21 action by the South African police in opening fire on a group of unarmed people was in the words of the Secretary of State "deplorable and the people of the United States have nothing except denunciation to say for it."

Since there have been so many conflicting, misleading, and contradictory statements by the South Africa Government about that incident, which resulted in the deaths of at least 17 people and the wounding of many more, it seems wise to request that our own Department of State carry out an investigation on that matter and give the Congress a full report. I believe such a report will be very helpful to the Congress as we consider what should be the right and moral policy for this country to adopt toward the benighted government of that country. My own view as to the proper policy for our Government to adopt is set forth in my bill, S. 147, which I introduced on January 3, 1985. Among other things it calls for a ban on new investment and new bank loans to that country until it changes its apartheid policy. Under that policy, a small white majority maintains a harsh and absolute rule over the black majority who have no political rights. The March 21 violence condemned by this resolution makes clear South Africa can only maintain that rule by using increased violence. That will not serve the interests of either the black or white South Africans nor U.S. interests in that country. We need to encourage peaceful change in that country and my bill is designed to do that.

I support this resolution and commend Senators KENNEDY and WEICKER for offering it.

Mr. KENNEDY. Mr. President, I am quite prepared to yield back the remainder of my time.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana, the distinguished chairman of the committee, is recognized.

Mr. LUGAR. Mr. President, I rise in support of the resolution offered by the distinguished Senator from Massachusetts. He has worked with the staff of the Foreign Relations Committee and we have asked that support come for his resolution as a way of expressing our outrage.

At the same time I deeply appreciate the assurances by the Senator who will work with the committee as will many Senators as they think through carefully our policy with regard to South Africa.

I pledge our committee will have hearings, will have markup, will have a full opportunity for all Senators to be heard on the South African issue as we attempt to think through ways which our policy might be more effective.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I am quite prepared to yield back the time. I believe the Senator from Connecticut will be the designee on the Republican side.

Otherwise, I withhold the time or am glad to yield such time as my colleague from Massachusetts may desire.

Mr. KERRY. Mr. President, will the Senator from Massachusetts yield?

Mr. KENNEDY. I yield to my colleague from Massachusetts.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KERRY. Mr. President, I rise in support of the resolution of my colleague from Massachusetts.

Mr. President, in light of the continued violence in South Africa, stemming from that Government's strict adherence to the most immoral of human policies—that of apartheid—this resolution represents the most minimal response this body can make to the racial tragedy of South Africa.

While I will support passage of this resolution, I believe the measures contained in S. 635, which was introduced by my distinguished colleague from Massachusetts, Senator KENNEDY, and of which I am a cosponsor, are a much more effective response to this situation.

Briefly, S. 635 proposed the following:

A prohibition on new funds from the United States to establish or finance American corporations in South Africa.

A prohibition on bank loans to the Government of South Africa or its parastatal entities, except those loans used for the construction or operation of educational, housing, or health facilities open, and accessible, to all South Africans on a nondiscriminatory basis.

A prohibition on the importation of Krugerrands into the United States.

A prohibition on computer sales to the South African Government.

As I stated earlier in my remarks, S. 635 represents a more effective vehicle to deal with the situation in South Africa and, in particular, U.S. financial dealings with that country. While Senate Resolution 96 places the Senate on record in condemning the racial violence in South Africa, and calls upon the Secretary of State to undertake an investigation into this violence, the resolution does not contain any remedial steps which could be helpful in at least encouraging a process aimed at dismantling apartheid.

Mr. President, I think it is important to understand the growing moral outrage in this country over the issue of the South African Government's racial policies. These policies contravene, so thoroughly, the morality and values that we individual Americans hold in such high esteem. And our sense of outrage is compounded by the fact that the official policy of the United States of constructive engagement—based upon a trickle-down theory of human rights—continues to contribute sustenance and support for a regime whose values are so contrary to our own.

The debate on this issue brings to mind the philosophical underpinning of this administration's so-called quiet

diplomacy and policy of constructive engagement. And the philosophical underpinning of this administration is United Nations' Ambassador Jeane Kirkpatrick's thesis entitled: "Dictators and Double Standards." According to this thesis, a distinction must be made, in our foreign policy, between authoritarian, non-Communist regimes, and totalitarian or Communist regimes.

In making this distinction, Ambassador Kirkpatrick argues that authoritarian nations are traditional societies where power is personal and it has always been that way. Thuggery, while widespread, is somewhat random. On the other hand, totalitarian nations are modern states with large bureaucracies where torture and terror are efficient tools of social control. Authoritarians limit themselves to the political sphere. Traditional autocrats do not disturb the habitual rhythms of work and leisure, habitual places of residence, habitual patterns of family and personal relations. Totalitarians, by contrast, claim jurisdiction over the whole life of the society.

Whatever philosophical consistency there is to this policy, comes apart on the issue of South Africa. For South Africa is the primary example of a non-Marxist totalitarian state. It is a fully developed modern state in which three-quarters of the population does not have any political rights. There is an elaborate apparatus of social control involving all the usual totalitarian paraphenalia; internal passports, secret police, censorship, political arrests and detainment.

State control in South Africa permeates deep into the personal sphere. Rules of the state determine with whom you can socialize, marry, or even invite into your home; where you can live, work, or appear in public. Families are broken up by residency requirements. Worst of all, millions are being uprooted from their homes and lands and packed off to the barren wastes known as bantustans. All of this is in the service of a sweeping ideology. Apartheid obsesses and motivates the ruling elite in South Africa, more than Marxism obsesses and motivates the latter-day rulers of the Soviet Union.

This is why the American people demonstrate their sense of moral outrage in response to our South Africa policy. A growing number of Americans believe that their Government is betraying the very values and morality we cherish so deeply as we continue to maintain the status quo in our relations with South Africa.

If the United States is indeed the leader of the Western World and the defender of democratic values, then our foreign policy must reflect these values, not contradict them. Repression, political, social and economic, whether under totalitarian or authoritarian regimes, is clearly contrary to our values as a nation.

And any government which relies on military repression risks an ultimate and violent explosion which clears the way for the most radical reaction. And that is what is happening in South Africa today. The most stable modern governments are those which have long since learned to tolerate political evolution. Where the road to evolution is blocked by soldiers and security police, revolution becomes the usual and inevitable alternative.

In closing, I reiterate this resolution is a minimal response to the ongoing tragedy of apartheid in South Africa. As the day of reckoning will come in South Africa unless apartheid is dismantled peacefully, so will the day of reckoning come for the United States if we continue to betray, in the conduct of our foreign policy, what we claim to represent to the rest of the world.

Mr. SIMON. Mr. President, I rise in support of Senate Joint Resolution 96, a resolution condemning the violence in South Africa, resulting from the Government's policy of apartheid, and calling on the Secretary of State to investigate the latest round of violence.

No one of us can be untouched by the daily reports of violent attacks on blacks in South Africa, often unprovoked. The continued practice of apartheid by the South African Government should be soundly rejected by the U.S. Government, both in word and in practice. It is all too clear that 4 years of the Reagan administration's policy of constructive engagement with the South African Government has failed completely. Rather than moving the South African Government toward solid reforms, the Reagan administration's approach has led to the worst violence and human destruction that country has seen in over a decade. It is time for our Government to disassociate itself from this policy, and from the South African Government. It is time for our Government to take strong actions against South Africa, actions that complement those taken by other Western nations and which are the best hope for constructive change in South Africa.

Mr. President, I applaud the leadership provided by my colleagues—Senator KENNEDY, Senator WEICKER, Senator PROXMIRE, and others. They understand that the majority of Americans find apartheid reprehensible and that the struggle for equality in South Africa is our struggle as well. If we are to be true to our own national commitment to equality, we must distance ourselves from apartheid by any means necessary and take strong actions that clearly place us in support of those, black and white, struggling for freedom and equality in South Africa. There is growing bipartisan support in Congress for strong sanctions against South Africa. I would hope that our efforts here today in the Senate and similar efforts in the other body will be taken seriously by the administration and that we will see dramatic changes in their approach to South Africa.

Last June, I had the opportunity to spend time with Bishop Tutu and his wife. The bishop is a reasonable man of good judgment. He firmly believes that, unless the United States, South Africa's major trading partner, brings economic pressure to bear on South Africa to change her policies, that country is headed toward a major bloodbath. I fear that, with developments in that country since my meeting with the bishop, his prediction is already coming back to haunt us. We cannot, as a nation, tolerate having any role in that ultimate destruction of human beings.

I sincerely hope that my colleagues will join me in supporting this resolution and take the first step in bringing about a change in our Government's policies toward South Africa.

Mr. LEVIN. Mr. President, I strongly support the resolution sponsored by my colleagues Senator KENNEDY and Senator WEICKER condemning the senseless violence in South Africa and requesting our State Department to conduct a study of the recent violence in the Eastern Cape area.

I am gravely concerned over the rapid deterioration of the situation in South Africa. Episodes of violence against defenseless opponents of apartheid throughout the country are escalating. Most recently in the town of Uitenhage on March 21, the South African police opened fire on innocent people proceeding to a funeral, killing and wounding scores of them.

It is my hope that the U.S. Senate will go on record this date strongly deploring such acts of violence. Violence can only further aggravate the situation in South Africa and make more difficult the search for a peaceful solution of the South African conflict.

We must continually reaffirm the legitimacy of the struggle of the majority of South Africans for a united, nonracial and democratic South Africa.

Passage of this resolution is a step in that direction.

Mr. HART. Mr. President, I support Senate Joint Resolution 96 and I urge each of my colleagues to join me in doing the same.

The violence of apartheid, to which 22 million blacks in South Africa are subjected daily, is intolerable. Quite simply, it is a crime against humanity which we must recognize and confront—rather than continue to ignore and condone. Apartheid is a system of racial segregation and economic exploitation which constitutes the worst abuse of human rights in the world.

Mr. President, I believe that this body, and this Nation, must speak forcefully and consistently in condemning apartheid in each of its vicious manifestations.

This system, Mr. President, intentionally and maliciously destroys the family and the community—the two most cherished institutions in African society. Husbands and fathers are separated from their families by law for 11 months a year while being forced to live in the squalor of hostels adjacent to major urban centers, solely for the purpose of maintaining the cheap labor force off of which the South African economy thrives.

Apartheid requires every black person in South Africa to have in their possession a domestic passport—the infamous Pass Book—in order to prove that their very presence in certain areas of their own country has the approval of the Pretoria regime.

Apartheid does not allow black South Africans to vote or otherwise participate in directing their destiny.

In addition, Mr. President, not only does the South African Government deny every fundamental human right to the majority of its people, it even refuses to allow them to peacefully protest its policies. One need look no further than the most recent round of intimidation, arrests and bannings to confirm this observation.

With its outright murder of 19 unarmed black mourners en route to a funeral on March 21, 1985, the message of the South African Government is clear: It intends to quell all opposition to apartheid by every means at its disposal. Mr. President, our message to the South African Government must be equally clear: Human nature does not allow oppressed people to remain oppressed forever. They can suffer abuse and degredation for only so long.

South Africa's day of reckoning is rapidly approaching. If the apartheid regime persists in its present course, the black majority will have no realistic options to consider in making their fateful decision, other than to resort to resisting by force the violence and humiliaton to which they are subjected.

It pleases me therefore, Mr. President, on behalf of the citizens of the State of Colorado, to support the statement by the Secretary of State that "apartheid is totally repugnant to the people of the United States" and that the most recent killings "underline [the] evil and [unacceptability]" of that practice.

Moreover, Mr. President, as we prepare to consider various pending legislation concerning South Africa, it is crucial that we have at our disposal, independent facts, rather than a steady stream of explanation and rationalization from Pretoria. This is why I strongly support the provision of Senate Joint Resolution 96 requesting the Secretary of State to investigate the circumstances of the most recent round of violence, and to verify to this body the number of innocent people killed and wounded.

I urge my colleagues to join me in condenming the violence of the South African Government, in all of its forms, whether political, economic, psychological, or physical.

The PRESIDING OFFICER. Who yields time?

Mr. WEICKER. Mr. President, I yield back the remainder of the time on this side.

The PRESIDING OFFICER. Has all time been yielded back?

Mr. KENNEDY. Mr. President, I yield back my time.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. HEINZ. Mr. President, I am advised that the majority leader is temporarily off the Hill and to accommodate him, and I have had a request from his staff, I wish to propose but am not yet propounding any unanimous-consent request, that we simply without prejudice to what we are doing lay aside the vote on the Kennedy resolution so we might proceed to the unanimous-consent agreement we have on the Export Administration Act.

Mr. METZENBAUM. Mr. President, I object to that.

Mr. WEICKER. I object to that.

Mr. President, as I understand it, there is a unanimous-consent request that has been agreed to to vote on the matter before us. I do not think we have the authority to go ahead and lay that aside at this time.

SEVERAL SENATORS. Vote!

The PRESIDING OFFICER. All time having been yielded back, the question is on the engrossment and the third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The joint resolution having been read the third time, the question is, Shall it pass?

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. EAST (when his name was called). Present.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Utah [Mr. GARN], the Senator from Oregon [Mr. HATFIELD], the Senator from New Hampshire [Mr. HUMPHREY], and the Senator from Alaska [Mr. MURKOWSKI], are necessarily absent.

I further announce, that, if present and voting, the Senator from Oregon [Mr. HATFIELD], would vote "yea."

The PRESIDING OFFICER [Mr. WARNER]. Is there any Senator in the Chamber who has not voted?

The result was announced—yeas 89, nays 4, as follows:

[Rollcall Vote No. 29 Leg.]

YEAS—89

ANSWERED "PRESENT"—1

East

NOT VOTING—6

Armstrong	Garn	Humphrey
Durenberger	Hatfield	Murkowski

So the joint resolution (S.J. Res. 96), as amended, was passed.

Mr. KERRY addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KERRY. Mr. President, I move to reconsider the vote by which the joint resolution, as amended, was passed.

Mr. HEINZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXTENSION OF THE EXPORT ADMINISTRATION ACT OF 1979

Mr. HEINZ. Mr. President, in accordance with the unanimous-consent request entered into earlier by the Senate, I send a bill to the desk on the Export Administration Act of 1979, and ask for its immediate consideration.

Mr. President, my understanding is that we have no time for debate. I will simply state for the RECORD that this is the measure previously agreed to for unanimous-consent consideration by

the Senate, extension of the Export Administration Act.

Mr. PROXMIRE. Mr. President, I support this extension of the Export Administration Act as part of the "fast track" process by which we hope to amend and renew that important law. Let me explain.

The Export Administration Act is the law which permits the President to control exports for national security, foreign policy, and short supply purposes. Last year, during the process in which the Congress was attempting to amend that law, it was allowed to expire. Since that time, the United States has been operating its export control program under a Presidential declaration of national economic emergency which, when invoked, permits the President to keep our export controls in effect under the authority of the International Emergency Economic Powers Act [IEEPA]. One problem with this situation is that export licensing decisions, including those involving national security controls, are subject to review by the courts. More than 100,000 export licenses are issued each year. If enough court challenges to licensing decisions were brought, it would make it difficult, if not impossible, to administer our export control program effectively.

Another serious drawback with operating our export control program under IEEPA is that questions have been raised whether that law is an adequate basis for keeping in effect the antiboycott regulations promulgated under authorities in the Export Administration Act. While I believe the President does have adequate authority under IEEPA to continue the antiboycott regulations, it would be preferable to have these regulations in effect under the Export Administration Act where many of our antiboycott policies are spelled out in greater detail.

Late in 1983, the House passed a bill amending and extending the Export Administration Act, and in March 1984, we, in the Senate, did the same. However, the amendments passed by the two Houses were quite different and we spent 6 months in a very long and arduous conference in an attempt to reconcile the two bills. By October 1984, we fashioned a compromise proposal that tightened national security controls, strengthened enforcement of such controls, enacted procedures ensuring adequate congressional review of nuclear agreements, and reduced redtape and speeded the overall licensing of exports. Unfortunately, some last-minute disagreements over provisions regarding South Africa prevented the enactment of those amendments to the EAA last October. Thus, we are still operating our export controls under authorities in the IEEPA.

This year, Congressmen BONKER and ROTH of the House Foreign Affairs Committee have taken the lead in a truly bipartisan effort to achieve quick passage of the amendments to the Export Administration Act nearly enacted last October. In fact, all the provisions in the Bonker-Roth bill did pass both Houses last October. They have simply dropped the provisions dealing with South Africa as agreement has been reached to pursue them through other legislation. The Bonker-Roth bill has been marked up at the full Foreign Affairs Committee level on the House side and is ready to be reported.

The fast track procedure mentioned earlier is that we will send an extension of current law to the House and the House will amend our bill by striking the extension and adding in its place their bill to renew and amend the Export Administration Act. It will then come back to the Senate for consideration here. The Bonker-Roth bill, as I stated previously, passed both Houses late last year.

I believe this fast track approach makes sense. The administration supports it. It will help achieve quick enactment of an amended Export Administration Act and remove the threat of legal challenges hanging over our export control program.

I urge my colleagues to support this bispartisan action.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 883) was ordered to be engrossed for a third reading, and read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall the bill pass?

The bill (S. 883) was passed, as follows:

S. 883

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 20 of the Export Administration Act of 1979 is amended by striking out "March 30, 1984" and inserting in lieu thereof "June 15, 1985".

(b) The amendment made by subsection (a) takes effect on March 30, 1984.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SCHEDULE

Mr. HEINZ. Mr. President, I know of no other business to come before the Senate. There certainly will be no further rollcall votes tonight, I am advised by the majority leader. There will be some housekeeping items. Beyond that, there will be no other kind of business.

ROUTINE MORNING BUSINESS

Mr. HEINZ. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond the hour of 7:45 p.m., with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT ON U.S. SUPPORT FOR DEMOCRATIC RESISTANCE IN NICARAGUA—MESSAGE FROM THE PRESIDENT—PM 34

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Appropriations:

To the Congress of the United States:

Pursuant to the provisions of Title VIII, Section 8066 of the Department of Defense Appropriations Act, 1985 (Public Law 98-473, enacted October 12, 1984; 98 Stat. 1935), I herewith transmit a classified report on U.S. support for the democratic resistance movement in Nicaragua. On the basis of this report, I have determined that assistance for military or paramilitary operations now prohibited by section 8066(a) of that Act is necessary.

RONALD REAGAN.

THE WHITE HOUSE, *April 3, 1985.*

PRESIDENTIAL APPROVALS

A message from the President of the United States announced that he had approved and signed the following enrolled bills:

March 27, 1985:

S. 592. An act to provide that the chairmanship of the Commission on Security and Cooperation in Europe shall rotate between members appointed from the House of Representatives and members appointed from the Senate, and for other purposes.

April 2, 1985:

S. 689. An act to authorize appropriations for famine relief and recovery in Africa.

MESSAGES FROM THE HOUSE

At 11:46 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill and joint resolutions, without amendment:

S. 781. An act to amend the Biomass Energy and Alcohol Fuels Act of 1980 to clarify the intention of section 221 of the Act;

S.J. Res. 35. Joint resolution to authorize and request the President to issue a proclamation designating April 21 through April 27, 1985, as "National Organ Donor Awareness Week";

S.J. Res. 50. Joint resolution to designate the week of April 1, 1985, through April 7, 1985, as "World Health Week," and to designate April 7, 1985, as "World Health Day";

S.J. Res. 62. Joint resolution commemorating the 25th anniversary of U.S. weather satellites; and

S.J. Res. 79. Joint resolution to designate April 1985, as "Fair Housing Month."

The message also announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 33. Concurrent resolution authorizing the rotunda of the U.S. Capitol to be used on April 18, 1985, for a ceremony commemorating the days of remembrance of victims of the Holocaust.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1847. An act to amend title 28, United States Code, with respect to the U.S. Sentencing Commission;

H.R. 1866. An act to phase out the Federal supplemental compensation program; and

H.R. 1869. An act to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984, and for other purposes.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 59. Concurrent resolution commemorating the 100th anniversary of the death of Ulysses S. Grant, the 18th President of the United States.

At 5:52 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1185. An act to amend the act establishing the Petrified Forest National Park; and

H.R. 1373. An act to designate the wilderness in the Point Reyes National Seashore in California as the Phillip Burton Wilderness.

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 1185. An act to amend the Act establishing the Petrified Forest National Park; to the Committee on Energy and Natural Resources.

H.R. 1373. An act to designate the wilderness in the Point Reyes National Seashore in California as the Phillip Burton Wilderness; to the Committee on Energy and Natural Resources.

The following concurrent resolution was read, and referred as indicated:

H. Con. Res. 59. Concurrent resolution commemorating the 100th anniversary of the death of Ulysses S. Grant, the 18th President of the United States; to the Committee on Rules and Administration.

MEASURES PLACED ON THE CALENDAR

The following bills were read the first and second time by unanimous consent, and placed on the calendar:

H.R. 1866. An act to phase out the Federal supplemental compensation program; and

H.R. 1869. An act to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984, and for other purposes.

MEASURES HELD AT THE DESK

Pursuant to the order of April 2, 1985, the following bill was held at the desk pending further disposition:

H.R. 1847. An act to amend title 28, United States Code, with respect to the U.S. Sentencing Commission.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-784. A communication from the Comptroller of the United States, transmitting, pursuant to law, a report on the examination of the Office of the Attending Physician Revolving Fund's Financial Statements for fiscal years 1983 and 1984; to the Committee on Appropriations.

EC-785. A communication from the Deputy Assistant Secretary of Defense (Administration), transmitting, pursuant to law, the annual report on extraordinary contractural actions to facilitate the National defense for calendar year 1984; to the Committee on Armed Forces.

EC-786. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Air Force's proposed letter of offer to Saudi Arabia for defense articles estimated to cost in excess of $50 million; to the Committee on Armed Services.

EC-787. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Army's proposed letter of offer to Pakistan for defense articles estimated to cost in excess of $50 million; to the Committee on Armed Services.

EC-788. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Federal Aviation Act of 1958 to advance the scheduled termination date of the Essential Air Service Program, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC-789. A communication from the Assistant Attorney General (Land and Natural Resources Division, transmitting, pursuant to law, the Attorney General's determination of legal responsibility of former owners and operators of the uranium processing site at Canonsburg, Pennsylvania; to the Committee on Energy and Natural Resources.

EC-790. A communication from the Administrator of the Environmental Protection Agency, transmitting a draft of proposed legislation to review and extend certain provisions of the Federal Water Pollution Control Act, as amended for five years, and for other purposes; to the Committee on Environment and Public Works.

EC-791. A communication from the Acting Assistant Secretary of State (Legislative and Intergovernmental Affairs), transmitting a draft of proposed legislation to amend and extend the Hostage Relief Act of 1980, and for other purposes; to the Committee on Finance.

EC-792. A communication from the Director of the United States Information Agency, transmitting a draft of proposed legislation entitled the "United States Information Agency Authorization Act, Fiscal Years 1986 and 1987"; to the Committee on Foreign Relations.

EC-793. A communication from the Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the sixty day period prior to March 21, 1985; to the Committee on Foreign Relations.

EC-794. A communication from the Chairman of the National Transportation Safety Board, transmitting, pursuant to law, a report on the evaluation of its system of internal accounting controls; to the Committee on Governmental Affairs.

EC-795. A communication from the Deputy Assistant Secretary of Defense (Administration), transmitting, pursuant to law, a notice for a computer matching program; to the Committee on Governmental Affairs.

EC-796. A communication from the District of Columbia Auditor, transmitting, pursuant to law, a revised copy of a report entitled "Escheated Estates Fund Review"; to the Committee on Governmental Affairs.

EC-797. A communication from the Acting Assistant Attorney General (Legislative and Intergovernmental Affairs), transmitting a draft of proposed legislation to provide for the recovery by the United States of the costs of hospital and medical care and treatment furnished by the United States in certain circumstances, and for other purposes; to the Committee on the Judiciary.

EC-798. A communication from the Chairman of the National Transportation Safety Board, transmitting, pursuant to law, the annual report of the Board under the Freedom of Information Act for calendar year 1984; to the Committee on the Judiciary.

EC-799. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the examination of the Senate Building Beauty Shop Financial Statements for fiscal years 1983 and 1984; to the Committee on Rules and Administration.

EC-800. A communication from the Administrator of the Environmental Protection Agency, transmitting a draft of proposed legislation to amend and extend the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for two years; to the

Committee on Agriculture, Nutrition, and Forestry.

EC-801. A communication from the Acting Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Navy's proposed letter of offer to Pakistan for defense articles estimated to cost in excess of $50 million; to the Committee on Armed Services.

EC-802. A communication from the Secretary of the Interstate Commerce Commission, transmitting, pursuant to law, an extension of time for rendering a decision in Pittsburg and Lake Erie Railroad Co. v. Consolidated Rail Corporation; to the Committee on Commerce, Science, and Transportation.

EC-803. A communication from the Secretary of Commerce, transmitting a draft of proposed legislation to abolish the United States Travel and Tourism Administration, to repeal the International Travel Act of 1961, as amended, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC-804. A communication from the State Cochairman and the Federal Cochairman of the Alaska Land Use Council, transmitting, pursuant to law, the report of the Council on the Kantishna Hills/Dunkle Mine Study in the Denali National Park and Preserve, Alaska; to the Committee on Energy and Natural Resources.

EC-805. A communication from the Administrator of the Environmental Protection Agency, transmitting a draft of proposed legislation to extend certain provisions of the Safe Drinking Water Act, as amended, for two years; to the Committee on Environment and Public Works.

EC-806. A communication from the Administrator of the Environmental Protection Agency, transmitting a draft of proposed legislation to amend and extend Title I of the Marine Protection, Research, and Sanctuaries Act, as amended, for two years; to the Committee on Environment and Public Works.

EC-807. A communication from the Administrator of the Environmental Protection Agency, transmitting a draft of proposed legislation to amend and extend the Clean Air Act, as amended, for two years; to the Committee on Environment and Public Works.

EC-808. A communication from the Administrator of the Environmental Protection Agency, transmitting a draft of proposed legislation to amend and extend the Toxic Substances Control Act, as amended, for two years; to the Committee on Environment and Public Works.

EC-809. A communication from the Administrator of the Environmental Protection Agency, transmitting a draft of proposed legislation entitled the "Environmental Research, Development, and Demonstration Authorization Act of 1985"; to the Committee on Environment and Public Works.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. Res. 30. A resolution to authorize the printing, for Committee use, of the report entitled "Developments in Aging: 1984" (Rept. No. 99-24).

By Mr. WEICKER, from the Committee on Small Business:

Special Report on Legislative and Oversight Activities During The 98th Congress by the Committee on Small Business (Rept. No. 99-25).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. Res. 117. An original resolution to pay a gratuity to Maureen S. McRoy.

S. Res. 118. An original resolution to pay a gratuity to Victor Natali; Lena Bardelli; Mafalda Revetta; Americo Natali; Edith Serra; Elmo Natali; Elsie DelMastro.

S. Res. 119. An original resolution to pay a gratuity to Ray K. Larkin.

S. Res. 120. An original resolution to pay a gratuity to Andre Whitney.

S. Res. 121. An original resolution to pay a gratuity to Bonita B. Bass.

S. Res. 122. An original resolution to pay a gratuity to Aguilla H. Poss.

S. Res. 123. An original resolution to pay a gratuity to Alene J. Ayers.

S. Res. 124. An original resolution to pay a gratuity to Albert C. Johnson; Earl M. Johnson; Stephen Leslie Johnson; Christy Johnson Maguschak; Paula Johnson Maguschak.

S. Res. 125. An original resolution authorizing expenditures by the Committee on Rules and Administration.

S. Res. 126. An original resolution providing for members on the part of the Senate of the Joint Committee on Printing and the Joint Committee of Congress on the Library.

By Mr. ANDREWS, from the Select Committee on Indian Affairs, without amendment:

S. Res. 127. An original resolution authorizing expenditures by the Select Committee on Indian Affairs for inquiries and investigations.

By Mr. THURMOND, from the Committee on the Judiciary, without amendment and with a preamble:

S.J. Res. 47. A joint resolution designating the week beginning November 10, 1985, as "National Women Veterans Recognition Week."

S.J. Res. 52. A joint resolution to designate the month of April 1985 as "National School Library Month."

S.J. Res. 63. A joint resolution to designate the week of April 21, 1985, through April 27, 1985, as "National DES Awareness Week."

S.J. Res. 67. A joint resolution to designate the week of October 6, 1985, through October 12, 1985, as "Mental Illness Awareness Week."

S.J. Res. 90. A joint resolution commemorating the 75th Anniversary of the Boy Scouts of America.

S.J. Res. 94. A joint resolution to designate the week beginning May 12, 1985, as "National Digestive Disease Awareness Week."

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources:

Rosemary M. Collyer, of Colorado, to be General Counsel of the National Labor Relations Board for a term of 4 years.

Donna M. Alvarado, of Virginia, to be Director of the ACTION Agency.

Donald Ian Macdonald, of Florida, to be Administrator of the Alcohol, Drug Abuse, and Mental Health Administration.

(The above nominations were reported from the Committee on Labor and Human Resources with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. THURMOND, from the Committee on the Judiciary:

Thomas J. Aquilino, Jr., of New York, to be a judge of the U.S. Court of International Trade, vice Frederick Landis, retired.

Frank H. Easterbrook, of Illinois, to be U.S. circuit judge for the seventh circuit, vice a new position created by P.L. 98-353, approved July 10, 1984.

Melvin T. Brunetti, of Nevada, to be U.S. circuit judge for the ninth circuit, vice Herbert Y.C. Choy, retired.

Edith H. Jones, of Texas, to be U.S. circuit judge for the fifth circuit, vice a new position created by P.L. 98-353, approved July 10, 1984.

Carol Los Mansmann, of Pennsylvania, to be U.S. circuit judge for the third circuit, vice a new position created by P.L. 98-353, approved July 10, 1984.

Walter K. Stapleton, of Delaware, to be U.S. circuit judge for the third circuit, vice a new position created by P.L. 98-353, approved July 10, 1984.

James F. Holderman, Jr., of Illinois, to be U.S. district judge for the northern district of Illinois, vice a new position created by P.L. 98-353, approved July 10, 1984.

R. Allan Edgar, of Tennessee, to be U.S. district judge for the eastern district of Tennessee, vice H. Ted Milburn, elevated.

Howell Cobb, of Texas, to be U.S. district judge for the eastern district of Texas, vice a new position created by P.L. 98-353, approved July 10, 1984.

George La Plata, of Michigan, to be U.S. district judge for the eastern district of Michigan, vice a new position created by P.L. 98-353, approved July 10, 1984.

Ronald E. Meredith, of Kentucky, to be U.S. district judge for the western district of Kentucky, vice a new position created by P.L. 98-353, approved July 10, 1984.

Alice M. Batchelder, of Ohio, to be U.S. district judge for the northern district of Ohio, vice a new position created by P.L. 98-353, approved July 10, 1984.

Herman J. Weber, of Ohio, to be U.S. district judge for the southern district of Ohio, vice a new position created by P.L. 98-353, approved July 10, 1984.

J. Thomas Greene, of Utah, to be U.S. district judge for the district of Utah vice a new position created by P.L. 98-353, approved July 10, 1984.

Carolyn R. Dimmick, of Washington, to be U.S. district judge for the western district of Washington vice a new position created by P.L. 98-353, approved July 10, 1984.

Mark L. Wolf, of Massachusetts, to be U.S. district judge for the district of Massachusetts, vice a new position created by P.L. 98-353, approved July 10, 1984.

William G. Young, of Massachusetts, to be U.S. district judge for the district of Massachusetts, vice a new position created by P.L. 98-353, approved July 10, 1984.

Ann C. Williams, of Illinois, to be U.S. district judge for the northern district of Illinois, vice a new position created by P.L. 98-353, approved July 10, 1984.

Charles C. Lovell, of Montana, to be U.S. district judge for the district of Montana vice a new position created by P.L. 98-353, approved July 10, 1984.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. WILSON:

S. 842. A bill for the relief of Fatima Benitez; to the Committee on the Judiciary.

By Mr. COCHRAN:

S. 843. A bill to amend the Agricultural Act of 1949 to provide support for the 1986 through 1989 crops of certain agricultural commodities, to promote the export of United States agricultural commodities, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. PROXMIRE (for himself and Mr. GARN) (by request):

S. 844. A bill to amend the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. CHILES:

S. 845. A bill to amend title 38, United States Code, to authorize the Veterans' Administration to furnish each veteran with a compensable service-connected disability, such drugs and medicines as may be prescribed by any licensed physician for treatment of the service-connected disability; to the Committee on Veterans Affairs.

S. 846. A bill to amend title 38, United States Code, to require the Administrator of the Veterans' Administration to consider the number of veterans residing in each state and projected changes in the number of veterans residing in each state in acquiring and operating medical facilities, and for other purposes; to the Committee on Veterans Affairs.

By Mr. ROCKEFELLER (for himself, Mr. BYRD, Mr. SARBANES, Mr. HEINZ, Mr. STENNIS, Mr. FORD, Mr. SASSER, Mr. HEFLIN, Mr. MOYNIHAN, Mr. METZENBAUM, Mr. GLENN, Mr. PRYOR, Mr. SPECTER, Mr. GORE, Mr. BUMPERS, and Mr. HOLLINGS):

S. 847. A bill to extend the Appalachian Regional Development Act of 1965 and to provide authorizations for the Appalachian Highway and Appalachian Area Development Programs; to the Committee on Environment and Public Works.

By Mr. COHEN:

S. 848. A bill to provide for orderly trade in nonrubber footwear, to reduce unemployment, and for other purposes; to the Committee on Finance.

By Mr. HART (for himself and Mr. KERRY):

S. 849. A bill to establish a National Infrastructure Fund to provide funds for interest-free loans to State and local governments for construction and improvement of highways, bridges, water supply and distribution systems, mass transportation facilities and equipment, and wastewater treatment facilities, and for other purposes; to the Committee on Environment and Public Works.

By Mr. THURMOND (for himself, Mr. GRASSLEY, and Mr. LAXALT):

S. 850. A bill to create a Federal criminal offense for operating or directing the operation of a common carrier while intoxicated or under the influence of drugs; to the Committee on the Judiciary.

By Mr. HEINZ:

S. 851. A bill to suspend the tariff on 1,5 naphthalene diisocyanate; to the Committee on Finance.

By Mr. HEINZ:

S. 852. A bill to make permanent the existing temporary duty-free treatment for certain wools not finer than 46s; to the Committee on Finance.

By Mr. PRYOR (for himself and Mr. BUMPERS):

S. 853. A bill to amend the Trade Act of 1974 to allow watches to be designated as eligible articles for purposes of the generalized system of preferences; to the Committee on Finance.

By Mr. BUMPERS (for himself and Mr. PRYOR):

S. 854. A bill to amend the Tariff Schedules of the United States by eliminating the special marking requirements for imported watches and clocks and components thereof; to the Committee on Finance.

By Mr. PRYOR (for himself and Mr. GRASSLEY):

S. 855. A bill for the relief of rural mail carriers; to the Committee on Finance.

By Mr. HATCH (for himself, Mr. DENTON, Mr. HUMPHREY, and Mr. SIMON):

S. 856. A bill to amend the Internal Revenue Code of 1954 to allow the deduction for certain expenses paid or incurred by an individual in connection with the adoption of a child; to the Committee on Finance.

By Mr. DANFORTH (by request):

S. 857. A bill to amend the Federal Railroad Safety Act of 1970; to the Committee on Commerce, Science, and Transportation.

By Mr. GORTON:

S. 858. A bill to amend section 119 of the Housing and Community Development Act of 1974 to modify the selection criteria for urban development action grants; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. THURMOND:

S. 859. A bill to suspend temporarily the duty on dicyclohexylbenzothiazylsulfenamide; to the Committee on Finance.

By Mr. METZENBAUM:

S. 860. A bill to amend the Securities Exchange Act of 1934; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. WALLOP (for himself, Mr. BENTSEN, Mr. DANFORTH, Mr. DURENBERGER, Mr. GRASSLEY, Mr. PRYOR, Mr. ROTH, and Mr. SYMMS):

S. 861. A bill to amend the Internal Revenue Code of 1954 to treat deductions for research and experimental expenses attributable to activities conducted in the United States as allocable to income from sources within the United States; to the Committee on Finance.

By Mr. DANFORTH (for himself, Mr. PACKWOOD, Mr. GORTON, and Mr. LAUTENBERG):

S. 862. A bill to provide for enhanced motor vehicle safety, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. DANFORTH (for himself, Mr. PACKWOOD, Mr. GORTON, and Mr. LAUTENBERG):

S. 863. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 and the Motor Vehicle Information and Cost Savings Act to authorize appropriations for fiscal years 1986 and 1987, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. DANFORTH (for himself, Mr. MOYNIHAN, Mr. GORTON, and Mr. LAUTENBERG):

S. 864. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 to provide for more effective motor vehicle safety regulations, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. MATHIAS (for himself and Mr. WARNER):

S. 865. A bill to award special congressional gold medals to Jan Scruggs, Robert Doubek, and Jack Wheeler; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. MATHIAS (for himself and Mr. THURMOND) (by request):

S. 866. A bill to authorize appropriations for the Patent and Trademark Office in the Department of Commerce; to the Committee on the Judiciary.

By Mr. ROTH (for himself and Mr. BENTSEN):

S. 867. A bill to amend title XIX of the Social Security Act to provide coverage for hospice care under the medicaid program; to the Committee on Finance.

By Mr. GRAMM:

S. 868. A bill to define allowable cost reimbursement under contracts of the Department of Defense; to control the cost of spare parts acquisition under Department of Defense contracts; to authorize greater financial and criminal penalties for false claims; to make inapplicable to the Department of Defense certain provisions of law that limit the ability of the Department of Defense to purchase labor competitively; to remove restrictions on the authority of the Secretary of Defense to contract out; and to authorize expedited procedures for closing or realigning military installations when the national budget provides for deficit financing of Federal Government operations; to the Committee on Armed Services.

By Mr. MITCHELL (for himself, Mr. BENTSEN, and Mr. BUMPERS):

S. 869. A bill to provide that the pensions received by retired judges who are assigned to active duty shall not be treated as wages for purposes of the Social Security Act; to the Committee on Finance.

By Mr. MITCHELL:

S. 870. A bill to provide for Federal recognition of comprehensive State plans to promote the wise use and management of outstanding river resources; to the Committee on Energy and Natural Resources.

By Mr. SPECTER:

S. 871. A bill to prohibit trade with Libya; to the Committee on Finance.

By Mr. BOSCHWITZ:

S. 872. A bill to entitled the "Women's Small Business Ownership Act of 1985"; to the Committee on Small Business.

By Mr. CHAFEE (for himself, Mr. STAFFORD, and Mr. INOUYE):

S. 873. A bill to amend title XIX of the Social Security Act to assist severely disabled individuals to attain or maintain their maximum potential for independence and capacity to participate in community and family life; to the Committee on Finance.

By Mr. CHAFEE:

S. 874. A bill to amend the Internal Revenue Code of 1954 by increasing the Federal excise tax on cigarettes by 16 cents per pack to a permanent 32 cents per pack and by providing that revenues from the additional tax be deposited in the Federal Hospital Insurance Trust Fund under the Social Security Act; to the Committee on Finance.

By Mr. DOLE (for Mr. MURKOWSKI):

S. 875. A bill to amend title 38, United States Code, to require the Administrator of Veterans' Affairs to establish and carry out a Vietnam Veterans' Resource Center pilot

program; to the Committee on Veterans Affairs.

By Mr. DOLE (for Mr. MURKOWSKI):

S. 876. A bill to amend title 38, United States Code, to establish, extend, and improve certain Veterans' Administration health care programs; to the Committee on Veterans Affairs.

By Mr. BOSCHWITZ (for himself and Mr. ZORINSKY):

S. 877. A bill to amend the Internal Revenue Code of 1954 to allow individuals to compute the deduction for retirement savings on the basis of the compensation of their spouses and to treat alimony as compensation for purposes of such deduction; to the Committee on Finance.

By Mr. LEAHY (for himself, Mr. STAFFORD, Mr. ZORINSKY, Mrs. HAWKINS, Mr. HART, Mr. BAUCUS, Mr. KENNEDY, Mr. MOYNIHAN, Mr. HARKIN, and Mr. INOUYE):

S. 878. A bill to direct the Secretary of Agriculture to take certain actions to improve the productivity of American farmers, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. PROXMIRE (for himself, Mr. MATHIAS, Mr. BUMPERS, and Mr. CHAFEE):

S. 879. A bill to authorize funds for research, development, test, and evaluation in connection with Strategic Defense Initiative programs and advanced strategic missile systems for fiscal year 1986, and for other purposes; to the Committee on Armed Services.

By Mr. DOLE (for Mr. HUMPHREY):

S. 880. A bill to sunset the Economic Development Administration, to repeal the Public Works and Economic Development Act of 1965, and for other purposes; to the Committee on Environment and Public Works.

By Mr. KENNEDY (for himself, Mr. WEICKER, Mr. DODD, Mr. PELL, Mr. CRANSTON, Mr. STAFFORD, Mr. PACKWOOD, Mr. CHAFEE, Mr. METZENBAUM, Mr. KERRY, Mr. SIMON, and Mr. COHEN):

S. 881. A bill to extend title X of the Public Health Service Act for 3 years; to the Committee on Labor and Human Resources.

By Mr. CRANSTON (for himself, Mr. MATHIAS, Mr. PELL, Mrs. KASSEBAUM, and Mr. DODD):

S. 882. A bill to amend the Peace Corps Act to establish a Peace Corps National Advisory Council, to establish a policy of providing opportunities for a volunteer corps of at least 10,000, and to provide for nonpartisan appointments; to the Committee on Foreign Relations.

By Mr. HEINZ:

S. 883. A bill to extend the Export Administration Act of 1979; considered and passed.

By Mr. INOUYE:

S. 884. A bill to amend the Agricultural Act of 1949 to provide price support for the 1986 through 1989 crops of sugar beets and sugarcane; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. KERRY (for himself, Mr. CHAFEE, Mr. MATHIAS, and Mr. HART):

S. 885. A bill to establish a moratorium during the fiscal years 1985 and 1986 on the testing of anti-satellite weapons against objects in space; to the Committee on Armed Services.

By Mr. ZORINSKY (for himself, Mr. DOLE, Mr. THURMOND, Mr. HATCH, Mr. PRESSLER, Mr. SYMMS, Mr. TRIBLE, Mr. GLENN, Mr. NUNN, Mr. GOLDWATER, Mr. HOLLINGS, Mr. GARN, Mr. GORE, Mr. BAUCUS, Mr. STENNIS, Mr. MELCHER, Mr. EAST, Mr. WARNER, Mr. GRAMM, and Mr. STEVENS):

S.J. Res. 102. Joint resolution to establish a National Commission on Illiteracy; to the Committee on Labor and Human Resources.

By Mr. PELL (for himself, Mr. STAFFORD, Mr. STENNIS, Mr. NUNN, Mr. BUMPERS, Mr. CHAFEE, Mr. KENNEDY, Mr. KERRY, Mr. COCHRAN, Mr. MATSUNAGA, Mr. METZENBAUM, Mr. HOLLINGS, Mr. DOLE, Mr. EAST, Mr. ABDNOR, Mr. STEVENS, Mr. KASTEN, Mr. LAUTENBERG, Mr. HEINZ, and Mr. ZORINSKY):

S.J. Res. 103. Joint resolution to designate the month of May 1985, as "Very Special Arts U.S.A. Month"; to the Committee on the Judiciary.

By Mr. DENTON (for himself, Mr. LEAHY, Mr. THURMOND, Mr. ANDREWS, Mr. BIDEN, Mr. BOSCHWITZ, Mr. BURDICK, Mr. CRANSTON, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DOLE, Mr. DIXON, Mr. EAST, Mr. GRAMM, Mr. GRASSLEY, Mr. HATCH, Mrs. HAWKINS, Mr. HECHT, Mr. HEFLIN, Mr. HELMS, Mr. HOLLINGS, Mr. HUMPHREY, Mr. JOHNSTON, Mr. KENNEDY, Mr. LAUTENBERG, Mr. LAXALT, Mr. MCCONNELL, Mr. METZENBAUM, Mr. MURKOWSKI, Mr. NUNN, Mr. QUAYLE, Mr. RIEGLE, Mr. SARBANES, Mr. SASSER, Mr. SPECTER, and Mr. SYMMS):

S.J. Res. 104. Joint resolution to proclaim October 23, 1985, as "A time of remembrance" for all victims of terrorism throughout the world; to the Committee on the Judiciary.

By Mr. DOLE (for Mr. HATFIELD):

S.J. Res. 105. Joint resolution to designate July 23, 1985, as "Ulysses S. Grant Day"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MATHIAS, from the Committee on Rules and Administration:

S. Res. 117. An original resolution to pay a gratuity to Maureen S. McRoy; placed on the calendar.

S. Res. 118. An original resolution to pay a gratuity to Victor Natali; Lena Bardelli; Mafalda Revetta; Americo Natali; Edith Serra; Elmo Natali; Elsie DelMastro; placed on the calendar.

S. Res. 119. An original resolution to pay a gratuity to Ray K. Larkin; placed on the calendar.

S. Res. 120. An original resolution to pay a gratuity to Andre Whitney; placed on the calendar.

S. Res. 121. An original resolution to pay a gratuity to Bonita B. Bass; placed on the calendar.

S. Res. 122. An original resolution to pay a gratuity to Aquilla H. Ross; placed on the calendar.

S. Res. 123. An original resolution to pay a gratuity to Alene J. Ayers; placed on the calendar.

S. Res. 124. An original resolution to pay a gratuity to Albert C. Johnson; Earl M. Johnson; Stephen Leslie Johnson; Christy Johnson Maguschak; Paula Johnson Maguschak; placed on the calendar.

S. Res. 125. An original resolution authorizing expenditures by the Committee on Rules and Administration; placed on the calendar.

S. Res. 126. An original resolution providing for members on the part of the Senate of the Joint Committee on Printing and the Joint Committee of Congress on the Library; place on the calendar.

By Mr. ANDREWS from the Select Committee on Indian Affairs:

S. Res. 127. An original resolution authorizing expenditures by the Select Committee on Indian Affairs for inquiries and investigations; to the Committee on Rules and Administration.

By Mr. DOLE (for himself and Mr. BYRD):

S. Res. 128. Resolution to authorize production of documents by the Senate Permanent Subcommittee on Investigations; considered and agreed to.

By Mr. DOLE:

S. Res. 129. Resolution relating to printing of the compilation entitled "Majority and Minority Leaders of the Senate" as a Senate document; considered and agreed to.

By Mr. WALLOP:

S. Res. 130. Resolution relative to the Sport Fish Restoration Trust Fund; to the Committee on Finance.

By Mr. DOLE:

S. Con. Res. 38. Concurrent resolution providing for an adjournment of the Senate and the House of Representatives from Wednesday, April 3, or Thursday, April 4, 1985, until Monday, April 15, 1985; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. COCHRAN:

S. 843. A bill to amend the Agricultural Act of 1949 to provide price support for the 1986 through 1989 crops of certain agricultural commodities, to promote the export of U.S. agricultural commodities, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

(The remarks of Mr. COCHRAN and the text of the bill appear earlier in today's RECORD.)

By Mr. PROXMIRE (for himself and Mr. GARN) (by request):

S. 844, A bill to amend the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Housing, and Urban Affairs.

(The remarks of Mr. PROXMIRE and the text of the legislation appears earlier in today's RECORD.)

By Mr. CHILES:

S. 845. A bill to amend title 38, United States Code, to authorize the Veterans' Administration to furnish each veteran with a compensable service-connected disability, such drugs and medicines as may be prescribed by any licensed physician for treatment of the service-connected disability; to the Committee on Veterans' Affairs.

VA PRESCRIPTION DRUGS

Mr. CHILES. Mr. President, today I am introducing legislation to address a problem that surfaced several years ago concerning the Veterans' Administration authority to provide medica-

tion to service-connected veterans who have medicines prescribed by private physicians. This bill is identical to S. 1833, which I first introduced in the 98th Congress.

Up until 1983 service-connected disabled veterans who sought medical attention for their disabilities from private physicians could receive medications and have prescriptions filled by the Veterans' Administraton. A legal opinion supplied to the Chief Medical Director of the Veterans' Administration questioned the statutory authority for this procedure and promoted the subsequent decision by the Veterans' Administration to stop providing medication to service-connected disabled veterans not being treated in VA facilities or on a fee card basis. Veterans now have to receive medical care at a Veterans' Administration facility in order to receive medications from the VA.

The VA has estimated that this decision would result in savings of $4.8 million in prescription supplies and $1.5 million in administrative costs. However, the estimate of the savings does not reflect the offsetting cost of veterans who, being denied VA-pharmacy service for the prescriptions written by their private physicians, would switch to VA physicians for both treatment and prescription renewal. Other veterans could seek to have the VA reimburse their physicians under contract. Since the average cost of a staff outpatient visit is nearly 10 times the average cost of filling a prescription, few veterans would have to switch from private to VA physicans to completely offset any savings from the VA decision not to fill prescriptions written by non-VA physicians for the treatment of veterans' service-connected disabilities.

The legislation I am introducing today would reverse this decision and would authorize the VA to return to the previous policy of furnishing medication prescribed by private physicians for treatment of a veteran's service-connected disabilities. Last year the House of Representatives took positive action on this proposal which was a provision of H.R. 5618, the Veterans' Health Care and Facilities Improvement Act of 1985. Unfortunately, the provision was later dropped during deliberations with the Senate. I am hopeful that during this Congress we will finally resolve this issue and allow for the reinstitution of policy to provide medications to eligible service-connected veterans.●

By Mr. CHILES:

S. 846. A bill to amend title 38, United States Code, to require the Administrator of the Veterans' Administration to consider the number of veterans residing in each State and projected changes in the number of veterans residing in each State in acquiring and operating medical facilities, and for other purposes; to the Committee on Veterans' Affairs.

VETERANS MEDICAL CARE RESOURCE ALLOCATION ACT

● Mr. CHILES. Mr. President, today I am introducing legislation to provide for a more fair and reasonable distribution of the Federal dollars Congress appropriates each year for VA medical care facilities and services. In this era of budget cutting and belt tightening we cannot realistically expect huge increases in VA medical care funding. In this period of fiscal restraint, it becomes increasingly important to efficiently target VA health care funds so the money goes where the needs exist. In order to make sure health care dollars can go to where the eligible veterans are, we must make sure the VA health care dollars are distributed in a way that reflects the changing veteran population.

This legislation I am introducing today seeks to achieve this goal by requiring the VA Administrator to collect certain veteran demographic information each year and to recommend the apportionment of VA medical care funds on the basis of this information.

What we have seen in past years is a tremendous redistribution of the veteran population. I know my State has witnessed an incredible influx of veterans. Florida's veteran population now exceeds 1.3 million and is expected to reach 2 million by 1990. Florida has the fastest growing veteran population in the Nation. The State welcomes these veterans, but you can easily see how this ballooning veteran population strains our medical facilities when you realize that approximately one out of every five veterans seeks some kind of medical attention from the VA. Florida's VA medical facilities have just about reached the breaking point. It is clear that VA medical dollars have not increased through the decade in proportion to the population growth and health care demands of the eligible veteran community.

I am introducing the Veterans Medical Care Resource Allocation Act of 1985 to put in place a system that makes sure when an area experiences a boom in their veteran population, the money allocated to that area will reflect that change in population.

This legislation requires the VA to compile demographic information and requires the VA Administrator to look at this information and to operate and establish VA medical facilities on the basis of this information. The areas where the large veteran population live will start getting funds and facilities to meet the needs of those veterans living there. This kind of system, which cannot be run without the decisionmakers having current data on veterans, is simply the fairest and most reasonable way to go about providing for the health care needs of this country's veterans. This bill has three basic components:

CURRENT VETERANS DEMOGRAPHIC INFORMATION

The first part of the bill requires an annual review of veteran population data. This data would include an accounting of the present number of veterans residing in each State, as well as data on the past and projected changes in the veteran population figures. All of this information is needed to determine where exactly America's veterans are living.

MEDICAL CARE SERVICES ADEQUACY REPORT

The bill next requires an analysis of the adequacy of existing medical care services. This entails a study of admission policies throughout the medical care system. The bill would require a review of records of eligible veterans who apply for hospital care or outpatient care or nursing home care, but are turned down. Right now we have current information on the number of veterans that each facility serves. But we do not have any information that would tell us how many more veterans these facilities could service if the veterans could be accommodated. All of this information that is required in this part of the bill will give the VA Administrator a true picture of veterans health care demands.

VA ADMINISTRATOR'S REPORT TO CONGRESS

Based on the review of information that this bill necessitates, the Administrator must send to Congress an annual report detailing the veteran population data and recommending apportionment of appropriated funds. This recommendation would, of course, take into account the veteran population distribution.

This bill is designed to take a step toward reforming the VA system of allocating VA health care dollars. If we document where the veterans live and what health care needs they have, and then we require the VA Administrator to apportion funds based on all of that information, then I think we are moving closer toward making the VA health care system more responsive to the needs of veterans. I hope we will see favorable action on this proposal in the Senate.●

By Mr. ROCKEFELLER (for himself, Mr. BYRD, Mr. SARBANES, Mr. HEINZ, Mr. STENNIS, Mr. FORD, Mr. SASSER, Mr. HEFLIN, Mr. MOYNIHAN, Mr. METZENBAUM, Mr. GLENN, Mr. PRYOR, Mr. SPECTER, and Mr. GORE):

S. 847. A bill to extend the Appalachian Regional Development Act of 1965 and to provide authorizations for the Appalachian Highway and Appalachian Area Development Programs; to the Committee on Environment and Public Works.

(The remarks of Mr. ROCKEFELLER and the text of the legislation appear earlier in today's RECORD.)

By Mr. COHEN:

S. 848. A bill to provide for orderly trade in nonrubber footwear, to reduce unemployment, and for other purposes; to the Committee on Finance.

(The remarks of Mr. COHEN and the text of the legislation appear earlier in today's RECORD.)

By Mr. HART (for himself and Mr. KERRY):

S. 849. A bill to establish a National Infrastructure Fund to provide funds for interest-free loans to State and local governments for construction and improvement of highways, bridges, water supply and distribution systems, mass transportation facilities and equipment, and wastewater treatment facilities, and for other purposes; to the Committee on Environment and Public Works.

NATIONAL INFRASTRUCTURE ACT

Mr. HART. Mr. President, we are living in an era of unrelenting economic change. The composition of the American work force is changing. The American workplace is changing. The American economy is facing new and dramatic transformations which are forcing us to reexamine our export policies, our methods of compensating, training and retraining workers, and the education of our youth. This postindustrial transition cannot be ignored, or delayed through legislation.

The great challenge we face involves the marshaling of our resources—the creativity of our people, the ingenuity of the private sector, and the activity of Government—to anticipate change and become its master. A future that depends on what is done between now and then is subject to control. We can manage the postindustrial transition through which our economy is going, and create an enduring era of sustained growth.

To a large extent, we already know what must be done. Our students need the math and science skills to master the complexities of this technologically advanced economy. We need to invest in new plants and equipment and a retooled work force. We must renegotiate existing trade agreements to eliminate barriers faced by American goods in foreign markets. And we must undertake prompt and effective changes in our fiscal and monetary policies to reduce interest rates and the value of the dollar.

But it will ultimately avail us little to make investments—in human potential, in industrial productivity, and international competitiveness—if the very foundation of our economy is incapable of sustaining growth. Our public highways, roads, bridges, transit and water systems are the foundation of this Nation's commercial and industrial activity. Yet, our economic life support system is in disturbing and dangerous condition.

Throughout the country, water from underground acquifers is being consumed faster than nature can replenish it. A large percentage of our highways need immediate improvements. Bridges have become structurally unsafe or functionally obsolete. Years of declining investment in these basic, economic life support systems, the infrastructure, have undermined our Nation's productivity and commercial capacity. As the Congressional Budget Office reported, "The Nation's public works infrastructure * * * is suffering from growing problems of deterioration, technological obsolescence, and insufficient capacity to serve future growth."

The fact is that between 1971 and 1981, spending by all levels of government on highways, bridges, mass transit, water and sewer systems, as a percentage of GNP, dropped by half—from 1.5 percent of GNP to 0.78 percent. In the absence of a coordinated strategy, the investments we need to repair and rebuild these vital capital assets will not be made. The longer we wait, the more our inevitable repair bills will grow, and the more economic development will be constrained. Without a doubt, the repair bill for the restoration of our infrastructure will be substantial. But it is equally clear that the cost of inaction will be even greater.

The Joint Economic Committee recently developed a series of recommendations for addressing this national crisis, which included an infrastructure revitalization proposal. I am introducing in the Senate today "The National Infrastructure Act." A companion measure, embodying the Joint Economic Committee's recommendations, has been sponsored in the House by the chairman of the Public Works Committee, Representative JAMES HOWARD. Congressman LEE HAMILTON, a member of JEC, and members of Congressman HOWARD's committee, have cosponsored his legislation. I am joining their efforts in making a major effort for enactment of infrastructure legislation this year.

Our bill establishes a National Infrastructure Fund to be financed at a rate of $3 billion annually for 10 years. The fund would make 20-year, interest-free loans available to the States. States would, in turn, establish infrastructure banks or revolving funds to finance construction and repair. The State contribution would be funded through taxes and/or user fees. Through this mechanism, the $30 billion in loans will leverage $76 billion in new infrastructure spending over the 30-year life of the program. While States would be free to develop their own priorities, the legislation makes clear that this money is to be spent on new projects only, and should not be substituted for infrastructure investments to which the States are already committed.

This proposal will raise only a fraction, about one-sixth, of the $450 billion shortfall in infrastructure spending that will occur between now and the year 2000. Consequently, all levels of government, once this legislation is enacted, will have to make complementary commitments for additional infrastructure investments.

But, as the Joint Economic Committee reported: "The Nation which built the greatest network of roads and waterworks in the world has not suddenly become incapable of maintaining and improving such a system." What we need now is the patience and political will to make a dedicated effort to repair our public infrastructure.

Without a vital and efficient infrastructure system, the aspirations we have for achieving economic prosperity and growth will remain unfulfilled. If we want to secure our economic future, we will have to make substantial investments today in the capital assets on which we all depend. It is my hope that all of our colleagues, Mr. President, from both sides of the aisle, will give this legislation their enthusiastic support.

I ask unanimous consent that a factsheet describing the legislation, a table showing the funding distribution contemplated by the bill, and a copy of the legislation, be reprinted in the CONGRESSIONAL RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 849

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Infrastructure Act".

SEC. 2. FINDINGS AND POLICY.

(a) FINDINGS.—The Congress finds that—

(1) a gap exists between anticipated revenues of the Nation and infrastructure needs of the Nation which will approach $450,000,000,000 by the year 2000;

(2) annual expenditures, as a percentage of the gross national product, for public capital investment by all levels of government have declined in recent years by more than 50 percent;

(3) all regions of the country face sizable public works infrastructure needs;

(4) delay in repair and construction of the Nation's infrastructure systems increases the costs of such repair and construction; and

(5) a healthy United States economy depends upon a sound infrastructure system.

(b) POLICY.—It is, therefore, the policy of the United States that—

(1) the declining trend in public capital investment should be reversed;

(2) a strategy for wise infrastructure investment must be long-range and sustained;

(3) because of climatic, historic, and economic differences, the States should be

given greater latitude in establishing priorities for and managing infrastructure projects; and

(4) a new and innovative public works infrastructure program should be established to supplement infrastructure investment from existing Federal, State, and local capital programs.

SEC. 3. NATIONAL INFRASTRUCTURE FUND.

(a) ESTABLISHMENT.—There is established in the Treasury of the United States a fund to be known as the "National Infrastructure Fund" (hereinafter in this Act referred to as the "Fund"), consisting of such amounts as may be appropriated to the Fund under this section.

(b) AUTHORIZATIONS FOR APPROPRIATIONS.—There may be appropriated to the Fund (other than the sinking fund account established under subsection (d) of this section) $3,000,000,000 per fiscal year for each fiscal year beginning after September 30, 1985, and ending before October 1, 1995.

(c) AVAILABILITY OF FUND FOR INTEREST-FREE REPAYABLE GRANTS.—Amounts in the Fund (other than the sinking fund account established under subsection (d) of this section) shall be available to the Secretary of the Treasury (hereinafter in this Act referred to as the "Secretary") to make interest-free repayable grants to States under this Act.

(d) SINKING FUND ACCOUNT.—

(1) ESTABLISHMENT.—There is established in the Fund a separate account to be known as the "Sinking Fund Account" (hereinafter in this Act referred to as the "Account"), consisting of such amounts as are deposited in or credited to the Account as provided in this subsection.

(2) DEPOSIT OF GRANT REPAYMENTS IN THE ACCOUNT.—The Secretary shall deposit in the Account any amounts paid to the Secretary by a State under section 4(d) of this Act.

(3) INVESTMENT.—It shall be the duty of the Secretary to invest amounts in the Account. Such investments may be made only in interest-bearing obligations of the United States. For such purpose, such obligations may be acquired (A) on original issue at the issue price, or (B) by purchase of outstanding obligations at the market price. Any obligation acquired by the Account may be sold by the Secretary at the market price. The interest on, and the proceeds from the sale or redemption of, any obligations held in the Account shall be credited to and from a part of the Account.

(4) SEPARATE GRANT RECORDS.—The Secretary shall maintain separate records of funds in the Account with respect to each grant made under this Act.

(5) REPAYMENT OF GRANTS FROM FUNDS IN THE ACCOUNT.—Amounts in the account shall be used exclusively by the Secretary to repay grants made to States under this Act in accordance with section 4(e) of this Act.

(6) DUTIES OF THE SECRETARY; REPORTS TO CONGRESS.—It shall be the duty of the Secretary to hold the Account, and to report to the Congress each fiscal year ending on or after September 30, 1986, and before October 1, 2016, on the financial condition and the results of the operations of the Account during the preceding fiscal year and on its expected condition during the fiscal year and the five succeeding fiscal years. Such report shall be printed as Senate document of the session of the Congress to which the report is made.

SEC. 4. REPAYABLE GRANTS TO QUALIFYING STATES.

(a) AMOUNT OF GRANT.—For each fiscal year beginning after September 30, 1985, and ending before October 1, 1995, each State qualifying for such a grant under section 5 of this Act for such fiscal year shall be entitled to an interest-free repayable grant in an amount equal to the amount bearing the same ratio to $3,000,000,000 as the population of such State bears to the total population of all States qualifying for such grants under such section for such fiscal year.

(b) DATE OF GRANT PAYMENTS.—The Secretary shall pay to each State on October 1 of each fiscal year beginning after September 30, 1985, and ending before October 1, 1995, the amount of the repayable grant to which such State is entitled under subsection (a).

(c) TERMS AND CONDITIONS OF GRANTS.—Grants made under this Act shall be repaid in accordance with the provisions of subsections (d) and (e) of this section and shall be subject to such other terms and conditions as the Secretary determines necessary to ensure compliance with this Act.

(d) GRANT REPAYMENT.—

(1) ANNUAL PAYMENTS.—Any State receiving a grant under this Act shall make annual payments to the Secretary in repayment of such grant over a 20-year period beginning on the last day of the 12-month period beginning on the date such grant is made.

(2) AMOUNT OF ANNUAL PAYMENTS.—The payments shall be in such amounts as the Secretary determines are necessary for the aggregate amount of the payments plus the income derived from the payments under section 3(d)(3) of this Act to equal, at the end of the 20-year period, the amount of such grant.

(3) ADJUSTMENTS TO ANNUAL PAYMENTS.—The Secretary may adjust the amount of any payment determined under paragraph (2) if the Secretary determines that such adjustment is necessary to achieve the objective of such paragraph and if the Secretary notifies the State of such adjusted amount at least 30 days before such payment is due.

(e) FINAL SETTLEMENT OF GRANT REPAYMENT.—

(1) DETERMINATION OF AGGREGATE AMOUNT REPAID.—On the last day of the 21st year beginning after the date any grant is made to a State under this section, the Secretary shall determine whether or not the aggregate amount of payments received from such State in repayment of such grant and deposited in the Account plus the income derived from such payments equals the amount of such grant.

(2) PAYMENT OF EXCESS TO STATES.—If the aggregate amount of such payments plus derived income exceeds the amount of such grant, the Secretary shall pay the State an amount equal to the amount of such excess.

(3) STATE PAYMENT OF DEFICIENCY.—

(A) If such aggregate amount plus derived income is less than the amount of such grant, the Secretary shall request that the State, and the State shall, pay the Secretary an amount equal to such difference.

The Secretary shall deposit the amount of any payment received from any State under this paragraph in the general fund of the Treasury.

(4) REPAYMENT OF GRANTS TO GENERAL FUND OF TREASURY.—On the last day of the 21st year beginning after the date any grant is made to a State under this Act, the Secretary shall transfer to the general fund of the Treasury the aggregate amount of payments in the Account received from such State in repayment of such grant, plus the income derived from such payments, and less any amounts paid to such State with respect to such grant under paragraph (2).

SEC. 5. QUALIFICATION REQUIREMENTS FOR REPAYMENT GRANTS.

Under such regulations as the Secretary may issue, a State shall qualify for a repayable grant under this Act for a fiscal year only if the State enters into such agreements as the Secretary may require to ensure that each of the following requirements are met:

(1) ESTABLISHMENT OF STATE INFRASTRUCTURE FUND.—The State will establish an infrastructure revolving fund in the treasury of the State into which the State will deposit the amount of such grant.

(2) INTEREST-FREE LOANS TO STATE AND LOCAL AGENCIES.—Amounts deposited in the infrastructure revolving fund of the State will be used by the State, within a reasonable period as determined by the Secretary by regulation, to make interest-free loans to departments, agencies, and instrumentalities of the State, to political subdivisions of the State, and to department, agencies, and instrumentalities of one or more political subdivisions of the State.

(3) TERMS AND CONDITIONS APPLICABLE TO LOANS.—Any loan under paragraph (2) will be subject to the following:

(A) COMPLIANCE WITH STATE LAW.—The loan will be made in accordance with laws and procedures of the State applicable to loans of State funds to governmental entities.

(B) REPAYMENT SCHEDULE.—The loan will be repaid in equal annual payments—

(i) beginning on the last day of the 24-month period beginning on the date such loan is made; and

(ii) ending as soon as practicable thereafter, but in no event later than the life of the project for which such loan is made or the end of the 20-year period beginning on the date such loan is made, whichever first occurs.

(C) PROJECTS FOR WHICH LOANS MAY BE MADE.—The loan will only be used for (i) construction and improvement of highways, streets, and bridges, (ii) construction and improvement of water supply and distribution systems, (iii) acquisition, construction, and improvement of mass transportation facilities and equipment, and (iv) acquisition, construction, and improvement of wastewater treatment facilities.

(D) NEEDS TEST.—The loan will only be used for projects which, without such loan, would not be carried out in the 24-month period beginning on the date such loan is made.

(E) PROHIBITION ON USE FOR FEDERALLY ASSISTED PROJECTS.—The loan will not be used to provide the non-Federal share of the cost of any project carried out under any other provision of Federal law.

(F) PROHIBITION ON USE FOR OPERATION AND MAINTENANCE.—The loan will not be used to pay the cost of operation and maintenance of any project.

(G) USER FEES.—To the extent practicable, the loan will be repaid with user fees and dedicated taxes.

(4) LIMITATION ON USE OF STATE REVOLVING FUND.—The State will not use amounts paid to the State in repayment of loans made under paragraph (2) to repay any repayable grant made to the State under this Act and will deposit such amounts in the infrastructure revolving fund of the State.

(5) LOCAL SET-ASIDE.—At least 30 percent of the amount of such grant will be used to make interest-free loans to political subdivisions of the State and departments, agencies, and instrumentalities thereof.

(6) COMPLIANCE WITH GRANT REPAYMENT REQUIREMENTS.—The State will repay such grant in accordance with section 4 of this Act.

(7) ACCOUNTING, AUDIT, AND FISCAL PROCEDURES.—The State will use such accounting, audit, and fiscal procedures as conform to such guidelines as the Secretary shall prescribe after consulting the Comptroller General of the United States.

(8) INSPECTION OF STATE RECORDS.—After reasonable notice, the State will make available to the Secretary and the Comptroller General for inspection such records as the Secretary may require to review compliance with this Act or the Comptroller General may require to review compliance and operations under section 6 of this Act.

(9) COMPLIANCE WITH FEDERAL REQUIREMENTS.—The State will comply with the requirements of sections 6 and 7 of this Act.

SEC. 6. AUDITS, INVESTIGATIONS, AND REVIEWS.

(a) INDEPENDENT AUDITS.—Except as provided in this section, a State which receives a grant under this Act shall have an independent audit made of the financial statements of the State at least annually to determine compliance with this Act. The audit shall be carried out under generally accepted government auditing standards issued by the Comptroller General of the United States.

(b) SUBSTANTIAL COMPLIANCE TEST.—An audit of financial statements of a State carried out under another law of the United States for a fiscal year shall be deemed to be in compliance with subsection (a) for such year when the audit substantially complies with the requirements of subsection (a).

(c) GENERAL WAIVER OF AUDIT REQUIREMENTS.—A State may elect to waive, in writing, application of subsection (a) of this section when—

(1) the financial statements of the State are audited by independent auditors under State law at least annually;

(2) the State certifies that the audit is carried out under generally accepted government auditing standards issued by the Comptroller General of the United States; and

(3) the auditing provisions of the State law are applicable to the fiscal year to which the waiver applies.

(d) LIMITED WAIVER OF AUDIT REQUIREMENTS.—Under such regulations as the Secretary may issue, the Secretary may waive a requirement of subsections (a) and (b) of this section for a State for a fiscal year when the Secretary decides that the financial statements of the State for the year—

(1) cannot be audited and the State shows substantial progress in making the statements auditable; or

(2) have been audited by a department, agency, or instrumentality of the State that does not follow generally accepted government auditing standards issued by the Comptroller General of the United States or that is not independent, and the State department, agency, or instrumentality shows progress in meeting such auditing standards or in becoming independent.

(e) FORM OF AUDIT OPINIONS; PUBLIC INSPECTION.—An opinion on an audit carried out under this section shall be provided to the Secretary in such form and at such times as the Secretary may require by regulation. No later than 30 days following completion of the audit, the audit report shall be made available for public inspection by the State.

(f) REGULATIONS CONCERNING INVESTIGATIONS.—The Secretary shall issue regulations providing reasonable and specific time limits for the Secretary—

(1) to carry out an investigation of a possible violation of this Act; and

(2) to carry out audits and reviews (including investigations of allegations) about possible violations of this Act.

(g) REVIEW BY COMPTROLLER GENERAL.—The Comptroller General of the United States shall carry out reviews of the activities of the Secretary and the States necessary for Congress to evaluate compliance and operations under this Act.

SEC. 7. PUBLIC HEARINGS BY STATES ON PROPOSED INTEREST-FREE LOANS.

(a) MINIMUM OF ONE HEARING.—A State making an interest-free loan under this Act shall hold at least one public hearing on the proposed loan.

(b) PROCEDURES.—At the hearing, persons shall be given an opportunity to provide written and oral reviews to the State and to ask questions about the loan and the relation of the laon to other such loans.

(c) TIME AND LOCATION.—The State shall hold the hearing at a time and place that allows and encourages public attendance and participation.

(d) NOTICE.—The State shall provide adequate notice (including, but not limited to, newspaper notice) of a proposed interest-free loan under this Act.

SEC. 8. REPORTS.

(a) REPORTS OF SECRETARY.—Before June 2 of each year ending before January 1, 1997, the Secretary shall report to Congress on—

(1) the status and operation of the Fund during the prior fiscal year; and

(2) the administration of this Act, including a complete and detailed analysis of—

(A) the way in which amounts of repayable grants made under this Act have been distributed in the States receiving such grants; and

(B) any recommendations for legislation to improve the program authorized by this Act.

(b) STATE REPORTS TO SECRETARY.—At the end of each fiscal year for which repayable grants are made under this Act, each State government receiving such a grant shall submit a report to the Secretary. The report shall be submitted in the form and at a time prescribed by the Secretary and shall be available to the public for inspection. The report shall state—

(1) the purposes for which the amount of the grant has been appropriated, expended, or obligated during the fiscal year and the amounts made available for each such purpose during the fiscal year; and

(2) the differences between the actual and proposed use of any amount of the grant.

SEC. 9. BUDGET TREATMENT.

The amount of repayable grants made to States (budget authority) under this Act shall not be included in the budget of the United States Government and shall be exempt from any general limitation imposed by statute on expenditures and net lending (budget outlays) of the United States.

SEC. 10. POPULATION INFORMATION.

The Secretary shall determine population on the same basis that the Secretary of Commerce determines resident population for general statistical purposes. The Secretary shall request the Secretary of Commerce to adjust the population information provided to the Secretary as soon as practicable to include a reasonable estimate of the number of resident individuals not counted in the 1980 census or revisions of the census. The Secretary shall use the estimates in determining the amounts of repayable grants for the fiscal year beginning after the Secretary receives the estimates. The Secretary shall adjust population information to reflect adjustments made under section 118 of the Act of October 1, 1980 (Public Law 96-369; 94 Stat. 1357).

SEC. 11. DEFINITIONS.

As used in this Act—

(1) the term "construction" means the supervising, inspecting, and actual building and all expenses incidental to the acquisition, construction, reconstruction, or other improvement of any project, including designing, engineering, locating, surveying, mapping, acquisition of rights-of-way, relocation assistance, elimination of hazards, acquisition of replacement housing sites, and acquisition and rehabilitation, relocation, and construction of replacement housing; and

(2) the term "State" means the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands.

NATIONAL INFRASTRUCTURE ACT

Purpose

To establish a National Infrastructure Fund to provide for interest-free repayable grants to State and local governments for specified infrastructure activities.

Funding

$3 billion per year for 10 years to be fully repaid in 30 years;

Off-budget entitlement funding to be repaid by state and local governments;

Not to be used to provide non-Federal share of project cost.

Eligible Activities

Construction and improvement of highways, streets, bridges, water supply and distribution systems;

Acquisition, construction, and improvement of mass transportation facilities and equipment, and waste treatment facilities.

States

Interest-free repayable grant apportioned by population;

Must establish state revolving loan fund;

Repayment to Federal sinking fund beginning in second year.

Locals

At least 30% set-aside within each state for local governments;

Interest-free loans from revolving loan fund;

Repayment to state revolving loan fund beginning in second year.

Repayment

To be determined by Secretary of Treasury based on economic conditions and loan amounts to allow full repayment in 20 years;

Beginning second year for 20 years.

Accountability

State auditing and investigations;

GAO review;

Public hearings;

Annual report to Congress.

Total Projects Funded

Approximately $76 billion over 50 years.

Funding to States Available After All Repayments

Approximately $25 billion at the end of 30 years.

By Mr. THURMOND (for himself and Mr. GRASSLEY):

S. 850. A bill to create a Federal criminal offense for operating or directing the operation of a common carrier while intoxicated or under the influence of drugs; to the Committee on the Judiciary.

CRIMINAL OFFENSE FOR OPERATION OF COMMON CARRIER UNDER THE INFLUENCE OF ALCOHOL OR DRUGS

Mr. THURMOND. Mr. President, today, I am again introducing legislation to penalize on-the-job use of drugs or alcohol by employees who operate, or direct the operation of, trains, airplanes, buses, and ships across this Nation and its waterways.

During the last year, particular attention has been drawn to problems in the railroad industry. News accounts last week by "CBS Morning News" and the Washington Post indicate that two serious train wrecks last spring were due, at least in part, to alcohol or drug use by railroad employees. One accident, a head-on collision in Colorado, killed five crewmembers and caused nearly $4 million in damage. The other, a derailment in Wyoming, occurred only a few days later, killing two crewmembers. Figures released by the Department of Transportation show that at least 47 alcohol- or drug-related train accidents have occurred during the last 9 years. Forty-one people have died. According to Department of Transportation officials, this is only the tip of the iceberg—the problem is far more widespread and serious than statistics reveal.

Currently, there are no Federal criminal laws which specifically address the use of drugs or alcohol by persons while they are operating, or directing the operation of, common carriers. Railroad employees may even refuse to take an alcohol or drug test and not be formally penalized for that decision.

Over the last few years, many States have either amended their motor vehicle laws or enacted new legislation to cover vehicular homicide. In general, it is a criminal offense for a driver to operate a vehicle while intoxicated or under the influence of drugs. This should also be the case for those entrusted with the operation of our common carriers. Under common law, common carriers have always been held to a higher standard of care because of the increased responsibility they bear. In common parlance, it is a crime for intoxicated operation of common carriers to take place, and it is time that our Federal criminal laws treated it as such.

Mr. President, the legislation I propose would amend title 18 of the United States Code by adding a new chapter 17A. It would create a Federal offense relating to operating, or directing the operation of, a common carrier, such as passenger and freight trains, airplanes, buses, and ships, while intoxicated or under the influence of drugs. The penalty would be a fine of up to $10,000, or imprisonment for up to 5 years, or both.

I introduced a similar measure, S. 3020, late in the last Congress, but, because of time limitations, no action was taken. It is my hope that favorable consideration can occur early in this Congress, as this measure is needed to help combat this most serious problem.

While administrative regulations are one approach to this problem, I firmly believe that criminal sanctions on the Federal level are a necessary and proper step for this Congress to take to bring this situation under control. I urge my colleagues to join with me in this effort to help make public transportation safe for all of our citizens.

By Mr. PRYOR (for himself and Mr. GRASSLEY):

S. 855. A bill for the relief of rural mail carriers; to the Committee on Finance.

RELIEF OF RURAL MAIL CARRIERS

● Mr. PRYOR. Mr. President, today I am introducing a bill to bring some certainty to our tax laws as it relates to the rural letter carriers of this Nation. This bill is very important to these hard-working men and women as a result of a retroactive reversal of a longstanding ruling by the Internal Revenue Service [IRS]. I'm pleased that the Senator from Iowa, Mr. GRASSLEY, is joining me in this effort.

Mr. President, for many years—since 1956 to be precise—the rural letter carriers had filed their tax returns based on an IRS-approved form that contained the necessary information for the calculation of the expenses of their vehicles. As most Members of the Senate are aware, the rural letter carriers, through a contract with the Postal Service, receive a set mileage amount for the use of their vehicles. Currently, this is around 33 cents per mile. The IRS allows taxpayers a standard mileage deduction for the use of their cars at a rate of 20½ cents per mile. The question, with regard to the rural letter carriers, is how the difference is to be treated for tax purposes.

Obviously, since the 33-cents-per-mile rate is set by contract, it is what the Postal Service has calculated is the cost of driving and maintaining the vehicle. There's no profit involved.

Prior to the IRS' reversal of its longstanding policy, there was a formula available for the letter carriers under which they could calculate their depreciation and actual expenses for the use of their cars and trucks to deliver the mail. For those who did not want to use the formula to claim any depreciation, then the contractually set equipment maintenance allowance—the amount they received under the contract with the Postal Service—was deemed to be their operating expenses. Therefore, there were not tax implications involved.

The problem, Mr. President, is that in 1984 the IRS retroactively reversed the understanding with the rural letter carriers. The result is that literally thousands of these men and women are now under IRS audit for tax years 1983 and earlier, and face interest and penalties on alleged deficiencies, even though they fully and faithfully complied with the law.

The bill we're introducing today would:

First, for taxable years prior to 1985, provide that the old formula was correct, and for those who didn't use the formula, then the operating expenses equaled the equipment maintenance allowance; and

Second, for taxable years beginning in 1985, allow letter carriers to have the equipment allowance equal the operating expenses, or use a formula of 150 percent of the standard mileage allowance as their operating expenses. Also, for tax years beginning in 1985, for those who depreciated their cars, remove the 50 percent of business use limitation contained in section 280F of the Internal Revenue Code.

The effect of these changes, Mr. President, would be to deny the retroactive application of the IRS changes. Therefore, the rural letter carriers would not have to face these audits when they complied with the law at the time their tax returns were filed. For years starting after January 1, 1985, there would also be some certainty in this area in the Tax Code so that these men and women would know exactly where they stand.

This is a sound bill, Mr. President, that provides some certainty to these hard-working people, and will prevent a very serious problem they're now facing from becoming worse. I urge my colleagues to carefully consider this measure, and I hope we will have a hearing and consideration in the Senate Finance Committee in the very near future.

I ask unanimous consent, Mr. President, that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 855

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. BUSINESS USE OF AUTOMOBILES BY RURAL MAIL CARRIERS.

(a) TAXABLE YEARS BEGINNING AFTER 1984.—

(1) IN GENERAL.—In the case of any employee of the United States Postal Service who performs services involving the collection and delivery of mail on a rural route, for taxable years beginning after December 31, 1984—

(A) such employee shall be permitted to compute the amount allowable as a deduction under chapter 1 of the Internal Revenue Code of 1954 for the use of an automobile in performing such services by using a standard mileage rate for all miles of such use equal to 150 percent of the basic standard rate, or

(B) if the employee does not use such standard mileage rate, section 280F(b) of the Internal Revenue Code of 1954 (relating to limitation where business use of listed property not greater than 50 percent) shall not apply to any automobile used in performing such services.

(2) PARAGRAPH (1)(A) NOT TO APPLY IF EMPLOYEE CLAIMS INVESTMENT TAX CREDIT OR ACCELERATED COST RECOVERY DEDUCTIONS FOR AUTOMOBILE.—Paragraph (1)(A) shall not apply with respect to any automobile if, for any taxable year beginning after December 31, 1984, the taxpayer claimed an investment tax credit or depreciation deductions for such automobile.

(3) DEFINITIONS.—For purposes of this subsection—

(A) BASIC STANDARD RATE.—The term "basic standard rate" means the standard mileage rate which is prescribed by the Secretary of the Treasury or his delegate for computing the amount of the deduction for the business use of an automobile and which—

(i) is in effect at the time of the use referred to in paragraph (1),

(ii) applies to an automobile which is not fully depreciated, and

(iii) applies to the first 15,000 miles (or such other number as the Secretary may hereafter prescribe) of business use during the taxable year.

(B) INVESTMENT TAX CREDIT.—The term "investment tax credit" means the credit determined under section 46(a) of the Internal Revenue Code of 1954

(b) YEARS BEFORE 1985.—In the case of an employee described in subsection (a)(1), for taxable years beginning before January 1, 1985—

(1) the amount allowable as a deduction for any such taxable year under chapter 1 of the Internal Revenue Code of 1954 for the use of an automoble in performing services described in subsection (a)(1) shall be the amount received by the employee during such taxable year as equipment maintenance allowances from the United States Postal Service, except that

(2) such employee shall be permitted for any such taxable year to compute the amount so allowable in accordance with the form entitled "Worksheet for Use of Rural Carrier in Reporting Equipment Allowance and Claiming Transportation Expense Deduction" which was approved by the Internal Revenue Service in 1956 after being prepared by the National Rural Letter Carriers' Association.●

By Mr. HATCH (for himself, Mr. DENTON, Mr. HUMPHREY, and Mr. SIMON):

S. 856. A bill to amend the Internal Revenue Code of 1954 to allow the deduction for certain expenses paid or incurred by an individual in connection with the adoption of a child; to the Committee on Finance.

FAIRNESS FOR ADOPTING FAMILIES ACT

Mr. HATCH. Mr. President, Senators DENTON, HUMPHREY, and SIMON join me today in introducing the Fairness for Adopting Families Act, a bill designed to address, in a comprehensive way, the issue of tax treatment of the costs of adopting children.

In the simplest terms, this legislation is needed for three reasons. First, it recognizes that, as a nation, we respect and wish to encourage the building of strong families through adoption. Second, it recognizes that equity of treatment in respect to the way a family is formed—whether by biology or through adoption—can only be achieved by providing assistance in defraying the costs of adopting. Third, it is one attempt to cure a barrier to adoption; that is, the increased costs of legal adoptions.

I do not question the variety of tax benefits available to the couple who has a child biologically. However, in contrast, there is but one measure aimed at providing a small tax deduction for people who adopt children with special needs. There is nothing for others who adopt. This must be changed, and the premier purpose of this legislation is to do so.

Mr. President, what would this legislation do? It has three major features, First, it would provide a tax deduction for unreimbursed adoption expenses. Second, it would exclude from the employee's income any payments made by an employer for adoption expenses. Third, it would treat any employer contribution to an adoption expense plan as an ordinary and necessary business expense.

Let me explain these three features in a bit more detail.

The tax deduction for unreimbursed adoption expenses would be available for the costs of an adoption, as long as that adoption was in accordance with State and Federal law. This deduction would be available for all adoptions meeting this condition. I recognize that there are significant differences in adoptions. Depending on whether they are done within a State, between States or involve a child from a country other than the United States. However, each legal adoption is socially useful and beneficial. Each adoptive family, no matter how the adoptive child came to be in that family, deserves our support. Whether that child is a healthy infant, a child with special needs or a child from another country, the adoption expenses may be deductible, as long as all Federal and State legal requirements are met.

Data provided by the National Committee for Adoption shows that the actual cost connected with the adoption of a healthy infant often is in excess of $10,000. Because of the voluntary spirit that is so much a part of the adoption scene, the actual fees charged are often less than the costs incurred by agencies—sometimes thousands of dollars less. The difference is made up in fund-raising drives and charitable solicitation. I would hope that this continues. But not every adoption fee is subsidized. And not every adoption is of a healthy infant. For example, the costs of cesarean delivery or premature birth by the natural mother can further drive up the expenses adoptive parents may have to bear.

This legislation should stimulate discussion on the various adoption costs. I encourage my colleagues on the Finance Committee to look at this proposal with an open mind. If they believe some restrictions are needed, then proposals I have heard discussed include capping the deductible, possibly at 80 percent of expenses, or possibly limiting the deduction for a healthy infant at $5,000 and the expenses of a child with special needs at $10,000.

For those not familiar with adoptions, some of the appropriate costs

which make adoptions expensive are: maternity home services, hospital and physician's costs, attorney's costs, and the comprehensive costs of complete adoption service incurred by an agency—including, for instance, costs such as those for advertising and outreach to tell pregnant women about their services, costs incurred to provide them with educational services, and costs for job training. However, by limiting these deductions only to those which are conducted in compliance with Federal and State laws, we are insuring that we would not be underwriting the kinds of practices that have come to light in my own State of Utah and other States, where people were defrauded by certain individuals attempting to act as baby brokers. The illegal adoption brings with it a price tag of $25,000 or more, most of which goes into the pockets of middlemen. Fees for arrangements would not be deductible.

We are also insuring that certain practices that are related to the resolution of infertility, including in vitro fertilization, ovum transfers and transplants, and surrogate parenting arrangements, do not qualify for favorable tax treatment under this bill. These practices are not adoption. Some of these practices are unacceptable, for medical, religious or other reasons, to many Americans. Some of these practices are, however, addressed under other portions of the tax laws. For instance, certain medical treatments aimed at treating infertility, including some of those mentioned above, may qualify for favorable tax treatment.

Two of this legislation's provisions relate to the development of interest in adoption by many of the Nation's employers. Forty companies now provide adoption benefits, including some of the largest employers such as Control Data, IBM, Time, and Xerox. The actual benefits vary widely, with some providing both a cash payment and paid leave. Many of these benefits are flat payments. In my home State of Utah, Deseret Mutual Benefit Association, a large employer, provides adoption benefits to their employees of up to 80 percent of approved adoption expenses capping the fee at $1,200. These usual and necessary fees include maternity expenses and legal agency fees.

There are two problems that exist in regard to employer-provided benefits which we address in this bill. The first problem is that payments made to employees are taxable as income. This means that if a benefit of $1,200 is received, not all of the money can be applied to defraying expenses. Our bill would exclude from the employee's income those payments made by an employer.

The second problem is that companies currently may not treat their contributions to adoption expense plans as an ordinary and necessary business expense. This discourages many companies which would otherwise offer these benefits from providing them. Our bill would solve this problem and remove that barrier to more companies providing adoption benefits.

There are those who will say that we do not need this law at this time, that we cannot afford even the modest revenue loss that this would represent. I do not agree with them. Our families are our most important resource, and we must do everything in our power to be fair to families. The benefits to children and families of this legislation, and to our society as a whole, both in human and economic terms far outweigh the dollar costs that some may wish to focus on.

At this time, I encourage my colleagues to join me in this effort. In addition, I would like to ask unanimous consent to include a recent article that appeared in the Washington Post entitled "Paying Adoption Expenses—Increasing Number of Companies Help Their Employees Meet Costs" by Steven Heilbronner. My office has received numerous calls concerning this fine article, and I commend the Washington Post for highlighting accurately the importance of adoption within families. I ask unanimous consent that the complete text and summary of the bill be included in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 856

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Fairness for Adopting Families Act".

SEC. 2. MODIFICATION OF DEDUCTION FOR ADOPTION EXPENSES.

(a) IN GENERAL.—Subsections (b) and (c) of section 222 of the Internal Revenue Code of 1954 (relating to adoption expenses) are amended to read as follows:

"(b) DENIAL OF DOUBLE BENEFIT.—

"(1) IN GENERAL.—No deduction shall be allowable under subsection (a) for any expense for which a deduction or credit is allowable under any other provision of this chapter.

"(2) GRANTS.—No deduction shall be allowed under subsection (a) for any expenses paid from any funds received under any Federal, State, or local program.

"(C) QUALIFIED ADOPTION EXPENSES.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified adoption expenses' means reasonable and necessary adoption fees (including agency fees), court costs, attorney fees, and other expenses which—

"(A) are directly related to the legal adoption of a child by the taxpayer but only if such adoption has been arranged—

"(i) by a State or local agency with responsibility under State or local law for child placement through adoption,

"(ii) by a non-profit, voluntary adoption agency which is authorized by State or local law to place children for adoption, or

"(iii) through a private placement, and

"(B) are not incurred in violation of State or Federal law.

"(2) ADOPTION EXPENSES NOT TO INCLUDE CERTAIN AMOUNTS.—The term 'qualified adoption expenses' shall not include any expenses in connection with—

"(A) the adoption of a child who was conceived through—

"(i) artificial insemination,

"(ii) embryo transplantation,

"(iii) in vitro fertilization, or

"(iv) so-called 'surrogate parenthood', including surrogate mothers who serve voluntarily and without remuneration in jurisdictions where such practice is legal, or

"(B) travel outside the United States, unless such travel is required—

"(i) as a condition of a legal adoption by the country of the child's origin,

"(ii) to assess the health and status of the child to be adopted, or

"(iii) to escort the child to be adopted to the United States.

"(3) CHILD.—The term 'child' shall include any child determined by the State to be a child described in paragraphs (1) and (2) of section 473(c) of the Social Security Act.".

(b) ADOPTION ASSISTANCE PROGRAMS.—

(1) IN GENERAL.—Part III of subchapter B of chapter 1 of such Code (relating to items specifically excluded from gross income) is amended by redesignating section 134 as section 135 and by inserting after section 133 the following new section:

"SEC. 134. ADOPTION ASSISTANCE PROGRAMS.

"(a) IN GENERAL.—Gross income of an employee does not include amounts paid or expenses incurred by the employer for qualified adoption expenses in connection with the adoption of a child by an employee if such amounts are furnished pursuant to a program described in subsection (b).

"(b) ADOPTION ASSISTANCE PROGRAM.—For purposes of this section, a program is described in this subsection if it—

"(1) is a separate written plan of an employer for the exclusive benefit of his employees to provide his employees with adoption assistance, and

"(2) meets requirements similar to the requirements of paragraphs (2), (3), (5), and (6) of section 127(b).

"(c) QUALIFIED ADOPTION EXPENSES.—For purposes of this section, the term 'qualified adoption expenses' has the meaning given such term by section 222(c).".

(2) CONFORMING AMENDMENT.—The table of sections for part III of subchapter B of Chapter 1 of such Code is amended by striking out the item relating to section 134 and inserting in lieu thereof the following new items:

"Sec. 134. Adoption assistance programs.

"Sec. 135. Gross reference to other Acts.".

SEC. 3. EFFECTIVE DATE.

The amendments made by this Act shall apply to expenses paid or incurred for adoptions which become final after December 31, 1984.

SUMMARY OF FAIRNESS FOR ADOPTING FAMILIES ACT

1. Provides tax deduction for adoption expenses. Allowance of a deduction costs of an adoption, in accordance with State and Federal law, including infant, special needs or foreign child adoptions. It excludes surrogate mother and invitro arrangements. It also restricts the deduction of travel outside

the United States unless such travel is required as a condition of the adoption, or to assess the health and status of the child, or to escort the child to be adopted to the United States. There is no dollar limitation on the amount of the deduction.

2. Excludes from employee's income adoption expenses paid by an employer.

3. Treats employer contributions to adoption expense plans as an ordinary and necessary business expense.

4. Effective date: applies to expenses incurred or paid for adoption which become final after December 31, 1984.

[From the Washington Post March 18, 1985]

PAYING ADOPTION EXPENSES—INCREASING NUMBER OF COMPANIES HELP THEIR EMPLOYES MEET COSTS

(By Steven Heilbronner)

When Sue and Jim Orban, a Gaithersburg couple, adopted their first child in 1980, raising $4,000 to pay the adoption costs meant "asking relatives to give cash instead of other presents for Christmas." It also required Sue to take on four part-time jobs as a baby sitter, a sales clerk, a recreational supervisor and house cleaner, while Jim worked his regular hours as a computer programmer for Fairchild Industries Inc. in Germantown.

"At times it just felt crazy," Sue Orban said. "But that's the price we had to pay to make ends meet. It was the best money for short-term work."

Four years later, after she gave birth to a child, they adopted a Filipino boy. This time paying the bills was less arduous. Although the price to adopt their son Michael ran $5,500, part of the cost was absorbed through a benefits policy provided by Jim Orban's new employer, and Sue stayed at home to take care of the children.

International Business Machines Corp., where Orban has been a computer analyst since 1981, pays employes up to $1,750 toward adoption costs.

According to the National Committee for Adoptions, 40 major United States firms, or three times the number since 1980, pay $150 to $2,500 in expenses incurred for agency placement fees, court costs and legal fees, temporary foster child care and transportation for the adopted child.

The list includes such giants as Honeywell Inc., Procter & Gamble Co., Time Inc. and Bank of America.

In addition, more than 100 firms, such as Acacia Group Insurance Co. of Washington, allow employes to use accrued leave time, which in some cases includes sick leave, to acclimate their newly adopted child to unfamilar surroundings.

The changes have extended even to state government in Maryland, which last year enacted a law allowing any employe to use up to 30 days of accrued sick leave to spend with a newly adopted child. The sponsor of the bill, Del. Virginia M. Thomas (D-Howard), said it is only one of its kind in the country.

Federal employes are not entitled to adoption benefits, according to Jim Ludwig of the Office of Personnel Management, and neither are Virginia state workers or District of Columbia employes.

Edward Rider, an archivist at Procter & Gamble of Cincinnati, said the five months that the company allowed him to take off from work without pay when he and his wife received their 4-week-old daughter were "invaluable."

Edward and Barbara Rider had been waiting three years before a local agency notified them that a teen-aged mother was giving up her child for adoption. "We found out a few days before having to bring [Anne] home," Edward Rider said. "Although we were expecting a child at some point, it's not like planning for a natural birth."

William Pierce, president of the National Committee for Adoptions, said, "The basic premise of adoption benefits is a matter of equity. Most people who adopt children do not enjoy the same privileges as those who are biological parents."

Officials of companies that have instituted these payments agree that parents who adopt should not be burdened with costs that natural parents escape through major medical insurance, which typically absorbs up to 80 percent of their costs.

Doctor fees and hospitalization for a natural birth usually amount to about $4,000, industry spokesmen say, whereas normal agency adoption expenses range from $2,000 to $10,000, depending on the type of services rendered.

These officials assert that the expanded coverage marks their growing commitment to a diverse work force, although they acknowledge that the policy makes for good public relations at minimal cost because few of their employes adopt children and claim the benefit.

"Companies are realizing that there is not such a distance between your work and family life," said Linda Ulrey, a public relations assistant at Procter & Gamble. "They've got to make it easier for the two to work in tandem."

Procter & Gamble in 1982 designed a package that provides up to $1,000 for adoption costs and allows employes time off from work until their child is 6 months old. "If the child is older than 6 months when he or she is adopted, we'll usually make special exceptions," Ulrey said.

"Obviously we're only providing maybe a half the cost to the family," said Emily Karakashian, a senior benefits analyst at Bank of America, which introduced cash payments of $2,000 to employes in 1983. "The philosophy is to equalize the benefits for people who choose other options [than natural birth]. From our point of view it's a great benefit, because the cost is negligible," Karakashian said.

Karakashian noted that in two years, about 30 employes have used the adoption benefit, which requires a $250 deductible.

At IBM, which in 1972 was one of the first Fortune 500 firms to enact the program, 4,500 employes have been granted the $1,750 benefit. The company employs 394,930 people in the United States.

One criticism of the cash benefit programs is that the money is not always tax-deductible, thereby reducing the amount parents receive by up to 25 percent.

The Orbans, for example, said their $1,750 benefit from IBM "amounted to around $1,300" once taxes were deducted. However other companies, such as Acacia, Proctor & Gamble, and Honeywell, shoulder the tax burden.

A tax bill passed by Congress in 1981 provided an exemption of up to $1,500 for the adoption of a "special needs" child, but no exemptions were made for other children. "Special needs" refers to children 5 years or older, handicapped children, and sibling sets.

This year a bill has been introduced by Sens. Orrin G. Hatch (R-Utah) and Jeremiah Denton (R-Ala.) that would permit deductions for any adopted child.

Mr. DENTON. Mr. President, I am pleased to join the distinguished Senator from Utah, Mr. HATCH, in introducing the Fairness for Adopting Families Act of 1985. Senators may recall that Senator HATCH and I introduced an identical bill in the 98th Congress, but that unfortunately the Congress adjourned without acting on the bill.

Although there are many exciting initiatives underway to promote adoption, there is much more than can and should be done to increase the number of children who can be adopted into loving families. The bill that Senator HATCH and I are introducing today would provide badly needed tax relief to persons who form their families through adoption.

The Subcommittee on Family and Human Services, of which I am chairman, has held several hearings on adoption. Although specific tax issues do not fall within the jurisdiction of the subcommittee, many witnesses expressed the need for ending the inequitable tax treatment of adoptive parents.

As we all know, families formed through the biological birth of children are eligible for a tax deduction for the medical expenses of the pregnancy and delivery. Adoptive parents, however, cannot deduct the expenses for adoption, even though, in many cases, they have paid the medical expenses of the baby's birth and the biological mother's prenatal care, in addition to adoption agency fees and attorney fees. For many families, those out of the pocket expenses, which can vary widely from locality to locality, put a substantial strain on resources.

I believe that adopting families truly deserve fair tax treatment and should not be discriminated against under our tax laws.

The bill would offer a tax deduction for all reasonable fees for an adoption that is conducted in accordance with State law. As already mentioned. adoption expense can vary from as little as $500 up to $10,000 and still fall within the realm of legal fees. For that reason, the bill does not include a fixed dollar amount for the deduction.

The bill would also exclude families from taxable income any adoption benefits paid by employers to employees adopting children. Employers would be able to treat the benefit as an ordinary and necessary business expense of providing benefits to their employees. These provisions would be of inestimable help to hold employers and employees.

Because I am interested in encouraging private sector support for adoption, I included a provision in the Adoption Opportunites Act reauthorization bill—S. 1003 in the 98th Congress—that would direct the Secretary

of HHS to educate and encourage the private sector to offer adoption benefits to adopting employees. That provision became part of Public Law 98-457, signed by President Reagan on October 9, 1984. I closely watch the effect of the provision.

In a hearing on the bill, written testimony was received from a vice president for employee benefits who described the formation of adoption benefit plans. Thirty-five corporations now offer adoption benefit programs to their employees. I strongly believe that if companies were able to consider this expense as an ordinary and necessary business expense, many more companies would provide the benefit. Likewise, the benefit would not be considered taxable income for the employee, as is currently the case.

We should allow the private sector to do as much as it can to support adopting families. The Fairness for Adopting Families Act would encourage businesses to offer help to their employees.

Finally, the bill would repeal the current provisions for adoption expense for the adoption of special needs children. The legislation will provide more generous support for adoptions.

Mr. President, many persons in our country are desperate to adopt children. There are older children and children with handicaps who are now in foster care but who could be adopted. There are also infants available for adoption. Young children from foreign countries, including children with handicaps, are also free for adoption.

By enacting legislation to grant tax relief to adopting families, we can help to bring the thousands of waiting parents together with infants and children who are waiting for permanent, loving homes.

I urge my colleagues to join Senator HATCH and me by cosponsor's of the Fairness for Adopting Families Act of 1985.

● Mr. SIMON. Mr. President, I am pleased to introduce a bill, with my distinguished colleague from Utah, Mr. HATCH, which amends the Tax Code to provide for the deduction of expenses incurred in the course of adoption.

This bill encourages legal adoption by providing a mechanism through which an adoptive parent may recover the often overwhelming expenses of adoption. A second provision in the bill allows employers to contribute to an adoption and deduct this as a necessary business expense.

As an adoptive parent myself, I know the joys of adoption. Adopted children are chosen and wanted. For those who are thinking about adopting, this bill removes the monetary barrier that may otherwise prevent a child from being placed in a caring home.●

By Mr. GORTON:

S. 858. A bill to amend section 119 of the Housing and Community Development Act of 1974 to modify the selection criteria for urban development action grants; to the Committee on Banking, Housing, and Urban Affairs.

MODIFICATION OF SELECTION CRITERIA FOR URBAN DEVELOPMENT ACTION GRANTS

Mr. GORTON. Mr. President, today I am introducing legislation to make urban development action grants a truly national program again. It is time to reform the UDAG project selection system to assure that projects which have the greatest economic benefit and impact will be selected for funding.

The UDAG Program has been a vital resource in providing assistance to cities and urban counties which are experiencing severe economic distress, to help stimulate the economic development activity necessary to bring about economic recovery. Grant funds awarded to distressed communities are granted or loaned to private developers, thus making feasible otherwise unprofitable private sector economic development projects. These public funds leverage even greater amounts of private investment for industrial, commercial, and neighborhood projects. Distressed urban areas are renovated and the local tax base is improved.

Prior to 1983, all applications for UDAG projects meeting the basic eligibility requirements were funded. After the number of applications grew to exceed available grant funds, the Department of Housing and Urban Development developed criteria for selecting projects to be funded. This project ranking system awards 70 of the 100 total points to relative economic distress and economic impaction or deterioration, leaving only 30 points to be assigned on the basis of project merit.

The result of this project selection system has been to send 70 percent of UDAG funds to only eight States, based on the formula judgment of greater economic distress and impaction. Some cities, in effect, have been locked in as winners in each funding round, based on high scores for distress and impaction, without regard to the benefits, or lack thereof, that will actually be realized from the proposed project. A General Accounting Office report issued last month found that, indeed, some applications with high project merit points have not been funded, while applications with low project points were funded.

Current economic indicators, such as percentage of poverty, per capita income, percentage of unemployment, age of housing, population growth or decline, and job loss are appropriate factors to establish a community's eligibility for the UDAG Program. The program is intended to provide assistance only to severely distressed cities, urban counties, small cities, or pockets of poverty. But once such economic distress factors are used to determine eligibility, award of projects should be based solely on project merit. All eligible distressed communities should have equal access to UDAG funding.

The bill I am introducing today provides for a project selection process based entirely on the economic benefits of proposed projects. Those applications ranking highest on the basis of project merit would be funded. Project merit would be measured by first, the ratio of private investment dollars to grant funds, second, the ratio of grant funds to the number of permanent jobs to be created, third, the proportion of such permanent jobs likely to be obtained by unemployed and economically disadvantaged individuals and disadvantaged minorities, and fourth, the impact the project would have in improving local government revenues.

Giving full weight to project merit in the application process will once again make all distressed communities in the Nation competitive for UDAG grants. Competition on the basis of project merit will also encourage better project applications and will mean that more projects will be funded each year as smaller dollar requests would likely score higher since they tend to have a higher private investment leveraging ratio with lower UDAG dollars required per project.

Even with the changes mandated in this bill, a disproportionate amount of UDAG grant funds will continue to flow to the Northeastern region of the Nation. Half of the UDAG eligible population resides in that general region of the country and thus such population centers will continue to receive a lion's share of UDAG grants. But they will do so in a fair and equal competition by high quality project proposals with the rest of the Nation's distressed cities and counties.

Ranking project applications on the basis of project merit will also help integrate distressed pockets of poverty into the general project selection system. The Department of Housing and Urban Development is authorized to fund applications, up to 20 percent of available funds, from metropolitan communities and small cities that do not meet the UDAG economic distress eligibility standards but which have pockets of poverty with severe economic distress. Since economic distress and impaction measures cannot apply to the community at large, applications from pockets of poverty communities can only achieve a maximum of 30 points based on the project characteristics. Last month's GAO report found that if HUD had not exercised its discretion to approve such applications, no pocket of poverty application could have competed for UDAG fund-

ing. Transition to a project merit selection system would integrate pocket of poverty applications fully into the selection process.

Finally, this bill establishes certain minimum standards for any application for UDAG funding. As general requirements, there would have to be a showing that the project would be completed in a timely manner, that the grant recipient has demonstrated successful performance in community development, that the project will have a substantial impact on the development and economy of the community, and that the project would not be feasible without UDAG funding.

In addition, there would be a threshold requirement that each project must leverage $3 in private funds for every UDAG dollar provided, and that at least one permanent job would be created for every $15,000 of UDAG funding. A "job" would be defined as one person working a standard work week of 40 hours.

I urge a swift resolution of the inequities in the UDAG project selection system by the Congress. The Urban Development Action Grant Program plays a major role in the health and recovery of the economy in our urban areas. We need to strengthen the UDAG Program by one again making it national in scope.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 858

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 119(d)(1) of the Housing and Community Development Act of 1974 is amended to read as follows:

"(d)(1)(A) A grant may be made under this section to a city or urban county eligible under subsection (c)(1) only if the secretary determines that—

"(i) the project wil be completed in a timely manner;

"(ii) the grant recipient has demonstrated successful performance in community development activities;

"(iii) the project will have a substantial impact on the development and economy of the community;

"(iv) the project is not feasible without assistance under this section;

"(v) there will be at least three dollars in private investment supplied for each dollar of grant funds under this section; and

"(vi) for each $15,000 of grant funds under this section there will be created at least one permanent, 40-hour per week job.

"(B) The Secretary shall establish selection criteria for a national competition for grants under this section to cities and urban counties eligible under subsection (d)(1). Such criteria shall consist of—

"(i) the ratio of private investment dollars to grant funds under this section;

"(ii) the ratio of the number of permanent jobs to be created to the amount of grant funds;

"(iii) the proportion of such permanent jobs likely to be obtained by unemployed and economically disadvantaged individuals and disadvantaged minorities;

"(iv) the impact the project would have in improving local government revenues; and

"(v) such other factors relating to economic benefit of the project as are deemed appropriate by the Secretary.".

By Mr. THURMOND:

S. 859. A bill to suspend temporarily the duty on dicyclohexylbenzothiazylsulfenamide; to the Committee on Finance.

TEMPORARY SUSPENSION OF DUTY

Mr. THURMOND. Mr. President, I am today introducing legislation to temporarily suspend the duty on the chemical dicyclohexylbenzothiazylsulfenamide [DCBS], which is used as an accelerator in the production of radial tires.

Mr. President, with the enactment last year of the Trade and Tariff Act of 1984—Public Law 98-573—the duties on a wide array of items, including numerous chemicals, were temporarily suspended. The suspended duties generally involved items not domestically manufactured or produced, and for which there is no readily available substitute produced domestically. Although that is the case insofar as DCBS is concerned, unfortunately this request was not brought to the attention of Congress during consideration of the Trade and Tariff Act of 1984; therefore, the duty on DCBS—$0.017 per pound, plus 16.2 percent ad valorem—was unaffected by enactment of that measure.

Ironically, another chemical, diphenyl guanidine [DPG], which is also used as an accelerator in the manufacture of radial tires, and for which there is neither a domestic manufacturer nor a domestically produced substitute, was listed for temporary duty suspension in the 1984 act. However, as the respective manufacturing processes involving these two chemicals differ, they cannot be substituted. Thus, a situation exists where radial tire manufacturers utilizing one process can import an essential chemical duty-free, while those employing another process must pay a duty. Enactment of the legislation I am introducing today would rectify this unfair situation.

Mr. President, the policy considerations surrounding the issue of duty suspension on items or substances for which there is no domestic manufacturer, nor a readily available domestically produced substitute, strongly favor suspension of those duties. Suspending the duties on such imported items benefits consumers, as well as industries in which those items are critical to the production process.

In the case of the chemical DCBS, suspension of the currently imposed duty will lessen the cost of producing radial tires. As a result, the competitiveness of our domestic producers in the world market will be strengthened, American jobs will be preserved, and consumers will gain the benefit of relatively lower prices for domestically produced radial tires. In addition, as I mentioned earlier, suspension would also eliminate an inequity which currently exists in our tariff laws.

Mr. President, an identical bill (H.R. 1265) has been introduced in the House by Congressman CAMPBELL. I hope the House will soon act favorably on that bill, and I urge my Senate colleagues to join me in supporting swift Senate passage of this measure.

By Mr. METZENBAUM:

S. 860. A bill to amend the Securities Exchange Act of 1934; to the Committee on Banking, Housing, and Urban Affairs.

SHAREHOLDER FAIRNESS ACT

● Mr. METZENBAUM. Mr. President, over the last few years, there has been a dramatic growth in corporate tender offer activity. This surge in corporate mergers and acquisitions has spawned a range of abusive tactics by both bidders seeking control and targets seeking to remain independent.

We have seen corporate raiders resort to coercive and unfair tactics either to gain control over a target or extort huge payments to withdraw their bids.

And we have seen target management, often motivated by a selfish desire to stay in power, employ aggressive defenses to thwart a hostile bidder.

Often, the victim of these abusive bidding and defensive tactics are the shareholders and, in particular, the small shareholder.

In the 17 years since Congress passed the Williams Act to regulate corporate takeover activity, much has changed. It is clear to me that the time has come to amend the Williams Act and eliminate the loopholes exploited by creative tender offer practitioners.

Today, I am introducing the Shareholder Fairness Act of 1985. This legislation is designed to deal with the new realities dominating the corporate tender offer arena.

This legislation would move us toward a regulatory scheme that permits, even encourages, economically sound takeovers, whether hostile or friendly, while discouraging inefficient and empire building tender offers. And it would create a more fair and rational process that permits greater time to weigh the impact of a proposed acquisition and reach intelligent investment decisions and increases the likelihood that all shareholders will be treated equally.

Further, this proposal recognizes the need for a regulatory environment that does not place a premium on short-term results to the detriment of

long-term planning. I do not believe it is in the national interest to permit rampant acquisitions, where the combined company has incurred such huge debt that it has undermined its ability to do the long-term research and development necessary to compete in the world economy.

In recent weeks, the debate over tender offer law has focused on two schools of thought:

One school takes the position that the current wave of hostile tender offers are good for the economy. Supporters of this view argue that tender offers are the best and most effective way to discipline inept and lazy management and maximize shareholder value and should not be discouraged by Federal law.

The opposite school, which numbers many of our Nation's most distinguished business leaders, believes that the surge in tender offer activity has forced managers to place a disproportionate emphasis on short term performance. As a result, they contend, long term planning suffers, and, with it, the company's ability to compete in a global economic environment where the race will be won by those with the most vision and foresight.

I find merit and flaws in both schools. I agree with those who argue that tender offers can be a healthy way to discipline lazy corporate managers and help shareholders realize the true value of their investments. But I do not believe that it necessarily follows that all tender offers are good for the shareholders and the economy. I believe it is a self-serving oversimplification to claim, as many corporate takeover specialists do, that only poorly managed companies need fear takeovers. Indeed, there is considerable evidence that many quality firms have been put into play.

Louis Lowenstein, professor of law at Columbia University examined 14 hostile tender offers made in 1981, including those involving Marathon Oil, Conoco, and St. Joe Minerals. Lowenstein found that the target companies average return on equity compared favorably with that of American industry as a whole. Of the 10 targets that failed to survive, 5 had higher returns on equity than their acquirers. And 7 of the 10 targets eventually acquired actually outperformed the stock market over the 18-month period ending July 31, 1982 while only 3 of the acquirers could make that claim.

The Shareholder Fairness Act of 1985 would curb the most abusive bidder tactics while sharply limiting target management's ability to mortgage the company to defeat a hostile bid.

The bill would prohibit two-tier, front-end-loaded tender offers, as well as partial tender offers.

Two-tier tender offers are inherently coercive and unfair. They create a stampede effect as shareholders, afraid of losing out on the higher front end premium, rush to tender. The big winners in a two-tier offer are the professional shareholders who are savvy enough to tender early and the bidder who is able to reduce the cost of acquisiton by offering an initial high price and a lower second tier price. As usual, the loser is the smaller shareholder who often lacks the sophistication to respond fast enough to receive the higher premium.

Paul Elicker, chairman and president of the SCM Corp., who represented the National Association of Manufacturers in House testimony on tender offer reform last year said that—

> Two-tier offers are inherently unfair and coercive. A heavy front end loaded offer, with a reduced second step, puts tremendous pressure on shareholders to reach a complex decision based on personal capital maximization. The front-end acceptance, with its financial price advantage, dissuades shareholders from delaying final decision on acceptance of offers. In effect, delay and rational consideration is heavily penalized with no economic justification for that penalty.

David Norr, of Lieber & Co., a New York brokerage firm, recently told the SEC that—

> The public receives a disproportionately larger share of the second or lower price tier. The professional community, of whom I am one, the arbitrageurs, the money management firms, the full-time investors know exactly what to do. They turn in 100 percent of their stock for the higher price. A system that benefits the professional against the public is not fair.

A recent SEC study found that first tier offers gave shareholders, on the average, a 64-percent premium while second-tier offers gave shareholders an average premium of 47 percent. In individual cases, the disparity was sometimes much greater. For example, the front end of United States Steel's acquisition of Marathon Oil paid shareholders a premium of 109 percent while the back end tenderers received a premium of just 24 percent; the front end of Fluor's takeover of St. Joe's Minerals paid a 116-percent premium while back end shareholders received a 47-percent premium.

The SEC's view seems to be that it doesn't matter if some shareholders get a better deal than others as long as everyone receives some premium. My view is that any outcome which creates two classes of unequal shareholders should be barred by Federal law.

My legislation would also prohibit partial tender offers where a bidder seeks more than 21 percent of the target's stock unless it makes a tender offer for all shares at the same price. There is little practical difference between partial and two-tier bids. As a rule, partial bids are followed later by either bids for the remaining stock—at a lower price than the first bid—or by open market purchases. In either event, partials are another vehicle used to gain control without treating all shareholders equally.

By establishing a 21-percent threshold—compared to the 5- or ten-percent levels in other proposals—as the trigger for a tender offer for all shares, the legislation recognizes the need to permit legitimate long-term investors to accumulate substantial positions in a company and to permit technology sharing investments such as IBM's, investment in ROLM.

Section 3 restricts the odious practice of Greenmail where a handful of investors are bought out at a substantial premium to market. In a typical Greenmail transaction, an investor group acquires a toehold in a company, either in preparation for a bid or as an investment. Management, fearing a bid, buys out the Greenmailer at a premium to market in exchange for a commitment to drop the raid. Generally, the Greenmailers make huge profits and the rest of the shareholders not only don't get the same deal, but often see the value of their investment eroded as the stock price falls once the company is taken out of play.

Section 4 would require a tender offer to remain open for 60 business days instead of the current 20 business days.

The fight for corporate control should not be won by the swift; it should be won by the most capable and best suited. A short timeframe places a premium on speed, rather than rational, informed decisionmaking. The present 20-day time period promotes a siege mentality in the target; it forces shareholders to make complex investment decisions in a very short time, and it forces other potential bidders to make snap decisions without adequate analysis. Finally, 20 days is insufficient time for other potential bidders to evaluate a possible purchase and thus it discourages auctions and makes it less likely that target shareholders will realize the real value of the stock.

Some critics of extended waiting periods have argued that they will simply give targets more time to develop tactics aimed at thwarting bids. This is a valid concern. That is why I have drafted section 5 of this package. This provision would prohibit target management from making any structural change in the company once a takeover bid is publicly announced unless the shareholders approve the transaction.

The term "structural change" would cover tactics such as selling the crown jewels, issuing new stock with different voting rights and other changes in capitalization, seeking to acquire the bidder or other scorched earth tactics to make the target unattractive to the bidder.

Finally, section 6 of the legislation would close the 10-day window. Section 13(d)(1) of the Securities and Exchange Act currently requires that within 10 days after a person acquires more than 5 percent of the stock of a public corporation, they must disclose their identity, their source of financing, and whether their investment is for long-term purposes or to seek control.

The 10-day window permits investors to continue accumulating large blocks in excess of 5 percent before the market learns of their position. These secret acquisitions can substantially affect the price of the stock and creates an unnecessarily long timelag when the market lacks material investment information.

The proposed legislation would narrow the window by requiring a filing within 2 days of a person's acquisition of stock in excess of 5 percent and it prevents further trading by the holder until 2 days after the filing to allow the market to digest the information.

In sum, anecdotal evidence increasingly suggests that it is our best run companies that are the most likely takeover targets. We must question a policy where the companies working hardest to meet the global economic challenge are replaced by larger, weaker, and less efficient conglomerates that must justify their empire building by emphasizing short-run profit maximization over long-term industrial strength.

I ask unanimous consent that the term of the bill and a section-by-section analysis be inserted in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 860

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SHORT TITLE

SECTION 1. This Act may be cited as the "Shareholder Fairness Act of 1985".

TWO-TIER, PARTIAL, AND "CREEPING" TENDER OFFERS

SEC. 2. Section 14 of the Securities Exchange Act of 1934 (15 U.S.C. 78n) is amended by adding at the end thereof the following:

"(h) It shall be unlawful for any person, by use of the mails or by any means or instrumentality of interstate commerce or of any facility of a national securities exchange or otherwise, to acquire, or agree to acquire, directly or indirectly, any class of any equity security which is registered pursuant to section 12, or any equity security of an insurance company which would have been required to be so registered except for the exemption contained in section 12(g)(2)(G) of this title, or any equity security issued by a closed-end investment company registered under the Investment Company Act of 1940, if, after consummation thereof, such person would become, directly or indirectly, the beneficial owner of more than 21 per centum of the outstanding voting equity securities of the issuer unless—

"(1) such person is the issuer of such securities;

"(2) such an acquisition is made pursuant to a tender offer for, or a request or invitation for tenders of, all of the outstanding voting securities of the issuer, for the same price per share as all other shares, to the holders of all outstanding shares of the class;

"(3) such an acquisition is made within six months following written consent of the issuer to acquire in excess of 21 per centum of outstanding voting securities;

"(4) the acquisition is by gift, inheritance, or transfer from an existing holder to an individual related to such holder by blood or marriage;

"(5) the acquisition is by an employee benefit plan or pension fund of such issuer; or

"(6) on the effective date of this subsection such person is the beneficial owner of more than 21 per centum of the outstanding voting equity securities of the issuer and the acquisition would not represent an increase in the percentage of such person's beneficial ownership from the effective date of this Act.

For the purpose of this subsection, applicable State laws shall determine whether consent is properly granted under paragraph (3), except that in any case, the procedures applicable to such consent shall be those procedures that apply to a structural change under subsection (k) of this section".

GREENMAIL

SEC. 3. Section 14 of the Securities Exchange Act of 1934 (15 U.S.C. 78n) is amended by adding at the end thereof the following:

"(i) It shall be unlawful for an issuer to purchase, directly or indirectly, any of its securities at a price above the market from any person who holds more than 3 per centum of the class of the securities to be purchased and has held such securities for less than two years, unless such purchase has been approved by the affirmative vote of a majority of the aggregate voting securities of the issuer, or the issuer makes an offer to acquire, of at least equal value, to all holders of securities of such class and to all holders of any class into which such securities may be converted.".

WAITING PERIOD

SEC. 4. Section 14 of the Securities Exchange Act of 1934 (15 U.S.C. 78n) is amended—

(1) by striking out subsection (d)(2) and inserting in lieu thereof the following:

"(2) Any person making a tender offer or request or invitation for tenders shall hold such offer, request, or invitation open for a period of at least 60 business days from the date on which such offer, request, or invitation is first published or sent or given to security holders, except that his paragraph shall not apply to such an offer, invitation, or request by the issuer for the class of securities being sought if such offer, invitation, or request is not made in anticipation of or response to another person's offer, request, or invitation for securities of the same class."; and

(2) by adding at the end thereof the following:

"(j)(1) For the purpose of subsections (d), (f), (h), and (i) of this section, when two or more persons act as a partnership, limited partnership, syndicate, or other group for the purpose of acquiring, voting, holding, or disposing of securities of an issuer, such syndicate or group shall be deemed a 'person'.

"(2) For the purpose of this section, the term 'voting equity security' means any equity security of the issuer that entitles the holder thereof to vote generally in an election of directors of the issuer.".

DEFENSIVE TACTICS

SEC. 5. Section 14 of the Securities Exchange act of 1934 (15 U.S.C. 78n) is amended by adding at the end thereof the following:

"(k) An issuer which is the target of a takeover bid may not, from the time the takeover bid is publicly announced until the bid expires or otherwise terminates, enter into any transaction or take any action which constitutes a structural change, unless the change is pursuant to a contract entered into prior to any publicly announced takeover bid, or unless the change is approved by the holders of either a majority of the outstanding voting equity securities, or such greater number of holders as may be required by applicable State law, and on such minimum notice as may be prescribed by State law. For the purpose of this subsection—

"(1) a takeover bid is publicly announced if a tender offer has been made for voting equity securities of the target company, or if any person states an intent to acquire control of a company in a statement filed with the Commission pursuant to section 13(d)(1) of this title; and

"(2) the term 'structural change' means—

"(A) any acquisition or disposition of any significant amount of assets other than in the ordinary course of business, any issuance or purchase of 5 per centum or more of any class of equity securities, or any agreement or arrangement for any of the foregoing,

"(B) any other transaction or action which is reasonably likely to affect the voting rights of any class of securities of the company, or

"(C) any other transaction or action which the Commission determines, by rule, regulation, or order, should be conditioned on shareholder approval in order to carry out the purpose of this subsection.

The Commission may, by rule, regulation, or order, exempt any transaction or action, unconditionally or on specified terms or conditions, as not constituting a structural change.".

CLOSE OF "10-DAY WINDOW"

SEC. 6. (a) Section 13(d)(1) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(d)(1)) is amended by striking out "ten" and inserting in lieu thereof "two".

(b) Section 13(d) of such Act is further amended by adding at the end thereof the following:

"(7) A person subject to the requirements of paragraph (1) may not acquire, directly or indirectly, beneficial ownership of any additional shares of the equity security that is the subject of the statement required by paragraph (1) for two business days subsequent to the filing of such statement with the Commission. The Commission may, by rule, regulation, or order, in the public interest or for the protection of investors, may exempt any person from the requirements of this subsection.".

SECTION-BY-SECTION ANALYSIS OF THE SHAREHOLDER FAIRNESS ACT OF 1985

SECTION ONE

Section One sets forth the short title, The Shareholder Fairness Act of 1985.

SECTION TWO

Section Two effectively prohibits "two tier, front end loaded" tender offers. By pressuring shareholders to tender early to receive the higher premium, such offers are inherently coercive and unfair. Frequently, the effect of a two tier is that less sophisticated investors don't receive the same value for their shares as market professionals; shareholders as a whole may not be able to sell to the bidder who have paid the most and; the bidder is able to acquire a corporation for less than its full value.

Section Two also prohibits stock purchases that would result in the buyer's owning in excess of 21 percent of outstanding shares, unless a tender offer is made for all shares at the same price.

By establishing a 21 percent threshold the bill would allow long term investors, joint venturers and other to maintain a substantial minority holding in a company. At the same time, it will assure all other shareholders that significant minority holdings cannot be transformed into control without each shareholder receiving the same opportunity to sell their shares.

Section Two also bars partial tender offers in excess of 21 percent. A partial offer has the same coercive effect as a two-tier: the bidder can acquire effective control and then freeze out minority holders by paying a lower price for the remaining shares at a later date.

In addition, Section Two prohibits "creeping tender offers" where a buyer acquires in excess of 21 percent on the open market. Such tactics deprive shareholders of the opportunity to enjoy a true auction for their shares since other firms cannot contest a buyer who already has locked up a large portion of the shares. They also have the effect of allowing someone to gain control without paying the premium for control which the market usually dictates.

Section Two contains certain exemptions for situations where control in excess of 21 percent does not create the likelihood of coercion. Thus, acquisitions by the issuer, an employee benefit or pension plan of the issuer of acquisitions with the issuer's consent, are exempt from provisions of this section.

Further, transfers or gifts among relatives would not trigger a mandatory tender offer and existing holders of shares in excess of 21 percent can maintain their stake in the company.

The exemption for major acquisitions with the issuer's consent does have several limitations. The consent must be in writing; any acquisition must occur within six months of the granting of consent by the issuer. State law shall determine whether consent must be authorized by the shareholders, the board of directors, or any designated officer. However, when the issuer is the target of a pending takeover bid, as defind in Section Five of this Act, the consent must be approved by at least a majority of the shareholders.

SECTION THREE

Section Three would prevent a company from buying back shares at a premium to market from any person who holds more than three percent of stock, and who has held such stock for less than two years, unless the shareholders approve or the same price is offered to all sharedholders.

This language is identical to the language proposed by the SEC last year.

SECTION FOUR

Section Four extends the tender offer waiting period to sixty business days from the current twenty business days. This would allow shareholders and management to evaluate offers and to allow all potential bidders time to enter the fray and thereby maximize shareholder values. Finally, if Section Five, which requires shareholder approval of defensive tactics is adopted, a longer period is necessary to allow target management sufficient time to solicit such approval.

SECTION FIVE

Section Five deals with defensive tactics of target firms. It would prohibit implementation of actions that constitute a "structural change" in the company unless such transaction is approved by a majority of the shareholders.

The term "structural change" is defined to cover such activities as the acquisition or disposition of any significant amount of assets other than in the ordinary course of business. Examples of actions covered by this language would be the sale of the "crown jewels," the acquisition of one of the bidder's competitors to create an antitrust problem or making a bid to acquire the bidder.

"Structural change" also means the issuance or purchase of five percent or more of any class of equity securities, or any agreement for any of the foregoing. This would cover issuance of so-called poison pills.

Finally, "structural change" is defined to cover transactions or actions which are reasonably likely to affect the voting rights of any class of securities of the company, including by-law or charter amendments requiring supermajority approval for certain mergers, staggered director terms and changes in the state of incorporation.

Recognizing that no definition can be perfect, the bill gives the SEC power to exempt or include any transaction or action as either constituting or not constituting a "structural change."

SECTION SIX

Section Six amends the Section 13(d)(1) filing requirements to require that a person file a 13(d)(1) within two days of reaching the five percent threshold and it prevents further trading by the filer until two days after the filing to give the market time to absorb the news. Since these requirements may not be necessary in some cases to assure informed trading decisions, the Commission is granted exemptive authority.●

By Mr. WALLOP (for himself, Mr. BENTSEN, Mr. DANFORTH, Mr. DURENBERGER, Mr. GRASSLEY, Mr. PRYOR, Mr. ROTH, and Mr. SYMMS):

S. 861. A bill to amend the Internal Revenue Code of 1954 to treat deductions for research and experimental expenses attributable to activities conducted in the United States as allocable to income from sources within the United States; to the Committee on Finance.

RESEARCH AND EXPERIMENTAL TAX DEDUCTIONS

● Mr. WALLOP. Mr. President, today I am joined by Senators PRYOR, SYMMS, BENTSEN, DURENBERGER, DANFORTH, and GRASSLEY in reintroducing legislation which would eliminate an Internal Revenue Code regulation which has acted as a disincentive to research and development investments in the United States. Regulation section 1.861-8 requires U.S. companies with foreign operations to apportion or allocate a percentage of their domestic R&D expenditures to their earned income abroad. Since foreign tax authorities do not recognize this bookkeeping fiction, the net result is that full tax benefits are denied this portion of a company's R&D investment. Such adverse tax consequences create a disincentive to expand R&D expenditures in the United States and an incentive to move such investments abroad.

Section 1.861-8 is based on what the Treasury says are theoretically sound accounting principles which allocate expenses not related to particular income groups to general overhead expense. Thus, resulting in an allocation of R&D deductions to all income centers, domestic and foreign. As a result section 1.861-8 has the anomalous effect of pushing U.S. R&D and its principal benefits abroad, a consequence this country can ill afford. A sound economy requires that we foster, not impede U.S. investment in R&D, and the expansion of the American technological base. Enactment of this bill is a critical step in America's effort to retool our traditional industries, create new and more productive jobs in both our traditional and growing high-technology sectors, regain our international competitiveness in markets throughout the world and, thereby, make a major contribution toward the lowering our enormous trade deficits.

The Congress took an important first step to rectify the problems created by the R&D portions of section 1.861-8 in the context of the Economic Recovery Tax Act of 1981. A provision was included in the House-passed measure to simply eliminate the R&D allocation requirements. While we were unsuccessful in incorporating a similar provision in the Senate Finance Committee bill, an amendment proposed on the Senate floor to suspend the application of the regulations for 1 year was approved. The subsequent House-Senate conference agreed upon a 2-year suspension of the R&D portions of 1.861-8. Congress again addressed this issue in the Deficit Reduction Tax Act of 1984 by extending the moratorium for another 2 years. This second moratorium expires at the end of this year.

It is to preclude the imposition of the R&D allocation requirements and their concomitant adverse effects on future R&D investment decisions that I introduce this bill today. It would simply add the statutory requirement that all R&D expenditures be allocated to sources within the United States,

making all such expenses fully deductible against U.S. income.

The logical impact of denial of deduction for domestic R&D performed by multinational corporations was confirmed by a study conducted by Arthur Andersen & Co., for four major trade associations. The study, based on a survey of the principal R&D participants, released February 1, 1983, documents the manner in which section 1.861-8 has adversely impacted R&D investments in this country. It concludes that the numerous foreign governmental policies designed to attract R&D dollars, when combined with the disincentive effects of section 1.861-8 frequently lead U.S. management to shift R&D investments abroad rather than expand R&D activities in the United States.

Treasury itself acknowledged that regulation section 1.861-8 when combined with the impact of the foreign tax credit results in a disincentive to perform R&D in the United States. So the need for this legislation was confirmed by Treasury's own study which was required in ERTA and conducted over a 6-month period straddling 1982-83.

We've talked with Treasury for years now. Twice we have extended the moratorium on the application of 1.861-8. It is time to insure that Internal Revenue regulations give proper deference to trade policy and not prejudice domestic R&D. Since Treasury is unwilling to take action, even in the face of their own study, Congress must now finally resolve this matter. The uncertainty of our continued extensions has caused the delay and cancellation of domestic R&D projects. Inaction by Congress and the Treasury has been, and continues to be, responsible for chasing R&D offshore, to the detriment of all Americans. Continuation of this policy is neither responsible nor is it consistent with our trade needs.

The bill I introduced today has strong bipartisan support in both the Senate and House and it is my sincere hope that it will also have the endorsement of the administration. I wish to thank my colleagues who have cosponsored this legislation and pledge to work with them toward its early enactment.

Mr. President, I ask unanimous consent that the text of the text of this legislation appear in the RECORD immediately following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 861

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 861 of the Internal Revenue Code of 1954 (relating to income from sources within the United States) is amended by adding at the end thereof the following new subsection:

"(g) ALLOCATION OF RESEARCH AND EXPERIMENTAL EXPENDITURES.—

"(1) IN GENERAL.—For purposes of subsection (b), section 862(b), and 863(b), all amounts allowable as a deduction for qualified research and experimental expenditures shall be allocated to income from sources within the United States and deducted from such income in determining the amount of taxable income from sources within the United States.

"(2) QUALIFIED RESEARCH AND EXPERIMENTAL EXPENDITURES.—

"(A) IN GENERAL.—The term 'qualified research and experimental expenditures' means amounts—

"(i) which are research and experimental expenditures within the meaning of section 174, and

"(ii) which are attributable to activities conducted in the United States.

"(B) TREATMENT OF DEPRECIATION, ETC.—Rules similar to the rules of subsection (c) of section 174 shall apply.".

(b) The amendment made by subsection (a) shall apply to taxable years beginning after August 1, 1985.●

By Mr. DANFORTH (for himself, Mr. PACKWOOD, Mr. GORTON, and Mr. LAUTENBERG):

S. 862. A bill to provide for enhanced motor vehicle safety, and for other purposes; to the Committee on Commerce, Science, and Transportation.

BUMPER IMPROVEMENT ACT

● Mr. DANFORTH. Mr. President, the National Highway Traffic Safety Administration [NHTSA] has been directed by Congress not only to promote highway safety but also to seek to reduce the economic losses caused by traffic accidents and to provide consumers with information on motor vehicles.

One of NHTSA's most pro-consumer standards was the bumper standard, until it was weakened in 1982. Prior to the rollback, the standard required bumpers to be able to withstand 5 mph collisions without damage to safety related and sheet metal parts of the automobile or to the bumper itself. All model year 1980 to 1982 cars sold in the United States were required to have these bumpers. In May 1982, however, NHTSA reduced the standard from 5 mph to 2.5 mph for both front and rear bumpers and eliminated entirely the requirement that the bumper itself be capable of withstanding damage at a specified speed. In reducing the bumper durability requirement, NHTSA asserted that the 2.5 mph bumpers would cost and weigh less than the 5 mph bumpers. This, in turn, was supposed to lead to lower sticker prices and improved fuel economy.

Mr. President, NHTSA's promised savings from the reduced bumper standard have not occurred. There is no evidence that carmakers who adopted 2.5 mph standards are passing the savings on to the public. Further, manufacturers are not installing significantly lighter bumpers. According to the American Automobile Association, the actual weight reductions for the 2.5 mph bumpers have been estimated at 2 to 6 pounds. This produces an average fuel savings of only 2 to 6 gallons during the life of the car. This is hardly the substantial fuel savings promised by NHTSA.

Mr. President, the Commerce Committee has received extensive testimony demonstrating the substantial consumer savings which have resulted from 5 mph bumpers. For example, the Insurance Institute for Highway Safety's [IIHS] "1984 Report on Bumpers" contains the following statistics:

REPAIR COSTS IN FRONT-END CRASH TESTS

	Bumper system	5 mph	5 mph angle	10 mph
1982 Accord	5 mph	$0	$526	$650
1983 Accord	Weakened	314	927	1,459
1982 Civic	5 mph	0	411	564
1983 Civic	Weakened	217	481	633
1983 Horizon	5 mph	0	29	425
1983 Horizon	Weakened	69	231	855
1983 Reliant	5 mph	0	269	821
1983 Reliant	Weakened	176	183	696
1983 Volvo GL	5 mph	0	144	602
1983 Volvo GL	Weakened	138	770	863

More recently, in testimony last month before the Commerce Committee, the institute presented crash-test results for 1985 cars which demonstrate another problem. Some manufacturers are installing 5 mph bumpers on their cars. While I generally consider this a positive development, these 5 mph bumpers provide varying degrees of protectiveness. Strong 5 mph bumpers meet the bumper standard prior to its 1982 rollback; weak 5 mph bumpers prevent damage to the car body but allow damage to the bumper. For example, all the cars tested in the 1985 IIHS test have 5 mph bumpers. The cars with the strong 5 mph bumpers—the 1985 Honda Accord and the 1984 Oldsmobile Ciera—clearly outperform the other cars tested, over the range of tests; all of these other cars have weak 5 mph bumpers:

5 MPH CRASH TEST RESULTS

[Dollar amounts of damage repair costs]

	Front-barrier [1]	Rear-barrier [1]	Front-angle-barriers [2]	Rear-pole [2]
1984 Honda Accord	350	470	338	1,047
1985 Honda Accord	36	33	410	527
1984 Oldsmobile Ciera	0	0	313	288
1985 Oldsmobile Ciera	0	33	469	923
1985 Oldsmobile Calais	139	52	514	286
1985 Pontiac Grand Am	289	216	570	434
1985 Ford Thunderbird	0	0	233	356
1985 Nissan 200SX	0	0	868	1,112

[1] In contrast: All 1980–82 models sustained $0 damage in front- and rear-barrier crash tests.

[2] In contrast: A number of 1980–82 models sustained little or no damage in one or both of these tests (front-angle and rear-pole).

Source: Insurance Institute for Highway Safety.

Mr. President, this problem is compounded by the fact that NHTSA does not provide information to consumers about the relative performance of bumpers on various cars. NHTSA promised to provide such inforamtion at the time the standard was reduced to 2.5 mph. I understand that NHTSA hopes to soon come up with a bumper-rating program, but at present, consumers cannot get the type of bumper rating information they need.

Mr. President, we must take action to ensure that automobile bumpers are not merely ornaments. The legislation I am introducing today, on behalf of Senators PACKWOOD, GORTON, LAUTENBERG, and myself, requires the Department of Transportation to reinstate the 5 mph bumper standard as it existed prior to its 1982 rollback; this is to be done within 1 year of enactment of this act. The standard will apply to all cars manufactured for the model year after the date on which the bumper standard is amended. In addition, the legislation allows DOT to further strengthen the bumper standard—beyond 5 mph—if it wishes.

Mr. President, I ask unanimous consent that the text of the Bumper Improvement Act of 1985 be inserted in the RECORD in its entirety.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 862

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Bumper Improvement Act of 1985".

DEFINITIONS

SEC. 2. As used in this Act, the term—

(1) "passenger automobile means a motor vehicle with motive power, except that the term does not include a multipurpose passenger vehicle, a motorcycle, a bus, a truck, or a trailer designed for carrying 10 persons or less;

(2) "multipurpose passenger vehicle" means a motor vehicle with motive power, other than a trailer, which is designed to carry 10 persons or less and which is constructed either on a truck chassis or with special features for occasional off-road operation; and

(3) "Secretary" means the Secretary of Transportation.

BUMPER STANDARDS

SEC. 3. (a) Not later than 1 year after the date of enactment of this Act, the Secretary shall, in accordance with section 102 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1912), amend the bumper standard contained in 49 CFR sections 581.1 through 581.7 to ensure that such standard is identical to the bumper standard under such sections which was in effect on January 1, 1982. The amended standard shall apply to all passenger automobiles beginning with the model year after the date of amendment of the standard.

(b) Nothing in this section shall be construed to prohibit the Secretary from requiring impact speeds under such sections higher than the impact speeds contained in such amended standard.●

By Mr. DANFORTH (for himself, Mr. PACKWOOD, Mr. GORTON, and Mr. LAUTENBERG):

S. 863. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 and the Motor Vehicle Information and Cost Savings Act to authorize appropriations for fiscal years 1986 and 1987, and for other pruposes; to the Committee on Commerce, Science, and Transportation.

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION AUTHORIZATION ACT

● Mr. DANFORTH. Mr. President, the National Highway Traffic Safety Administration [NHTSA] of the U.S. Department of Transportation [DOT] has been charged with the responsibility of saving lives and preventing injuries on our Nation's highways. NHTSA administers three landmark statutes: the National Traffic and Motor Vehicle Safety Act of 1966; the Highway Safety Act of 1966; the Highway Safety Act of 1966; and the Motor Vehicle Information and Cost Savings Act. These statutes direct NHTSA to establish safety standards, mandate compliance, undertake safety research, order recalls, and provide consumers with information on motor vehicles.

It is clear that many of NHTSA's programs are actively promoting highway safety. In testimony before the Commerce Committee last month, NHTSA Administrator Diane Steed noted that the highway accident fatality rate in 1984 declined to an all-time low of 2.55 deaths per hundred million vehicle miles traveled. I have no doubt that many of NHTSA's efforts, such as in the areas of drunk driving and child passenger safety, along with improved motor vehicle design and construction and other factors, have been important contributors to this improvement.

Nevertheless, the fact remains that roughly 43,800 people died in highway accidents in 1984. It is clear that NHTSA must continue to aggressively work to improve highway safety in a broad range of areas. I also believe there are specific actions that NHTSA can take which will enhance highway safety.

Mr. President, today I am introducing the "National Highway Traffic Safety Administration Authorization Act of 1985," on behalf of Senator PACKWOOD, Senator GORTON, Senator LAUTENBERG, and myself. Title I of the bill authorizes funding for NHTSA's highway safety programs for fiscal years 1986 and 1987. NHTSA's overall funding levels for these fiscal years for all programs are consistent with the efforts of the President and the Congress to reduce the Federal budget deficit. I wish to note that this budget does not authorize funding for NHTSA's implementation of the motor vehicle theft legislation enacted last year. I understand from NHTSA that the overall authorization level provided for NHTSA programs is sufficient to ensure effective implementation of this important legislation.

Title I also authorizes DOT to reprogram $20 million of existing funds to enable DOT to conduct the National Seat Belt/Passive Restraint Education Program established as part of Secretary Dole's July 1984 occupant crash protection standard. We intend, however, that DOT spend half of the reprogramed funds for air bag education efforts. The bill further directs DOT to use at least $5 million of these reprogramed funds to carry out a program to demonstrate the effectiveness of air bag technology, with emphasis on lowest cost technologies.

Title II of this legislation authorizes funding for fiscal 1987 for the State and community highway safety grant program, the so-called section 402 program. This legislation authorizes funding of $132 million for this important safety program; this is equivalent to the fiscal 1986 authorization provided in Public Law 98-363.

In addition, title II authorizes funding for fiscal year 1987 for the Drunk Driving Incentive Grant Program established in 1982. Funds are not authorized for fiscal 1986 because I understand from NHTSA that sufficient funds, which have already been appropriated, exist to meet this program's needs during fiscal 1986. This program, which encourages States to enact tougher drunk driving laws, has been working well. According to NHTSA, 16 States have qualified thus far for a basic grant; 13 of these States have also qualified for a supplemental grant, which requires a State to meet additional criteria. I understand that several other States are working to meet the grant criteria of the 1982 law.

Title III of the legislation directs NHTSA to take action in two specific areas:

One, side impact protection—more than 9,000 Americans die each year in side impact crashes and another 20,000 suffer serious, nonfatal injuries. The current side impact protection standard is effective in preventing death and serious injury in single-vehicle crashes, where about 30 percent of the life-threatening injuries occur, but it is not effective in vehicle-to-vehicle crashes.

Research in the 1970's showed that the side impact crashworthiness of cars could be significantly improved using existing technology. In December 1979, NHTSA issued an advance notice of proposed rulemaking to upgrade the side impact protection standard, No. 214. The new standard would have required testing procedures which more closely resemble real-world crashes, and also would have been extended to apply to light trucks, vans, and multipurpose passenger vehicles. In July 1982, however,

NHTSA terminated this rulemaking, stating that many complex issues needing resolution had arisen. NHTSA indicated, however, that the rulemaking would be reopened after further research and analysis had been completed and appropriate test methods had been developed.

Mr. President, I believe that motor vehicle side impact protection can be improved now. Our bill requires NHTSA to reopen its rulemaking on standard 214 within 60 days after the enactment of this act. NHTSA would be required to issue the final regulations implementing this standard not later than 1 year after enactment.

Two, automobile crashworthiness data—our legislation requires NHTSA to promulgate a safety standard establishing crashworthiness and labeling requirements for cars manufactured on or after September 1, 1986. NHTSA also would be required to prepare a booklet regarding the crashworthiness of cars, along with other pertinent information. NHTSA would be required to furnish copies of this booklet to manufacturers for distribution to car dealers.

Mr. President, it is essential that we do all that we can to promote highway safety in this country. Our legislation will help us to meet this important goal.

Mr. President, I ask unanimous consent that the text of the "National Highway Traffic Safety Administration Authorization Act of 1985" be inserted in the RECORD in its entirety.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 863

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Highway Traffic Safety Administration Authorization Act of 1985".

DEFINITIONS

SEC. 2. As used in this Act, the term—

(1) "multipurpose passenger vehicle" means a motor vehicle with motive power, other than a trailer, which is designed to carry 10 persons or less and which is constructed either on a truck chassis or with special features for occasional off-road operation;

(2) "passenger automobile" means a motor vehicle with motive power, except that the term does not include a multipurpose passenger vehicle, a motorcycle, a bus, a truck, or a trailer designed for carrying 10 persons or less; and

(3) "Secretary" means the Secretary of Transportation.

TITLE I—AUTHORIZATIONS OF APPROPRIATIONS

GENERAL AUTHORIZATIONS

SEC. 101. (a) Section 121 of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1409) is amended—

(1) by striking "and"; and

(2) by striking the period and inserting in lieu thereof ", $51,187,000 for fiscal year 1986, and $53,490,415 for fiscal year 1987.".

(b) Section 111 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1921) is amended—

(1) by striking "and"; and

(2) by striking the period and inserting in lieu thereof ", $326,000 for fiscal year 1986, and $340,670 for fiscal year 1987.".

(c) Section 209 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1949) is amended—

(1) by striking "and"; and

(2) by striking the period and inserting in lieu thereof ", $1,929,000 for fiscal year 1986, and $2,015,805 for fiscal year 1987.".

(d) Section 417 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1990g) is amended—

(1) by striking "and"; and

(2) by striking the period and inserting in lieu thereof ", $469,000 for fiscal year 1986, and $490,105 for fiscal year 1987.".

OCCUPANT CRASH PROTECTION PROGRAM

SEC. 102. In order to carry out a national program to encourage the use of safety belts and passive restraints in passenger automobiles, as authorized by section 403 of title 23, United States Code, the Secretary may derive an additional amount not to exceed $20,000,000 from unobligated balances of funds made available for highway safety programs under title 23, United States Code. Not less than one-half of the total of such amounts shall be used for educational efforts related to the use of air bags. Of the funds allocated to such efforts, not less than $5,000,000 shall be used to carry out a program to demonstrate the effectiveness of air bag technology, with emphasis on lowest-cost technologies. Such amounts shall remain available until expended.

TITLE II—DRUNK DRIVING INCENTIVE GRANTS

AUTHORIZATION OF APPROPRIATIONS

SEC. 201. (a) Section 203(a)(1) of the Surface Transportation Assistance Act of 1982 (Public Law 97-424; 96 Stat. 2138) is amended—

(1) by striking "and" immediately after "1985,"; and

(2) by inserting immediately before the period at the end thereof the following: ", and $132,000,000 for the fiscal year ending September 30, 1987".

(b) Section 203(b) of the Surface Transportation Assistance Act of 1982 (Public Law 97-424; 96 Stat. 2138) is amended—

(1) by striking "and" immediately after "1985," wherever it appears; and

(2) by inserting immediately after "1986," the following: ", and $132,000,000 for the fiscal year ending September 30, 1987,"; and

(3) by inserting immediately before the period at the end thereof the following: ", and September 30, 1987".

SEC. 202. The first sentence of section 408(g) of title 23, United States Code, is amended by striking all after "Fund," and inserting in lieu thereof "$29,232,000 for the fiscal year ending September 30, 1987.".

TITLE III—PURPOSE AND FINDINGS

SEC. 301. (a) This title is part of the continuing effort by Congress to address the critical highway safety problems facing this Nation.

(b) The Congress finds that—

(1) the Department of Transportation should be given explicit direction as to actions to be taken to save lives, reduce injuries, and decrease consumer costs of accidents;

(2) the current trend toward purchases of smaller and lighter passenger automobiles increases the importance of and the need for effective occupant crash protection;

(3) crashworthiness information should be available upon the introduction of each new passenger automobile model, and a systematic effort must be made to disseminate this information; and

(4) the Department of Transportation should be directed to take specific actions to combat the problem of odometer tampering.

SIDE IMPACT PROTECTION

SEC. 302. (a) Not later than 60 days after the date of enactment of this Act, the Secretary shall reopen the rulemaking proceeding terminated on July 12, 1982, to implement Federal Motor Vehicle Safety Standard 214 (49 CFR 571.214). The Secretary shall—

(1) establish performance criteria for occupant protection in side impact under dynamic crash tests; and

(2) extend the applicability of such Standard to light trucks, vans, and multipurpose passenger vehicles.

(b) The final regulations implementing such Standard shall be issued not later than 1 year after the date of enactment of this Act.

AUTOMOBILE CRASHWORTHINESS DATA

SEC. 303. (a) Part A of title I of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1391-1410b) is amended by adding at the end thereof the following:

"SEC. 126. (a) Not later than 60 days after the date of enactment of this section, the Secretary shall promulgate a Federal motor vehicle safety standard establishing passenger automobile crashworthiness rating and labeling requirements in accordance with this section. Such amendment shall take effect not later than 120 days after such date of enactment, and shall apply to passenger automobiles manufactured on or before September 1, 1986.

"(b) The standard required in subsection (a) of this section shall provide a method for calculating a uniform numerical rating which will enable consumers to compare the crashworthiness of different passenger automobile models.

"(c)(1) The standard required in subsection (a) of this section shall also require that—

"(A) each passenger automobile manufacturer certify to the Secretary, not later than 90 days before any passenger automobile model produced by such manufacturer is offered for sale to consumers, the crashworthiness rating achieved by that model;

"(B) each passenger automobile manufacturer affix a label to each passenger automobile indicating that model's crashworthiness rating; and

"(C) the Secretary prepare a booklet for purposes of disseminating comparative information regarding the crashworthiness of passenger automobiles.

"(2) The Secretary may include in the booklet to be prepared pursuant to paragraph (1)(C) of this subsection such other information relating to the purchse and ownership of passenger automobiles as the Secretary determines may be useful to consumers. Copies of such booklet shall be furnished by the Secretary to passenger automobile manufacturers for distribution to passenger automobile dealers.

"(d) The labeling and certification required under this section shall be based upon performance criteria established by the Secretary relating to—

"(1) crash protection for occupants with and without manual seatbelts;

"(2) windshield mounting;
"(3) windshield zone intrusion;
"(4) fuel system integrity; and
"(5) such other aspects affecting crashworthiness as the Secretary's may consider appropriate.".

(b)(1) Section 201 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1941) is amended by adding at the end thereof the following:

"(f) Not later than 1 year after the date of enactment of the National Highway Traffic Safety Administration Authorization Act of 1985, the Secretary shall by rule establish procedures requiring passenger automobile dealers to make available to prospective passenger automobile purchasers information developed by the Secretary and provided to the dealer which contains data comparing the crashworthiness of passenger automobiles.".

(2) Section 2 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1901) is amended by adding at the end thereof the following new paragraph:

"(19)(A) The term 'passenger automobile' means a motor vehicle with motive power, except that the term does not include a multipurpose passenger vehicle, a motorcycle, a bus, a truck, or a trailer designed for carrying 10 persons or less.

"(B) As used in subparagraph (A) of this paragraph, the term 'multipurpose passenger vehicle' means a motor vehicle with motive power, other than a trailer, which is designed to carry 10 persons or less and which is constructed either on a truck chassis or with special features for occasional off-road operation.".●

By Mr. DANFORTH (for himself, Mr. MOYNIHAN, Mr. GORTON, and Mr. LAUTENBERG):

S. 864. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 to provide for more effective motor vehicle safety regulations, and for other purposes; to the Committee on Commerce, Science, and Transportation.

AUTOMOBILE OCCUPANT PROTECTION IMPROVEMENT ACT

● Mr. DANFORTH. Mr. President, highway safety is one of this country's most pressing problems. Although the highway accident fatality rate declined in 1984, the number of traffic fatalities increased: last year, nearly 44,000 Americans were killed in motor vehicle crashes.

Today, I am introducing legislation aimed at saving thousands of lives and preventing hundreds of thousands of injuries in traffic accidents on our Nation's highways.

In July 1984, Transportation Secretary Elizabeth Dole reissued Federal Motor Vehicle Safety Standard 208—the passive restraint standard. The new standard 208 is a positive effort and I commend Secretary Dole for her commitment to safety.

Nevertheless, I remain concerned that Americans are not receiving as much crash protection in their cars as technology will allow. The legislation I am introducing today, on behalf of myself and Senators MOYNIHAN, GORTON, and LAUTENBERG, the "Automobile Occupant Protection Improvement Act of 1985," takes steps to remedy this situation. This legislation will require all cars manufactured for sale in the United States to be equipped with front-seat airbags, using the following phase-in schedule:

That 10 percent of all automobiles manufactured on or after September 1, 1986; 25 percent of all automobiles manufactured on or after September 1, 1987; 40 percent of all automobiles manufactured on or after September 1, 1988; and 100 percent of all automobiles manufactured on or after September 1, 1989.

This phase-in schedule is the same as the schedule contained in Secretary Dole's 1984 passive restraint rule. My bill differs from the DOT rule in two respects.

First, the legislation requires installation of airbags in all cars by model year 1990; the DOT rule mandates installation of passive restraints—that is, airbags, automatic seatbelts, or energy-absorbing interiors. I have no doubt that many lives would be saved if Americans used passive restraints of any type. However, I believe that airbags are superior, proven technology; according to NHTSA estimates, airbags could save about 8,500 lives and prevent more than 130,000 injuries each year. Airbags provide unobtrusive protection for front-seat occupants involved in frontal and front-angle crashes. Airbags deploy only when they are needed—they do not inflate when cars go over bumps in the road, when front bumpers come into contact with objects at very low speeds, or when cars make sudden stops.

Second, the DOT rule revokes the passive restraint requirement if States representing two thirds of the population of the United States enact mandatory seatbelt use laws; my bill does not contain this contingency. While I believe that people should wear seatbelts, I am not convinced of the efficacy of mandatory seatbelt use laws. There is no doubt that some lives will be saved, as evidenced by New York's experience to date with its seatbelt law, and this is indeed a positive development. I am concerned, however, that unless States enact seatbelt laws with meaningful provisions, and follow this up with adequate enforcement efforts, we will not save as many lives as we could by requiring installation of airbags.

For example, the State of Missouri recently enacted a mandatory seatbelt use law whose requirements are so tepid and so innocuous that it basically amounts to a sham law. The Missouri bill provides for a maximum fine of $10 for front-seat passenger car occupants found not to be wearing a seatbelt. However, a police officer is not authorized under the Missouri law to stop someone only for a seatbelt offense—the police officer may only write a ticket for a seatbelt violation if the person has been stopped for some other traffic offense. Further, this $10 fine, small as it is, does not go into effect until July 1, 1987. The Missouri law also does not apply to persons who have a medical reason for failing to wear a seatbelt; acceptable medical reasons are not specified by the law.

Missouri is not the only State with such a seatbelt law. Other States have enacted laws with similar provisions and many others are considering such legislation. I seriously question the effectiveness of these laws. We should be encouraging States to enact meaningful laws, not ridiculous ones.

I am also concerned that if enough States enact seatbelt laws, with whatever provisions, to revoke the DOT rule's passive restraint requirements, the American consumer may never be able to buy on a widespread basis an automobile equipped with any type of passive restraint, much less an airbag. I am especially concerned about this lack of protection for Americans living in States without mandatory belt use laws—those States which make up the remaining one-third of the U.S. population.

Mr. President, I do not want to forestall the development of even better types of occupant crash protection. But neither do I want to deny consumers the effective crash protection that is available from airbags now. I firmly believe that airbag technology must be made available to American consumers as quickly as possible. This legislation will accomplish this vital goal.

Mr. President, I ask unanimous consent that the text of the "Automotive Occupant Protection Improvement Act of 1985" be printed in the RECORD in its entirety.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 864

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Automobile Occupant Protection Improvement Act of 1985".

PURPOSE AND FINDINGS

SEC. 2. (a) This Act is part of the continuing effort by Congress to address the critical highway safety problems facing this Nation.

(b) The Congress finds that—

(1) the Department of Transportation should be given specific direction as to actions to be taken to save lives and reduce injuries; and

(2) comfortable and convenient crash protection should be provided for occupants of new passenger automobiles.

DEFINITIONS

SEC. 3. For purposes of this Act, the term—

(1) "passenger automobile" means a motor vehicle with motive power, except that the term does not include a multipurpose passenger vehicle, a motorcycle, a bus, a truck, or a trailer designed for carrying 10 persons or less; and

(2) "multipurpose passenger vehicle" means a motor vehicle with motive power, other that a trailer, which is designed to carry 10 persons or less and which is constructed either on a truck chassis or with special features for occasional off-road operation.

AUTOMATIC CRASH PROTECTION

SEC. 4. Part A of title I of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1391-1410b) is amended by adding at the end thereof the following:

"Sec. 126. (a) Each manufacturer of passenger automobiles shall install front seat airbags in each passenger automobile manufactured for sale in the United States. Such airbags shall be installed in not less than—

"(1) 10 percent of all passenger automobiles manufactured on or after September 1, 1986;

"(2) 25 percent of all passenger automobiles manufactured on or after September 1, 1987;

"(3) 40% of all passenger automobiles manufactured on or after September 1, 1988; and

"(4) 100% of all passenger automobiles manufactured on or after September 1, 1989.

"(b) The Secretary, in carrying out the Secretary's responsibilities under section 210(c) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1941(c)), shall develop and disseminate data to inform the public about the performance and benefits of airbags.

"(c) For purposes of this section, the term—

"(1) 'passenger automobile' means a motor vehicle with motive power, except that the term does not include a multipurpose passenger vehicle, a motorcycle, a bus, a truck, or a trailer designed for carrying 10 persons or less; and

"(2) 'multipurpose passenger vehicle' means a motor vehicle with motive power, other than a trailer, which is designed to carry 10 persons or less and which is constructed either on a truck chassis or with special features for occasional off-road operation.".●

By Mr. MATHIAS (for himself and Mr. WARNER):

S. 865. A bill to award special Congressional Gold Medals to Jan Scruggs, Robert Doubek, and Jack Wheeler; to the Committee on Banking, Housing, and Urban Affairs.

PRESENTATION OF SPECIAL CONGRESSIONAL GOLD MEDALS

● Mr. MATHIAS. Mr. President, the Senator from Virginia, Mr. WARNER, and I join today in introducing a bill to authorize the President of the United States to award Congressional Gold Medals to Jan Scruggs, Robert W. Doubek, and John P. Wheeler III, in recognition of their initiative, leadership, and work in giving the Vietnam Veterans Memorial to the Nation.

The Congressional Gold Medal is one of this country's highest honors and has been awarded in recognition of extraordinary contributions to American society. It is in such company that Jan Scruggs, Bob Doubek, and Jack Wheeler belong.

Fifteen years ago, Jan Scruggs was an infantryman in the U.S. Army, fresh out of high school and dropped into the jungles of Vietnam and into some of the fiercest fighting in America's longest war. Though they never met Jan in Vietnam, Bob Doubek and Jack Wheeler were also young soldiers in that traumatic war. More recently, after the last Americans had left Saigon, these three veterans met and joined forces in the effort to provide a memorial to honor the men and women who served in the Vietnam war. Their effort has given the Nation a powerful symbol of healing and reconciliation after that bitterly divisive war.

Anyone who recalls their struggle knows that it was no easy task. There were a significant number of obstacles. But, somehow, the three men persevered in their vision.

Today, as a result of their dedication, the memorial exists as one of the most powerful—and most frequently visited—monuments in Washington.

Even in a city famous for its breathtaking sites, the Vietnam Veterans Memorial stands out. It is the final stop for hundreds of mothers, fathers, wives, and children each year who make pilgrimages to the solemn black granite slabs on which the names of their fallen loved ones are inscribed. There, many of them say, they have experienced a sense of reunion and a healing of emotional wounds that may have remained open since the war.

It stands in The Mall, which during the war so often served as the forum of opinion and dissent. Planted into the earth, it has become a symbol of the reconciliation this country has finally achieved—thanks in large part to the efforts of Jan Scruggs, Bob Doubek, and Jack Wheeler.

I can think of no better way to show our appreciation of Jan Scruggs, Bob Doubek, and Jack Wheeler than by awarding them Congressional Gold Medals. I am sure my colleagues will want to join in this effort, just as they unanimously supported the original resolution granting land for the memorial.●

Mr. WARNER. Mr. President, I am proud today to join my colleague, Senator MATHIAS, to recommend Jan Scruggs, Robert Doubek, and John P. Wheeler III to be the recipients of the Congressional Gold Medal for the tremendous service they have provided our Nation and its people.

As the president of the Vietnam Veterans Memorial Fund, Jan Scrugs has provided the realization of a dream, a tribute to our veterans who fought so heroically in the Vietnam war.

The immense pride in the honor of the Vietnam veteran is heartfelt.

In 1964, thousands of America's young servicemen and servicewomen began what would be an 8-year ordeal for our Nation.

Before the conflict ended, 57,414 of these young people lost their lives, and our citizens were divided in opinion over what had transpired on the battlefield and at home.

In 1982, the lengthy healing process from that war reached a significant milestone when the Nation's long-overdue recognition and appreciation for those whose service and sacrifice was realized in the ground broken for the massive granite and statuary tribute to all who had fought.

It was Jan Scruggs who initiated the general concept to express our gratitude and pride for the Vietnam veteran through a monument in the Nation's Capital. Once the effort gained momentum, he remained steadfast through out.

We must always remember that those who have the trust and responsibility of leadership of this Nation must never again send our brave young Americans into battle unless the Nation is prepared to stand solidly behind them and honor their service.

Jan Scruggs, Robert Doubek, and John Wheeler represent the highest values of our society—honor, heroism, and dignity.

Jan Scruggs was a soldier in the 199th Light Infantry Brigade and was wounded in action.

Robert Doubek and John Wheeler were also young soldiers who fought in the Vietnam war.

They came back to this country and fought hard for a tribute to memorialize their comrades, especially those who had given their lives to preserve those precious American values of freedom and liberty.

It is only right that we honor Jan Scruggs, Robert Doubek, and John Wheeler with Congressional Gold Medals as individuals who have honored and kept the highest values in our society for themselves and our Nation.

By Mr. ROTH (for himself and Mr. BENTSEN):

S. 867. A bill to amend title XIX of the Social Security Act to provide coverage for hospice care under the Medicaid Program; to the Committee on Finance.

MEDICAID COVERAGE FOR HOSPICE CARE

● Mr. ROTH. Mr. President, my colleague, Senator BENTSEN, and I are today introducing legislation to expand the availability of hospice care for those diagnosed as terminally ill. Congress has already recognized the value of this unique concept of care through enactment of legislation making hospice a Medicare-covered service. We propose to use this existing statute as the foundation for giving States the option to add hospice as a covered service under Medicaid.

Hospice has become increasingly popular as a humane and compassionate way to care for terminally ill patients and their families. Last year,

the Nation's 950 fully operational hospice programs served approximately 100,000 patients/families. Each day, 16,000 home care patients and 2,700 inpatients receive hospice care.

Major insurance carriers have recognized the potential cost savings of hospice when compared to the cost of traditional medical care for terminal illness. By 1984, many major insurance carriers had added some form of reimbursement for hospice services.

One of the Nation's largest employee benefits and actuarial firms conducted a group-benefits survey looking at the major types of group benefits provided to salaried employees in the United States. The survey asked 1,115 participants to identify cost control provisions they had instituted to help limit health care cost escalation. Hospice was included in a list of 12 possibilities. Forty-four percent of the respondents indicated that a hospice care benefit had been added as an alternative to traditional hospital care.

A number of studies have substantiated the cost effectiveness of hospice care, particularly in light of its emphasis on home versus inpatient care. The Congressional Budget Office estimated in 1982 that adding a hospice benefit would save the Medicare Program more than $100 million by 1987.

The time has come to add the Medicaid Program to the list of third-party payors which are providing this humane alternative. Cost savings will likely result, since many of the hospice services which are not otherwise covered by Medicare, outpatient drugs, for example, are already covered by the Medicaid Programs in many States. Therefore, the offsetting costs which CBO took into account in estimating savings to the Medicare Program should be lower in the case of Medicaid. I have requested an estimate from CBO for this legislation, and will make that information available when I receive it.

Several States have already passed legislation adding hospice as a Medicaid covered service and at least one State has sought to amend its State plan to include hospice coverage. The Secretary of Health and Human Services may not have the discretion to approve such requests without a lengthy rulemaking process, however. Therefore, it is appropriate for Congress to take steps to assure that the hospice alternative is made available as soon as possible to our low-income elderly and disabled citizens, who are most dependent on Government programs for their health care needs.●

● Mr. BENTSEN. Mr. President, I am pleased to join with my distinguished colleague from Delaware, Senator ROTH, in introducing a bill which would permit States to extend to Medicaid beneficiaries the option of choosing hospice care. As many of our colleagues are aware, hospice is an interdisciplinary approach to care for the terminally ill which is designed to address the needs of the patient and his or her family in a humane and cost-effective way. By avoiding recurrent hospitalization and emphasizing home-based care, hospice patients can remain in a familiar and supportive environment. The Congressional Budget Office estimated $100 million is savings to the trust fund when Congress added hospice services to the Medicare Program in 1982. Savings to the Medicaid Program should also result from allowing States to make this alternative available to beneficiaries.

In order to assure that participating providers maintain the high standards of care we have come to associate with this alternative, our bill adopts the Medicare definition of hospice. I am pleased to report that by February of this year, 165 hospices had become certified under the Medicare Program. In my home State of Texas, there is growing recognition of the value of hospice services and I am confident that the number of certified programs will continue to increase if reimbursement is maintained at an appropriate level.

Mr. President, in this era of patient dumping and spiraling costs of medical care, most hospices serve patients regardless of their ability to pay. Those hospices that are not subsidiaries of hospitals, nursing homes of home health agencies are particularly vulnerable when they accept patients who are uninsured or otherwise unable to fully finance needed care. Allowing States to reimburse for services provided Medicaid beneficiaries would have the effect of encouraging these programs to accept patients of modest means, thereby expanding the range of treatment options for all individuals. I encourage you, Mr. President, and my Senate colleagues to lend your support to this improvement in the Medicaid statute.●

By Mr. GRAMM:

S. 868. A bill to define allowable cost reimbursement under contracts of the Department of Defense; to control the cost of spare parts acquisition under Department of Defense contracts; to authorize greater financial and criminal penalties for false claims; to make inapplicable to the Department of Defense certain provisions of law that limit the ability of the Department of Defense to purchase labor competitively; to remove restrictions on the authority of the Secretary of Defense to contract out; and to authorize expedited procedures for losing or realigning military installations when the national budget provides for deficit financing of Federal Government operations; to the Committee on Armed Services.

DEPARTMENT OF DEFENSE EFFICIENCY AND ECONOMY ACT

Mr. GRAMM. Mr. President, I am today introducing the Department of Defense Efficiency and Economy Act of 1985. This legislation makes substantial changes in the way in which the Department of Defense does business. The bill will save American taxpayers hundreds of millions of dollars.

Many of the changes which this legislation makes are to repeal congressionally mandated inefficiencies in DOD operations. Other changes tighten up procurement practices in areas such as the submission of overhead charges by contractors and pricing of spare parts. Finally, the bill will permit the Secretary of Defense to rationalize the bloated DOD facility infrastructure by simplifying the procedures for closing unnecessary and wasteful defense installations.

If Members of the Senate are serious about cutting the fat in defense, and not the muscle, they should be willing to support these proposals. I ask unanimous consent that a copy of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 868

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Department of Defense Efficiency and Economy Act of 1985".

TITLE I—ALLOWABLE CONTRACT COSTS

REGULATIONS RELATING TO UNALLOWABLE INDIRECT COSTS

SEC. 101. (a) The Secretary of Defense shall, within 90 days after the date of the enactment of this Act, issue proposed regulations to amend those provisions of the Department of Defense Supplement to the Federal Acquisition Regulation dealing with the unallowability of contractor indirect costs. The amendments shall define in detail and in specific terms those general and administrative costs which are unallowable under contracts entered into by the Department of Defense. In developing specific standards of allowable costs, the Secretary shall consider whether the costs incurred benefit the United States or are necessary for the operation of the business. The amendments shall specify, at a minimum, that the following costs are unallowable:

(1) Advertising, other than for recruiting employees, acquiring scarce items, or disposing of scrap or surplus material.

(2) Dues paid to any social, country, or luncheon club, or any similar type of club or organization.

(3) Company furnished automobiles for personal use.

(4) Provision of transportation to and from work, unless the contractor can show that such transportation is necessary for security reasons.

(5) Use of corporate aircraft which has any personal benefit to the user.

(6) Contributions or donations, regardless of the recipient, including political contributions.

(7) Entertainment costs.

(8) Hotel expenses for accommodations other than a normal single or double room.
(9) Meal expenses while traveling in excess of amounts to be specified by the Secretary as being reasonable.
(10) Fines and penalties.
(11) Lobbying costs.
(12) First class air travel, unless no other travel option is available.
(13) Defense of fraud proceedings unless found not to be liable in any way for the alleged fraud.
(14) Gifts.

(b)(1) After final promulgation of the amendments required by subsection (a), if a contractor submits for reimbursement any general or administrative expense for which there is clear and convincing evidence that the expense is unallowable, the expense shall be disallowed and the total amount of general and administrative expense for which reimbursement is sought from the United States shall be reduced by 3 times the amount of the disallowed expense.

(2) The Secretary of Defense shall have the authority to make disallowances and to assess the specified penalty under the amendments. An action of the Secretary in exercising such authority shall be considered a final decision for the purposes of section 6 of the Contract Disputes Act of 1978 (41 U.S.C. 605) and shall be appealable in the manner provided in section 7 of such Act (41 U.S.C. 606).

(c)(1) If the Secretary determines that a contractor has consistently submitted for reimbursement general and administrative expenses for which there is clear and convincing evidence that the expenses are unallowable, the Secretary may impose, at his discretion, an additional monetary penalty on such contractor, except that such penalty may not exceed one-fourth of the amount of all general and administrative expenses for which reimbursement is sought under the applicable contract.

(2) An action of the Secretary under paragraph (1) shall be considered a final decision for the purposes of section 6 of the Contract Disputes Act of 1978 (41 U.S.C. 605) and is appealable in the manner provided in section 7 of such Act (41 U.S.C. 606).

(d) If a contractor submits for reimbursement by the Department of Defense any expense that was not actually incurred, such action shall be considered—

(1) a false claim under section 3729 of title 31, United States Code, and the remedies of such section (as modified by section 103(b) of the Act) shall be available to the Federal Government; and

(2) a false claim under section 287 of title 18, United States Code, and shall be punishable as provided in such section (as modified by section 103(a) of this Act).

REGULATION TO CONTROL PRICES THAT MAY BE PAID FOR SPARE PARTS

SEC. 102. (a) The Congress finds that the Department of Defense has in some instances paid unreasonably high prices for spare parts because—

(1) some parts have been built to overly detailed specifications;

(2) some parts have been designed and fabricated in such a manner that excessive engineering and manufacturing steps have been involved resulting in a price in excess of the intrinsic value of the part;

(3) some parts have been purchased in very small, and thus highly uneconomic, quantities;

(4) some parts have had inappropriate amounts of corporate overhead assigned to them, resulting in a price in excess of the intrinsic value of the part;

(5) some parts have not been purchased directly from the manufacturer, and thus the Government has unnecessarily paid an additional profit to the seller;

(6) some parts have not been purchased through a competitive process; and

(7) some parts have been sold with unreasonably high profits included in the price.

(b) Not later than 90 days after the date of the enactment of this Act, the Secretary of Defense shall report to the Committees on Armed Services of the Senate and House of Representatives on the specific actions taken by the Department of Defense to address the management problems identified in subsection (a). Such report shall evaluate the actions taken to determine whether the actions have been successful in remedying the identified management problems.

(c) In the event that the Secretary of Defense concludes that the management problems identified in subsection (a) have not been successfully remedied by actions of the Department of Defense, he shall—

(1) issue proposed regulations to limit the price that may be charged by defense contractors for spare parts; and

(2) submit proposed legislation to remedy the management problems indentified in subsection (a), as necessary.

INCREASED PENALTIES FOR FALSE CLAIMS IN DEPARTMENT OF DEFENSE PROCUREMENT

SEC. 103. (a) Notwithstanding section 287 of title 18, United States Code, the maximum fine authorized to be imposed under such section on a contractor of the Department of Defense who is guilty of a violation of such section by reason of the application of section 101(d) of this Act is $100,000.

(b) Notwithstanding section 3729 of title 31, United States Code, if a contractor is liable under such section by reason of the application of section 101(d) of this Act, the amount of the liability under that section shall be $2,000, an amount equal to 3 times the amount of the damages the Government sustains because of the act of the contractor, and costs of the civil action.

TITLE II— COMPETITIVE LABOR PURCHASE REQUIREMENTS

INAPPLICABILITY OF DAVIS-BACON ACT TO MILITARY CONSTRUCTION PROJECTS

SEC. 201. (a) Subject to subsection (b), the Act entitled "An Act relating to the rate of wages for laborers and mechanics employed on public buildings of the United States and the District fo Columbia by contrators and subcontractors, and for other purposes", approved March 3, 1931 (40 U.S.C. 276a-2), commonly referred to as the Davis-Bacon Act, shall not apply to the wages paid to laborers and mechanics for any work or services performed under any contract entered into on or after the date of the enactment of this Act for the construction of any project authorized by this or any other Act authorizing the construction of military projects.

(b) Subsection (a) shall apply only in the event the Senate and the House of Representatives agree to a first concurrent resolution on the budget for fiscal year 1986 that provides less than $312,300,000,000 in budget authority for function 050, National Defense.

PROHIBITION ON ESTABLISHMENT OF PAY RATES FOR PREVAILING RATE EMPLOYEES OF THE DEPARTMENT OF DEFENSE USING SURVEYS OF WAGES PAID OUTSIDE THE LOCAL WAGE AREA

SEC. 202. (a) Section 5343(d)(2) of title 5, United States Code, is amended to read as follows:

"(2) When the lead agency determines that there is a number of comparable positions in private industry insufficient to establish the wage schedules and rates, such agency shall—

"(A) establish the wage schedules and rates to be applicable to prevailing rate employees other than prevailing rate employees of the Department of Defense on the basis of—

"(i) local private industry rates; and

"(ii) rates paid for comparable positions in private industry in the nearest wage area that such agency determines is most similar in the nature of its population, employment, manpower, and industry to the local wage area for which the wage survey is being made; and

"(B) establish the wage schedules and rates to be applicable to prevailing rate employees of the Department of Defense only on the basis of local private industry rates.".

(b) The rate of pay payable to a prevailing rate employee employed by the Department of Defense on the day before the date of enactment of this Act may not be reduced by reason of the amendment made by subsection (a).

INAPPLICABILITY OF CERTAIN OVERTIME REQUIREMENTS OF THE WALSH-HEALEY ACT AND THE CONTRACT WORK HOURS AND SAFETY STANDARDS ACT TO THE DEPARTMENT OF DEFENSE

SEC. 203. (a) Subsections (b) and (c) of the first section of the Act entitled "An Act to provide conditions for the purchases of supplies and the making of contracts by the United States, and for other purposes", approved June 30, 1936 (41 U.S.C. 35), commonly referred to as the Walsh-Healey Act, shall not be applicable to the Department of Defense or to any contract of the Department of Defense to the extent that such subsections require a contractor carrying out the contract to pay an employee an overtime rate of pay for work done in the performance of the contract after completing more than 8 hours of work in any one day. A contract to which the first sentence applies shall include a provision requiring the contractor to pay an employee an overtime rate of pay for work done in the performance of the contract after completing more than 10 hours of work in any one day.

(b) Section 102 of the Contract Work Hours and Safety Standards Act (76 Stat. 357; 40 U.S.C. 328) shall not be applicable to the Department of Defense or to any contract of the Department of Defense to the extent that such section requires a contractor carrying out the contract to pay an employee an overtime rate of pay for work done in the performance of the contract after completing more than 8 hours of work in any one day. A contract to which the first sentence applies shall include a provision requiring the contractor to pay an employee an overtime rate of pay for work done in the performance of the contract after completing more than 10 hours of work in any one day.

(c) Subsections (a) and (b) shall take effect on October 1, 1985, and apply to any contract entered into carried out on or after such date.

TITLE III—MISCELLANEOUS COST SAVINGS PROVISIONS

REMOVAL OF RESTRICTIONS ON CONTRACTING OUT AUTHORITY

SEC. 301. Notwithstanding any other provision of law, the Secretary of Defense may contract for the performance of any service or activity by non-Government personnel if the Secretary determines that the perform-

ance of such service or activity by non-Government personnel would be cost effective and in the best interest of the national defense.

EMERGENCY BASE CLOSURE AND REALIGNMENT

SEC. 302. (a) Section 2687(a) of title 10, United States Code, is amended by inserting "and subject to section 2688 of this title" after "Notwithstanding any other provision of law".

(b) Chapter 159 of title 10, United States Code, is amended by adding after section 2687 the following new section:

"§ 2688. Emergency Base Closures and Realignments

"(a)(1) If the budget submitted to the Congress by the President for any fiscal year (pursuant to section 1105 of title 31) reflects a budget deficit for such fiscal year and the Secretary of Defense satisfies the notification requirement set out in paragraph (2), the Secretary, during any 24-month period following the submission of such budget, may close or realign any military installation without regard to any other provision of law that would prevent or delay such closing or realignment, including any restrictions on the disposal of specific real property and any restriction contained in any appropriation Act on the use of funds to close or realign any military installation.

"(2) Not later than 60 days before the date the Secretary of Defense takes any irrevocable action to effect or implement a closure or realignment of a military installation under paragraph (1), the Secretary shall notify the Congress of the plan to take such action.

"(b) The Secretary of Defense is authorized to design and construct such facilities as he determines are necessary to effect the closure or realignment of any military installation under the authority of this section and may use for the design and construction of such facilities any funds available to the Department of Defense for military construction.

"(c) In this section the terms 'military installation' and 'realignment' have the same meaning as provided in section 2687(d) of this title.".

(b) The table of sections at the beginning of such subchapter is amended by adding after section 2687 the following new item:

"2688. Emergency base closures and realignments.".

By Mr. MITCHELL (for himself Mr. BENTSEN and Mr. BUMPERS):

S. 869. A bill to provide that the pensions received by retired judges who are assigned to active duty shall not be treated as wages for purposes of the Social Security Act; to the Committee on Finance.

EXCLUSION OF RETIRED JUDGES ON ACTIVE DUTY FROM SOCIAL SECURITY ACT

● Mr. MITCHELL. Mr. President, the Social Security Amendments of 1983 addressed many of the critical problems facing the Social Security system. Social Security is now in a much healthier condition, and Congress can be proud of this legislation. I am concerned, however, that one minor provision included in the 1983 legislation has created a problem which I believe can have an adverse impact on the Federal judiciary.

Upon retirement, Federal judges can choose to enter senior status. When they do so, they voluntarily offer to continue performing their judicial services. These services are a major contribution to the Federal judiciary, as retired judges share the increasing workload of the Federal courts.

Title I of the Social Security amendments extends Social Security coverage to Federal judges. I do not disagree with that. What I do disagree with, however, is the provision that treats as wages, for purposes of the Social Security system, compensation paid to retired judges who continue in active duty. This creates significant financial disincentives for retired judges to continue their judicial work.

Most retired judges provide substantial services on a purely voluntary basis, making available their wisdom and experience for the effective discharge of the business of the courts without renumeration beyond that to which they are entitled by law without performing judicial services. Under the provision in the Social Security amendments, such retired judges will now be required to pay for the privilege of rendering judicial service in the following respects:

They will be required to make contributions to the Social Security fund in the amount of 7 percent of the first $37,500 of compensation starting January 1, 1986, and in increasing amounts thereafter.

They must forgo, between the ages of 65 and 70, the Social Security benefits which they earned, and to which they became entitled, by their pre-judicial employment.

Even after age 70, they must contribute to the fund so long as they continue to perform such voluntary judicial services. In most instances, this would mean for the rest of the lives of the judges.

By this redefinition of "wages," the compensation of such retired judges may likely again be subject to substantial local and State taxes on earned income. Presently, in such jurisdictions, the compensation of retired judges is not regarded as earned income.

Because of these disincentives, I am concerned that we run the risk of losing the services of many retired judges. To compensate for the loss of these services, Congress may well have to add additional judgeships to cope with existing caseloads, at a considerable greater expense. In addition to these undesirable effects on the judicial system and on the budget, this provision is unfair as it applies to current retired judges, who had agreed to continue service on terms that did not include Social Security coverage.

I believe that a more appropriate treatment would view compensation of retired Federal judges in active service as retirement income, not as earned income, and would acknowledge that these judges are performing their services voluntarily. This was the position taken in the Senate version of the Social Security legislation.

During the 98th Congress, I introduced legislation which became law, that delayed the implementation of the provision in the Social Security amendments affecting taxation of payments to retired Federal judges who continue to handle cases for 2 years. My bill would permanently restore the provisions of the law prior to the passage of the Social Security amendments of 1983. My legislation represents a more reasonable interpretation of the services provided by retired Federal judges.●

By Mr. MITCHELL:

S. 870. A bill to provide for Federal recognition of comprehensive State plans to promote the wise use and management of outstanding river resources; to the Committee on Energy and Natural Resources.

STATE COMPREHENSIVE RIVER PLANNING ACT

Mr. MITCHELL. Mr. President, today I am introducing legislation which will enable States and the Federal Government to work together in promoting the effective utilization and sound management of river resources.

The bill amends title 16 of the U.S. Code. The specific sections which the legislation would amend are part of the Federal Power Act. The heart of the proposal is a new section 803(a) to title 16. It would allow, but does not require, each State to develop a comprehensive plan, to be submitted to the Federal Energy Regulatory Commission [FERC] for review and approval. States without approved plans will continue to be treated as FERC now treats all States.

If approved by FERC, the comprehensive plan would be controlling in Federal licensing proceedings for hydropower projects in that State, similar to the Federal-State relationship that exists under section 307 of the Coastal Zone Management Act.

In many respects, this legislation should be viewed as an aid to FERC. Although the existing Federal Power Act, section 10(a) requires FERC to license dams in accordance with a comprehensive plan, nowhere in the existing statute is the term "comprehensive plan" defined and, as a result, the requirement now is largely ignored.

By giving meaning to the term, this bill will encourage long-range planning while it will discourage the current practice of licensing facilities on an ad hoc basis, dam by dam. The legislation will enable FERC to look at hydropower in a broader, more reasoned context.

If a State chooses to prepare a comprehensive plan, such a plan must meet certain minimum criteria set out in the bill. A review of the criteria shows that they are designed to establish the information necessary for the State and FERC to make an informed decision about where to strike the balance between river protection and development. For example, an inventory of outstanding river stretches is required, but so too is a projection of the States energy needs for 10 and 20 years and an explanation as to how such needs can be met at a reasonable cost.

Before approving a comprehensive plan, FERC must make certain findings. For instance, FERC would have to determine that the State has developed the plan in accordance with the rest of the act, after notice, and with the opportunity for full participation by relevant Federal and State agencies, local governments, and other interested public and private parties. The legislation would require a developer to certify that the proposed project complied with the FERC-approved State comprehensive plan. The State would have to concur with this certification.

A key point to keep in mind is that the so-called State comprehensive plan is without effect unleased approved by FERC. A plan which places too much of a States rivers resource off-limits to hydrodevelopment can be rejected by FERC. In other words, FERC will make the final judgment on whether a proposed State plan is compatible with the national interest. As a result, my legislation maintains Federal control and reserves to FERC the ultimate authority to license dams.

I believe the legislation strikes a beneficial public policy balance by allowing the States to undertake greater river resource conservation planning, as many States now are doing, and the Federal Government to retain the ultimate licensing power it must possess to preserve the integrity of important Federal environmental laws including the National Environmental Policy Act, the Fish and Wildlife Coordination Act, the Clean Water Act, and others. Such Federal authority is necessary, in my judgment, if we are to maintain the quality and use of water flowing from one State into another.

In closing, Mr. President, I want to make just a few comments about the development of this legislation. The bill introduced today is identical to one I introduced in the 98th Congress, S. 2361. That bill was introduced at the request of Maine's Governor, Joseph Brennan, who has taken a national leadership role in the area of rivers resource planning as a result of his role in the development of a sound, coherent rivers policy in Maine.

But while Maine was in the forefront of recognizing the need for FERC to utilize a comprehensive plan when licensing hydroprojects, the issue is not limited to Maine, or even the Northeast. The prolems stemming from the present manner in which FERC licenses hydroprojects are apparent nationwide.

It is my hope that this legislation can lead to the resolution of the present ad hoc nature of FERC's licensing procedures which too often ignores the knowledgeable voice of State governments regarding the most prudent course to follow in the licensing of hydroprojects within that State in order that this Nation can pursue the wise and best development of our rivers resources.

I ask unanimous consent that a copy of the legislation be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 870

Be it enacted by the Senate and House of Representatives of the United States of America assembled, That this Act be cited as the "State Comprehensive River Planning Act."

SEC. 2. Section 802, of title 16, United States Code is amended by striking subsection (c) and inserting in lieu thereof the following new subsections:

"(c) A certification that the proposed project complies with the State's comprehensive plan, and that such activity will be conducted in a manner consistent with the plan, where the proposed project is within a State or States which have a comprehensive plan which has been approved in accordance with section 803(a). At the same time, the applicant shall furnish to the State or its designated agency a copy of the certification, with all necessary information and data. Each State shall establish procedures for public notice in the case of all such certifications and, to the extent that it deems appropriate, procedures for public hearings in connection therewith. At the earliest practicable time, the State, or its designated agency shall notify the Commission that the State concurs with or objects to the applicant's certification. If the State or its designated agency fails to furnish the required notification within ninety days of receipt of its copy of the applicant's certification, the State's concurrence with the certification shall be conclusively presumed. No license or exemption shall be granted by the Commission until the State or its designated agency has concurred with the applicant's certification or until, by the State's failure to act, the concurrence is conclusively presumed.

"(d) Such additional information as the Commission may require.".

SEC. 3. Section 803 of title 16, United States Code, is amended by striking subsection (a) and inserting in lieu thereof the following new subsection:

"STATE COMPREHENSIVE PLANS

"(a)(1) That in order to facilitate the licensing of water power projects under this Act, while at the same time according to the States their legitimate role in controlling the future of their waterways, any State may submit to the Commission for its approval a comprehensive plan allocating the use of its waterways for the use or benefit of interstate or foreign commerce, for the improvement and utilization of waterpower development, and for other beneficial uses, including flood control, industrial and agricultural water use, recreational, ecological, historical, commercial fishery, and esthetic purposes. Within ninety days of receipt by the Commission of a certified copy of such plan, the Commission shall approve or disapprove the plan. In order for a State comprehensive plan to be approved by the Commission, the plan shall include at a minimum—

"(A) the identification of rivers and river segments deserving special protection based upon an analysis of each river's composite recreational ecological, geologic, hydrologic, historic, commercial fishery and esthetic resource values, in at least two categories:

"(i) rivers and river segments which are of greater than statewide significance because the aforementioned values are outstanding or rare when considered in a regional or national context; and

"(ii) rivers and river segments which are of statewide significance because the aforementioned values are outstanding or rare when considerd in a statewide context.

"(B) a State hydropower plan which shall include:

"(i) a description of current and projected energy supplies which may include consideration of applicable interstate energy plans;

"(ii) energy demand projections for the succeeding ten and twenty years including the assumptions on which such projections are based;

"(iii) an analysis of the contribution new hydropower will make to the State's energy supply and the likely alternative energy sources to new hydropower;

"(iv) identification of existing and potential hydropower project sites; and

"(v) identification of possible State actions to facilitate the development of hydropower wherever appropriate.

"(C) a fisheries management plan which shall include the identification of existing and potential hydropower sites, the expected fish passage requirements necessary to support a substantial commercial or recreational fishery, and the water flows necessary to maintain and protect water habitats.

"(D) the provision that no new dams shall be built on river segments of greater than statewide significance and that additional development or redevelopment of dams existing on these segments be designed and executed in a manner that does not diminish the significant values of these river segments; and the consideration of protective measures to enhance the resource values of river segments of outstanding statewide significance.

"(E) the identification of any State actions necessary to implement the plan and a schedule for taking such actions.

"(2) That prior to granting approval of a comprehensive plan, the Commission shall find that—

"(A) the state has developed the plan in accordance with this title, after notice, and with the opportunity of full participation by relevant Federal agencies, State agencies, local governments, and other interested parties, public and private;

"(B) the State has held public hearings in the development of the comprehensive plan;

"(C) the plan and any changes thereto have been reviewed and approved by the Governor; and

"(D) the State has the authorities necessary to implement the plan.

"(3) That comprehensive plans shall be reviewed and updated at least every five years though a State may amend its plan subject to approval by the Commission at any time. Any amendment must be the subject of a public hearing conducted by the State before it may be submitted to the Commission for approval.".

By Mr. SPECTER:

S. 871. A bill to prohibit trade with Libya; to the Committee on Finance.

TO PROHIBIT TRADE WITH LIBYA

Mr. SPECTER. Mr. President, today I am introducing legislation to stop all U.S. trade with Libya because of that country's involvement in international terrorism.

It is a direct bill that will send an unmistakable message: the United States will not tolerate states sponsoring terrorism.

It may come as a surprise to many Americans that between 1981 and 1984, the United States exported over $1½ billion worth of goods to Libya and imported more than $6 billion worth of goods from Libya. Trade with Libya actually increased in 1984 over 1983 levels. Exports for 1984 were up to $200 million from $190.9 million in 1983, and imports rose from less than $1 million—$0.9 million—in 1983 to $10 million in 1984.

These numbers are not terribly high relative to our trade with other countries, but the question must be asked: Why trade with Libya at all?

I put that question to Secretary of State George Shultz during his appearance before the Foreign Operations Subcommittee on March 7, 1985, and he agreed that we should not be trading with Libya at all. He testified that he would support legislation to stop all trade with Libya, and I told him I would introduce such legislation.

Moreover, I have urged Secretary Shultz to redouble his efforts to forge a unified, international boycott of Libya and other states sponsoring terrorism. Clearly a joint effort will be far more effective in pressuring Libya to cease its nefarious policy of terror, but the United States should take the leadership role by ceasing trade unilaterally now.

Anyone who questions the need to take strong action against Libya need only review the words of Mu'ammar Qadhafi, the dictator of Libya. In a speech marking the seventh anniversary of his revolution, Qadhafi spoke about the Beirut bombings that claimed the lives of over 260 U.S. Marines, and bragged that—

> The defeat the Americans suffered in Lebanon is not less than its defeat in Vietnam * * * the Marines, who can land and occupy any place in the world—they were dealt a powerful blow by the blowing up of the U.S. and French headquarters and were forced to leave.

Qadhafi went on:

> If we are able—we the revolutionary forces, the Libyans, the steadfast Syrians, and Palestinian resistance—to overthrow the May 17 Agreement (the Lebanese-Israeli disengagement agreement) it would mean we have the power to overthrow the Camp David Agreement by the Liberation of Egypt.

Qadhafi is clearly bent on the destruction of Egyptian President Mubarak and President Nimeiri of Sudan. "They are the agents of America," he said in his speech:

> The ones who enter Camp David and those who welcome Mubarak, who is head-to-toe sinking in treason. They entered the list of Sadat, the Camp of Shame, which must be liquidated either individually or in the form of a revolution against their regime.

Nor is the United States assured that it is immune from this threat of state-sponsored terrorism. Consider the words of Qadhafi in a speech on June 11:

> We have no alternative but to resist America by every means. If we have to export terrorism, we will export terrorism to it. We are capable of exporting terrorism to the heart of America. We are also capable of physical liquidation, destruction, and arson inside America.

"The dogs of America," said Qadhafi, "will be killed."

More recently, Qadhafi told a Black Muslim convention here that black soldiers in the U.S. military should desert and fight against "your racist oppressors" and establish a separate nation. "This imperialist country must be destroyed," Qadhafi said. "We are ready to give you arms because your cause is just."

Libya provides arms and funding for numerous terrorist organizations. A recent study by the Rand Corp. notes that "Qadhafi is reputed to have given so much money to the PLO in the past that nearly half of the weapons it used in Lebanon were purchased with Libyan funds." The study explains that Libyan funding has since been reduced: "contributions have subsequently been selectively parceled out to those member-groups who both reflect Libya's hardline policy on Lebanon and were willing to sign a pledge promising to carry on the struggle against Israel." Those factions that did so in 1982 were given a total of $9.5 million.

In addition, it is reported that there are five training centers in Libya, which are havens for terrorists. Forged passports and the like are available in what one commentator has called the "world trade center for terrorism."

Ambassador Anthony C.E. Quainton, then Director of the State Department's Office for Combatting Terrorism told the Senate Committee on Foreign Relations on June 10, 1981, that—

> * * * the government of Colonel Qadhafi is the most prominent state sponsor of and participant in international terrorism. There is a clear and consistent pattern of Libyan aid and training to almost every major international terrorist group, ranging from the Provisional Irish Republican Army to the Popular Front for the Liberation of Palestine and every group in between * * *.

Press reports have linked Libya to the Basque ETA, Japan's Red Army, Italy's Red Brigade, and Moslem insurgents in Thailand, Indonesia, Malaysia, and the Philippines.

On November 27, 1984, the Foreign Operations Subcommittee held, at my request, hearings on the implementation of current laws restricting trade with states sponsoring terrorism. Specific language on sanctions against governments that support international terrorism is found in several different provisions of law. Chief among these laws are the Export Administration Act, the Arms Export Control Act, the Foreign Assistance Act, and the Trade Act of 1974. Various sections of other laws, including foreign assistance appropriations acts are also applicable to this problem.

Ambassador Oakley, Director of the Office for Counter-Terrorism and Emergency Planning testified that despite these laws, a general embargo is in effect against only North Korea, Vietnam, Kampuchea, and Cuba. Libya, Syria, Bulgaria, South Yeman, and Iran are on a list of "states sponsoring terrorism" to which trade is restricted, but not prohibited.

Thus, the need for this legislation. Despite current trade restrictions, $200 million worth of commodities were exported to Libya last year. And some 1,000 Americans continue to work there.

Aside from the apparent hypocrisy of condemning Libya's ties to terrorism while continuing to provide them U.S. goods, the continuing U.S. presence in that country undermines our ability to take strong action against this menace.

When the issue arose about some retaliatory action against Libya after the British policewoman was killed, the immediate response arose that if any action were taken by Great Britain or retaliatory action by the United States, that there would be at risk our 1,000 citizens and some 30,000 Europeans.

In a letter to Secretary Shultz on February 25, 1985, I urged a cutoff of trade with Syria and Libya, noting recent reports of their connection with Abu Nidal, the nefarious Palestinian terrorist—considered by many to be a leading figure in international terrorism over the past decade. On November 20, 1984, the Libyan press agency, Janaa, said Abu Nidal had been recieved by Qadhafi.

I emphasized in the letter that—

> * * * We should abandon the fallacy of trade restrictions and cease all trade with these nations, simultaneously pressing our

allies to join us in a unified international boycott of states sponsoring terrorism.

At the same time, the President should call for an international meeting to consider a cooperative strategy for treating terrorists as the criminals they are, including establishing terrorism as a crime against the law of nations punishable by any country that captures the terrorist, the possibility of establishing an international criminal tribunal along the lines of the Military Tribunal at Nuremberg following World War II, and amending the Vienna Convention to make it clear that "diplomats" who murder—such as those involved in the Libyan shootout in London last year—forfeit any claim to diplomatic immunity. I have proposed legislation to achieve these objectives * * *.

Ultimately, we should consider completely cutting off trade with all countries determined to be sponsoring terrorism. But Libya, as the most notorious, is a logical place to start.

We cannot continue to deal with the likes of Muammar Qadhafi. The time to stop is now.

I ask unanimous consent that the text of this bill and accompanying letters be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 871

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) notwithstanding any other provision of law, no article grown, produced, extracted, or manufactured in Libya may be imported into the United States.

(b) Notwithstanding any other provision of law, no goods or technology, including technical data or other information, subject to the jurisdiction of the United States or exported or imported by any person subject to the jurisdiction of the United States, may be exported to Libya or imported from Libya.

(c) For purposes of this Act, the term "United States" includes territories and possessions of the United States.

U.S. SENATE,
Washington, DC, December 6, 1984.

Hon. GEORGE P. SHULTZ,
Secretary of State,
Department of State, Washington, DC.

DEAR MR. SECRETARY: As you may recall from our conversation on November 28th at the Majority Leader's dinner, I am very much concerned that the U.S. government continues to license the export of industrial equipment, worth 191 million dollars in 1983, to Libya despite that state's open support of international terrorism.

On November 27th, Senator Kasten and I conducted a hearing before the Appropriations Subcommittee on Foreign Operations at which Ambassador Oakley and other State Department representatives admitted the essential facts about continued trade relations with terrorist states. As I understand it, the rationalization is that Libya, or other countries, could possibly obtain similar equipment from other nations if the U.S. denied the requisite licenses. I think this argument is backwards. The U.S. should deny licenses and should pressure our allies to do likewise. It seems clear that we cannot make this case as long as we are making the sales. Nor can we say that U.S. prosperity or that of any U.S. firm is materially dependent on trade with Libya.

I urge you to initiate an immediate review of the export policies of the State Department regarding terrorist states.

Finally, I am considering proposing amendments in the Foreign Operations Appropriations Subcommittee next year to reduce U.S. aid (or restrict trade) to states such as Greece and France unless they make changes to prevent repetition of recent incidents where known terrorists were released from custody on questionable and technical grounds, when those individuals could and should have been kept in custody.

I would appreciate your report on the export policies, as well as your reaction to my proposal on limiting aid.

Sincerely,

ARLEN SPECTER.

U.S. DEPARTMENT OF STATE,
Washington, DC, December 31, 1984.

Hon. ARLEN SPECTER,
U.S. Senate.

DEAR SENATOR SPECTER: I am replying to your letter to Secretary Shultz concerning U.S. trade policy toward Libya and other countries that engage in state-supported terrorism or that do not cooperate with USG efforts to prosecute known terrorists.

As Ambassador Oakley underscored in testimony before your Committee, this Administration at the highest levels has attached great importance to the problem of terrorism, and has sought to develop policies that serve to defend US personnel, facilities and interests from terrorist attacks. In addition, we have actively pursued greater international cooperation in combatting terrorism.

As part of our policy toward countries that provide support for terrorism, we have imposed foreign policy export controls designed to prevent a US contribution to the ability of those nations to engage in or support terrorist activity. Export controls on Libya are the tightest we maintain on any destination, with the exception of the total embargoes in place for Cuba, Vietnam, Kampuchea and North Korea. Our Libyan controls are tighter than our controls on the Soviet Union. We deny export licenses for all munitions items. Furthermore, we generally deny export licenses for equipment and technology controlled for national security purposes, oil and gas related equipment and technology not readily available outside the US, aircraft and related parts and components, nuclear related equipment and technology, and several other categories of items. We believe these controls enable us to prvent a US contribution to Libya's ability to pursue policies contrary to the US National interest.

Our Libyan export controls are unilateral; other nations supply most of the items we deny. We have had some success gaining allied support for our policies in the nuclear and munitions areas. Beyond this, we see no indication our allies are willing to join us in economic sanctions against Libya. Their position is based on a belief that economic sanctions are not effective in exerting pressure to influence the behavior of other governments, and that isolating Qadhafi drives him deeper into the arms of the Soviets. Although we see little likelihood that other countries will join us in sanctions, we will continue to take every appropriate opportunity to reiterate to our allies and other countries with which we have influence our position regarding economic sanctions against Libya. And, we will maintain close consultations with our allies to design other measures to combat terrorism.

Regardless of the actions of others, we believe it is important that the US maintain tight controls on exports to terrorism supporting states such as Libya. At a minimum, they show we are willing to pay a price to demonstrate our opposition to the policies of those nations.

The use of unilateral foreign policy export controls involves, however, difficult tradeoffs between our international economic and political concerns. While perhaps no major corporation is dependent for its survival solely on exports to countries subject to the anti-terrorism export controls, the effect of our export controls (which entail third country obligations on re-exports) can be significant. With regard to Libya, for example, our present controls cost American exporters several hundred million dollars a year in foregone sales and thousands of lost US jobs.

We have continued to allow exports of certain non-strategic, non-military items to Libya, and the other terrorism supporting states. This policy is the result of weighing the numerous, complex factors which must be addressed in any such decision, including the Congressionally-mandated factors of Section 6(b) of the Export Administration Act of 1979. Among the factors we must consider in imposing or expanding export controls are 1) the probability that controls will achieve the intended foreign policy purpose, in light of other factors, including the foreign availability of similar goods; 2) the reaction of other countries to the imposition or expansion of US export controls; and 3) the likely effects of proposed controls on the export performance of the US, and on the international reputation of the US as a reliable supplier, and on individual companies and their employees and communities, including the effects of the controls on existing contracts.

Our export policy toward Libya and the other terrorism supporting states is not static. These policies are under constant review which could result in additional US restrictions in the future should events so dictate.

On the separate question of our efforts to gain international support for prosecution of known terrorists, we have asked the governments of Greece and France to keep us informed of their actions taken in this area. In the case of Faud Hassen Shara, arrested by the Greek police in mid-April, the US provided the Greek government with firm evidence of his attempt to place an explosive device on an international passenger airliner. After Greek officials released shara, stating that the evidence of terrorist activity was insufficient, the US made strong protests against the release both here and in Athens.

We have made clear on numerous occasions to many governments, including the Greek and French, the USG position that all civilized countries must cooperate to eliminate terrorism. We have pressed the Greeks specifically for progress in solving terrorist attacks against two US military personnel in Athens. And we have shared with the French and others our strong views on the need to ensure that the full weight of available law enforcement measures is brought to bear on international terrorism.

Stong commercial ties and security assistance programs with France and Greece respectively, form an important part of US relationships with these countries, and bring significant benefits to the US. Moreover, as

members of the Atlantic Alliance, both countries contribute to the defense of Europe. US security assistance to Greece, in particular, helps that country fulfill its NATO responsibilities, contributes to achieving NATO goals, and provides an incentive for Greece to continue procurement of US equipment.

Against this background, we must keep in mind that Greece and France are important allies. Our relationships with both countries have endured because they are based on common values. Differences in the handling of individual matters should not be allowed to obscure this basic alliance, or to provoke us into excessive responses that could interfere with our efforts to engage in a constructive dialogue with these governments.

We welcome the attention you have given to this issue and we will continue to work closely with the Congress to strengthen measures to combat terrorism.

Sincerely,

W. TAPLEY BENNETT, Jr.,
Assistant Secretary,
Legislative and Intergovernmental Affairs.

U.S. SENATE,
Washington, DC, February 25, 1985.

Hon. GEORGE P. SHULTZ,
Secretary of State,
Department of State, Washington, DC.

DEAR SECRETARY SHULTZ: A February 22 New York Times article quoting a Paris magazine interview with Abu Nidal, the nefarious Palestinian terrorist, has dramatically reinforced my grave concerns about the threat of state-sponsored terrorism and its impact on Middle East peace.

Nidal, who was reported to have died last November, was quoted as saying that he planned new terrorist attacks against Americans this year and that his organization, the Fatah Revolutionary Council, has "decided to execute King Hussein of Jordan."

During my most recent visit to that region last August, I met with leaders of a number of key Arab nations, including King Hussein, and the pervasive fear of assassination that haunted these men was palpable. It is a fear I could well understand, having met with Bashir Gemayel in Lebanon days before he was assassinated. All other efforts at peace in the Middle East are futile if individuals like Nidal and the nations that harbor them go unpunished.

The Nidal saga demands an immediate response from all civilized nations, spearheaded by the U.S. It is a very serious matter if this notorious criminal has in fact convinced the West of his death while continuing to plot his heinous crimes, many, he boasts, aimed at Americans. Perhaps most troubling is that he can state his violent intentions so confident that he can carry them out with impunity.

I intend to request hearings to consider stepped-up intelligence and operational cooperation with our allies to pursue and prosecute terrorists worldwide. In addition, I believe we should examine our own counterterrorism intelligence capabilities and efforts, to ensure that we are doing all we can unilaterally.

I have already questioned the CIA on whether the U.S. knows who is responsible for the bombings of American facilities that claimed so many lives in Lebanon and who is behind the Kuwaiti highjacking during which two Americans were murdered and where these perpetrators may be found today. It is imperative that we promptly assess what we do know, and promptly discover what we do not.

Syria and Libya, both of which are implicated in the Nidal story as places of refuge for this terrorist, are already listed by the State Department, along with Bulgaria, Iran, and South Yemen, as states subject to trade restrictions because of their ties to terrorists. Yet last year we exported $104 million worth of goods to Syria and an even higher level to Libya. We should abandon the fallacy of trade "restrictions" and cease all trade with these nations, simultaneously pressing our allies to join us in a unified international boycott of states sponsoring terrorism.

At the same time, the President should call for an international meeting to consider a cooperative strategy for treating terrorists as the criminals they are, including establishing terrorism as a crime against the law of nations punishable by any country that captures the terrorist, the possibility of establishing an international criminal tribunal along the lines of the Military Tribunal at Nuremberg following World War II, and amending the Vienna Convention to make it clear that "diplomats" who murder—such as those involved in the Libyan shootout in London last year—forfeit any claim to diplomatic immunity. I have proposed legislation to achieve these objectives.

There is a growing evidence that terrorists are uniting in their violence. Western Democracies must unite in response. I would like to resume the discussions of these matters that we started last fall.

Sincerely,

ARLEN SPECTER.

By Mr. BOSCHWITZ:

S. 872. A bill entitled the "Women's Small Business Ownership Act of 1985"; to the Committee on Small Business.

WOMEN'S SMALL BUSINESS OWNERSHIP ACT

● Mr. BOSCHWITZ. Mr. President, I am introducing a bill to establish a National Commission on Women's Small Business Ownership. The purpose of the Commission will be to study ways to improve the business climate for women business owners. The Commission would be appointed for 2 years at a cost of $2 million, report its findings, and then expire. Similar legislation was introduced in the House by Congressman MOODY during the last session of Congress, hearings were held and the bill was reported out of the Small Business Committee.

You hear and read a lot about the difficulties encountered by women business owners, but there is very little statistical data available. The most recent statistics available are Census Bureau data from 1977 to 1980. That data showed that over that period the average net income of female-operated sole proprietorships continued to stay at about 31 percent of the average for male-operated sole proprietorships. The number of businesses owned by women increased 32 percent from 1977 to 1980, while business owned by men only increased 11 percent.

This Commission will help fill the void in statistics since 1980 by not only collecting available data but also reviewing data-collecting procedures and identifying gaps and discrepancies. The Commission will also review all existing Federal initiatives relating to women-owned small businesses and Federal roles in aiding and promoting women-owned small businesses. This bill directs the Commission to focus on the special problems of socially and economically disadvantaged women in owning small businesses. Finally, the Commission would be required to make recommendations based upon its findings. The recommendations should include private sector and Federal initiatives to assist women in small business ownership.

President Reagan has taken some important steps to help promote women entrepreneurs and to improve the business climate for women. He reinstituted the Interagency Committee on Women's Business Enterprise to coordinate the efforts of the various Federal agencies in assisting women business owners. The President established a Presidential Advisory Committee to advise the President and the Small Business Administration concerning the status of women-owned businesses. Probably the most innovative step taken by President Reagan was to initiate a series of conferences for women entrepreneurs to provide business skills training for women business owners. This Commission would complement the initiatives taken by President Reagan by serving as a review body of all efforts on behalf of women business owners.

As one of the few businessmen in Congress, and one of very few to have started a business from scratch, I know all too well the difficulties in owning a business. To succeed in business, particularly to start a business, I had to borrow from banks, approach new suppliers, convince landlords to rent me buildings, fight with government at various levels, and overcome many other obstacles. For women, accomplishing all of those things would have been harder. For a black, Hispanic, or Hmong it would have been harder as well, and if I had been a woman and a member of one of these minority groups it would have been harder still. One of the basics of the free enterprise system is access. All should have equal access to our economic system. We are not yet close to achieving economic parity in the marketplace and the pace at which we move is not rapid enough, especially considering the number of people affected. So barriers must be broken down, barriers—economic and others—that deny people equal access to treatment in our society.

The Commission established by this bill will help to identify those barriers and help us, both the Government and private sector, to break down those barriers.●

By Mr. CHAFEE (for himself, Mr. STAFFORD, and Mr. INOUYE):

S. 873. A bill to amend title XIX of the Social Security Act to assist severely disabled individuals to attain or maintain their maximum potential for independence and capacity to participate in community and family life; to the Committee on Finance.

COMMUNITY AND FAMILY LIVING AMENDMENTS

● Mr. CHAFEE. Mr. President, in his State of the Union Address, President Reagan said:

> This Government will meet its responsibility to help those in need. But policies that increase dependency, break up families, and destroy self-respect are not progressive, they are reactionary * * * let us resolve that we will stop spreading dependency and start spreading opportunity; that we will stop spreading bondage and start spreading freedom * * * There must be no forgotten Americans.

Nowhere are these words more appropriate than when they are applied to citizens who have mental and/or physical disabilities.

The legislation I am introducing today stands for all of the ideals held dear by the citizens of this country. It honors the family by giving Americans the support they need to keep their families intact. It rediscovers the values of freedom, meaningful work, and the neighborhood by giving the developmentally disabled what they have long been denied—an opportunity to participate in the pursuit of these ideals.

Mr. President, 2 years ago, I introduced a bill, S. 2053, the Community and Family Living Amendments of 1983. Today I am offering a substantially revised version of that legislation. I ask that a summary of the bill, as well as the bill itself, be printed in full in the RECORD immediately following my statement.

The legislation I introduced during the last session of Congress, S. 2053, would have redirected all Medicaid funding from larger facilities for the developmentally disabled to community-based services such as group homes and in-home assistance, like respite care.

That bill was extremely controversial. In my office alone, we received almost 10,000 letters on the issue, many of which suggested revisions. Two hearings were held in the Finance Committee on the legislation. We heard from a variety of individuals representing parents, program experts, State administrators, institutions workers and directors, group home directors, and the disabled themselves.

Through these hearings and the scores of letters and meetings with individuals and groups, I found that there were five major provisions in S. 2053 which many individuals and organizations were concerned about: First, the total phaseout of Medicaid dollars from facilities with more than 15 beds; second, the 10-year time period over which that phaseout would take place; third, the size of community living facilities; fourth, the broad definition of the eligible population; and fifth, that there was no provision to address the needs of the so-called residual population; that is, those individuals who some contend could never be served in any facility other than a large one.

When I introduced S. 2053, I stressed that it was not carved in stone. It was simply a first step in the discussion of what the best system of care for the developmentally disabled should look like. I believe that the bill I am introducing today addresses many of the major concerns raised last year, with three new provisions.

First, the definition of a severely disabled individual in the original legislation was too broad and difficult to work with. Consequently, I have redefined the eligibility definition as those severely disabled individuals who have a disability, as defined in section 223(d) of the Social Security Act, which was manifest before the age of 35. The definition will also include children or youths who are under the age of 21 at the time the bill is enacted, who have a primary diagnosis of mental illness. This definition substantially narrows the eligible population.

Second, the concern that 10 years was not an adequate period of time for States to develop a quality community-based service system seemed to be reasonable. Consequently, I have changed that provision to require that the phasedown, as described below, be completed by the year 2000.

Third, I recognize the concerns of some individuals that a complete phaseout of Medicaid dollars from large facilities may in fact be too extreme an idea for many to accept. There are concerns that some service systems are not ready to support the most severely disabled people in smaller facilities in the community and that there may be a need to rely on some larger facilities. Having seen even the most profoundly disabled and medically fragile individuals thriving in small community-based settings, I do not agree that these large facilities are necessary; however, I am willing to recognize the concerns of others. Consequently, I have expanded the grandfathering clause to include facilities with up to 15 beds and cluster homes—three homes which would meet the definition of a community group home but for the fact that they are adjacent to each other. I have also added a provision which would allow the States to retain some Medicaid dollars to spend in larger facilities.

This new provision would work in the following manner: Each State would choose a base year for the purposes of this provision. Fifteen percent of the funds used by the State during this base year for the care of individuals with severe disabilities as defined in the bill would be available to the State for services which do not meet the definition of community-based services outlined in the bill. For example: State X chooses 1980 as its base year. In that year, it spent $1 million through the Medicaid Program to provide services to severely disabled individuals in facilities with over 15 beds. State X could spend up to $150,000—15 percent of $1 million—each year for services to severely disabled individuals provided in facilities which do not meet the definition of a community living facility or which are not provided in a natural, adoptive, or foster care family home. This dollar amount would be adjusted annually for inflation.

For each individual currently being served in a facility which does not qualify as a community or family living facility, the Federal matching rate would be reduced by 4 percent per year for no more than 10 years. For example, State X has a 50-50 matching rate, the percentage of the matching rate would decrease by no more than 40 percent over 10 years. The State would then receive a 30-percent match for that individual in a facility which is not a community or family living facility.

One other major change is included in the new bill which merits special mention. Many individuals and groups who wrote to or met with me made the point that individual and family support services are the most critical need for individuals trying to live in the community independently and for families who wish to care for their severely disabled relatives at home. I have therefore added this service as one of the three services which are required to be offered by the State in order to receive Medicaid dollars. Without this assistance, many severely disabled individuals are denied the opportunity to live in the community and are forced to live away from their families in nursing homes or other congregate housing situations which are more expensive. The definition of "individual and family support services" in the legislation is very broad. During the hearing process, a clearer definition will evolve.

Mr. President, legislation of this nature is essential. A policy change at the Federal level is long overdue. Federal Medicaid funds flow primarily toward large facilities. In fiscal year 1984, the total amount of State and Federal expenditures for this population amounted to $7.3 billion. Of that amount, $4.3 billion was spent in facilities of over 15 beds. The reason for this has more to do with what Medicaid will pay for than what system of care is best.

Since 1977, less than 20 percent of our ICF/MR dollars have gone to support persons with mental retardation/developmental disabilities in the community; the balance has been spent to keep people in institutions. While there is a great deal of interest in supporting people in the community and removing the emphasis on institutional care, there is much variation in the rate at which various States approach the task. Since 1977, more than one-half of the residents of large facilities in Vermont, Michigan, Ohio, and Nebraska have returned to the community. In other States, however, less than 10 percent of this population has returned to society. Three States, Louisiana, Tennessee, and Mississippi, have actually increased the number of persons living in institutions in the last 7 years.

This legislation is an attempt to encourage all States to move in the direction of allowing individuals with developmental disabilities to live in the community, either at home, on their own, or in a group home. The legislation makes this possible by providing resources to the States to offer a better level of care than that available in most larger facilities. In addition, I expect that for most people, this system of care will be better and less expensive.

In fiscal year 1984, there were 110,000 developmentally disabled individuals living in institutions for the mentally retarded or developmentally disabled. These institutional placements cost a total of $4.3 billion, or an average of $40,000 per person per year. There are entire families living on much less than that in this country today. It stands to reason that with that type of expenditure, great and innovative things can be done in the community. Solid community-based services can be provided at a much lower cost and can be tailored to meet individual needs.

Last year, this Congress spent many hours debating the "Baby Doe" issue. Every year since the Roe versus Wade decision by the Supreme Court, we have debated the issue of abortion. Yet these debates seem to go no further than birth. What happens to the individual after birth seems to be of little or no concern to many. This bill focuses attention on the quality of life of a severely disabled individual during his or her lifetime. This discussion is long overdue.

Since he became chairman of the Subcommittee on the Handicapped, my colleague from Connecticut, Senator WEICKER, has consistently worked to improve the current system of care for mentally retarded and developmentally disabled individuals. He has held hearing after hearing on the issue, uncovering nationwide abuse and neglect. Over the past 3 days, his subcommittee has heard another round of testimony on this issue. Much of the testimony from those hearings describing abuse, neglect, and inappropriate programming is appalling. I think that the record of these hearings will support my belief that the Medicaid program as it applies to severely disabled individuals must be reformed. The legislation I am offering today is one way of accomplishing such a reform.

Mr. President, I would again like to make clear that the provisions in my legislation are open to discussion. I do not intend to attempt to push this legislation through without further discussion and revision. Although I have tried to address most of the concerns which were raised last year, I am certain that others will be raised as the legislation is examined and analyzed. As always, I welcome such scrutiny. The goal of this legislation is to provide a mechanism for the development of the most appropriate and effective system of long-term care for those in our society who are severely disabled. I desire any input which will further that goal.

Mr. President, I ask unanimous consent that a summary of the bill be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SHORT SUMMARY: COMMUNITY AND FAMILY LIVING AMENDMENTS OF 1985

ELIGIBILITY: DEFINITION OF SEVERELY DISABLED INDIVIDUAL

The eligible population is defined as those individuals who have a disability as defined in section 223 of the Social Security Act which was manifest before the age of 35. Individuals who suffer primarily from a mental disease are eligible only if that condition was manifest before the age of 21.

As with current Medicaid law, states have the discretion to narrow this definition of eligibility.

DEFINITION OF A COMMUNITY LIVING FACILITY AND FAMILY HOME

A family home is defined as a residence maintained by an individual or natural, adoptive or foster family in which one or more severely disabled individuals are living who receive medical assistance which includes payment for some of the services outlined in section 1919(a).

A community living facility is defined as a single household other than a family home which: 1) provides living arrangements and services to one or more severely disabled individuals; 2) has a number of beds no greater than three times the average family size in the area in which it is located; 3) is located in an area which is primarily populated by individuals other than those who are severely disabled; 4) meets standards for program appropriateness, safety and sanitation as are established by the Secretary of Health and Human Services and those applicable under state law; 5) is staffed by individuals who are trained or retrained in accordance with the implementation agreement to be filed with the Secretary of Health and Human Services by each State.

SERVICES ELIGIBLE FOR PAYMENT

The list of services which the state may provide to severely disabled individuals and receive payment under the Medicaid program is attached. In addition to these the legislation allows the states an option to provide these services to any severely disabled individual or the family of such an individual provided that more than 5% of the individual's or family's Adjusted Gross Income is spent on the provision of the services outlined.

There are three mandated services, that is services which the state must provide in order to receive Medicaid dollars. These services are: (1) protective intervention; (2) case management; and (3) Individual/Family Support services (which would include non-medical personal assistance and respite care).

PHASE DOWN

Medicaid dollars would be available for use by the state for the services outlined above if they are provided to an individual living in his or her own home, in a natural, adoptive or foster home, in a community living facility or in facilities which fall within the grandfathering clause.

The legislation does not require a complete phase out of federal Medicaid dollars from facilities which do not meet the above definitions. Instead it would require a phase down of these funds. The phase down would be complete by the year 2000 and would work in the following manner. Each state will choose a base year for the purpose of this provision, fifteen percent of the funds expended by the Medicaid program in that state during that year for individuals with severe disabilities would be available to the state in each year after 2000 for services which do not meet the definition of community based services as defined in the bill. This amount would be adjusted for inflation annually. For example: State X chooses 1975 as its base year. In that year it spent one million dollars to provide services to severely disabled individuals in facilities with over 15 beds. Beginning in 2000 State X could spend no more than 150 thousand dollars (15% of one million) for services provided to severely disabled individuals in facilities which do not fall within the requirements outlined above.

For services provided in facilities which are not community living facilities, a natural, adoptive or foster home or which are not grandfathered, the federal Medicaid match would be reduced by 4% per year for no more than 10 years.

GRANDFATHERED FACILITIES

There are two types of facilities which do not meet the definition of a Community Living Facility or a Family Home which are grandfathered in by the legislation (i.e. are not subject to payment restrictions): 1) any facility in operation before the date of enactment which has less than 15 beds; and 2) any "cluster home" facility—any group of three homes which would otherwise meet the definition of a community living facility except for the fact that they are adjacent to one another.

IMPLEMENTATION AGREEMENT

Within two years after the legislation is enacted each state must develop an implementation agreement which must be approved by the Secretary of Health and Human Resources. The implementation agreement must outline how the state will comply with the provisions outlined in the

bill. The agreement forces the states to plan in advance of taking any action.

STATE MAINTENANCE OF EFFORT CLAUSE

States which are currently providing (with state dollars only) services which would be eligible for federal Medicaid matching funds under the legislation would be required to maintain these services with state dollars.

STATEWIDE WAIVER PROVISION

States would be allowed to waive the Medicaid requirement of statewideness for a particular service for two years at any time it wishes to develop such a new service.

MONITORING AND SAFEGUARDS

Each community living facility must be licensed by the state or accredited.

Any program or facility receiving Medicaid funding must meet the standards set forth by the Secretary of Health and Human Services.

Protective intervention services.

The implementation agreement development by the state must outline plans for the development of community based services, safeguards at the state level, training of staff and other specific requirements as outlined in the legislation. The public must have adequate opportunity to comment on this agreement and it must be approved by the Secretary. The states must comply with the implementation agreement.

Individuals and families may participate in the development of the individual written plan and may ask for a hearing if they do not agree with the needs outlined in that plan. Such a hearing must be granted.

Before any individual is transferred there is an opportunity for that individual or his family or guardian to object and request a hearing. Such a hearing must be granted.

A private right of action is available if the state does not comply with its implementation agreement.●

By Mr. CHAFEE:

S. 874. A bill to amend the Internal Revenue Code of 1954 by increasing the Federal excise tax on cigarettes by 16 cents per pack to a permanent 32 cents per pack and by providing that revenues from the additional tax be deposited in the Federal Hospital Insurance Trust Fund under the Social Security Act; to the Committee on Finance.

INCREASE IN TAX ON CIGARETTES

● Mr. CHAFEE. Mr. President, the legislation I am proposing today would increase the current Federal excise tax on cigarettes from 16 cents to 32 cents per package. The current tax on 16 cents will fall to 8 cents per package as of October 1, 1985. This bill would continue the tax at 16 cents until January 1, 1986, and then increase it to 32 cents. The increase, 16 cents, would be earmarked to the Hospital Insurance Trust Fund—part A of the Medicare Program.

The Hospital Insurance Trust Fund is on the verge of insolvency. Although the actuaries disagree as to the exact projected date of the bankruptcy of the program, no one will disagree with the proposition that measures need to be taken to ensure its long-term viability. While an increased excise tax on tobacco may not ensure that the fund will remain solvent, it will certainly help to increase the revenues flowing into the trust fund.

By the year 2000, only 16 years away, the number of people over age 65 in the United States will increase by 40 percent. Those over age 85 will double. These figures are nothing compared to what will happen in the next century; moreover, they are probably conservative. These statistics leave us with clear and unequivocal evidence of the need for prompt, effective and above all careful action. We know what dragging our feet now will mean for the future of health care for the elderly—a bankrupt system.

The legislation I am introducing today is necessary to stave off the impending bankruptcy of part A of the Medicare Program until Congress can accomplish a reform of the program. This reform must be one which will ensure high quality health care at a reasonable, affordable price. Such a reform cannot occur overnight, it will take time to develop. This legislation will help to give us that necessary time.

Medical evidence of the incidence of tobacco-related diseases among users of this product demonstrates the correlation between smoking and increased health care costs. An increased and earmarked Federal excise tax on cigarettes is a tax imposed on the users for the resulting excess health care costs which they impose on the Hospital Insurance Trust Fund.

According to the coalition on smoking or health, in 1981 cigarette smoking accounted for $13 billion in medical care costs and $25 billion in lost economic productivity. Cigarette smoking cost the taxpayers $3.8 billion through the Medicare and Medicaid Programs.

An increased excise tax on this product will also help discourage smoking. In the Tax Equity and Fiscal Responsibility Act [TEFRA], Congress doubled the excise tax on cigarettes from $0.08 to $0.16 for a 3-year period ending October 1, 1985. In "Cigarette Taxation: Doing Good by Doing Well," author Kenneth Warner stated that the doubling of the excise tax caused one and a quarter million adult Americans to stop smoking and one-half million teenagers to stop or not start smoking. Among price-responsive young people, teenage smoking decreased by 14 percent. Adult smoking decreased by 4 percent.

Not only would this increase in the excise tax help the hospital insurance trust fund, it will also discourage smoking and therefore help improve the overall health of the country. Cigarette smoking is the No. 1 preventable cause of death and disability in this country; 340,000 die of smoking related diseases annually. Nine million people suffer from chronic bronchitis and emphysema due to smoking.

Each of us, whether we smoke or not, pay for the health care needs of smokers—either through insurance premiums or our taxes. I believe it is reasonable to ask those who smoke to help ensure the financial viability of the Medicare Program which is depended upon by so many elderly individuals.

Mr. President, I ask that my legislation be printed in full in the RECORD immediately following my statement.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 874

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. INCREASE IN TAX ON CIGARETTES.

(a) RATE OF TAX.—Subsection (b) of section 5701 (relating to rate of tax on cigarettes) is amended—

(1) by striking out "$8" in paragraph (1) and inserting in lieu thereof "$16"; and

(2) by striking out "$16.80" in paragraph (2) and inserting in lieu thereof "$33.60".

(b) FLOOR STOCKS.—

(1) IMPOSITION OF TAX.—On cigarettes manufactured in or imported into the United States which are removed before January 1, 1986, and held on such date for sale by any person, there shall be imposed the following taxes:

(A) SMALL CIGARETTES.—On cigarettes, weighing not more than 3 pounds per thousand, $8 per thousand;

(B) LARGE CIGARETTES.—On cigarettes, weighing more than 3 pounds per thousand, $16.80 per thousand; except that, if more than 6½ inches in length, they shall be taxable at the rate prescribed for cigarettes weighing not more than 3 pounds per thousand, counting each 2¾ inches, or fraction thereof, of the length of each as one cigarette.

(2) LIABILITY FOR TAX AND METHOD OF PAYMENT.—

(A) LIABILITY FOR TAX.—A person holding cigarettes on January 1, 1986, to which any tax imposed by paragraph (1) applies shall be liable for such tax.

(B) METHOD OF PAYMENT.—The tax imposed by paragraph (1) shall be treated as a tax imposed under section 5701 and shall be due and payable on January 18, 1986, in the same manner as the tax imposed under such section is payable with respect to cigarettes removed on January 1, 1986.

(3) CIGARETTE.—For purposes of this subsection, the term "cigarette" shall have the meaning given to such term by subsection (b) of section 5702 of the Internal Revenue Code of 1954.

(4) EXCEPTION FOR RETAILERS.—The taxes imposed by paragraph (1) shall not apply to cigarettes in retail stocks held on January 1, 1986, at the place where intended to be sold at retail.

(c) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendment made by subsection (a) shall apply with respect to cigarettes removed after December 31, 1985.

(2) CONFORMING AMENDMENT.—Subsection (c) of section 283 of the Tax Equity and Fiscal Responsibility Act of 1982 is amended by striking out "and before October 1, 1985".

SEC. 2. TRANSFER OF ADDITIONAL REVENUES TO FEDERAL HOSPITAL INSURANCE TRUST FUND.

(a) IN GENERAL.—Subsection (a) of section 1817 of the Social Security Act is amended—

(1) by striking out "100 per centum of" in the matter preceding paragraph (1);

(2) by striking out "(1) the taxes" in paragraph (1) and inserting in lieu thereof "(1) 100 per centum of the taxes";

(3) by striking out "and" at the end of paragraph (1);

(4) by striking out "(2) the taxes" in paragraph (2) and inserting in lieu thereof "(2) 100 per centum of the taxes";

(5) by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; and "; and

(6) by adding at the end thereof the following new paragraph:

"(3) 50 per centum of the taxes imposed by subsection (b) of section 5701 of the Internal Revenue Code of 1954.".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall become effective on January 1, 1986.●

By Mr. DOLE (for Mr. MURKOWSKI):

S. 875. A bill to amend title 38, United States Code, to require the Administrator of Veterans' Affairs to establish and carry out a Vietnam Veterans' Resource Center Pilot Program; to the Committee on Veterans' Affairs.

VIETNAM VETERANS' RESOURCE CENTER ACT

● Mr. MURKOWSKI. Mr. President, today I am introducing a bill to establish a pilot program of Vietnam Veteran Resource Centers [VVRC]. These centers would use existing vet center sites to explore a new concept in providing better service more efficiently to eligible Vietnam veterans.

Under current law, the VA has 187 satellites and storefront vet centers which provide readjustment counseling to Vietnam veterans who have had difficulty readjusting to civilian life. The underlying goal of these very successful centers has been to attract veterans who shied away from VA hospitals and regional offices but were having difficulty with their lives. Many of these veterans have been found to be suffering from posttraumatic stress disorder [PTSD] as a result of their combat experiences. The vet centers have provided an avenue for these veterans to come back to the mainstream of life and to be referred to VA medical centers or regional offices if they need specific services other than readjustment counseling.

Mr. President, the Vet Center Program was established by Congress by Public Law 96-22 and is due to expire on October 1, 1988. At this time, the services provided in these storefront centers will remain available, but within the confines of VA medical centers. Before the program expires, the Administrator of the Veterans' Affairs shall submit to the Congress a report that will provide some insights with respect to the extent to which the readjustment needs of such Vietnam veterans have remained unmet, the extent to which the provision of readjustment counseling services is needed to meet such needs and, finally, a recommendation for legislative or administration action that could affect the continuation of such services.

I have designed this additional legislation to meet the changing needs of Vietnam veterans, some of whom have been struggling to find their place in civilian society for longer than 10 years. My proposal incorporates the very positive aspects of the current Vet Center Program. Initially, I do believe it was appropriate to offer psychological readjustment services to such veterans and, in fact, I think these services may still be appropriate and are incorporated in my proposal. However, experience has taught us that psychological services are only one of a number of services which could benefit veterans who seek assistance through community vet centers providing a broad range of services. For example, a Vietnam veteran who is having problems may also be out of a job, may not have taken advantage of his or her VA benefits and may, as a result of these problems, be grappling with some substance abuse which only adds to complicate the readjustment process. It seems only logical to me that if we are to set up storefront community centers for Vietnam veterans that the mandate include a broad spectrum of services under one roof—a one-stop service point combining the resources of the VA's Departments of Medicine and Surgery [DM&S], Veterans Benefits [DVB], as well as the Department of Labor [DOL] employment specialists. By providing a complete spectrum of services, VVRC's would emphasize that Vietnam veterans are not unlike other citizens, in that psychological problems can be traced to concrete life problems and need to be dealt with in that context. This is the most likely way to successfully overcome any psychological barriers which may exist to complete integration into our society as a responsible citizen. These centers would address the full range of problems a veteran may face.

Mr. President, I have intended that this program be a 3-year pilot program to coincide with the end of vet center services as they exist under current law. As the VA and the Congress weigh the necessity for this program to continue in its present or another form, the usefulness of a case management approach can be incorporated into recommendations regarding the future of vet center services and their relevance for Vietnam and other veterans as well. This bill contains a reporting requirement to ensure that the recommendations are transmitted to the Congress and are coordinated with the recommendations that are required under the Readjustment Counseling Program.

Mr. President, this idea is not mine alone, I owe the germination of these thoughts from many experts in Washington and in the field who run vet center programs, the veterans who have participated in them and the many fine representatives of veterans organizations, all of whom share a reponsibility for the development of this concept. I am grateful for their input and I believe that an examination of this new model for VA services will provide benefits beyond those of the pilot program.

My bill would expand the readjustment counseling services to include the availability of employment counseling, training and placement; outreach and other services as provided by veterans benefits' counselors; and the treatment and rehabilitation for alcohol and drug abuse dependence. Some vet centers have already determined a need for some of the services in my bill and offer them on an ad hoc basis to their veteran clientele; however, services beyond readjustment counseling are not mandated by law and often employees are not qualified to provide them. The main difference that would be provided by this bill is that in each VVRC there would be qualified employees in the above-mentioned areas available, either part time or full time, as needed, to provide a wide range of services to interested and eligible veterans.

Currently vet centers are administered under the auspices of the Department of Medicine and Surgery. The VVRC's would operate under a totally new concept. The program's central office administration would be under the Deputy Administrator of Veterans' Affairs, and would include representatives from the Department of Medicine and Surgery and the Department of Veterans' Benefits who would jointly administer the program and coordinate with the readjustment counseling office in the VA. In the 10 VVRC's, the staff would furnish unified case management to eligible veterans. What this really means is that a veteran who walks in the door will be seen by someone who is qualified to determine his or her needs and would designate the appropriate employees and services within the VVRC.

Having benefits and medical services under one roof is a new idea within the VA but it makes so much sense. Why should a veteran who is in need of alcohol rehabilitation, employment counseling, and educational training have to coordinate those services on his or her own. The VA was established to be the service provider. This bill is designed to facilitate communications between DVB and DM&S personnel in order to simplify an inherently complex process. Under my proposal, a designated case manager would be assigned to the veteran when he or she walks in the door, to improve coordination of services.

Mr. President, I look forward to holding hearings on this legislation and soliciting the views of veterans' organizations and the Veterans' Administration as we strive to work together to achieve our mutual goal of providing the best service in the most efficient manner to our Nation's Vietnam veterans. Some of these veterans have had a long and ardous trip back from their service in Vietnam that has lasted many years more than any of us would have wished. We are proud of these fine citizens and want to provide them every opportunity to integrate fully into our society. I believe that this program will be a positive step in the right direction. Vietnam veterans have a variety of concerns, not unlike other citizens. I believe we must provide them every opportunity to succeed and to thank them once again for their sacrifices on our behalf.●

By Mr. DOLE (for Mr. MURKOWSKI):

S. 876. A bill to amend title 38, United States Code, to establish, extend, and improve certain Veterans' Administration health care programs; to the Committee on Veterans' Affairs.

VETERANS' ADMINISTRATION HEALTH CARE PROGRAMS IMPROVEMENT ACT

● Mr. MURKOWSKI. Mr. President, as chairman of the Senate Committee on Veterans' Affairs, I am introducing today the proposed Veterans' Administration Health Care Programs Improvement Act of 1985. This legislation is intended to improve the VA's ability to make maximum use of its resources to provide a full continuum of acute and long-term care services, both institution- and community-based. This initiative has a threefold purpose: First, to provide the VA with increased flexibility to make available to eligible veterans certain noninstitutional forms of health care services; second, to improve the VA's health care system; and third, to improve the VA's planning process for the construction of VA medical facilities.

SUMMARY OF PROVISIONS

Mr. President, the five substantive provisions of the bill would:

First, direct the VA to establish a pilot program to furnish medical, rehabilitative, and social services as an alternative to nursing home care for eligible veterans who would otherwise receive nursing home care.

Second, make permanent the currently authorized halfway house pilot program for veterans with alcohol and drug dependence disabilities.

Third, provide the VA with the authority to conduct a pilot program to furnish community residential care to certain chronically mentally ill veterans.

Fourth, require the Administrator to delineate the responsibilities of the Office of the Inspector General and the Department of Medicine and Surgery with respect to the monitoring, evaluation, and conduct of VA quality assurance programs.

Fifth, establish a committee of health care experts to review the VA's criteria and methodology for sizing VA medical facilities.

ALTERNATIVE TO NURSING HOME CARE

Mr. President, section 2 of the bill I am introducing today would amend section 620 of title 38, relating to transfers for nursing home care, to require the VA to establish a pilot program to provide medical, rehabilitative, and social services as an alternative to nursing home care for certain eligible veterans who would otherwise receive care in a nursing home environment.

Most Government health care dollars, including VA resources, are allocated to institutional care. Nursing home care represents a substantial portion of these resources. The growing demand for nursing home care and the high cost of institutional long-term care services has increased incentives for both public and private sectors to seek alternatives to institutional care. Experts in geriatric care and gerontology at the 1983 VA-Harvard University Conference on Aging and the 1984 VA-American Health Planning Association Conference on long-term care supported increased efforts to develop alternatives to institutional care and to coordinate and maximize the use of already existing community-based services. The VA's August 1984 report, Caring for the Older Veteran, outlines a specific extended care strategy advocating an increase in certain noninstitional services for elderly veterans.

Certain research on long-term care has demonstrated that by providing community-based services, institutionalization may be reduced and patient longevity, independence, and satisfaction may be enhanced. However, verification of these study results and further fine-tuning and improvements on study designs and methodology are necessary before any final conclusion can be made about the advantages and cost-effectiveness of noninstitutional alternatives to nursing home care for the elderly.

The pilot program would serve two primary purposes: First, to increase the availability of cost effective long-term care options for elderly veterans; and second, to assess the feasibility, medical advantages and cost-effectiveness of providing community-based services instead of nursing home care to certain veterans. This pilot program would address the following specific questions to what extent can providing community-based services for certain elderly persons in lieu of nursing home care: First, improve the quality of care; second, result in the provision of more appropriate kinds of care; third, reduce nursing home admission rates; fourth, lower the number of hospital days; fifth, reduce mortality rates; and sixth, reduce long-term care costs. The result of the evaluation of the program would contribute to the scientific knowledge base relating to noninstitutional services.

This provision also requires the Administrator to place special emphasis on and target services to veterans who are catastrophically disabled. Such veterans sometimes are prevented, due to the catastrophic nature of their disabilities, from residing in the community because of a lack of access to medical, rehabilitative or social services other than nursing home care.

In addition to medical and rehabilitative services, such as hospital-based home care and adult day health care services, the VA would have the authority to furnish social services to veterans participating in the program. For the purposes of the program, social services would be defined to include services to aid those elderly veterans or catastrophically disabled veterans in performing necessary activities of daily living. Such in-home and community-based services would include home health services, personal care services, home-delivered meals, and respite care.

ALCOHOLISM AND DRUG DEPENDENCE TREATMENT

Mr. President, section 3 of my proposal would provide the VA with a permanent authority to contract with private sector halfway house programs for veterans with alcohol or drug dependence or abuse disabilities and require the VA to strengthen its management of the halfway house program.

Each year approximately 100,000 veterans are treated for alcohol-related disorders in the VA's 102 alcohol treatment units and other programs. According to 1980 VA statistics, alcoholism-related disorders are the second largest category of diagnoses, next to heart disease, of patients discharged from VA hospitals. Approximately 38 percent of hospitalized Vietnam-era veterans were being treated for alcohol-related disorders.

Public Law 96-22, the Veterans' Health Care Amendments of 1979, established a 5-year pilot program for the treatment and rehabilitation of veterans with alcohol or drug dependence disabilities and provided the VA with specific authority to contract with halfway houses and other community-based treatment facilities for this purpose. It was the committee's intent to support the use of different modes of medically advantageous and cost-effective care for veterans with these disorders. Halfway house care is intended to be tailored to individual special needs, and is delivered in an unrestrictive environment. The primary goal of a halfway house is to

provide veterans with a partially structured living and therapeutic environment as a transition from a total care environment to independent living in the community. It is estimated that 89 VA medical centers will have contracted with 303 halfway houses to provide care to 6,000 veterans in fiscal year 1985 at an average cost of approximately $20 per day. Estimated fiscal year 1985 program expenditures are expected to be $6.1 million.

During the 2d session of the 98th Congress, the committee examined the pilot program, but deferred action until this year to provide the House Veterans' Affairs Committee with the opportunity to review the program. At that time, the VA supported a 3-year extension of the program and stated that the program is therapeutically beneficial and cost-effective. However, an inspector general audit, released in November 1984, found that management improvements are needed to provide more effective monitoring and control over contractor services and billings. Providing permanent authority would be contingent upon the implementation of such improvements. Permanent authority would enable the VA to incorporate these services into the long-term planning and budget processes along with other permanent health care programs. Because the pilot program will expire at the end of this fiscal year, it is the appropriate time for the Congress to address the future of this important program.

COMMUNITY RESIDENTIAL CARE

Mr. President, section 4 of the bill would amend 630 of title 38, United States Code, relating to community residential care, to provide the VA with the authority to conduct a pilot program to contract for community residential care for certain chronically mentally ill veterans. This pilot program would be designed to provide more appropriate care for certain chronically mentally ill veterans for whom long-term institutional care is unnecessary and inappropriate.

A community residential care facility is a facility that provides room and board and limited personal care and supervision for residents who, because of health or mental health difficulties, are unable to live independently in the community. In 1983, Public Law 98-160 provided the VA with a limited authority to refer veterans to community residential homes and to monitor the homes receiving VA referrals.

Approximately 10 percent of the VA's long-term care psychiatric population are not referred to these homes for certain reasons, including an inability to defray the cost of residential care, and instead remain inappropriately institutionalized in VA medical facilities.

The American Psychiatric Association has determined that certain chronically mentally ill persons for whom institutionalization is not appropriate would be able to make a successful transition into the community provided that certain alternative services would be made available. Appropriate medication; stable financial support; supportive and appropriate community living arrangements; comprehensive medical, psychiatric, and rehabilitative follow-up services; crisis intervention services; and a designated case manager or management system responsible for administering and overseeing the individual's care are among these major requirements.

By providing the VA with an additional authority on a pilot program basis, the VA would be able to play a leadership role and use its integrated and comprehensive health care system to promote a successful community based program for the chronically mentally ill. The VA's psychiatric day treatment and hospital-based home care programs would provide useful supportive and followup services to ensure its success.

QUALITY ASSURANCE

Mr. President, section 5 of this initiative would add a new subchapter to title 38 to: first, establish VA quality assurance programs as a statutory priority; second, clarify the role and promote the independence of the IG with respect to monitoring VA quality assurance programs; third, state that sufficient resources be allocated to adequately implement VA quality assurance programs; and fourth, improve Congress' ability to monitor VA quality assurance efforts.

Mr. President, the committee held a hearing on June 6, 1984, on the VA's quality assurance programs, including the roles of the inspector general and the medical inspector in monitoring such efforts. Certain questions about the inspector general's monitoring activities and the Department of Medicine and Surgery's specific programs were raised at that time and since then by the General Accounting Office as a result of its review of these important programs. This provision is intended to require the VA to clarify certain areas of major concern.

Since that time, the new Chief Medical Director, Dr. John Ditzler, has stated that quality assurance is a major priority and that he intends to modify existing quality assurance programs and initiate several new quality assurance efforts. I am highly supportive of Dr. Ditzler's initiatives and look forward to the results of his endeavors. I believe those provisions outlined above are general in nature and scope and consistent with the views of the Chief Medical Director and the quality assurance programs of the Department of Medicine and Surgery. These provisions would address the concerns of the committee while, at the same time providing the VA with the flexibility to continue to make its own determinations about the most effective ways to monitor the quality of care provided by the VA and develop and implement any new efforts in this area.

VETERANS' ADMINISTRATION MEDICAL FACILITY PLANNING

Mr. President, section 6 of the bill would establish a committee of VA and non-VA experts to: First, review the criteria for sizing VA medical facilities and services and the method for determining the criteria; and second, make any recommendations for necessary modifications in the criteria and process.

After reviewing agency information about and explanations of the assumptions, processes, and justifications for the medical facility construction projects for which the Veterans' Administration requests funding each year, I am very concerned about current policies and procedures used for determining the need for and size of the facilities proposed for construction. The VA bases its planning on the demographics of the entire veteran population in the area to be served as well as the historical utilization of VA facilities by these veterans. In light of the large potential demand for care from service-connected disabled and other priority groups within the fast-growing population of older veterans during a time of diminishing resources, I believe it is essential that the implications of current practice be evaluated.

Last year, in its resolution approving VA construction projects for fiscal year 1985, the committee stated its intention that the VA reevaluate its policies and methods for determining the size of VA medical facilities. No action was taken in response to this request. I believe it is important that certain factors, such as the relative statutory eligibility priorities, the impact of diagnosis-related groups [DRG's], the availability of community beds, the development and use of noninstitutional forms of care, and other factors be taken into account. The views of VA and non-VA experts in the fields of health care policy, planning and clinical practice and experts in medical facility construction would promote a comprehensive reevaluation of current sizing methodology and make recommendation to the VA for improvements in the current system.●

By Mr. BOSCHWITZ (for himself and Mr. ZORINSKY):

S. 877. A bill to amend the Internal Revenue Code of 1954 to allow individuals to compute the deduction for retirement savings on the basis of the compensation of their spouses and to treat alimony as compensation for purposes of such deduction; to the Committee on Finance.

SPOUSAL IRA'S

● Mr. BOSCHWITZ. Mr. President, I rise today to introduce legislation to ensure that all women, whether homemakers, or those employed outside the home, receive equal treatment in establishing Individual Retirement Accounts [IRA's].

Currently, families in which one spouse works in the home can contribute only $2,250 annually to an IRA, while families in which both spouses work outside the home can contribute $4,000 per year. My bill would allow every family to contribute up to $4,000 annually. It also allows alimony and support payments to count as income for purposes of establishing eligibility to contribute toward an IRA.

The current situation does not recognize the contributions made by spouses who make their career in the home, raising children and providing a home for their family. These people work as hard as anyone with no direct compensation. In addition, they are not given equal treatment in preparing for retirement.

The purpose of this legislation is to allow spouses who remain at home and raise a family to establish eligibility for an IRA based on their spouses earnings. I introduced the same bill during the 98th Congress and similar legislation was passed by the Senate, it is time Congress passed this legislation to treat homemakers equitably.●

By Mr. PROXMIRE (for himself, Mr. MATHIAS, Mr. BUMPERS, and Mr. CHAFEE):

S. 879. A bill to authorize funds for research, development, test, and evaluation in connection with Strategic Defense Initiative Programs and advanced strategic missile systems for fiscal year 1986, and for other purposes; to the Committee on Armed Services.

ALTERNATE STRATEGIC DEFENSE INITIATIVE AUTHORIZATION ACT, FISCAL YEAR 1986

Mr. PROXMIRE. Mr. President, today Senator BUMPERS, Senator MATHIAS, Senator CHAFEE, and I are introducing an alternate strategic defense initiative budget for fiscal year 1986.

I must emphasize at the outset, Mr. President, that this bill represents a joint effort on the part of Mr. BUMPERS, Mr. MATHIAS, Mr. CHAFEE, and myself. It is the product of no one individual, but of the entire group.

Mr. President, we all share the President's goal of one day seeing nuclear weapons wiped off the face of the Earth. No one would argue against making all nuclear weapons impotent and obsolete. The differences among us are over whether the President's strategic defense initiative can achieve that goal.

Nevertheless, if we are going to pursue a strategic defense initiative, it should be an initiative that supports prudent and high-quality research into ballistic missile defenses that can provide options to future Presidents and future Congresses.

It should be a strategic defense initiative that conducts research in a manner consistent with the ABM Treaty.

It should be a strategic defense initiative that serves as a hedge against Soviet advances in ballistic missile defense development.

It should be a strategic defense initiative whose research is vigorous but whose cost is reasonable.

Mr. President, the alternate strategic defense initiative budget we are introducing today accomplishes those important goals.

Mr. President, I ask unanimous consent that a summary of this budget follows, along with a section-by-section analysis, and a text of the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 879

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Alternate Strategic Defense Initiative Authorization Act for Fiscal Year 1986".

EXCLUSIVE AUTHORIZATION OF FUNDS FOR STRATEGIC DEFENSE INITIATIVE PROGRAMS AND ADVANCED STRATEGIC MISSILE SYSTEMS FOR FISCAL YEAR 1986

SEC. 2. Funds authorized to be appropriated by this Act for the Strategic Defense Initiative and for advanced strategic missile systems for fiscal year 1986 are in lieu of any authorization for the appropriation of funds for such purposes for such fiscal year contained in any other Act.

AUTHORIZATION OF APPROPRIATIONS FOR STRATEGIC DEFENSE INITIATIVE AND FOR THE ADVANCED STRATEGIC MISSILE SYSTEMS PROGRAM

SEC. 3. (a) Funds are hereby authorized to be appropriated to the Defense Agencies for fiscal year 1986 in the total amount of $1,860,200,000 for research, development, test, and evaluation in connection with the Strategic Defense Initiative as follows:

(1) For the Surveillance, Acquisition, and Tracking Program, $683,500,000, of which amount not more than $121,700,000 may be expended for the Optical Surveillance Project and not more than $6,200,000 may be expended for the Terminal Imaging Radar Demonstration Project.

(2) For the Directed Energy Weapons Program, $446,800,000, of which not more than $169,200,000 may be expended for the Space-Based Laser Concepts Project.

(3) For the Kinetic Energy Weapons Program, $305,000,000, of which not more than $28,700,000 may be expended for the Endo NNK Test Bed Project; not more than $13,200,000 may be expended for the Exo NNK Test Bed Project; not more than $3,600,000 may be expended for the Hypervelocity Launcher Development Project; not more than $31,200,000 may be expended for the Kinetic Kill Vehicle Project; and not more than $33,600,000 may be expended for the Terminal Technologies Intergration Project.

(4) For a new program, to be carried out under the Strategic Defense Initiative Organization and to be designated as the Hard Point Defense Technology Development Program, to continue research, development, test, and evaluation of conventional antiballistic missile systems for the defense of strategic military targets, $75,000,000.

(5) For the Systems Concepts and Battle Management Program, $127,800,000.

(6) For a new program, to be carried out under the Strategic Defense Initiative Organization and to be designated as the Threat Analysis Program, to conduct research into Soviet countermeasures, analyze Soviet offensive responses, and evaluate the cost effectiveness of developing and deploying offensive nuclear systems to defeat defensive systems, $20,000,000.

(7) For the Survivability, Lethality, and Key Technologies Program, $192,900,000, of which $72,100,000 may be expended only for the System Survivability Project and $103,500,000 may be expended only for the Lethality and Target Hardening Project.

(8) For Management Headquarters of the Strategic Defense Initiative, $9,200,000.

(b) Funds are hereby authorized to be appropriated to the Air Force for fiscal year 1986 in the amount of $196,000,000 for research, development, test, and evaluation in connection with the Advanced Strategic Missile Systems program.

THREAT ANALYSIS PROGRAM

SEC. 4. (a) The Threat Analysis Program provided for in subsection (a)(6) of the first section shall be carried out as a part of the Air Force Advanced Strategic Missile Systems Program.

(b) The Secretary of the Air Force shall submit a report each year to the Office of the Secretary of Defense, the Joint Chiefs of Staff, the Science Advisor to the President, the Strategic Defense Evaluation Panel (established under section 5), and the Congress on the results of the research referred to in section 3(a)(6). The Secretary shall submit a classified and unclassified version of each such report to the Congress.

STRATEGIC DEFENSE EVALUATION PANEL

SEC. 5. (a) There is established in the Department of Defense a panel to be known as the Strategic Defense Evaluation Panel (hereinafter in this section referred to as the "Panel").

(b) The Panel shall be composed of 8 members appointed as follows:

(1) Two members to be appointed by the Speaker of the House of Representatives.

(2) Two members to be appointed by the minority leader of the House of Representatives.

(3) Two members to be appointed by the President pro tempore of the Senate upon the recommendation of the majority leader of the Senate.

(4) Two members to be appointed by the President pro tempore of the Senate upon the recommendation of the majority leader of the Senate.

(c) Members of the panel shall be appointed for a term of three years except that of the members first appointed to the panel, two shall be appointed for a term of one year, three shall be appointed for a term of two years, and three shall be apponted for a term of three years, as determined by lot at the first organizational meeting of the panel.

(d) It shall be the function of the panel to evaluate defensive research and development activities of the Department of Defense, the technical and programmatic status of work within the Strategic Defense Initiative Organization, and the effect of

the Strategic Defense Initiative on United States arms control goals and policies.

(e) The Panel shall submit a report to the Congress each year containing the results of its evaluations made pursuant to subsection (d) for the preceding year together with such recommendations for legislative and administrative action as it considers appropriate. The first such report shall be submitted not later than April 1, 1986.

(f) Expenses of the Panel shall be paid out of funds made available for the Management Headquarters of the Strategic Defense Initiative Organization.

REDESIGNATION OF PROJECTS FOR PURPOSES OF REPORTING

SEC. 6. All Strategic Defense Initiative projects on which work is being carried out on the date of the enactment of this Act, which the Secretary of Defense estimates will cost a total of more than $200,000,000 to complete, and on which (before the date of the enactment of this Act) no Selected Acquisition Report was required to be submitted shall be designated as a major defense acquisition program for purposes of section 139a of title 10, United States Code.

STUDY OF THE CONSEQUENCES OF THE STRATEGIC DEFENSE INITIATIVE PROGRAM

SEC. 7. At the same time that the Secretary of Defense submits his annual budget presentation materials to the Congress for each fiscal year, beginning with fiscal year 1987 and ending with fiscal year 1991 (but in no event later than March 15 of the year in which the fiscal year begins), the Secretary of Defense shall submit to the Committee on Armed Services of the Senate and the House of Representatives, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives a report on the programs of the Department of Defense that constitute the Strategic Defense Initiative and on all other programs of the Department of Defense, if any, that relate to defense against strategic ballistic missiles. Each such report shall include the following:

(1) A detailed discussion and explanation of all programs of the Department of Defense that are a part of the Strategic Defense Initiative or that relate to defense against ballistic missiles.

(2) A clear description of the objectives of the Strategic Defense Initiative and any changes in these objectives from the previous fiscal year.

(3) An explanation of the relationship between each such objective referred to in paragraph (3) and each program and project associated with the Strategic Defense Initiative or defense against strategic ballistic missiles.

(4) The status of any consultations with other member nations of the North Atlantic Treaty Organization, Japan, or other allies of the United States concerning research being conducted on the Strategic Defense Initiative.

(5) A statement of the impact that each program or project within the Strategic Defense Initiative will likely have on the 1972 Anti-Ballistic Missile Treaty.

STUDY BY THE DIRECTOR OF THE CONGRESSIONAL BUDGET OFFICE

SEC. 8. (a) The Director of the Congressional Budget Office shall conduct a comprehensive study of the impact that projected expenditures for Strategic Defense Initiative programs for fiscal years 1986 through 1991 will likely have on the research and development budget of the Department of Defense for each of such years and on the research and development budget for the entire Federal Government for each of such years.

(b) The Director shall report the results of such study to the Congress not later than 180 days after the date of the enactment of this Act.

STUDY BY THE JOINT ECONOMIC COMMITTEE

SEC. 9. (a) The Joint Economic Committee shall conduct a comprehensive study of the impact that projected expenditures for Strategic Defense Initiative programs for fiscal years 1986 through 1991 will likely have on the research and development efforts by the civilian sector of the economy for such years.

(b) The Committee shall report the results of such study to the Congress not later than 180 days after the date of the enactment of this Act.

CONGRESSIONAL COMMITMENT TO THE ABM TREATY

SEC. 10. The Congress reaffirms its commitment to the 1972 Treaty on the Limitation of Anti-Ballistic Missile Systems between the Soviet Union and the United States and strongly believes that special care should be exercised by the Department of Defense to ensure that all research and development programs conducted by the Department be conducted in a manner that fully complies with the treaty.

ALTERNATE STRATEGIC DEFENSE INITIATIVE BUDGET FOR FISCAL YEAR 1986—SUMMARY

FUNDING LEVEL

The Strategic Defense Initiative would be funded at $1.86 billion in fiscal year 1986, allowing for a 33 percent increase over the fiscal year 1985 appropriation of $1.4 billion. This percentage increase would be about three times higher than the percentage increase the Administration has requested for the entire DOD budget.

Funding at the $1.85 billion level would still enable SDI to pursue the President's vision of a comprehensive and vigorous R&D program, which explores the potential of newly emerging technologies to support an effective defense against ballistic missiles. Under the Alternate Budget, funding for every program and project in SDI would be allowed to increase over the fiscal year 1985 level. This Budget also reaffirms Congress' commitment to research consistent with the ABM Treaty.

HIGH QUALITY ABM RESEARCH

Because SDI is a long-term research project in its very early stages and "is not based on any single or preconceived notion of what an effective defense system would look like," according to President Reagan, it would be too early at this point to consider technology demonstrations. Such premature demonstration projects would only do damage to the SDI research and will likely raise serious compliance questions with the ABM Treaty. Therefore, funding for demonstration projects within SDI would be held to a 4 percent increase, while funding for the technology research projects would be allowed to increase by 30 percent.

The critical question SDI research must answer is whether a militarily effective defensive system can be deployed, which can perform in the face of the Soviet offensive threat and countermeasures. Therefore, funding for the System Survivability, and Lethality and Hardening Projects would be allowed to increase at the rate the Administration requested. Furthermore, a new program would be created, titled Threat Analysis, to research Soviet countermeasures and offensive nuclear response.

HEDGE AGAINST SOVIET ABM EFFORT

As the President has stated, the SDI research program should also be able to respond to the ongoing Soviet ABM effort. In other words, an important goal of SDI should be as a hedge against Soviet breakout of the ABM Treaty. Unfortunately, the SDI program, as it is now structured, seriously downgrades research into conventional ABM systems that offer the most immediate hedge to a Soviet breakout. The Alternate Budget, therefore, would establish a new Hard Point Defense Technology Program, which would continue R&D into conventional ABM systems.

The most immediate and effective response the United States could take in the face of a Soviet breakout, however, would be to increase the capability of its offensive nuclear forces to penetrate Soviet defenses. Therefore, the budget of the Advanced Strategic Missile Systems Program (the Air Force penaids program) would be doubled in FY86.

GREATER CONGRESSIONAL OVERSIGHT

Because SDI is such a large research program, which will consume an even greater portion of the entire DoD research budget as years go by, it is imperative that Congress have greater oversight over this effort. Therefore, a senior-level and congressionally appointed Strategic Defense Evaluation Panel would be established to monitor and report to Congress on SDI technology and its implications for arms control. Reporting requirements similar to those in the FY85 Authorization are imposed. In addition, the Congressional Budget Office and Joint Economic Committee are tasked to study the impact of SDI on DoD, federal and civilian research.

SECTION ANALYSIS

Sec. 3. (a) This sets the overall funding level for SDI in FY86 at $1.8602 billion, which is an increase of $463 million (33%) over the FY85 appropriation of $1.3972 billion. The Administration had requested $3.7223 billion for FY86, an increase of $2.3251 billion over FY85 (166%). The Alternate Strategic Defense Initiative (ASDI) would cut the Administration's request by $1.8621 billion.

Sec. 3(a)(1) The Surveillance Program would be allowed to grow at an overall rate of 25% from $546 million in FY85 to $683.5 million in FY86. Because technology demonstrations are much too premature at this point in the strategic defense effort and can only do damage to attaining the goals of SDI, the funding increase for the two technology demonstration projects under the Surveillance Program—the Optical Surveillance Project and the Terminal Imaging Radar Project—would be held to 4%. Funding for the other nine technology research projects would increase by 30%.

Sec. 3(a)(2) The Directed Energy Weapons Program would be allowed to grow at an overall rate of 19% from $376.3 million in FY85 to $446.8 million in FY86. Funding for the Ground-Based Laser Concepts, Space-Based Particle Beam Concepts and Nuclear Driven Concepts projects would be allowed to increase by 30%. A number of concerns, however, have been raised by SDI proponents and critics alike over the value of spaced-based chemical lasers in a defensive system because of (a) their vulnerability to attack, (b) the costly redundancy involved in maintaining laser satellites on station at

all times, and (b) the vast amount of equipment and energy stores that would be placed at risk in space. Because the technology demonstration planned in the Space-Based Laser Concepts Project is premature and highly questionable at this point, funding for this program would be held to a 4% increase.

Sec. 3(a)(3) The Kinetic Energy Weapons Program also would be allowed to grow at an overall rate of 19% from $256 million in FY85 to $305 million in FY86. Funding for the five technology research projects (Projects 0001-0005) would be allowed to increase by 30%. Again, because the technology demonstration in Projects 0006-0011 are premature until SDI planners have a better idea of the basic technology requirements (particularly in terminal and midcourse defense), funding for these projects would be held to a 4% increase.

Sec. 3(a)(4) It is important that one of the goals of SDI be to serve as a hedge against Soviet breakout of the ABM Treaty. Deploying penetration aids and other countermeasures could be the most immediate response to a Soviet defensive system. However, to protect ourselves against technological surprise by the Soviets, it is also important to continue R&D of conventional antiballistic missile systems, within the constraints of the ABM Treaty, which was conducted before the establishment of SDI. Unfortunately, SDI as it is now structured seriously downgrades R&D for conventional ABM systems. This section, therefore, would establish a new program within SDI, entitled Hard Point Defense Technology Development and funded at $75 million for FY86, which would continue RDT&E into conventional ABM systems for the defense of strategic military targets. The figure would grow over the next several years.

Sec. 3(a)(5) The Systems Concepts and Battle Management Program would be allowed to grow at an overall rate of 30% from $99 million in FY85 to $127.8 million in FY86. This funding increase would be more than enough to accommodate the battle management research and systems analysis that needs to be conducted at this early stage of the SDI technology development.

Sec. 3(a)(6) As the Flectcher Panel noted, SDI system survivability in the face of Soviet countermeasures is a critical hurdle for any defensive system. It is therefore important to begin a vigorous research program within SDI, which would investigate possible Soviet countermeasures, analyze Soviet offensive reponses and evaluate the cost effectiveness of offensive nuclear forces for defeating defensive systems. At the very minimum, 1% of the SDI budget should be allocated to a program that would perform this all important research. This section, therefore, establishes a new program within SDI, titled Threat Analysis and funded at $20 million for FY86, which in effect would institutionalize a Red Team within SDI. Sec. 4(a) further specifies that the Air Forces's Advanced Strategic Missile Systems Program, which specializes in countermeasures research, will serve as the executing agent for the Threat Analysis Program. In addition, an annual report on the Threat Analysis Program's research shall be submitted to the Office of the Secretary of Defense, the Joint Chiefs of Staff, the White House Science Adviser, the Congress, and the Strategic Defense Evaluation Panel, which would be established in Sec. 5(a).

Sec. 3(a)(7) Because of the importance of projects within the Survivability, Lethality and Key Technologies Program, overall funding would be allowed to increase by 72% from $112 million in FY85 to $192.9 million in FY86. One of the major obstacles facing SDI is the vulnerability of space-based components. Accordingly, funding for the System Survivability Project and the Lethality and Target Hardening Project would be allowed to increase per the Administration's request (99% and 63% respectively). The remaining funds would be distributed between the Space Power and Conversion Project and the Space Logistics Project.

Sec. 3(a)(8) Funding for the new Management Headquarters Program would be allowed to increase at the Administration's request from $8 million to $9.2 million.

Sec. 3(b) The Air Force's Advanced Strategic Missile Systems (ASMS) program conducts research into the improvement of U.S. ICBM systems, such as penetration aids and countermeasures to Soviet defensive systems. The work of ASMS, therefore, is critical as a hedge to a possible Soviet breakout of the ABM Treaty. The ASMS appropriation for FY85 was $98 million, and the Administration requested an increase to $173.9 million. The Alternate Strategic Defense Initiative would go even further, doubling the ASMS budget to $196 million.

Sec. 5(a) As the President has stated, the SDI research program has been established to "provide to a future President and a future Congress the technical knowledge necessary to support a decision in the early 1990s on whether to develop and deploy such advanced defensive systems." In order for the Congress to make this important decision, it will need the objective analysis and evaluation of experts in defense, arms control and ballistic missile defense technology. This section therefore establishes a senior-level, congressionally appointed panel of experts to monitor and report to Congress annually on SDI technology and its implications for U.S. arms control policy.

Sec. 6. Because SDI projects are becoming so large, it is important that the Congress have the means to properly oversee the work in this major research effort. This section requires that SDI projects, which the Secretary of Defense estimates will cost more than $200 million to complete, will be designated as programs. The $200 million threshold is same threshold used by the SAR.

Sec. 7. This section is self-explanatory. It imposes generally the same reporting requirements called for in the FY85 Defense Authorization on SDI goals, program explanations, consultations with the allies, and impact on the ABM Treaty.

Sec. 8. and Sec. 9. These sections are self-explanatory. They would have the CBO study the impact of SDI research on the R&D budget within DOD and the entire federal budget, and report to Congress. The Joint Economic Committee also would be tasked with studying the impact of SDI research on the civilian sector of the eonomy and reporting to Congress on its findings.

Sec. 10. This section also is self-explanatory. It reaffirms Congress' commitment to the 1972 ABM Treaty and urges that all SDI research be conducted in a manner that fully complies with the treaty.

By Mr. LEAHY (for himself, Mr. STAFFORD, Mr. ZORINSKY, Mrs. HAWKINS, Mr. HART, Mr. BAUCUS, Mr. KENNEDY, Mr. MOYNIHAN, Mr. HARKIN, and Mr. INOUYE):

S. 878. A bill to direct the Secretary of Agriculture to take certain actions to improve the productivity of American farmers, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

AGRICULTURAL PRODUCTIVITY ACT

Mr. LEAHY. Mr. President, today, I am introducing legislation with nine of my colleagues which will begin important basic research on farming systems which do not rely solely on costly chemical inputs, but rather on biological control of weeds and pests, crop rotations, and the use of intercropping to strengthen soils.

The Agricultural Productivity Act of 1985 contains provisions designed to improve our knowledge about the feasibility of these farming systems.

Congress has spoken twice on the need for this type of legislation. In the 1977 farm bill, Members of this body and the House of Representatives directed USDA to investigate and analyze low-energy agricultural techniques.

Three years later, the Department published their report. It examined the use of manures and crop residues to improve soil fertility and strength. It also examined a series of new methods of fertilization, soil conservation, and enhanced crop production.

USDA concluded that even a partial shift away from energy intensive farming practices would go a long way toward helping the farmer improve his operation.

In the 1981 farm bill, Congress spoke again on this matter. Again, we urged the USDA to carry out research necessary to determine the practicality of these methods.

USDA's own internal advisers have been making this same point for several years. In 1983, the Agricultural Research Service proposed its 6-year program plan. In the plan ARS advocates the development of farming systems characterized by less costly methods and by technologies that are safe, sustainable, and environmentally sound.

The plan recommended innovative research to reduce farm production costs while maintaining a high level of sustainable productivity through the development of efficient and diversified crop and animal production systems and to insure conservation of our natural resources.

Mr. President, the Agricultural Productivity Act provides the tools necessary to insure that the research that Congress and others have been calling for is done adequately and properly.

It would establish 24 on-farm pilot research projects. Each of the farms would be studied over a 5-year period as they made the transition from energy and chemical intensive farming to systems which rely less on petroleum based inputs.

Study subjects would include changes in soil profile, crop yields, energy and water usage, farmer

income, and other factors important to the American farmer.

Twenty-four additional projects would take place over the same period. This group of farms, already employing low-energy techniques, would serve as a comparison for the transition farms as well as a measure of the feasibility of such farming systems over the long term.

The farms would be located in a manner which would take advantage of the widest possible variety in soil and climatic conditions.

Dairy farms, crop and livestock farms, row crop farms, and fruit and vegetable operations would all be examined.

These on-farm studies will provide farmers and others with the kind of practical demonstrations necessary to determine the practicability of such operations.

The bill also establishes a program to assist farmers who utilize intercropping systems to establish vegetative cover that improve nitrogen fixation and control soil erosion. Intercropping is the practice of planting legumes, grasses, or other soil conserving crops between rows of such crops as wheat, corn, or soybeans.

Finally, the bill directs the Secretary of Agriculture to make an inventory of existing research and extension materials, and recommend new research that may help farmers, achieve a better understanding of these innovative farming methods.

Mr. President, the costs of this effort would be minimal and the benefits to American agriculture, the consumer, and the environment could be substantial.

I urge my colleagues to join with us in this positive effort to open new, self-sufficient opportunities for our farmers.

By Mr. DOLE (for Mr. HUMPHREY):

S. 880. A bill to sunset the Economic Development Administration, to repeal the Public Works and Economic Development Act of 1965, and for other purposes; to the Committee on Environment and Public Works.

ECONOMIC DEVELOPMENT ADMINISTRATION SUNSET ACT

● Mr. HUMPHREY. Mr. President, a recent article in Reader's Digest asked Americans to consider the legacy of the Economic Development Administration [EDA]. The article, aptly titled, "Is This Any Way to Run an Aid Program?" chronicled "Tax dollars for luxury resorts, aid for affluent suburbs, loans to political patrons * * * all in the name of alleviating rural poverty."

Created with the intent of fighting poverty in some of the Nation's most distressed areas, EDA has strayed hopelessly off course. Besides issuing grants to build golf courses and boat marinas, the Agency has sent huge piles of Federal money to some of the Nation's wealthiest communities. As chairman of the Subcommittee on Regional and Community Development, it has become very clear to me that this is no way to run an aid program. This would be true in the best of fiscal times. But with Federal deficits completely out of control, the kind of wasteful and inefficient spending through programs like EDA simply must stop.

Today, I am introducing legislation which would terminate the Economic Development Administration. I am doing so for two reasons. First, and most importantly I am deeply concerned over the Federal deficits which we face. The mountain of debt which we have created over the past several years looms ominously over us. Clearly, it stands as a threat to the fundamental economic health of this Nation, and as such, it threatens real economic growth and real economic development. In my view, the way out of our fiscal mess is simply for the Government to stop spending money on programs it can no longer afford.

EDA is such a program, not only because of the mismanagement and misdirection implied by the Reader's Digest article, but perhaps more fundamentally, because of the policy assumptions upon which it was founded. Created at the height of the Great Society, it embodied the notion that the Government was an effective agent in stimulating development. My second objective in introducing this legislation is to challenge that notion head on. I share the view of this administration that real economic progress, and thus real jobs, are not created by the Government. Rather, real economic development must come from a healthy and vigorous free enterprise system. A good place to start is rolling back the tide of huge Federal deficits by eliminating programs that do not work and that we cannot afford.

There is no question that the sorry record of EDA is a function of its misguided mission. It is a classic study in pork barrel programs. Today some 85 percent of the country qualifies for assistance under the program as economically distressed areas. That covers nearly every one of the 435 congressional districts. But the dollars which have been delivered to the district have been expensive. The administration tells us that over the past 8 years, EDA programs have added $9.4 billion to the Federal deficit through bad loans and grants. Over 55 percent of direct loans issued by the Agency are delinquent.

Mr. President, the American taxpayers deserve far better than this. In light of the huge Federal deficits, we simply cannot afford any more fiscal foolishness from the Federal Government. As unpopular as it may be in the Halls of Congress, wasteful and ineffective pork barrel programs like EDA have got to go. That is the purpose of the legislation which I am introducing today. This bill is supported by the administration, and I am informed it is fully consistent with the President's program.

Mr. President, I ask that the bill be printed in the RECORD following my remarks. I also ask that a copy of the Reader's Digest article, "Is This Any Way To Run an Aid Program?" be printed.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 880

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Economic Development Administration Sunset Act of 1985".

REPEAL AND TERMINATION

SEC. 2. (a) The Public Works and Economic Development Act of 1965 (42 (U.S.C. 3121 et seq.), the Local Public Works Capital Development and Investment Act (42 U.S.C. 6701 et seq.) and title I of the Community Emergency Drought Relief Act of 1977 (42 U.S.C. 5184) are repealed.

(b) On and after the effective date of this Act—

(1) the Secretary of Commerce is authorized to take such actions as necessary or appropriate to administer and liquidate any existing grant, contract, agreement, loan, obligation, debenture, or guarantee made by the Secretary pursuant to the Acts repealed under subsection (a); and

(2) the Economic Development Revolving Fund established under section 203 of the Public Works and Economic Development Act of 1965 (42 U.S.C. 3143) shall continue in existence for the purposes of—

(A) receipt of collections and repayments in connection with assistance previously extended under such Act and the Trade Act of 1974 (19 U.S.C. 2341 et seq.) by the Economic Development Administration; and

(3) payment of all obligations and expenditures arising in connection with such Act, until the Secretary of Commerce certifies to the Secretary of the Treasury that the Fund is no longer needed, at which time any moneys remaining in the Fund and any future payments and collections received in connection with any loan or guarantee made under such Act shall be deposited into the general fund of the Treasury as miscellaneous receipts.

AUTHORIZATION

SEC. 3. There are hereby authorized to be appropriated such sums as necessary to provide for the orderly phase out of the activities of the Economic Development Administration.

CONFORMING AMENDMENTS

SEC. 4. Title 5, United States Code is amended—

(1) in section 5315 by striking out "(8)" after "Assistant Secretaries of Commerce" and inserting in lieu thereof "(7)"; and

(2) in section 5316 by striking out "Administrator for Economic Development.".

EFFECTIVE DATE

SEC. 5. This Act shall be effective on October 1, 1985.

[From the Reader's Digest, March 1985]

IS THIS ANYWAY TO RUN AN AID PROGRAM?

(By Sheldon Kelly)

Created in the heyday of the Great Society in 1965, the Economic Development Administration (EDA) promised an economic revival for America's rural poor. Federal grants, loans and loan guarantees made to localities, businesses and individuals would alleviate unemployment and eliminate the "pockets of poverty" in which 12 percent of the population lived. More than $12 billion in federal outlays have produced few measurable results, however. Indeed, a former top-ranking EDA official estimates that almost $3.5 billion has been "totally wasted.

When the Reagan Administration came to power, Budget Director David Stockman concluded that EDA was "wasteful, inefficient, the worst kind of pork-barrel spending," and moved to shut it down. But four years later, EDA remains very much in business, a textbook example of how difficult—if not impossible—it is to terminate an unworkable federal program.

By repeatedly broadening the program until most of the nation's 435 Congressional districts—encompassing more than 80 percent of the population—were classified as "economically distressed" and thus eligible for EDA aid, Congress has created a vast constituency to demand EDA's continuation. And EDA largess has hardly been confined to pockets of poverty. Some of the country's most affluent areas—from the booming oil town of Anchorage, Alaska, to Greenwich, Conn. (per capita income: $20,083)—have received huge grants.

Examples of EDA waste and mismanagement abound:

Phoenix, Ariz., received a grant to build a golf course, jogging and tennis facilities with its own utility system on a 60-acre landfill. But when the adjoining Salt River predictably flooded, washing away a large portion of the landfill, the project—with $813,000 already disbursed—had to be abandoned.

Paulsboro, N.J., received —— for a much-needed 1.5-million-gallon water-storage tank. But the tank didn't work because it was badly designed. For seven years the tank sat idle until another $300,000 was shelled out to fix it.

Tower, Minn., an isolated, lakeside community, was given $670,000 to build a marina complex. The project, EDA documents show, proved far to costly for the small town to maintain and has become "a total bust."

EDA successes are rare, and overshadowed by countless failures. In 1981 an EDA-funded analysis of its $1.1-billion loan portfolio revealed that the agency had neither firm lending criteria nor loan-risk guidelines. Borrowers' cash-flow projections were often accepted without question; debt collection received lower priority than the granting of loans. Incredibly, 42 percent of EDA's borrowers were either seriously delinquent or had stopped payment altogether on loans totaling nearly $450 million.

Although EDA's budget was pared from $625 million in 1980 to $198.5 million in 1982, the Reagan Administration was unable to persuade Congress to shut down the agency. Dismayed, the newly appointed Assistant Secretary of Commerce in charge of EDA, Carlos C. Campbell, ordered an analysis of 20 representative EDA projects. The results were shocking; for a total EDA investment of $27.5 million, only 86 jobs had been created—a per-job cost of $320,000. Yet even as Campbell argued anew for dismantlement, Congress extended the agency.

Most Congressmen don't give a damn about saving taxpayer dollars," Campbell concludes. "Politics is routinely placed above the national interest." Indeed, political connections between EDA and Congress are evident:

For 11 years the highly successful West Oakland (Calif.) Health Center had made no payments on its $750,000 EDA loan. The center, with cash reserves in 1982 totaling $2.8 million, cited loss of other federal funds as its reason for nonpayment. When pressed, the center threatened to "make the matter political." Soon Rep. Ronald V. Dellums (D., Calif.) jumped to the center's defense, introducing legislation to forgive the loan and accrued penalties. Threatened with EDA foreclosure on its loan, the center began making payments—13 years late.

In Alma, Mich., investors in an ethyl-alcohol plant received a $7.3-million EDA loan guarantee in 1980. By 1982 the project had defaulted, and then-Rep. Donald J. Albosta (D., Mich.) lobbied vigorously for additional federal funding for its investors—one of whom happened to be his brother-in-law. When the project failed, taxpayers footed most of the bill. Albosta, a staunch EDA supporter, served on the committee that has jurisdiction over the agency.

To help tighten up operations, Campbell hired EDA's first certified commercial lender—a professional banker. And throughout 1983, the outspoken Campbell continued his crusade against waste, improving EDA's debt collection, consolidating staff and centralizing the agency's decision-making.

Campbell's tough, businesslike approach to angered EDA's Congressional supporters that an investigative subcommittee notified the beleaguered administrator it wanted to question him about EDA staffing levels, grant recipients and employee morale. Campbell braced himself to meet his questioners.

Days before the scheduled hearing, President Reagan signed EDA's $240-million budget for 1984. Meanwhile, word was passed from the White House to EDA supporters on Capitol Hill that Campbell would be replaced by a more "sensitive" official. In January 1984 Campbell was quietly transferred from EDA to the Treasury Department. White House aide J. Bonnie Newman was appointed to succeed him.

Today EDA is still a thriving bureaucracy—the agency's budget is $200 million—but its history is not forgotten. Commerce's Office of Inpector General (OIG) remains busy investigating fraud cases involving EDA funds, including a $17.5-million suit brought by the Justice Department against Youngstown Steel, for allegedly making false claims to obtain federal funds. It is also investigating scores of mismanaged projects. Indeed, an OIG report on 90 EDA business loans worth $82.5 million revealed that 43 percent of the recipients had actually eliminated jobs. More than 30 percent of the companies were found to have been financially unsound or even bankrupt at the time they received the money.

In another study the OIG concluded that $100 million awarded under the 1983 Jobs Act had reaped dismal results. Twelve projects started in the first six months of the program revealed an incredible per-job cost of $20,000 each month.

If, as political realities seem to dictate, EDA will remain a federal agency, what should be done to improve its effectiveness? "It's vital to understnd that there's no such thing as a government-created job," says Campbell. "Real jobs come from the private sector."

Joseph R. Wright, deputy director of the Office of Management and Budget, argues that EDA should redefine its target areas without political influence and get out of the loan business entirely. "We have shown that we can't manage loan programs as well as the private sector can," he says. "We need to get back to the American basics of running efficient government stop playing poker with tax dollars.●

By Mr. KENNEDY (for himself, Mr. WEICKER, Mr. DODD, Mr. PELL, Mr. CRANSTON, Mr. STAFFORD, Mr. PACKWOOD, Mr. CHAFEE, Mr. METZENBAUM, Mr. KERRY, Mr. SIMON, AND Mr. COHEN):

S. 881. A bill to extend title X of the Public Health Service Act for 3 years; to the Committee on Labor and Human Resources.

EXTENSION OF TITLE X OF PUBLIC HEALTH SERVICE ACT

● Mr. KENNEDY. Mr. President, on behalf of Senators WEICKER, DODD, PELL, CRANSTON, STAFFORD, PACKWOOD, CHAFEE, METZENBAUM, KERRY, SIMON, COHEN, and myself, I send to the desk a bill to reauthorize title X of the Public Health Service Act. Since its enactment in 1970, this legislation has supported our Nation's family planning assistance.

A nationwide system of thousands of local clinics supported by this legislation provides almost 5 million low-income women with access to comprehensive family planning services. For some of the women served, family planning clinics represent their only source of primary health care services.

Participation in title X programs is totally voluntary. A full range of safe and effective contraceptive methods are available including natural family planning methods.

The performance of abortions with title X funds is and has always been prohibited by the authorizing statute. The title X program helps reduce the number of abortions.

One of the most important functions of the family planning program is in the prevention of unwanted teenage pregnancy. Teenage pregnancy is a major contributor to poverty and welfare dependency. In recent years the teenage pregnancy rate in the United States has been rising and is now well above that of other developed nations. It is more than twice the rate of England and Canada. Countries with the most accessible contraceptive services for teenagers have the lowest rate of teenage pregnancy. Though funding levels for family planning services have decreased significantly in the past few years, it is estimated that over 800,000 unintended pregnancies—almost half involving adolescents—are avoided every year through the efforts of title X programs.

The legislation we are introducing contains no changes in the title X program other than extending the authorizations of appropriations for 3 additional years. Because the final funding levels for title X will inevitably grow out of the budget process and because we believe it is important to demonstrate the broadest possible base of support for the program apart from overall budget issues, authorization levels are set on a such-sums basis.●

By Mr. CRANSTON (for himself, Mr. MATHIAS, Mr. PELL, Mrs. KASSEBAUM, and Mr. DODD):

S. 882. A bill to amend the Peace Corps Act to establish a Peace Corps National Advisory Council, to establish a policy of providing opportunities for a volunteer corps of at least 10,000, and to provide for nonpartisan appointments; to the Committee on Foreign Relations.

PEACE CORPS AMENDMENTS

Mr. CRANSTON. Mr. President, I am introducing today S. 882, the proposed "Peace Corps Amendments of 1985." I am pleased to be joined in sponsoring this measure by two fellow Foreign Relations Committee members, the distinguished Senator from Maryland [Mr. MATHIAS] and the committee's ranking minority member, the Senator from Rhode Island [Mr. PELL], who also joined with me as the principal Republican and Democratic sponsors of S. 1015, the Peace Corps Autonomy Act which was enacted into law as title VI of the International Security and Development Cooperation Act of 1981, Public Law 97-113. Also joining as cosponsors are the able Senators from Kansas [Mrs. KASSEBAUM] and Connecticut [Mr. DODD] who serve with us on the Foreign Relations Committee.

This legislation would do three things. First, it would establish a statutory Peace Corps National Advisory Council. Second, it would establish a policy of providing opportunities for a volunteer corps of at least 10,000 in strength. Third, it would provide that overseas appointments of Peace Corps employees be made on a nonpartisan basis.

TWENTY-FIFTH ANNIVERISTY OF THE PEACE CORPS

Mr. President, next year the Peace Corps will celebrate its 25th anniversity. For almost a quarter of a century, Americans of all ages have volunteered for the Peace Corps. In all, over 100,000 Americans have served as Peace Corps volunteers. They have established a record of service throughout the world of which every one of us can and should be proud.

Former Peace Corps volunteers are continuing to contribute in a multitude of ways, from activities in small communities to national leadership. Two former Peace Corps volunteers, the Senator from Connecticut, [Mr. DODD] and former Senator Tsongas from Massachusetts have been elected to this body. Four former volunteers currently serve in the House of Representatives.

For a period of time, however, the visibility of the Peace Corps has seemed to diminish. Some wondered whether the Peace Corps still existed or whether the idealism of the sixties which had spawned and nurtured this program has been replaced by a consumptionistic, materialistic orientation. In 1981, the legislation I authored in the International Security and Development Cooperation Act of 1981 set the Peace Corps free from the Federal bureaucracy in which it has been buried and was hibernating and gave it an opportunity to reestablish its presence, both in the public eye at home and throughout the world.

The Peace Corps is alive and well today and is thriving. Public interest in Peace Corps volunteer service is strong, as demonstrated by the flood of inquiries received by the Peace Corps in response to Peace Corps Director Loret Ruppe's call for 600 volunteers to go to Africa to help deal with the agricultural challenges facing that famine-ridden part of our world. Inquiries were pouring into Peace Corps offices at the rate of 1,000 calls a day. However, even as we rejoice in the renewal of interest in this program, there is more that can be done to help continue to stimulate this revival and renewal of the ideals and the vision that the Peace Corps has always symbolized and to reinforce the bipartisan, nonpartisan nature of support for the program.

OPPORTUNITY FOR RENEWAL AND REDEDICATION OF THE PROGRAM

Mr. President, the 25th anniversary of this unique program that so well exemplifies the compassion and the willingness to help those in need which is integral to the American spirit presents us with a special opportunity to reflect upon the Peace Corps and on where it should be going in the next 25 years.

Despite the renewed sense of interest in and a much greater public awareness of the Peace Corps since Congress granted it independence in 1981, the Peace Corps today is one-third the size it was in 1966 when more than 15,000 Peace Corps volunteers were serving throughout the world. Today, we have barely 5,000 volunteers. Concerns over the utilization of overseas Peace Corps staff posts as political patronage plums continue to plague the program. The resources, talents, and ideas of the thousands and thousands of former Peace Corps volunteers bearing on the future direction of the Peace Corps program are not used as a part of the formal structure within which Peace Corps planning and programming decisions are made. It is long since past time, for example, for the appointment of a former Peace Corps volunteer as Director of the Peace Corps.

The legislation that we are introducing today is aimed at addressing each of these issues.

OUTLINE OF LEGISLATION

NATIONAL ADVISORY COUNCIL

First, this legislation would mandate the establishment of a bipartisan Peace Corps National Advisory Council which would be directed to evaluate the accomplishments of the Peace Corps, assess the potential capabilities and future role of the Peace Corps, and make recommendations to the Director of the Peace Corps, the President, and the Congress. The Council's recommendations would serve to help guide the future direction of the Peace Corps and ensure that the purposes and programs of the Peace Corps are carried out in ways that are economical, efficient, responsive to changing needs in host and potential host countries and to changing relationships among peoples, and in accordance with law. The Council would consist of 16 voting members. Eight would be appointed by congressional leaders and seven by the President. Not more than four of the President's appointees could be from one political party. At least six of these appointed members would be required to be former Peace Corps volunteers. The Secretary of State would serve as an ex officio, voting member.

This Council would serve as a real, working group, not a perfunctory rubber-stamp.

Mr. President, there is a nonstatutory advisory council to the Peace Corps. However, as far as we can tell from the scant information available about it, it contains no former Peace Corps volunteers and does not have the type of mission, responsibilities, scope, or experienced and representative membership as the advisory council which would be established under this legislation.

I am convinced that this is the right point in the history of the Peace Corps to create this kind of specialized, representative, bipartisan body to bring together individuals with relevant experience and insights about the role that the Peace Corps should play in the world during its next quarter of a century.

VOLUNTEER STRENGTH GOAL

Second, the legislation would establish a goal of having a Peace Corps volunteer strength of 10,000 individuals. In 1984, there were about 5,200 Peace Corps volunteers serving in 60 countries around the world. For the past 18 years, however, the number of Peace Corps volunteers has steadily declined, from its height of more than 15,000 in 1966, to 9,000 in 1970 and

6,000 in 1980. The worldwide distribution has also declined. Almost half of the current volunteers—2,400—serve in Africa. Less than 200 serve in South America—all of those in only two countries.

Obviously, an increase in the size of the Peace Corps must be carefully planned and executed. Expansion must be tailored to, first, the needs of and requests for assistance from host countries, second, the pool of qualified volunteers, third, the capacity of the Peace Corps to provide adequate training and support to and placement of volunteers, and, fourth, budgetary realities given our deficit problem and the great competition for scarce resources. But I believe there is little doubt that a goal of a total volunteer strength of at least 10,000 is attainable and worthwhile.

OVERSEAS STAFF APPOINTMENTS

Finally, Mr. President, this legislation would amend the Peace Corps Act to provide that overseas staff appointments must be nonpartisan. This provision deals with a problem that has plagued the Peace Corps through both Republican and Democratic administrations. Unfortunately, Peace Corps country directorships have sometimes been viewed as political patronage prizes. These posts are too important to be handed out to unqualified persons. A Peace Corps country director is a vital link both to the government of the host country and to scores of volunteers in the field who must depend on the country director's good judgment and sensitivity on numerous occasions.

Peace Corps Volunteers often serve in precarious positions, hundreds of miles from any governmental—ours or the host country's—support mechanism or protection. They don't live, as do most foreign service officers, in American compounds or foreigners' enclaves with special commissary and diplomatic privileges. Peace Corps volunteers live generally at the level and in the communities of the people they come to serve and help.

They deserve to know that their country director and support staff were chosen specifically because of the capacity to be of help to Peace Corps volunteers and not as a reward for political contributions or campaign work.

Unlike overseas diplomatic missions of the U.S. Government which are supported by a cadre of career, professional foreign service staff, the Peace Corps' overseas programs are staffed by very small numbers of American employees serving in the Peace Corps for statutorily-limited periods, generally no more than 5 years. Under these circumstances, missteps or miscalculations by an unqualified Peace Corps country director or other staff person could have dire consequences. Each overseas Peace Corps staff member must be competent and dedicated to the goals of the Peace Corps and to the well-being and success of the volunteers and should be expressly selected beause of and only because of those attributes.

CONCLUSION

Mr. President, the Peace Corps has always been a very special program for me. In the midsixties, I had the honor of serving as a Peace Corps program evaluator, visiting volunteers on the job in Ghana. Seeing firsthand the tremendous work being done by these dedicated Americans left me with an enduring commitment to this truly outstanding endeavor.

Mr. President, I also have a very special feeling toward the Peace Corps because my State, California, has contributed more volunteers to the Peace Corps than any other. There are almost 700 Californians currently serving in the Peace Corps—13 percent of the total. In total, more than 15,000 Peace Corps volunteers have come from the State of California.

Peace Corps volunteers have contributed in countless ways to the goal of world peace and understanding. Both America and the world have much to gain from an expanded, rededicated, and nonpartisan Peace Corps. The Peace Corps is needed as much today as it has ever been. I believe that enactment of this legislation will provide an opportunity to help make the next 25 years the best they can be for this unique people-to-people effort.

By Mr. INOUYE:

S. 884. A bill to amend the Agricultural Act of 1949 to provide price support for the 1986 through 1989 crops of sugar beets and sugarcane; to the Committee on Agriculture, Nutrition, and Forestry.

PRICE SUPPORTS FOR SUGAR BEETS AND SUGARCANE

● Mr. INOUYE. Mr. President, I rise today to introduce legislation which will help maintain a viable and productive domestic sugar industry. I do so following hearings which were held yesterday before the Senate Committee on Agriculture, Nutrition and Forestry at which convincing testimony was offered on behalf of the domestic industry and the sugar price support program contained in the Agriculture and Food Act of 1981—Public Law 97-98. These hearings were chaired by our distinguished colleague from North Dakota [Mr. ANDREWS], and I commend him for his efforts on behalf of American agricultue and domestic sugar growers.

The bill I am introducing preserves the main features of the present sugar program: nonrecourse loans and modest increases in the loan rate for cane sugar over the next 4 years. Under present legislation, the loan rate has risen only a penny from 17 cents a pound to 18 cents. This amounts to an increase of only 1.5 percent a year—well below the annual inflation rate of 3 to 6 percent. My bill would increase the loan rate by a half penny each year for the next 4 years from 18½ cents a pound in 1986 to 20 cents a pound in 1989. The proposed increases represent simple adjustments for inflation, which is projected to be approximately 5 percent for the balance of the decade.

Mr. President, my bill is designed not to guarantee the sugar industry profits, which have been minimal over the past 4 years, but only to offer the industry the hopes of meeting the challenges of unfair foreign competition, record deficits, punishing interest rates, high unemployment, and a growing trade deficit. To illustrate, over the last 4 years, on operating revenues of approximately $400 million, the Hawaiian sugar industry lost $90 million in 1981 and $2 million in 1982, while earning $29 million in 1983 and $21 million in 1984—before taxes. Given this net loss, one can hardly accuse the sugar program of providing an unfair windfall for sugar growers and processors, as has been claimed by some.

Mr. President, sugar is vitally important to the State of Hawaii. A total of 26,000 people owe their jobs directly or indirectly to the industry, which is the State's third largest source of revenue; 185,000 acres, or three-fourths of our farmland, is planted in sugar, and there are presently no good alternatives to this use. A cut in the present sugar loan rate, as proposed by the President in S. 501, would put the Hawaiian sugar industry out of business and double the State's unemployment rate to 11 percent. On Maui and the big island, unemployment would exceed 20 percent, while on the Island of Kauai, it would reach 30 percent. The State and Federal Governments would have to expand welfare rolls and social services to deal with the thousands of newly unemployed people.

The Hawaiian industry produces sugar at about 18 cents a pound, which is about the world average, and we would do even better if it were not for the strength of the dollar abroad. In the State of Hawaii, which leads the world in sugar research, we produce as much sugar with 8,000 workers as they do in the Dominican Republic with 80,000. Similarly, we produce sugar at a cost below that of such countries as Barbados and Haiti. Yet we pay our workers a minimum of $7 an hour, which is almost as much as Haitian workers earn in a week.

During the last 4 years, the Hawaiian sugarcane industry has streamlined its operations and cut acreage by almost 15 percent. The number of workers employed in the Hawaiian industry has dropped from 8,600 in 1981 to a projected 7,500 by the end of 1985,

while the cost of producing a pound of sugar has declined nearly 10 percent. Hawaii's sugarcane workers have agreed to freeze their wages for 2 of the past 3 years, and they have given up overtime on weekends and paid furloughs. These cutbacks have been a cooperative effort, involving both management and labor, and only the most efficient companies are still in business. All they are asking for is a measure of protection against the dumping of surplus sugar on the world market at ruinous prices. They do so in the hopes of riding out the roller coaster of world sugar prices, currently at an all-time low, and for the prospects of better days ahead.

Finally, Mr. President, we come to the issue of cost. It is often argued that the sugar program operates at a high cost to the American consumer. Nothing could be further from the truth, and the Senate has rejected amendments to the sugar program based on this argument by 2-to-1 margins on three separate occasions since 1981.

We hear a great deal about the high cost of certain commodity programs to the U.S. Treasury. Does this mean that the sugar program costs the taxpayer anything? Not a penny, since there have been no forfeiture of sugar placed on loan with the CCC. Instead, the U.S. Government has earned revenues from the fees and duties placed on imported sugar.

What then of the sensational claims that the sugar program is costing American consumers hundreds of millions of dollars each year by denying them the privilege of buying underpriced sugar from abroad? Mr. President, this is nothing but a smokescreen put forward by some sugar users who would like to increase their profits by having access to the current glut of sugar on the world market. I would cite three examples to prove my point.

First, the cost of sugar that you buy in the supermarket is cheaper today than it was in 1980–81, when we had no sugar program. How could this be if the sugar program has unfairly increased costs to the consumer over the past 4 years?

Second, if lower sugar prices are supposed to mean lower costs to the consumer, why have we not seen this in the marketplace? I take as my example the Market Basket Survey published by the New York Department of Consumer Affairs on March 25, 1985. Based on a survey of 150 different food stores in New York City for the period January 1984 to January 1985, the department of consumer affairs found that while the cost of sugar decreased by 4 percent last year, the price of 16-ounce sandwich cookies increased by 10 percent, the cost of ice cream went up 13 percent, and incredibly, the cost of colas rose 12 percent. I say incredibly because during this period most soft drink manufacturers switched completely to high fructose corn syrup in formulating their soft drinks. HFCS is available in the United States for 25 percent less than sugar, yet the price of cola increased significantly. Given that, caloric sweeteners like sugar are an important component of processed foods, where are the savings that were supposed to accrue from lower sugar prices? There were none. Savings from cheaper sugar are not being passed on to consumers, nor would they be if we abolished the sugar price support program or quotas. Rather, the New York City Department of Consumer Affairs has underscored the point that high sugar prices are used as an excuse for raising the cost of sugar-containing products in times of short supply, but these prices do not come down when the price of sugar drops.

Third, I can disprove the consumer-cost argument by citing the case of Canada, where the Government supports sugar growers through direct payments and does not limit access to the world sugar market. If the sugar user's argument is correct, we would expect consumers in Canada to enjoy significant savings over their American counterparts. But this is definitely not the case. As was reported at the International Sweetener Colloquium just 2 months ago, the retail price of sugar in Canada averaged just under 33 cents a pound in Janaury 1985, while in the United States it was 34 cents a pound. Where are the much touted savings for consumers in a country that allows free use of world sugar? There aren't any—the difference between retail sugar prices in the United States and Canada was just a penny a pound. American consumers are being duped by the argument that somehow our sugar price support program costs them vast sums of money in the supermarket.

Mr. President, it has for years been the policy of the United States to maintain a domestic sugar industry capable of producing a significant portion of our sugar requirments. Without a sugar industry, we would have to import all, not just some, of our needs. To preserve our domestic industry, we need to protect it against unfair foreign competition. Without a domestic industry, we would be completely dependent on the whims of a boom-bust sugar market. The USDA has warned in testimony before the House Ways and Means Subcommittee on Trade that American consumers would face price increases of several hundred percent if we became totally dependent on foreign producers.

Mr. President, the domestic sugar industry is efficient and worth saving, otherwise I would not ask this body to expend one dime or one ounce of effort on its behalf. I commend this bill to my colleagues and ask unanimous consent that it be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 884

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended by adding at the end thereof the following new subsection:

"(i)(1) The price of each of the 1986 through 1989 crops of sugar beets and sugarcane, respectively, shall be supported in accordance with this subsection.

"(2) Effective October 1, 1985, the Secretary shall support the price of domestically grown sugarcane through nonrecourse loans at such level as the Secretary determines appropriate but not less than 18½ cents per pound for raw cane sugar for the 1986 crop, 19 cents per pound for the 1987 crop, 19½ cents per pound for the 1988 crop, and 20 cents per pound for the 1989 crop.

"(3) Effective October 1, 1985, the Secretary shall support the price of domestically grown sugar beets through nonrecourse loans at such level as the Secretary determines to be fair and reasonable in relation to the level of loans for sugarcane.

"(4) The Secretary shall announce the loan rate to be applicable during any fiscal year as far in advance of the beginning of the fiscal year as practicable consistent with the purposes of this subsection.

"(5) Loans during any such fiscal year shall be made available not earlier than the beginning of the fiscal year and shall mature before the end of that fiscal year.".●

By Mr. KERRY (for himself, Mr. CHAFEE, Mr. MATHIAS, and Mr. HART):

S. 885. A bill to establish a moratorium during the fiscal years 1985 and 1986 on the testing of antisatellite weapons against objects in space; to the Committee on Armed Services.

MORATORIUM ON THE TESTING OF ANTISATELLITE WEAPONS

Mr. KERRY. Mr. President, I rise to offer a bill to establish a moratorium during fiscal year 1985 and 1986 on the testing of antisatellite weapons against objects in space. I am very pleased to be joined by the distinguished Senator from Rhode Island [Mr. CHAFEE] and by the distinguished Senator from Maryland [Mr. MATHIAS] as cosponsors.

It is my firm belief that a continued moratorium on the testing of antisatellite weapons is essential to the United States and the Soviet Union to preserve the current posture of deterrence which is, I think, keeping an uneasy peace.

Last year, as the present occupant of the chair [Mr. WARNER] knows well and as other Senators know, the Congress did place a moratorium on the testing by the United States of antisatellite weapons against objects in space. This moratorium was passed in the hope that it would lead the Soviet Union to negotiate a permanent treaty

and the permanent prohibition thereof.

The moratorium expired on March 1 of this year just before the Geneva talks began. The Reagan administration stated that it does not intend to test satellite weapons in the near future but will perhaps by June at the earliest.

As the arms talks begin, I believe it is especially important that we maintain our ban on space test ASAT's which might close the window of opportunity. I believe it is essential because this barrier, if we cross it, is one like many other barriers of technology which may prove almost impossible to come back from. It will be difficult to say the least to put the ASAT genie back into the bottle if we test.

Mr. President, I think the particular difficulty is that at this point in time we have a system with the F-15 where if we test we immediately thereupon, if it is a successful test, have a deployed system, whereas the Soviet Union does not. Because the current Soviet capacity in ASAT's is such that they are not able to knock down our important command and control communications satellites, to test is merely to ask the Soviet Union to do likewise and there to affect our command and control system; also because of the great difficulty of verification, once one of the these systems has been created.

I am proud today to join with my colleagues from Maryland and Rhode Islands in an effort to ask the Congress to continue this moratorium.

Mr. President, it is a moratorium that will not in any way threaten the security of the United States because of our current levels and capacities versus those of the Soviet Union and our capacity to track their current deployment.

Furthermore, it is a moratorium which permits to the President of the United States the option of being able to certify to the Congress if the Soviet Union were either to test or to cease to negotiate in good faith. At any moment that the President were to say that either of those occurrence had taken place, we would be in a position at that point to immediately test our ASAT system and to proceed from that point.

Mr. President, I would urge the Senate and the Congress to readopt that it has before adopted, and which I am proud to say that my predecessor played a very significant role in seeking in the past.

Mr. President, I ask unanimous consent that a copy of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 885

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Congress finds that—

(1) the United States and the Soviet Union have agreed to resume negotiations on the control of nuclear weapons and weapons in space;

(2) the United States and the Soviet Union are currently observing a moratorium on the testing of anti-satellite weapons against objects in space; and

(3) the current moratorium on the testing of anti-satellite weapons against objects in space has helped to create an atmosphere conducive to continued United States-Soviet negotiations.

(b) Section 6100 of the Department of Defense Appropriations Act, 1985, as contained in section 101(b) of the joint resolution entitled "A joint resolution making continuing appropriations for the fiscal year 1985, and for other purposes" (Public Law 98-473) is amended—

(1) in subsection (a)—

(A) by striking out "(a)";

(B) by striking out paragraphs (1) through (4); and

(C) by adding at the end thereof the following:

"(1) that the Soviet Union refuses to resume or continue neogtiations aimed at achieving an agreement on anti-satellite weapons; or

"(2) that the Soviet Union has conducted a test of" an anti-satellite weapon against an object in space"; and

(2) by striking out subsections (b) and (c).

(c) Notwithstanding any other provision of law, no funds appropriated for the fiscal year 1986 may be obligated or expended to test against an object in space the miniature homing vehicle (MHV) anti-satellite warhead launched from an F-15 aircraft unless the President determines and certifies to the Congress—

(1) that the Soviet Union refuses to resume or continue negotiations aimed at achieving an agreement on anti-satellite weapons; or

(2) that the Soviet Union has conducted a test of an anti-satellite weapon against an object in space.

By Mr. ZORINSKY (for himself, Mr. DOLE, Mr. THURMOND, Mr. HATCH, Mr. PRESSLER, Mr. SYMMS, Mr. TRIBLE, Mr. GLENN, Mr. NUNN, Mr. GOLDWATER, Mr. HOLLINGS, Mr. GARN, Mr. GORE, Mr. BAUCUS, Mr. STENNIS, Mr. MELCHER, Mr. EAST, Mr. WARNER, Mr. GRAMM, and Mr. STEVENS):

S.J. Res. 102. Joint resolution to establish a National Commission on Illiteracy; to the Committee on Labor and Human Resources.

(The remarks of Mr. ZORINSKY and the text of the legislation appear earlier in today's RECORD.)

By Mr. PELL (for himself, Mr. STAFFORD, Mr. STENNIS, Mr. NUNN, Mr. BUMPERS, Mr. CHAFEE, Mr. KENNEDY, Mr. KERRY, Mr. COCHRAN, Mr. MATSUNAGA, Mr. METZENBAUM, Mr. HOLLINGS, Mr. DOLE, Mr. EAST, Mr. ABDNOR, Mr. STEVENS, Mr. KASTEN, Mr. LAUTENBERG, Mr. HEINZ, and Mr. ZORINSKY):

S.J. Res. 103. Joint resolution to designate the month of May 1985 as "Very Special Arts U.S.A. Month"; to the Committee on the Judiciary.

VERY SPECIAL ARTS U.S.A. MONTH

● Mr. PELL. Mr. President, today I am introducing, on behalf of myself and Senators STAFFORD, STENNIS, NUNN, BUMPERS, CHAFEE, KENNEDY, KERRY, COCHRAN, MATSUNAGA, METZENBAUM, HOLLINGS, DOLE, ANDREWS, EAST, ABDNOR, STEVENS, KASTEN, LAUTENBERG, HEINZ, and ZORINSKY, a resolution designating the month of May as Very Special Arts U.S.A. Month.

The official designation of the month of May as Very Special Arts U.S.A. Month recognizes the strong commitment of our country's leaders to provide opportunities for disabled and nondisabled children, youth, and adults to participate in the educational programs of the National Committee, Arts with the Handicapped (NCAH). NCAH, an educational affiliate of the John F. Kennedy Center for the Performing Arts, is our Nation's coordinating agency for arts programs for people with disabilities.

With vibrant leadership, NCAH has pioneered the arts with the handicapped movement. Through the Very Special Arts Festival Program (VSAF), all 50 States develop and implement quality, year-round programs which integrate the arts into the education of children and youth with disabilities.

Visual arts, drama, dance, and music are the means by which the VSAF Program helps students with handicaps enter the mainstream of society. Workshops, performances, and training are designed to increase learning skills and are implemented for disabled and nondisabled children as well as educators, parents, and friends. NCAH continues to develop innovative projects and to conduct, through VSAF's, a nationwide educational program unlike any other in the country.

Throughout 1985, 450 VSAF's will be held in all 50 States, Puerto Rico, and the District of Columbia. Approximately 450,000 people with disabilities will be served, as well as over 380,000 nondisabled individuals. In May, 53 VSAF's will be conducted in such places as: St. Louis, MO; Hickory City, NC; Canby, OR; Los Angeles, CA; and Amherst, MA. Both Bristol and Newport, RI, will hold their festivals in July.

Entering into its 11th year, NCAH will change its name to Very Special Arts U.S.A. By joining me in proclaiming the month of May as Very Special Arts U.S.A. Month, we will help this important organization begin its second decade of service to the more than 36 million Americans with disabilities under its new name, Very Special Arts U.S.A.●

By Mr. DENTON (for himself, Mr. LEAHY, Mr. THURMOND, Mr. ANDREWS, Mr. BIDEN, Mr. BOSCHWITZ, Mr. BURDICK, Mr. CRANSTON, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DOLE, Mr. DIXON, Mr. EAST, Mr. GRAMM, Mr. GRASSLEY, Mr. HATCH, Mrs. HAWKINS, Mr. HECHT, Mr. HEFLIN, Mr. HELMS, Mr. HOLLINGS, Mr. HUMPHREY, Mr. JOHNSTON, Mr. KENNEDY, Mr. LAUTENBERG, Mr. LAXALT, Mr. MCCONNELL, Mr. METZENBAUM, Mr. MURKOWSKI, Mr. NUNN, Mr. QUAYLE, Mr. RIEGLE, Mr. SARBANES, Mr. SASSER, Mr. SPECTER, and Mr. SYMMS):

S.J. Res. 104. Joint resolution to proclaim October 23, 1985, as "A Time of Remembrance" for all victims of terrorism throughout the world; to the Committee on the Judiciary.

A TIME OF REMEMBRANCE

● Mr. DENTON. Mr. President, I rise today along with my distinguished colleague and ranking minority member of the Senate Judiciary Subcommittee on Security and Terrorism, Senator PATRICK J. LEAHY and 36 other Senators, to introduce a joint resolution proclaiming October 23, 1985, as a "Time of Remembrance" for all victims of terrorism throughout the world.

Mr. President, on September 28, 1984, the President signed into law Senate Joint Resolution 336, a joint resolution proclaiming October 23, 1984, as "A Time of Remembrance" for all victims of terrorism throughout the world and marking the first anniversary of the terrorist attack on the multinational peacekeeping mission in Beirut, Lebanon. I was proud to be the sponsor of that joint resolution which 59 of my colleagues cosponsored.

On October 19, the President issued a proclamation, called for by the joint resolution, urging "all Americans to take time to reflect on the sacrifices that have been made in the pursuit of peace and freedom * * *" and calling upon "the departments and agencies of the United States and interested organizations, groups, and individuals to fly U.S. flags at half staff throughout the world in the hope that the desire for peace and freedom take firm root in every person and every nation." Without objection, I ask that the Presidential proclamation be printed in the RECORD at the close of my remarks.

The originating and driving organization behind this effort was No Greater Love, a national nonprofit, nonpolitical humanitarian organization dedicated to providing programs of care and friendship to children whose parents have been killed while serving our country. On October 23, No Greater Love sponsored a commemorative ceremony marking a time of remembrance at Arlington National Cemetery. This ceremony proved to be one of international significance and success. Letters of support and appreciation for this effort were received from diplomatic officials, Governors, organizations, and individuals from across the Nation and around the world.

In light of the tremendous response to the declaration of October 23, 1984, as "A Time of Remembrance," and because of the continuing tragedy of worldwide terrorism, families of the victims of terrorism have requested that a time of remembrance be made an annual occurrence. This would not only make us all more aware of the need to confront the problem of terrorism but would also assure the families that their loved ones who lost their lives in the service of our country would continue to be honored and that their service and sacrifice would never be forgotten by those whom they served.

Mr. President, I strongly urge each of my colleagues to support and cosponsor this joint resolution, and ask unanimous consent that a copy of the joint resolution along with a copy of a proclamation on the subject by President Reagan be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S.J. RES. 104

Whereas the problem of terrorism has become an international concern that knows no boundaries—religious, racial, political, or national;

Whereas thousands of men, women, and children have died at the hands of terrorists in nations around the world, and today terrorism continues to claim the lives of many peace-loving individuals;

Whereas October 23, 1983, is the date on which the largest number of Americans were killed in a single act of terrorism—the bombing of the United States compound in Beirut, Lebanon, in which two hundred and forty-one United States servicemen lost their lives;

Whereas many of these victims died defending ideals of peace and freedom; and

Whereas it is appropriate to honor all victims of terrorism, and in America to console the families of victims, and to cherish the freedom that their sacrifices make possible for all Americans: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 23, 1985, be proclaimed as "A Time of Remembrance", to urge all Americans to take time to reflect on the sacrifices that have been made in the pursuit of peace and freedom, and to promote active participation by the American people through the wearing of a purple ribbon, a symbol of patriotism, dignity, loyalty, and martydom. The President is authorized and requested to issue a proclamation calling upon the departments and agencies of the United States and interested organizations, groups, and individuals to fly United States flags at half staff throughout the world in the hope that the desire for peace and freedom take firm root in every person and every nation.

A TIME OF REMEMBRANCE FOR ALL VICTIMS OF TERRORISM THROUGHOUT THE WORLD

(By the President of the United States of America)

A PROCLAMATION

Terrorism poses an insidious challenge to the principles of freedom cherished by peace-loving peoples everywhere. Despicable acts such as the recent attack on Prime Minister Thatcher in England, the bombings of our Marine Amphibious Unit Headquarters, and of our Embassy facilities in Beirut, Lebanon, represent an attempt to strike at the very heart of Western democratic values. In the month of September, 37 attacks were carried out by 13 different terrorist groups affecting the people of 20 nations.

As a world power, the United States bears global responsibilities from which we must not shrink in the face of cowardly attempts at intimidation. Instead, we must strive to carry forward the heroic legacy of those brave people who, in the search for peace and justice, have lost their lives to international terrorism. Because terrorism poses such a pervasive and insidious threat to all free peoples and claims so many innocent victims in its indiscriminate brutality, we of the Western democracies have embarked on a course of improved cooperation to counter this scourage against humanity. To this end, it is appropriate that we reflect on the tragic loss of life that senseless terror leaves in its wake throughout the world. We do this not out of fear or trepidation, but to show our resolve that the free people of this world will not be deterred from our purpose by threats of terrorism.

The Congress, by Senate Joint Resolution 336, has designated October 23, 1984, as "A Time of Remembrance" for all victims of terrorism throughout the world and has authorized and requested the President to issue a proclamation in observance of this event.

Now, therefore, I, Ronald Reagan, President of the United States of America, do hereby proclaim October 23, 1984, as a Time of Remembrance for all victims of terrorism throughout the world, and I urge all Americans to take time to reflect on the sacrifices that have been made in the pursuit of peace and freedom.

I further call upon and authorize all departments and agencies of the United States and interested organizations, groups, and individuals to fly United States flags at half-staff on October 23 in the hope that the desire for peace and freedom will take firm root in every person and every nation.

In witness whereof, I have hereunto set my hand this nineteenth day of October, in the year of our Lord nineteen hundred and eighty-four, and of the Independence of the United States of America the two hundred and ninth.

RONALD REAGAN.●

● Mr. LEAHY. Mr. President, I join with my colleague JEREMIAH DENTON and many other Senate cosponsors in rising to support this most important resolution.

All too often in the age of instant news, we set aside yesterday's news to take up today's.

All too often the news we set aside so quickly is news we forget at our peril. When terrorists bombed the American Marine Headquarters and our Embassy in Beirut, their target

was more than the valiant lives they extinguished.

Their target was human dignity.

Their target was peaceful self-government.

Their target was world peace.

Setting aside a "Time of Remembrance" to reflect on the meaning of these sacrifices is an important act of conscience.

And sending a message to terrorists wherever they may be hiding will be an important act of will.

Our love and strength is greater than their hate.

And our remembering will quicken our own resolve to oppose violence everywhere and to yield to terrorists nowhere.

We will triumph over terrorism for two important reasons. First is strength. Our strength comes from total unity and total determination. If terrorists think they can ever divide and weaken American resolve through random, they will soon learn that they have picked the wrong people.

The second reason we will triumph is what we stand for and what we advocate in the councils of the world—peace with justice and a resolve to preserve democracy at any price.

I hope that every Member of the Congress joins in this resolution and that our message of love and hope and strength will be sounded everywhere at the "Time of Remembrance."●

By Mr. DOLE (for Mr. HATFIELD):

S.J. Res. 105. Joint resolution to designate July 23, 1985, as "Ulysses S. Grant Day;" to the Committee on the Judiciary.

ULYSSES S. GRANT DAY

● Mr. HATFIELD. Mr. President, as we work through the deliberations of this session, I would like to introduce a joint resolution commemorating the life of one who worked, as we do now, to improve the situation of the people of this Nation.

Today I have great pleasure in recognizing the contribution to the history of our Nation made by our 18th President, Ulysses S. Grant, as the 100th anniversary of his death nears this year. We must remind ourselves of our heritage, of the struggles we as a nation have survived, and of those who have led the way in resolving conflict to move the Nation through difficult times and on to periods of strength and growth. Such recognition deserves to be bestowed on President Grant for what he did to secure the unity of the Nation and to extend civil rights to blacks following the divisive Civil War.

Mr. President, I should like to bring to the attention of my colleagues the life and achievements of President Grant. Born and schooled in Ohio, the son of a tanner and farmer, Grant went on to attend the U.S. Military Academy at West Point. He excelled in mathematics and horsemanship, and upon graduation in 1843, served his first appointment as an infantryman in the Mexican War, 1846–48. Although deploring this war which he felt was fought to extend slavery, Grant served with distinction and emerged from the conflict as a captain.

In subsequent years Captain Grant served at a variety of remote Army posts, as far away as Fort Vancouver in the Oregon Province. He grew unhappy with these farflung assignments and in 1854 resigned the military to move with his wife, Julia, and family, to St. Louis, MO, and later to Galena, IL.

With the Confederate secession from the Union, Grant offered his services to the Northern Army, strongly believing in the need to reunite the Nation. Appointed as a colonel over volunteers in Illinois, Grant was soon promoted to brigadier general in Missouri. Grant's bold action enabled him to capture Fort Donelson on the Cumberland River in one of the first important Northern victories of the war, and winning for himself promotion to major general.

His famed response of "no terms except an unconditional and immediate surrender" to Confederate attempts at an armistice earned him the nickname "Unconditional Surrender" Grant and raised speculation that that was the meaning of his first two initials.

Following the triumphant, yet bloody, battle at Shiloh on the Tennessee River, Grant was criticized for his troop losses. Urged to replace Major General Grant, President Abraham Lincoln refused saying, "I can't spare this man—he fights." Grant was a ruthless fighter and by his attitude and military tactics embodied his belief that the Union must be restored at all costs.

Beginning with his successes in the Mississippi River Valley campaigns, the most notable being the capture of strategic Vicksburg, Grant was given greater responsibility and more critical assignments until he was selected by President Lincoln to take command of the entire Union Army of over one-half million men, as a lieutenant general. Leading his troops with energy and determination Grant proposed a unified plan and coordinated effort of all Union forces to fulfill the goal of ending the war.

The personal characteristics that carried Grant to the zenith of his military career continued to be displayed as General of the Army. He had deep resources of character and a quiet forcefulness, decisiveness and tenacity that won him the respect and confidence of the subordinates and helped him plan and carry out military operations. Behind the unprepossessing exterior and the modesty of manner lay a powerful, strategic genius.

Grant realized military success would not come with the capture of localities alone, but with the destruction of armies as well. His military philosophy was to resist retreat and his strategy was sound: To divide the Confederate armies, engage them in battle simultaneously, and continue to hammer away at them until they were forced to retreat and surrender.

In the spring of 1865 Confederate troops under Lee surrendered to Grant at Appomattox near Richmond. Grant's terms were magnanimous, as he released Lee and his soldiers on their honor, and he allowed them to keep their horses. This decisive battle signaled the end of the war which was over 17 days later.

After President Lincoln's death, Grant was the North's foremost war hero. His military successes during the Civil War and his generous treatment of Lee at Appomattox had made him a popular hero in both the North and South. Grant served for a short time as Secretary of War under President Andrew Johnson, and his strengthened Republican ties led to his nomination for President in 1868, a candidate embodying the forces that maintained the Union. The last line of his acceptance letter, "Let us have peace," constituted his contribution to American opinion and it became the Republican campaign slogan.

Grant became President and went on to win reelection easily in 1872. During the course of his two terms he faced the difficult circumstances and demanding condition that existed in the aftermath of the Civil War. An emotionally divided Nation needed to be united and the South rebuilt. To this end Grant pardoned many former Confederate leaders and limited the use of Federal troops stationed in the South. Turmoil and violence continued in the South with the harassment and persecution of freed blacks. Believing President Johnson's policies had permitted the Southern States to restrict black rights. Grant worked to enfranchise the blacks. He enforced the 14th and 15th amendments giving citizenship to blacks and making illegal the denial of voting rights to males of any race. In 1870 and 1871 force bills were passed to ensure the voting rights for blacks; 200,000 blacks had served in the Union Army and Grant acknowledged their great contribution to the Northern victories. He worked to help them through the Freedman's Bureau which offered the freed blacks help in obtaining education, homes, jobs, and protection of their interests.

There were economic as well as emotional tensions for Grant to deal with as President. Taking steps to fund the confused mass of Civil War securities,

Grant also worked to hold off a panic of the gold market.

Following his terms in office the former President traveled the world with his family, eventually settling in New York where, in financial difficulty, he began to prepare his memoirs.

President Grant wrote the memoirs, in collaboration with Mark Twain, while slowly dying of throat cancer. Written modestly and with a sense of humor, Grant's story of his career ranks high among military autobiographies. Unfortunately, Grant never saw the success of his book having died before its publication in 1885.

Ulysses S. Grant's reputation and lasting image is one of a military giant, the most important military leader for the Union during the Civil War. Recognized by his bluntness, lack of ostentation and the success of his operations, he advanced from the saddle to the President's chair—the model of American individualism and opportunity.

Shortly before he died Grant told his doctor how years before, on the way to a reception in his honor he came across a stranger who was going to the reception, as well. "I have always thought that he was a very much overrated man," said the stranger to Grant. "That's my view also, was Grant's reply." Such was the humility with which Grant viewed his life and achievements.

But today we recognize that he was not an overrated man. He is deserving of his excellent reputation. President Grant is memorialized here in Washington, DC, by the Grant Memorial located at the east end of the Mall, near the west front of the Capitol. The imposing sculpture by Henry Merwin Shrady shows General Grant mounted on his horse between two sculpture groups of military figures. Although we are mindful of his birthday on April 27, this July 23, 1985 will mark the 100th anniversary of the death of President Ulysses S. Grant. Plans are now being made at this time to celebrate the day with appropriate festivities, including a military ceremony to be held at the Grant Memorial. To remind ourselves and our Nation of the great contributions of this former President, I am introducing a resolution to declare July 23, 1985 as "Ulysses S. Grant Day."

Joining me in the introduction of this resolution are Senators MOYNIHAN, SIMON, GLENN, METZENBAUM, and D'AMATO.

I ask unanimous consent that their joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 105

Whereas July 23, 1985, marks the one-hundredth anniversary of the death of President Ulysses S. Grant;

Whereas Ulysses S. Grant served as General of the Union Army during the Civil War, fought to restore the Union, and commanded the victorious Union Army at the close of the Civil War; and

Whereas Ulysses S. Grant as the eighteenth President of the United States worked to unite the North and South following the Civil War, to rebuild the war damaged South, and to extend civil rights to blacks: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That July 23, 1985 is designated as "Ulysses S. Grant Day", and the President of the United States is authorized and requested to issue a proclamation calling upon all Government agencies and the people of the United States to observe the day with appropriate ceremonies, programs and activities.

ADDITIONAL COSPONSORS

S. 8

At the request of Mr. CRANSTON, the name of the Senator from Washington [Mr. EVANS] was added as a cosponsor of S. 8, a bill to grant a Federal charter to the Vietnam Veterans of America, Inc.

S. 12

At the request of Mr. MOYNIHAN, the name of the Senator from South Dakota [Mr. PRESSLER] was added as a cosponsor of S. 12, a bill to protect communications among Americans from interception by foreign governments, and for other purposes.

S. 84

At the request of Mr. INOUYE, the names of the Senator from South Dakota [Mr. PRESSLER], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from California [Mr. WILSON], the Senator from Ohio [Mr. METZENBAUM], and the Senator from South Carolina [Mr. HOLLINGS] were added as cosponsors of S. 84, a bill to incorporate the Pearl Harbor Survivors Association.

S. 120

At the request of Mr. MOYNIHAN, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of S. 120, a bill to amend the Tax Reform Act of 1984 to provide a transitional rule for the tax treatment of certain air travel benefits provided to employees of airlines.

S. 127

At the request of Mr. PRYOR, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 127, a bill to authorize the Secretary of Health and Human Services to conduct a clinical trial to determine the efficiency and economic feasibility of providing Medicare coverage for personal emergency response systems.

S. 245

At the request of Mr. ABDNOR, the names of the Senator from Washington [Mr. GORTON], the Senator from Utah [Mr. HATCH], the Senator from Indiana [Mr. QUAYLE], the Senator from South Carolina [Mr. THURMOND], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Oklahoma [Mr. NICKLES], the Senator from Mississippi [Mr. COCHRAN], and the Senator from Virginia [Mr. WARNER] were added as cosponsors of S. 245, a bill to amend the Internal Revenue Code of 1954 to repeal the requirement that contemporaneous records be kept to substantiate certain deductions and credits.

S. 260

At the request of Mr. HEINZ, the name of the Senator from North Carolina [Mr. HELMS] was added as a cosponsor of S. 260, a bill to amend the Internal Revenue Code of 1954 to provide that the substantiation requirements of section 274(d) of such Code may be met, in the case of passenger automobiles and other transportation property, if the taxpayer provides substantial evidence other than contemporaneous records.

S. 361

At the request of Mr. MOYNIHAN, the name of the Senator from Oklahoma [Mr. BOREN] was added as a cosponsor of S. 361, a bill to amend the Internal Revenue Code of 1954 to make permanent the deduction for charitable contributions by nonitemizers.

S. 377

At the request of Mr. DECONCINI, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 377, a bill to provide for a General Accounting Office investigation and report on conditions of displaced Salvadorans, to provide certain rules of the House of Representatives and of the Senate with respect to review of the report, to provide for the temporary stay of detention and deportation of certain Salvadorans, and for other purposes.

S. 394

At the request of Mr. GORTON, the name of the Senator from Ohio [Mr. GLENN] was added as a cosponsor of S. 394, a bill to amend the Housing and Community Development Act of 1974 to provide housing assistance to the homeless through renovation and conversion of facilities for use as temporary housing, provision of emergency housing and food, and provisions of residential housing assistance in the transition to independent living.

S. 412

At the request of Mr. DECONCINI, the name of the Senator from Nebraska [Mr. EXON] was added as a cosponsor of S. 412, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 426

At the request of Mr. WALLOP, the names of the Senator from Montana [Mr. MELCHER], the Senator from Wisconsin [Mr. KASTEN], and the Senator from North Carolina [Mr. EAST] were added as cosponsors of S. 426, a bill to amend the Federal Power Act to provide for more protection to electric consumers.

S. 528

At the request of Mr. RUDMAN, the name of the Senator from Maine [Mr. COHEN] was added as a cosponsor of S. 528, a bill to establish a Bipartisan Commission on Congressional Campaign Financing, to improve the manner in which Congressional campaigns are financed.

S. 576

At the request of Mr. DOLE, the name of the Senator from Illinois [Mr. DIXON] was added as a cosponsor of S. 576, a bill to exclude from the Caribbean Basin Economic Recovery Act ethyl alcohol used for fuel which is merely distilled or denatured in a beneficiary country.

S. 681

At the request of Mr. MATHIAS, the name of the Senator from Virginia [Mr. WARNER] was added as a cosponsor of S. 681, a bill to amend chapter 89 of title 5, United States Code, to authorize the Office of Personnel Management to waive certain eligibility requirements relating to enrollment of annuitants in a Federal employees health benefits plan.

S. 688

At the request of Mr. HEINZ, the name of the Senator from Delaware [Mr. ROTH] was added as a cosponsor of S. 688, a bill to amend the Tariff Act of 1930 to provide for revocation of "country under the agreement" status in certain circumstances.

S. 721

At the request of Mr. BOREN, the names of the Senator from New Mexico [Mr. DOMENICI], the Senator from Colorado [Mr. ARMSTRONG], and the Senator from Wisconsin [Mr. KASTEN] were added as cosponsors of S. 721, a bill to amend the Commodity Credit Corporation Charter Act regarding the export of agricultural commodities.

S. 744

At the request of Mr. COCHRAN, the names of the Senator from Iowa [Mr. HARKIN], and the Senator from Kentucky [Mr. MCCONNELL] were added as cosponsors of S. 744, a bill to amend the Agriculture and Food Act of 1981 to provide protection for agricultural purchasers of farm products.

S. 746

At the request of Mr. CHILES, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 746, a bill to require the National Drug Enforcement Policy Board to provide a comprehensive assessment of the designer drug problem and make recommendations to Congress for necessary legislation.

S. 768

At the request of Mr. PRESSLER, the name of the Senator from Nevada [Mr. HECHT] was added as a cosponsor of S. 768, a bill to authorize the President of the United States to award a Congressional Gold Medal to Jan C. Scruggs in recognition of his work on behalf of Vietnam veterans, and to authorize the Secretary of the Treasury to sell bronze duplicates of such medal.

S. 770

At the request of Mr. HEINZ, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of S. 770, a bill to amend the Tariff Schedules of the United States to impose a surcharge tariff on all imports from Japan.

SENATE JOINT RESOLUTION 10

At the request of Mr. KENNEDY, the name of the Senator from Missouri [Mr. EAGLETON] was added as a cosponsor of Senate Joint Resolution 10, a joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for women and men.

SENATE JOINT RESOLUTION 31

At the request of Mr. BURDICK, the name of the Senator from Arizona [Mr. DECONCINI] was added as a cosponsor of Senate Joint Resolution 31, a joint resolution to designate the week of November 24 through November 30, 1985, as "National Family Week".

SENATE JOINT RESOLUTION 35

At the request of Mr. GORTON, the name of the Senator from Illinois [Mr. DIXON] was added as a cosponsor of Senate Joint Resolution 35, a joint resolution to authorize and request the President to issue a proclamation designating April 21 through April 27, 1985, as "National Organ Donation Awareness Week".

SENATE JOINT RESOLUTION 47

At the request of Mr. CRANSTON, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of Senate Joint Resolution 47, a joint resolution designating the week beginning November 10, 1985, as "National Women Veterans Recognition Week".

SENATE JOINT RESOLUTION 51

At the request of Mr. HATCH, the names of the Senator from Indiana [Mr. QUAYLE], the Senator from New Mexico [Mr. DOMENICI], the Senator from Nevada [Mr. LAXALT], and the Senator from Texas [Mr. BENTSEN] were added as cosponsors of Senate Joint Resolution 51, a joint resolution to designate the week beginning November 24, 1985, as "National Adoption Week".

SENATE JOINT RESOLUTION 63

At the request of Mr. RIEGLE, the names of the Senator from Idaho [Mr. SYMMS], the Senator from Idaho [Mr. MCCLURE], the Senator from Nebraska [Mr. EXON], the Senator from New Jersey [Mr. BRADLEY], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Tennessee [Mr. SASSER], the Senator from Georgia [Mr. NUNN], and the Senator from California [Mr. CRANSTON] were added as cosponsors of Senate Joint Resolution 63, a joint resolution to designate the week of April 21, 1985, through April 27, 1985, as "National DES Awareness Week".

SENATE JOINT RESOLUTION 65

At the request of Mr. EAGLETON, the name of the Senator from Massachusetts [Mr. KENNEDY] was added as a cosponsor of Senate Joint Resolution 65, a joint resolution designating the month of November 1985 as "National Alzheimer's Disease Month".

SENATE JOINT RESOLUTION 90

At the request of Mr. NUNN, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of Senate Joint Resolution 90, a joint resolution commemorating the 75th Anniversary of the Boy Scouts of America.

SENATE JOINT RESOLUTION 101

At the request of Mr. LEVIN, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of Senate Joint Resolution 101, a joint resolution to designate April 24, 1985, as "National Day of Remembrance of Man's Inhumanity to Man".

SENATE CONCURRENT RESOLUTION 14

At the request of Mr. MOYNIHAN, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of Senate Concurrent Resolution 14, a concurrent resolution to express the sense of the Congress that Josef Mengele should be brought to justice.

SENATE CONCURRENT RESOLUTION 28

At the request of Mr. CRANSTON, the name of the Senator from New Mexico [Mr. DOMENICI] was added as a cosponsor of Senate Concurrent Resolution 28, a concurrent resolution expressing the sense of the Congress that May 18, 1985, should be commemorated as the 20th anniversary of the establishment of the Head Start Program and reaffirming congressional support for the Head Start Program.

SENATE RESOLUTION 82

At the request of Mr. D'AMATO, the name of the Senator from Alabama [Mr. DENTON] was added as a cosponsor of Senate Resolution 82, a resolution to preserve the deduction for State and local taxes.

SENATE RESOLUTION 103

At the request of Mr. SIMON, the name of the Senator from Minnesota

[Mr. BOSCHWITZ] was added as a cosponsor of Senate Resolution 103, a resolution expressing the sense of the Senate that the President should initiate negotiations with the Government of the Soviet Union on a long-term agreement on expanded trade in agricultural products.

SENATE RESOLUTION 110

At the request of Mr. HEINZ, the name of the Senator from Arizona [Mr. DECONCINI] was added as a cosponsor of Senate Resolution 110, a resolution supporting the Export-Import Bank.

SENATE RESOLUTION 112

At the request of Mr. COHEN, the name of the Senator from Arkansas [Mr. BUMPERS], the Senator from North Dakota [Mr. ANDREWS], the Senator from Vermont [Mr. STAFFORD], and the Senator from Connecticut [Mr. DODD] were added as cosponsors of Senate Resolution 112, a resolution relating to bilateral discussions between the United States and the Soviet Union to ban chemical weapons.

SENATE CONCURRENT RESOLUTION 38—PROVIDING FOR AN ADJOURNMENT OF THE SENATE AND HOUSE OF REPRESENTATIVES UNTIL APRIL 15, 1985

Mr. DOLE submitted the following concurrent resolution; which was considered and agreed to:

S. CON. RES. 38

Resolved by the Senate (the House of Representatives concurring), That when the Senate adjourns on Wednesday, April 3, 1985, or Thursday, April 4, 1985, pursuant to a motion made by the Majority Leader, or his designee, in accordance with this resolution, and that when the House of Representatives adjourns on Wednesday, April 3, 1985, or Thursday, April 4, 1985, pursuant to a motion made by the Majority Leader, or his designee, in accordance with this resolution, they stand adjourned until 12:00 o'clock noon on Monday, April 15, 1985.

SENATE RESOLUTION 117—TO PAY A GRATUITY TO MAUREEN S. McROY

Mr. MATHIAS, from the Committee on Rules and Administration reported the following original resolution; which was placed on the calendar:

S. RES. 117

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Maureen S. McRoy, widow of Robert T. McRoy, an employee of the Senate at the time of his death, a sum equal to six months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

SENATE RESOLUTION 118—TO PAY A GRATUITY TO VICTOR NATALI, LENA BARDELLI, MAFALDA REVETTA, AMERICO NATALI, EDITH SERRA, ELMO NATALI, AND ELSIE DELMASTRO

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar:

S. RES. 118

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Victor Natali; Americo Natali; Elmo Natali, brothers of Lewis A. Natali and Lena Bardelli; Mafalda Revetta; Edith Serra; Elsie DelMastro, sisters of Lewis A. Natali, an employee of the Senate at the time of his death, a sum to each equal to one-seventh of one years' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

SENATE RESOLUTION 119—TO PAY A GRATUITY TO RAY F. LARKIN

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar:

S. RES. 119

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Ray K. Larkin, widower of Virginia L. Larkin, an employee of the Senate at the time of her death, a sum equal to nine months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

SENATE RESOLUTION 120—TO PAY A GRATUITY TO ANDRE WHITNEY

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar:

S. RES. 120

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Andre Whitney, widower of Maxine M. Whitney, an employee of the Senate at the time of her death, a sum equal to six months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

SENATE RESOLUTION 121—TO PAY A GRATUITY TO BONITA B. BASS

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar:

S. RES. 121

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Bonita B. Bass, widow of Charles G. Bass, an employee of the Senate at the time of his death, a sum equal to one years' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

SENATE RESOLUTION 122—TO PAY A GRATUITY TO AQUILLA H. ROSS

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar:

S. RES. 122

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Aquilla H. Ross, widow of Henry L. Ross, Jr., an employee of the Senate at the time of his death, a sum equal to four months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

SENATE RESOLUTION 123—TO PAY A GRATUITY TO ALENE J. AYERS

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar:

S. RES. 123

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Alene J. Ayers, widow of Bernard M. Ayers, an employee of the Senate at the time of his death, a sum equal to four months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

SENATE RESOLUTION 124—TO PAY A GRATUITY TO ALBERT C. JOHNSON, EARL M. JOHNSON, STEPHEN LESLIE JOHNSON, CHRISTY JOHNSON MAGUSCHAK, AND PAULA JOHNSON MICHALEK

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar:

S. RES. 124

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Albert C. Johnson and Earl M. Johnson, sons of Helen O. Kane, an employee of the Architect of the Capitol assigned to duty on the Senate side at the time of her death, a sum to each equal to one-third of six months' compensation at the rate she was receiving by law at the time of her death, and to Stephen Leslie Johnson, Christy Johnson Maguschak and Paula Johnson Michalek, grandchildren of Helen

O. Kane, a sum to each equal one-ninth of six months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

SENATE RESOLUTION 125—ORIGINAL RESOLUTION REPORTED AUTHORIZING EXPENDITURES BY THE COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution which was placed on the calendar:

S. RES. 125

Resolved, That in carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Rules and Administration is authorized from March 1, 1985, through February 28, 1986, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

SEC. 2. The expenses of the committee under this section shall not exceed $1,384,659, of which amount (1) not to exceed $4,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended), and (2) not to exceed $3,500 may be expended for the training of the professional staff of such committee (under procedures specified by section 202(j) of such Act).

SEC. 3. The committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than February 28, 1986.

SEC. 4. Expenses of the committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

SENATE RESOLUTION 126—PROVIDING FOR SENATE MEMBERS OF THE JOINT COMMITTEE ON PRINTING AND THE JOINT COMMITTEE OF CONGRESS ON THE LIBRARY

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar:

S. RES. 126

Resolved, That the following-named Members be, and they are hereby, elected members of the following joint committees of Congress;

Joint Committee on Printing: Mr. Mathias of Maryland, Mr. Hatfield of Oregon, Mr. Stevens of Alaska, Mr. Ford of Kentucky, and Mr. DeConcini of Arizona.

Joint Committee of Congress on the Library: Mr. Mathias of Maryland, Mr. Hatfield of Oregon, Mr. Warner of Virginia, Mr. Inouye of Hawaii, and Mr. Pell of Rhode Island.

SENATE RESOLUTION 127—ORIGINAL RESOLUTION REPORTED AUTHORIZING EXPENDITURES BY THE SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. ANDREWS, from the Select Committee on Indian Affairs, reported the following original resolution; which was referred to the Committee on Rules and Administration:

S. RES. 127

Resolved, That in carrying out the duties and functions imposed on it by section 105 of S. Res. 4, Ninety-Fifth Congress, agreed to February 4 (legislative day, February 1), 1977, as amended, and in exercising the authority conferred on it by such section, the Select Committee on Indian Affairs is authorized from March 1, 1985, through February 28, 1986, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of any such department or agency.

(b) The expenses of the Committee under this section shall not exceed $934,786.00 of which amount not to exceed $1,000.00 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended).

(c) The Committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date.

(d) Expenses of the Committee under this section shall be paid from the contingent fund of the Senate upon vouchers approved by the Chairman of the Committee, except that vouchers shall not be required for the disbursement of salaries paid at an annual rate.

SENATE RESOLUTION 128—CONCERNING PRODUCTION OF DOCUMENTS BY THE SENATE PERMANENT SUBCOMMITTEE ON INVESTIGATIONS

Mr. DOLE (for himself and Mr. BYRD) submitted the following resolution; which was considered and agreed to.

S. RES. 128

Whereas, the Permanent Subcommittee on Investigations has been investigating allegations of improper practices in the Hotel Employees and Restaurant Employees International Union;

Whereas, the Subcommittee has asked the Department of Justice to determine whether violations of the federal perjury statute, 18 U.S.C. § 1621, occurred during the Subcommittee's proceedings and, the Department of Justice has requested access to records of the Subcommittee for this and for their investigatory purposes;

Whereas, by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by administrative or judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that documents, papers, and records under the control of or in the possession of the Senate are needful for investigation of possible offenses or for use in any court for the promotion of justice, the Senate will take such action as will promote the ends of justice consistently with the privileges and rights of the Senate: Now, therefore, be it

Resolved, That the Chairman and Ranking Minority Member of the Permanent Subcommittee on Investigations, acting jointly, are authorized to provide to law enforcement authorities records of the Subcommittee relating to its investigation of the Hotel Employees and Restaurant Employees International Union.

SENATE RESOLUTION 129—CONCERNING THE PRINTING OF A COMPILATION AS A DOCUMENT

Mr. DOLE submitted the following resolution; which was considered and agreed to.

S. RES. 129

Resolved, That the compilation entitled "Majority and Minority Leaders of the Senate", prepared by the Senate Parliamentarian Emeritus, Floyd M. Riddick, shall be printed, with any revisions and certain tables, as a Senate document, and an additional 2,000 copies shall be printed for distribution by the Secretary of the Senate.

SENATE RESOLUTION 130—RELATIVE TO THE SPORT FISH RESTORATION TRUST FUND

Mr. WALLOP submitted the following resolution; which was referred to the Committee on Finance.

S. RES. 130

Whereas, in 1950 the Congress established the Dingell-Johnson Sport Fish Restoration Trust Fund to promote natural resource protection and enhanced recreational opportunities, and levied taxes on selected recreational equipment to fund this account beginning a 30-year success story of a user fee program;

Whereas, in 1984, because of the efforts of recreationists and conservationists the above said trust fund was enhanced by additional recreational related taxes as part of the Deficit Reduction Act of 1984 and was renamed Wallop-Breaux Trust Fund;

Whereas, the law passed by Congress in 1950, as enhanced in 1984, requires that the funds within the Sport Fish Restoration Trust Fund be automatically appropriated for return to the several states annually (less limited overhead costs);

Whereas, the 1984 Act also authorizes funds for a Boating Safety Account in the Trust Fund to be returned to the states for boating safety purposes;

Whereas, the funds proportionately returned to the several states are earmarked by law to be used for specific uses of national resource protection and enhancement of recreational activities;

Whereas, severe demands on federal financial resources have threatened many recreational and environmental programs and have thus prompted calls by the administration for increased reliance on user fees;

Whereas, The President and other administration officials publicly applauded the 1984 amendment and the willingness of recreationists to tax themselves to pay for desired programs;

Whereas, the Administration's 1986 budget proposal threatens to:

(1) eliminate the guaranteed return of user fees, and

(2) withhold 2/3rds of the ear-marked user fees; and

Whereas, the Administration has not addressed this matter in a fashion deemed acceptable, which action is causing the erosion of any justification or public support for user fees; Now, therefore, be it

Resolved by the Senate, that it is the sense of the Senate that:

1. The administration should honor and comply with the automatic appropriation and ear-marking provisions of the Wallop/Breaux Sport Fish Restoration Trust Fund as required by law; and support adequate appropriation for the Boating Safety Account in this Trust Fund; and

2. Funds due and owed under the terms of the Trust Fund to the states should neither be withheld nor delayed by the Administration.

AMENDMENTS SUBMITTED

REPEAL OF CONTEMPORANEOUS RECORDKEEPING REQUIREMENTS

METZENBAUM AMENDMENT NO. 25

Mr. METZENBAUM proposed an amendment to amendment No. 23 proposed by Mr. PACKWOOD to the bill (H.R. 1869) to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984, and for other purposes; as follows:

At the end of the amendment add the following new section:

SEC. . AIR TRANSPORTATION FRINGE BENEFIT REGULATIONS.

Notwithstanding any other provision of this Act or any language in the Committees' Report, it is the sense of Congress that the existing regulations that impute income to corporate executives (so-called "key employees") for the use of noncommercial aircraft shall not be amended or altered in any manner that would reduce the amount of income imputed to such employees.

WALLOP (AND OTHERS) AMENDMENT NO. 26

Mr. WALLOP (for himself, Mr. BOREN, Mr. MOYNIHAN, and Mr. SYMMS) proposed an amendment to amendment No. 23 proposed by Mr. PACKWOOD to the bill H.R. 1869, supra; as follows:

Strike out section 2 of the amendment No. 23 and insert in lieu thereof the following:

SEC. 2. TAX TREATMENT OF PERSONAL USE OF VEHICLES.

(a) REPORTING REQUIREMENTS.—

(1) IN GENERAL.—Section 274 of the Internal Revenue Code of 1954 (relating to disallowance of certain entertainment, etc. expenses) is amended by redesignating subsection (i) as subsection (j) and by inserting after subsection (h) the following new subsection:

"(i) SPECIAL RULE FOR USE OF CERTAIN VEHICLES.—

"(1) IN GENERAL.—This subsection applies to—

(A) any emergency vehicle described in section 4064(b)(1)(C), or

"(B) any vehicle with respect to which the only use other than any qualified business use (within the meaning of section 280F(d)(6)(B)) is a qualified personal use.

"(2) QUALIFIED PERSONAL USE.—For purposes of this subsection—

"(A) IN GENERAL.—The term 'qualified personal use' means—

"(i) personal use of a vehicle by an employee if—

"(I) the employer requires the employee to commute to and from work for bona fide business reasons, including protection of the vehicle or equipment stored in the vehicle (but not including commuting solely for the protection or regular transportation of the employee), and

"(II) no other personal use (other than de minimis personal use) is allowed by the employer, or

"(ii) any personal use of a vehicle by an individual who is required to use such vehicle as an integral part of the performance of the trade or business use of the vehicle to make calls on customers or clients, to make deliveries, or to visit jobsites.

"(B) NO QUALIFIED PERSONAL USE IF BUSINESS USE IS LESS THAN 75 PERCENT.—The term 'qualified personal use' shall not include any personal use for any taxable year unless the taxpayer establishes that the qualified business use (within the meaning of section 280F(d)(6)(B)) of the vehicle is 75 percent or more of the total use of the vehicle for such taxable year.".

(2) CONFORMING AMENDMENT.—Paragraph (4) of section 274(d) of such Code (relating to substantiation requirement) is amended by inserting "other than property to which subsection (i) applies" after "280F(d)(4))".

(b) INCLUSION IN INCOME OF EMPLOYEES.—Section 132(e) of the Internal Revenue Code of 1954 (defining de minimis fringe) is amended by adding at the end thereof the following new paragraph:

"(3) PERSONAL USE OF AUTOMOBILES.—The personal use of a vehicle shall be treated as a de minimus fringe if—

"(A) such vehicle is an emergency vehicle described in section 4064(b)(1)(C), or

"(3) such use is qualified personal use (within the meaning of section 274(i)(2)).".

(c) DEDUCTIONS AND CREDITS.—Section 280F(d) of the Internal Revenue Code of 1954 (relating to definitions and special rules for limitation on luxury automobiles and personal use of property) is amended by adding at the end thereof the following new paragaph:

"(11) SPECIAL RULE FOR EMERGENCY VEHICLES AND QUALIFIED PERSONAL USE.—

"(A) EMERGENCY VEHICLES.—This section shall not apply to any emergency vehicle described in section 4064(b)(1)(C))(iii).

"(B) QUALIFIED PERSONAL USE.—This section (other than subsection (a)) shall not apply to any vehicle with respect to which the only use other than any qualified business use (within the meaning of section 280F(d)(6)(B)) is a qualified personal use (within the meaning of section 274(i)(2)).".

SEC. 3. EFFECTIVE DATES.

"(a) IN GENERAL.—The amendment and repeals made by subsections (a) and (b) of section 1 and section 2 shall take effect as if included in the amendments made by section 179(b) of the Tax Reform Act of 1984.

"(b) SPECIAL RULE FOR SECTION 2(c).—The amendment made by subsection (c) of section 2 shall apply to property placed in service after June 18, 1984, in taxable years ending after such date.

FEDERAL SUPPLEMENTAL COMPENSATION

SPECTER (AND OTHERS) AMENDMENT NO. 27

Mr. SPECTER (for himself, Mr. LEVIN, Mr. HEINZ, Mr. METZENBAUM, Mr. MATHIAS, Mr. ROCKEFELLER, and Mr. BYRD) proposed an amendment to the bill (H.R. 1866) to phase out the Federal supplemental compensation program; as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That (a) Extension of Program.—

(1) Section 602(f)(2) of the Federal Supplemental Compensation Act of 1982 is amended by striking out "March 31" and inserting in lieu thereof "September 30".

(2) Section 605(2) of such Act is amended by striking out "April 1" and inserting in lieu thereof "October 1".

(b) Modification of Agreements.—The Secretary of Labor shall, at the earliest practicable date after the date of the enactment of this Act, propose to each State with which he has in effect an agreement under section 602 of the Federal Supplemental Compensation Act of 1982 a modification of such agreement designed to provide for the payment of Federal supplemental compensation under such Act in accordance with the amendments made by this Act. Notwithstanding any other provision of law, if any State fails or refuses within the three-week period beginning on the date the Secretary of Labor proposes such modification to such State, to enter into such modification of such agreement, the Secretary of Labor shall terminate such agreement effective with the end of the last week which ends on or before the close of such three-week period. Pending modification (or termination) of the agreement, States may pay Federal supplemental compensation in accordance with the amendments made by this Act for weeks beginning after March 31, 1985, and shall be reimbursed in accordance with the provisions of the Federal Supplemental Compensation Act of 1982.

LEVIN (AND OTHERS) AMENDMENT NO. 28

Mr. LEVIN (for himself, Mr. SPECTER, Mr. RIEGLE, and Mr. METZENBAUM) proposed an amendment to the bill H.R. 1866, supra; as follows:

At the end of the bill add the following new section:

EXTENDED BENEFITS OPTIONAL TRIGGER

SEC. . (a) Section 203(d) of the Federal-State Extended Unemployment Compensation Act of 1970 is amended—

(1) by designating the last sentence thereof as paragraph (4);

(2) by striking out the sentence which begins with "Effective with respect to"; and

(3) by inserting after paragraph (2) the following new paragraph:

"(3) Effective with respect to compensation for weeks of unemployment beginning after April 30, 1985 (or, if later, the date established pursuant to State law), the State may by law provide that the determination of whether there is a State 'on' or 'off' indicator shall be made as if paragraph (1) did not contain subparagraph (A) thereof.".

(b)(1) Except as provided in paragraph (2), the amendment made by subsection (a) shall apply to weeks beginning after the date of the enactment of this Act.

(2) If the Secretary of Labor determines that State legislation is required in order for a State to comply with the amendment made by subsection (a), the State's unemployment compensation law shall not be found to be out of compliance under section 3304(c) of the Internal Revenue Code of 1954 solely by reason of a failure to comply with such amendment for any taxable year which begins prior to—

(A) in the case of a State whose legislature is in session on the date of the enactment of this Act and remains in session for not less than 25 calendar days thereafter, the date such session ends; or

(B) in the case of a State not described in subparagraph (A), the date of the close of the first session of the legislature which begins after the date of the enactment of this Act.

HART AMENDMENT NO. 29

Mr. HART proposed an amendment to the bill H.R. 1866, supra; as follows:

At the end of the bill add the following new section:

STUDY OF ALTERNATIVE USES OF UNEMPLOYMENT COMPENSATION

SEC. . (a) The Secretary of Labor shall conduct a study with respect to alternative ways in which unemployment compensation might be used to assist unemployed workers. Such alternatives shall include the use of unemployment compensation (in lump sum payment or otherwise) as—

(1) payments to assist unemployed workers in starting self-employment; and

(2) payments to fund education, retraining, or relocation for unemployed workers.

(b) The Secretary shall report the results of the study to the Congress not later than August 31, 1985. The report shall include any recommendations and proposals for legislation.

NOTICES OF HEARINGS

COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, I wish to announce that the Committee on Rules and Administration will meet on Tuesday, April 16, 1985, at 9:30 a.m., and April 23, 1985, at 9:30 a.m. and 2 p.m., in SR-301, to receive testimony from committee chairmen and ranking minority members on their fiscal year 1985 funding resolutions.

For further information concerning these hearings, please contact Carole Blessington of the Rules Committee staff on 224-0278.

Mr. President, I wish to announce that the Committee on Rules and Administration will meet to consider Senate committees' funding resolutions for fiscal year 1985 on Thursday, April 25, 1985, at 10:30 a.m., in SR-301.

For further information regarding this markup, please contact Carole Blessington of the Rules Committee staff on 224-0278.

SUBCOMMITTEE ON ENERGY RESEARCH AND DEVELOPMENT

Mr. DOMENICI. Mr. President, I would like to announce for the information of the Senate and the public that the Subcommittee on Energy Research and Development has scheduled oversight hearings on the Department of Energy's fiscal year 1986 budget requests. The subcommittee will receive testimony from administration witnesses as well as public witnesses. The schedule is as follows:

Wednesday, April 17, 1985, 2 p.m., environment and safety programs.

Tuesday, April 30, 1985, 9:30 a.m., energy research programs.

Thursday, May 9, 1985, 2 p.m., fusion energy programs.

Friday, May 10, 1985, 9:30 a.m., conservation and renewable programs.

Monday, May 13, 1985, 2 p.m., nuclear energy programs and nuclear waste activities.

Thursday, May 16, 1985, 2 p.m., fossil energy programs.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Subcommittee on Energy Research and Development, Committee on Energy and Natural Resources, U.S. Senate, Washington, DC.

For further information regarding these hearings, please contact Mr. Paul Gilman of the subcommittee staff at 202-224-4431.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON THE JUDICIARY

Mr. COHEN. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, April 3, in order to consider and act on pending nominations, commemorative resolutions and charters, and a discussion of the sale of Conrail.

The PRESIDING OFFICER. Without objection, it is so ordered.

TENTATIVE AGENDA

(1) Nominations:

U.S. CIRCUIT JUDGE

Melvin T. Brunetti, of Nevada, to be U.S. circuit judge for the ninth circuit.

Frank H. Easterbrook, of Illinois, to be U.S. circuit judge for the seventh circuit.

Edith H. Jones, of Texas, to be U.S. circuit judge for the fifth circuit.

Carlos Los Mansmann, of Pennsylvania, to be U.S. circuit judge for the third circuit.

Walter K. Stapleton, of Delaware, to be U.S. circuit judge for the third circuit.

U.S. DISTRICT JUDGE

Alice M. Batchelder, of Ohio, to be U.S. district judge for the northern district of Ohio.

Howell Cobb, of Texas, to be U.S. district judge for the eastern district of Texas.

Carolyn R. Dimmick, of Washington, to be U.S. district judge for the western district of Washington.

R. Allan Edgar, of Tennessee, to be U.S. district judge for the eastern district of Tennessee.

J. Thomas Greene, of Utah, to be U.S. district judge for the district of Utah.

James F. Holderman, Jr., of Illinois, to be U.S. district judge for the northern district of Illinois.

George La Plata, of Michigan, to be U.S. district judge for the eastern district of Michigan.

Charles C. Lovell, of Montana, to be U.S. district judge for the district of Montana.

Ronald E. Meredith, of Kentucky, to be U.S. district judge for the western district of Kentucky.

Herman J. Weber, of Ohio, to be U.S. district judge for the southern district of Ohio.

Ann C. Williams, of Illinois, to be U.S. district judge for the northern district of Illinois.

Mark L. Wolf, of Massachusetts, to be U.S. district judge for the district of Massachusetts.

William G. Young, of Massachusetts, to be U.S. district judge for the district of Massachusetts.

U.S COURT OF INTERNATIONAL TRADE

Thomas J. Aquilino, Jr., of New York, to be a judge of the U.S. Court of International Trade.

(21) Commemoratives:

S.J. Res. 47—To designate the week beginning November 10, 1985, as "National Women Veterans Recognition Week". (Introduced by Senator Cranston).

S.J. Res. 52—To designate the month of April 1985 as "National School Library Month". (Introduced by Senator Moynihan).

S.J. Res. 67—To designate October 6-12, 1985, as "Mental Illness Awareness Week". (Introduced by Senator Quayle).

S.J. Res. 90—To commemorate the 75th Anniversary of the Boy Scouts of America. (Introduced by Senator Nunn).

S.J. Res. 94—To designate the week of May 12, 1985, as "National Digestive Diseases Awareness Week". (Introduced by Senator Gore).

(3) Charters:

S. 487—A bill to recognize the organization known as The Statute of Liberty-Ellis Island Foundation, Inc.

(4) Discussion of the sale of Conrail.

Mr. COHEN. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, April 3, in order to receive testimony concerning the following nominations:

U.S. CIRCUIT COURT

Walter K. Stapleton, of Delaware, to be U.S. circuit judge for the third circuit.

U.S. DISTRICT COURT

Charles C. Lovell, of Montana, to be U.S. district judge for the district of Montana.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SECURITIES

Mr. COHEN. Mr. President, I ask unanimous consent that the Subcommittee on Securities, of the Committee on Banking, Housing and Urban Af-

fairs, be authorized to meet during the session of the Senate on Wednesday, April 3, to hold a hearing on corporate takeovers.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. ABDNOR. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, April 3, in closed session, to mark up S. 674, DOD authorization.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

SPEECH OF AMBASSADOR MIKE MANSFIELD BEFORE THE JAPAN SOCIETY

● Mr. ROTH. Mr. President, on March 19, our distinguished Ambassador to Japan, Mike Mansfield, spoke at the annual dinner of the Japan Society in New York.

As one of the two U.S. Senators on the Japan-United States Friendship Commission, I believe that the views expressed by Ambassador Mansfield that evening will be of keen interest to my colleagues.

After nearly 8 years of service as Ambassador to Japan, Mike Mansfield is more convinced than ever that the Japanese-American relationship is the most important bilateral relationship in the world—bar none. There is, however, a dark cloud on the horizon which theatens that relationship—the huge trade imbalance. If left unremedied, that imbalance could undermine mutual trust and eventually our overall relationship. Ambassador Mansfield wisely observed, "The time has come * * * to drop the rhetoric of mutual recriminations, and get on with the business of problem solving."

I commend Ambassador Mansfield's remarks and observations to my colleagues' attention, and I ask that the full text of his speech be printed in the RECORD.

The speech follows:

SPEECH BEFORE THE JAPAN SOCIETY BY AMBASSADOR MIKE MANSFIELD

Thank you very much for your kind introduction. I am delighted to be here this evening.

The Japan Society is now entering its 78th distinguished year of promoting better U.S.-Japan relations. For more than three-quarters of a century the Society has served as a pillar of strength in the bridge of understanding between our two countries.

I congratulate the Japan Society—its officers, board of directors, and all of those individuals and corporations who have contributed time, effort, and monies—on its outstanding success.

In Japan, a 77th birthday has special significance. It is celebrated as the kiju, which means happiness. Family and friends gather together with the celebrant to give thanks for 77 years of life, and to face the 78th year and beyond with renewed confidence. It is a time to take stock.

I would like to use this opportunity to take stock, to share some of my thoughts on U.S.-Japan relations—where we are and where we are heading. I am particularly pleased to do so here in New York City, which is celebrating another anniversary: the 25th year of sister-city relations with Tokyo. Congratulations for Mayor Koch, Governor Suzuki and the citizens of these two unsurpassed cities.

Nearly eight years of service as Ambassador to Japan have solidified my conviction—indeed my credo—that the Japanese-American relationship is the most important bilateral relationship in the world—bar none. It was established by remarkably farsighted statesmen on both sides, and has been nurtured and carefully tended by dedicated people ever since. The stability, reliability, and durability of our relationship provide the foundation of hope for the Pacific Basin's future, as well as that of the rest of the world.

President Reagan and Prime Minister Nakasone reaffirmed the vitality of our relationship when they met in Los Angeles on January 2. President Reagan noted that "there is no relationship more important to peace and prosperity in the world than that between the U.S. and Japan." Prime Minister Nakasone characterized U.S.-Japan relations as based on "trust, responsibility, and friendship."

In their joint statement to the press, the President and the Prime Minister commended the excellent report published last September by the U.S.-Japan Advisory Commission. The report noted that "the future success of the U.S.-Japan relationship is of great significance to world peace and prosperity." The report went on to make specific recommendations on managing our relationship, so that together we can make a great contribution to world peace and prosperity.

World peace and prosperity—these are our goals as partners.

Ours is a partnership grounded in fundamental agreement on democratic principles and an open international economic system. It protects the freedoms that exist in both countries—tangible and intangible. This partnership provides competitive stimuli to our economies and ever-rising standards of living. It deepens our understanding of human possibilities through cultural exchange.

As we well know, however, our relations are not trouble-free. We have all seen the newspaper headlines on the U.S. trade deficit with Japan. We have all heard the accusations about closed markets, high tariffs and non-tariff barriers on one side; and the high dollar, high interest rates, and a very large deficit on the other side.

If our relationship is to continue on the right track, we must tackle the serious and growing problem between us, namely our huge trade imbalance—a trade imbalance that threatens to do real harm to the international free trading system.

There is no doubt in my mind that the figures are ominous. Japanese exports to the U.S. increased 40 percent in 1984, while U.S. exports to Japan increased only 8.9 percent. Moreover, our $34 billion deficit with Japan last year amounts to 42 percent of our two-way $81 billion trade.

I think we can all agree that a deficit of this size has consequences far beyond economics. It spurs protectionist sentiment not only in the United States but elsewhere. It pressures our political institutions to act in ways that may be short-sighted. And if left unremedied, it can undermine mutual trust and eventually, our overall relationship.

The time has come, therefore, to drop the rhetoric of mutual recriminations, and get on with the business of problem solving.

When we look behind the headlines, what we are really talking about is the survival of the free trade, free enterprise system—a system that is absolutely vital to both Japan and the United States. It is a system that we are more than ever jointly responsible for maintaining.

The free trade system, by definition, depends on free—or at least equal—market access. And, it depends on adhering to the concept of "fair play."

Let me clarify what we, the U.S. Government, mean when we talk about equal access and fair play.

First, equal access means exactly that. It means that if all things are equal, any country with good quality, low-priced products can enter a market and sell freely—without tariff or non-tariff impediments. It means letting the market decide what is available to consumers, and at what price. Equal access means not restricting imports through non-transparent ordinances, administrative guidelines, repetitious and time-consuming certification procedures, and informal cartels. It means abandoning long-standing purchasing patterns that are based solely on "old boy" business connections.

The U.S. Government believes that unfortunately, equal access does not always exist in Japan. In several industry sectors—particularly telecommunications, electronics, forestry products, and pharmaceuticals and medical equipment—we are highly competitive. But we are denied the opportunity to prove it.

I am concerned—concerned that if no visible progress in opening Japan's markets in these four areas is made soon, rising protectionist pressure in the U.S. will make it difficult for us to avoid closing our markets. We do not want it to come to this, but if our relationship is to continue on the right track, we must have progress in the ongoing four sector negotiations.

Now, let me add that no one in the U.S. Government believes that even if all Japanese tariff and non-tariff barriers were dismantled, our trade deficit with Japan would disappear. Any American who thinks that equal market access would somehow translate into a bilateral trade balance is mistaken, because it won't.

Furthermore, we Americans will not solve our own economic problems by looking only beyond our borders for the sources of our ills. Raising a wall of protectionism to hide behind will not improve our situation. It will only make it worse.

For our part, we Americans must recognize some basic realities. Our domestic economy has been experiencing its strongest recovery in 30 years. Investors around the world, expressing confidence in that recovery, have bid up the value of the dollar. This has made American exports more expensive for people of other countries. These macro-economic factors—a high domestic economic growth rate, increased consumer demand, and the high value of the dollar—have also played a role in creating a bulging trade deficit.

Americans must maintain steady growth without inflation, reduce the federal deficit, and reduce interest rates—which in turn will produce a more realistic exchange rate.

51-059 O-86-13 (Pt. 6)

We must also continue the major industrial restructuring now underway. Our economy has become more efficient, and there are signs of a renewed commitment to producing better products and better services at less cost.

But if we are to compete, even more American hard work, increased productivity, respect for quality, competitive pricing, and follow-through service will be essential. This is what I call "the old-time religion," and we in America need more of it.

For its part, Japan simply must provide greater access to its markets. It is in Japan's interest to do so; it is in our mutual interest; and it is in the entire free world's interest.

Second, the U.S. asks for adherence to the rules of fair play. The other day a reporter asked one of our visiting U.S. trade officials if the U.S. would settle for a strictly bilateral agreement with Japan regarding opening measures. The answer of course was no.

We are not seeking special or preferred treatment for American companies and their products. Our goal—as President Reagan has said—is an economic system of free and fair trade in goods, services, and capital. We are seeking equal access for everyone, across the board, because that is what we consider fair play.

Whatever the United States and Japan do in their bilateral relationship affects the whole world. This is a reality we cannot escape.

And our impact on the world is measured not only in economic and technological terms, but also in terms of our growing political and security cooperation. Japan's emerging leadership and more active association with the other industrialized democracies mark one of the most exciting and encouraging developments of the last quarter of the 20th century.

Japan and the U.S. share fundamental policy interests in nearly every area—Asia, Africa, the Middle East, and East-West relations, arms control. With respect to arms control, I would like to reiterate Secretary Shultz's pledge: the United States will not agree to any arms accord that does not account for Intermediate-Range Nuclear weapons (INF) on a global basis. We will not sign an accord that would increase the threat to our friends and allies in Asia.

In Asia, stability on the Korean Peninsula remains vital to Japan and the U.S. Both countries also have an interest in supporting the political and economic development of the ASEAN countries. Japan and the U.S. have an important role to play in assisting China in its modernization programs and its integration into the international community.

Japan and America are of course tied together by the Treaty of Mutual Security and Cooperation. Under this agreement, the United States has pledged to come to Japan's aid in case of attack—and we will.

Japan in turn offers us the use of facilities in Japan to fulfill our obligations there and throughout Asia. In addition, Japan provides more than one billion dollars in host country support for the upkeep of those facilities, where today we deploy approximately 60,000 troops. Japan's financial and political support for the U.S. Forces stationed there has made it possible for us to rebuild a strong and stable presence in Asia.

I would like to emphasize that in defending Japan and our other Asian friends and allies, America is acting in its own defense as well. Without our bases in Japan, we would have to revamp our entire defense strategy. We would have to ask ourselves: to where would we drop back our line of defense? How many more billions of dollars would that cost us? And just how effective would that new line of defense be? Definitely something to think about.

It is also true that the United States has to spread its resources over a vast area. Therefore, the more Japan can do in its own defense, the more the U.S. can use its own resources efficiently to meet our common objectives. For the past fourteen years, Japan has made steady and significant progress toward increasing its own self-defense capability. And we appreciate it.

I have talked about our shared foreign policy interests and objectives. Let me also touch upon the roles cultural, academic, and professional exchanges play in the U.S.-Japan bilateral relationship. For as much as I have spoken about trade and defense—the "flesh and bone" of our partnership—I have not forgotten for a moment that the heart of our relationship has always revolved, and will continue to revolve, around people.

There is an old saying in the United States that "Ignorance is bliss." In other words, if you don't know about something it can't hurt you, can't bother you. I don't believe that for a minute. And neither do you. Some of the most lasting benefits of our knowing each other come from the sharing, the understanding, the cooperation, and the friendships that develop among us. And one of the major goals of cultural, academic and professional exchanges is to create a public climate where the "flesh and bone" problems can be solved in a spirit of cordiality and mutual respect. A better understanding of each other's people and culture—an understanding that can be translated into accurate perceptions of our governments and policies—will serve us in good stead now, and in the future.

In particular, I would like to pay tribute to the Japan Society and the Japan Center for International Exchange for currently sponsoring the U.S.-Japan Parliamentary Exchange Program. This program to date has brought 130 American and 80 Japanese legislative leaders to each other's country. I am pleased to note that several distinguished participants are with us tonight.

I am also pleased to note that the newly-established U.S.-Japan Leadership Program, sponsored by the U.S.-Japan Foundation and organized by the Japan Society, has already sent a number of talented, dynamic younger Americans to Japan. Their stay in Japan will help these Americans learn how their Japanese counterparts think and how they respond to the rest of the world.

The media can also be a positive force for increasing awareness among both our peoples. Coverage of Japanese-American affairs has increased and improved during recent years. Japanese correspondents in the U.S. now number more than 125, while American correspondents in Japan number more than 100. Stories, commentaries, in-depth articles—I welcome them all, because they provide the necessary food for thought about U.S.-Japan relations.

Finally, let me turn briefly to another subject that is as dear to my heart as the U.S.-Japan relationship. That is the future of the Pacific Basin, the coming "Century of the Pacific."

The development of this Basin during the next 100 years will mark a turning point in world history. More than half the people of the world live in this area. Four South American nations front on the Pacific, as do all of Central and North America, East Asia, Australia, New Zealand, and the islands of the Pacific.

When you think of the Pacific Basin, with its tremendous natural resources, the generally stable governments, the current trade volume, the great potential markets—when you consider the demographic trends—the movements of population—to the South and especially the West—in the United States, you cannot help but come to the conclusion that a pattern is emerging that clearly outlines the intersection of trade and peoples in the Pacific Basin.

It is, in the pronouncements of the U.S. Government, in the words of our President and Secretary of State, where it all is, what it is all about and where our futures lie.

The successful and peaceful development of the Pacific Basin, as well as its stability, will depend upon the durability and strength of the U.S.-Japan relationship.

In closing, I'd like to reiterate a few points I hope you will take home with you:

First, it is imperative that Japan and the United States not engage in mutual recriminations. We can afford neither the time for scapegoating each other, nor the damage it might do to our relations.

Second, the U.S. must put its own economic house in order.

Third, American sellers and investors must have the same opportunities in Japan that Japanese sellers and investors have, generally speaking, in the United States.

Fourth, our security relationship is in our mutual interest and is evolving in the direction of greater burden sharing.

Fifth, a vigorous program of exchanges is the surest way, over the long term, to build a true community of Asia Pacific nations.

It is in our mutual interest to keep these points in mind, to do something positive about them, and thus build a healthier and more understanding relationship. Together we can meet this challenge; separately we can only create a more difficult world for both of us.

The great American poet Carl Sandburg once wrote, "Nothing happens unless first a dream." We have our work cut out for us, and I suggest we get to it.

Thank you.●

WATER PROJECT FUNDING

● Mr. DECONCINI. Mr. President, an excellent article appeared in the Arizona Republic, a Phoenix newspaper, which I believe deserves the attention of my Senate colleagues. The article, entitled, "Water Funds: Eastern Critics Dipping Deeper in the Pork Barrel," is an editorial written by J.J. Casserly, a Phoenix reporter who is an astute observer of water policies and activities at both the State and Federal levels. The article points out in detail how both the East and the West benefit from Federal water programs. While the Bureau of Reclamation is the lead water development agency in the West, the Army Corps of Engineers invests considerable sums of moneys in the East and Midwest for similar purposes.

Mr. President, I think critics of reclamation projects should devote a few minutes to the Casserly article. I ask that the article be printed in the RECORD.

The article follows:

WATER FUNDS: EASTERN CRITICS DIPPING DEEPER IN THE PORK BARREL

(By J.J. Casserly)

WASHINGTON.—For four years, nearly 200 Eastern and Midwestern members of Congress have attacked Western water projects as "pork-barrel politics" at its worst.

They have accused the 17 Bureau of Reclamation states of sticking their snouts so deep in the federal trough that it would take several acts of Congress to get them out.

Yet, as the facts show, the East-Midwest are actually deeper in that barrel than Western states. Not only that, they repay Washington much less of what they get.

From 1970 through 1982, the U.S. Army Corps of Engineers—with two-thirds of its budget earmarked for the East and Midwest—spent $28.8 billion on water projects. In the same period, the Bureau of Reclamation—which operates the West—spent only $8.7 billion.

Adding $9.6 billion the corps spent in this region to the bureau's $8.7 billion, the West got a total of $18.3 billion. However, the East-Midwest received almost $1 billion more over the 12 years—$19.2 billion.

The Environmental Protection Agency spent more funds on water projects during those 12 years than any federal department or agency—a whopping $30.1 billion.

Nearly 80 percent of the EPA's vast construction outlays—mostly for sewage-treatment plants—went to East-Midwest states. Only 20 percent was spent in the West. Thus, $24 billion went to the East with only $6 billion to the West.

A very important change is now underway at the four federal agencies responsible for water-resource development—the corps, the bureau, the Soil Conservation Service and the Tennessee Valley Authority.

U.S. appropriations for water-project construction at the four have dropped 34 percent in real terms over six years to $3.7 billion in 1983. In contrast, operation, maintenance and rehabilitation for existing facilities have soared 38 percent.

This is crucial to the West since its traditional building funds are in a headlong fall.

Yet, money for OM&R in the East-Midwest soars. For the first time ever, OM&R surpassed construction funding in the 1984 corps' budget—$1.4 billion to $1 billion.

The East-Midwest are receiving increasing billions of dollars in OM&R funding, but do not repay a dime for most such work. The West repays most OM&R costs locally.

The West also repays 85 percent of all building while the East repays less and escapes other costs by listing new corps works as old.

California's Central Valley Project is the West's exception. It sells water to repay federal construction and OM&R charges. Some OM&R funds are not repaid because of old contracts, but Washington is reversing that.

Cost-sharing is the most critical aspect of all. The U.S. Water Resources Council has compared the payback to the four water agencies. The East and Midwest, which receive two-thirds of corps' funds, repay only 20 percent of such outlays. The West repays 37 percent of all funds received from the bureau, including loan interest.

Ohio and Pennsylvania are most critical of Arizona water projects. The leading critics are Sen. Howard Metzenbaum, D-Ohio, and Rept. Robert Edgar, D-Pa.

Yet, over the past four years, both states have received more water funding from the four major water agencies than Arizona.

Ohio received $2.4 billion; Pennsylvania, nearly $2.5 billion; and Arizona, less than $2.1 billion.

Metzenbaum says he will attack the 3.3 percent interest rate for Central Arizona Project funds. Yet, as of 1983, Ohio repaid only 7.5 percent of almost $500 million in corps work.

The corps has begun new navigation work in Ohio and the East, but termed it rehabilitation with no payment. It should be repaid.

The real pork barrel is sitting in Metzenbaum's back yard.●

HYDRO RELICENSING

● Mr. KASTEN. Mr. President, today I am cosponsoring Senator WALLOP's bill, S. 426, the Electric Consumers Protection Act of 1985. I believe that it is time for Congress to move ahead and resolve the controversy surrounding this issue.

Hydro generated electrical power is, in many cases, some of the cheapest electrical power in the Nation. Many of the best sites in the Nation were developed many years ago and have generated power for decades. This source of energy continues to serve the public by providing cheap, clean electricity. Many of the licenses that were granted to provide for the construction of these hydroelectric sites are due to expire soon, and Congress must decide if there are to be any changes in the law governing how these licenses are to be issued.

In the years since Congress established the laws governing the relicensing of hydroelectric sites, our Nation has gone through several revolutions in the way we think about energy. What was good energy policy 50 years ago is not always good energy policy today.

There are several points that I hope will be stressed throughout this process. The most fundamental is that the decisions Congress makes will have major financial implications for many utility consumers.

I hope that we will pursue a policy that will encourage competition for the use of these hydroelectric generating sites. We should not allow a single group to monopolize the use of these sites. Instead, we should include in the selection process consideration of who can make the most efficient use of the resource and pass that efficiency on to consumers.

As the House and the Senate move forward on the question of relicensing hydroelectric plants I believe we can take the necessary steps to bring this part of our energy policy in line with the needs of the Nation. I believe Congress will seek, and find, the policy that best meets the Nation's needs.●

NATIONAL ENERGY EDUCATION DAY

● Mr. JOHNSTON. Mr. President, I would like to take this opportunity to draw the attention of my colleagues to the worthy efforts of students across the Nation who participated in National Education Day, March 22, which was set aside to promote energy education at all grade levels of public and private schools throughout the United States.

The National Energy Education Day project, known to many as NEED, celebrates its fifth anniversary this year. As cochairman of the Alliance to Save Energy, I take particular pleasure in commending this successful, 36-State, 8,000 school program. NEED promotes energy education and student leadership through a variety of activities, including projects at elementary, middle, and high schools. These projects include devising games to teach other students about energy, community cooperation activities such as energy conservation contracts or recycling, science fairs and other classroom enrichment activities, and many other educational events. Projects may be schoolwide or conducted by student groups.

Project outlines are also submitted to State coordinating committees for judging; the best projects receive awards from the national NEED organization. Winners from each State journey to our Nation's Capital for a convention in June. My colleagues will be interested to know that one of the favorite activities for the convention is a simulated Senate hearing, in which a panel of student "senators" question real experts in energy matters. I understand that this year's topic will be nuclear licensing reform, and I urge my colleagues to attend the hearing, which will take place on June 25.

In my own State of Louisiana, NEED will be celebrated in Baton Rouge at an evening conference for students and teachers. Over 200 students from across the State will learn more about nuclear energy, the lignite coal industry, oil and gas resources, and alternative sources of energy. The evening will conclude with a skit produced by local students and an awards ceremony granting over $800 in prizes to winners of a statewide poster contest.

Our State science supervisor, Dr. James Barr, is the guiding force behind this program. Dr. Barr is also promoting energy and environmental science as a part of our State-mandated curriculum. With enthusiasm like Dr. Barr's, Louisiana can count on an active energy education program.

I urge my colleagues to become involved in the energy education programs in their States. Program like NEED are a twofold investment in the future—our children's education and our community knowledge of energy.●

SHORTER COLLEGE RECEIVES NCAA GRANT

● Mr. BUMPERS. Mr. President, I am pleased to offer my congratulations to Shorter College in North Little Rock, AR, for receiving a grant from the National Collegiate Athletic Association to operate a summer youth program. Shorter has a fine tradition of providing quality education to its students and also a strong tradition of service to the community. I am pleased that the grant will allow Shorter College to operate this summer program for 300 underprivileged youth in the Greater Little Rock area.

I offer my congratulations to Shorter College and salute them for work well done. I ask that an article from the Arkansas Gazette describing the award be printed in the RECORD.

The article follows:

SHORTER COLLEGE GETS $33,000 NCAA GRANT

(By William Green)

Shorter College in North Little Rock has received a grant of $33,000 from the National Collegiate Athletic Association to operate a five-week enrichment program for youth this summer.

The program, called the National Youth Sports Program, has been administered by the NCAA for 16 years to enable low-income youth between the ages of 10 and 16 to learn and compete in sports and to receive instruction in a number of subjects.

It is financed by the federal Health and Human Services Department.

The University of Arkansas at Fayetteville and the University of Arkansas at Pine Bluff have operated the program in recent years and will again this year, Ruth Berkey of Mission, Kan., the national director, said.

ONE OF 12 CHOSEN

More than 140 schools throughout the country will operate the program this year, and Shorter is one of 12 chosen to operate it for the first time, Berkey said.

She said Shorter was chosen because it had said there are children to be served in the area and had agreed to serve 300 of them and to contribute a project director.

Philander Smith College in Little Rock has applied to operate the program, too, and its application is being considered.

Dr. Frank Purnell, the vice president for academic affairs for Shorter, said the program will begin in June and transportation and meals will be provided. He added that information on how a youth may apply will be made available later.

Purnell, a native of Mississippi and a former running back for the Green Bay Packers, said he sought the money for the program because there's a need for it. He said he'll recruit young people and adults to speak to the participants and that besides learning sports they'll receive instruction in nutrition, personal hygiene and other matters that will help in their development.

A spokesman for the state Employment Security Division said Monday the state had $7.3 million for its regular summer program for youth this year. The program will provide work experience and tutoring to 7,300 youth between the ages of 14 and 21, she said, adding that the figure is $1 million less than the state had for the program last year.

U.S. ROLE IN CENTRAL AMERICA

● Mr. ROTH. Mr. President, I commend the senior Senator from Minnesota, the chairman of the Select Committee on Intelligence, for an extremely thoughtful presentation on the U.S. role in Central America, which he made before the National Press Club on March 26, 1985.

Senator DURENBERGER raises serious questions which, I believe, should be at the forefront of our debates on U.S. policy toward El Salvador, Honduras, Guatemala, Panama, Costa Rica, and Nicaragua. In particular, what is the ultimate goal of our long-term policy in the region. What are the principles which underlie our policy?

All too often, we, in the Senate, have failed to address these questions, choosing, instead, to concentrate our attentions upon means rather than ends. Consequently, I commend the Senator's speech to my colleagues and ask that it be printed in the RECORD in full for their careful consideration.

The material follows:

REMARKS OF SENATOR DAVE DURENBERGER BEFORE THE NATIONAL PRESS CLUB, MARCH 26, 1985

Some years ago, a senior United States government official was reported to have told a South American diplomat that the "axis of history" ran from Moscow through Berlin and London to New York, and did not encompass Latin America.

That narrow vision of international politics is no longer held by most informed people. Today, as never before, people in this country are following with intense interest developments in the nations of Central and South America.

But if we are interested, we are also confused, for we lack a frame of reference which can tell us what kind of policy to pursue. Our government appears to be reacting to events, rather than carrying out a strategy with specific goals and standards by which to measure progress. When things don't go the way we expect, we lose patience and try something different. When we lose confidence, we try something rash. When threatened, we overreact. When not threatened, we lose interest.

So, today, Americans are numbed by a plethora of proposals and counterproposals based on the contradictory views of various experts and witnesses. Americans are confused by the strength of Administration rhetoric and the absence of Administration action. They are confused by congressional procrastination, argument, and lack of consistency. They are looking for something we have seldom brought to Central American policy—coherence and a sense of vision.

We largely ignored events in Central America until the Nicaraguan people overthrew the Somoza regime, and shortly thereafter the Salvadoran military deposed General Romero in a reformist coup. Then, when we tried to react, we found that our policy was defined by a host of afterthoughts posing as Congressional amendments. Instead of crafting an integrated policy, we adopted a series of policy fragments. We looked at the region through a kaleidescope, which offers different views when turned to the right or the left, and not a telescope.

We adopted the Helms amendment prohibiting the use of American foreign aid in support of land reform. We adopted the Dodd amendment which demanded a regular paper exercise on behalf of human rights. We adopted the Boland amendment which tried to link tangible assistance to the intangible motives of the Nicaraguan opposition. And when we found that this was fruitless, we adopted Section 8066 of the Continuing Resolution, which holds American action hostage to an ill-timed vote on an ill-planned program in support of a policy which no one understands.

I submit to you today that we can no longer afford a kaleidescopic approach to foreign policy.

If Central America is important to this nation's future—and it is—then it is time for the public, the Congress, and the Executive Branch to begin shaping a long-term affirmative policy. We need to stop confusing instruments with ends; intentions with accomplishments; rhetoric with reality; and Congressional micromanagement with Congressional oversight. We need instead to ask ourselves what is happening today in Central America, what is likely to happen tomorrow, what we would like to see happen in the future, and what we can do about it.

Perhaps the place to start is with the democratic revolution which is being carried out every day throughout Latin America by millions of people who are demanding, and obtaining, the political and economic rights which they have long been denied.

Today no repressive government can remain in power in Central America unless it receives outside support. But equally, no democratic movement can flourish in Central America unless it receives outside support. Much of that support must come from the Latin American democracies themselves. They cannot be detached observers—critical or non-commital in public, yet supportive in private. They must participate in the democratic revolution for they will benefit the most from its success and suffer the most from its failure.

When I first went to Central America 12 years ago, only Costa Rica had a functioning democracy and a tradition of social justice. Today, Costa Rica is not alone. Panama, Honduras, and El Salvador have democratically-elected civilian governments that have made major progress in eliminating a legacy of injustice, economic stagnation, and the arbitrary exercise of power. Even in Guatemala, a country which for years stood apart because of its feudal brutality, there are clear signs of progress, and Presidential elections are scheduled for October.

At the same time, these developments are not irreversible. El Salvador's respected President, Jose Napolean Duarte, must contend with the remnants of yesterday's rightist dictatorship, while fighting the insurgency of the left. President Suazo of Honduras, though not significantly threatened by the left, is facing deteriorating economic conditions which may create uncontrollable pressure on his government. The Hondurans must also resolve the dilemma of strengthening a military which offers protection against the Marxists to the south but which poses a threat to democracy in its own right. Costa Rica's economy has been ravaged by the oil shocks of 1973 and 1979, by a decline in the terms of trade, by the burden of harboring thousands of refugees from Nicaragua, and by the government's historic generosity. In Panama, economic conditions are precarious and democracy is threatened by a nascent Marxist movement waiting on

stage left and the prospect of a reactionary military waiting on stage right.

The question facing the American people today is whether we ignore these realities or act concert with others to help the emerging democracies strengthen themselves. In the past, we fought change; now we must decide whether to ignore it or to bolster it. The old style military governments are evolving into democracy. The Marxist insurgencies are losing.

In every country but one, the democratic revolution is being carried out, however precariously. That country is Nicaragua.

The Sandinista National Directorate has stolen a democratic revolution from the citizens of Nicaragua as surely as the Bolsheviks stole the Russian revolution against the Czar. It has set out on a course of subversion abroad and repression at home which has disturbed and frightened democratic leaders throughout the region.

Nicaragua is a throwback to the old pattern. Today, as in 1979, the government faces international hostility, economic disaster, a population grown restive, and an increasing threat from a military insurgency supported by a democratic opposition. So if we are consistent in our support for a democratic revolution, we should see Nicaragua for what it is—another Central American dictatorship or which is doomed to failure unless it is kept alive by outside help.

The fundamental question, therefore, is whether we believe that the democratic revolution should move forward throughout Central America. If so, we must ask ourselves where the obstacles to this movement are found. One place is Managua, where a government is bent on throttling the democratic revolution at home and reversing it in the neighboring states.

Inside Nicaragua, the Sandinista National Directorate is resorting to ever greater forms of control and repression. Food is rationed by FSLN block committees. The behavior and beliefs of every citizen are subject to close monitoring to ensure that there is no deviation from the party line. Censorship, forced relocation, and orchestrated mob behavior are further divorcing the people from the Sandinistas. The list of exiles therefore grows bigger every day.

Nicaragua's behavior toward others is no better. Nicaragua is providing material, financial, and political support to insurgents in El Salvador, Honduras, Costa Rica, and Guatemala. This support takes the form of arms, ammunition, communications coordination, logistics, training, propaganda, medical assistance, and advice. In addition, Nicaragua poses a direct military threat to her neighbors in Central America with an arsenal which exceeds those of all the other Central American countries combined. Finally, the emerging client relationship between Nicaragua and the Soviet-Cuban axis represents a potential strategic and tactical threat to the United States.

That's why the United States has persistently raised four points with the Sandinistas in its bilateral talks at Manzanillo. These are the same points which lie at the heart of the multi-lateral Contadora negotiations.

First, we want Nicaragua to cease its support for insurgencies in other countries.

Second, we want the National Directorate to adhere to the principles of the OAS Charter, and to honor the promises they made in 1979 in return for OAS recognition as a transitional government.

Third, we want Nicaragua to reduce the size of its military to parity with that of its neighbors, and to refrain altogether from obtaining or seeking advanced military technology. The economies in Central America cannot afford an arms race spurred by a Nicaraguan bid for hegemony. But the democracies in Central America cannot thrive in the face of a military threat from a state which, unlike Cuba, is located in the heart of their small isthmus.

Finally, we want to see a reduction in Nicaraguan dependence on the Soviets, the Cubans, and clients like the PLO or Libya. Neither this nation nor any other nation in the hemisphere can tolerate another Soviet military outpost.

As important as these four points are, they do not comprise a genuine foreign policy. Instead, they represent problems which need an immediate solution. In other words, we find ourselves once again reacting after the fact to events which appear beyond our control. What we need is a comprehensive policy which can provide a road map for the future.

Thus far, the Administration has failed to provide such a road map. True, it has repeatedly announced three concrete goals which lie at the heart of its monetary requests to Congress: support for democracy against insurgency; economic assistance to help stabilize declining economies; and military assistance to contain the Nicaraguan threat. But these are only short-term reactions to immediate and visible threats. They do not tell us what we want the future to look like and because of that, programs and proposals which should be evaluated in terms of their contribution to progress become debated as ends in themselves.

We are not demonstrably undertaking a significant, long-term and supportable policy which will define the United States role in Central America for the future. And the role played by President Reagan in this issue only contributes to the difficulty.

The President has spoken to the public a number of times about Central America. Until recently, however, he has done so only in terms of such issues as the so-called "feet people". He has not made clear the affirmative policy which we should adopt, but instead has spoken only in terms of what we should oppose.

As a result, the President himself has to some degree become the issue. The President is usually seen as the source of foreign policy. Congress, therefore, debates, supports or refutes a man, not a policy. But the true issue here is a long-term strategy and higher-order goals, not the elections in 1986 or 1988.

Clearly, it is not the obligation of Congress to develop such a policy. That is the responsibility of the Executive Branch, and it is the Executive Branch which is far better prepared to undertake such detailed work. But unless a genuine policy is developed—soon and well—the Executive will leave itself open to defeat by a Congress which will begin to impose artificial restraints on this country. We cannot afford kaleidescopic micro-management of the sort that gave us the Clark Amendment, the artificial box-checking exercise of human rights certification, or the fencing of funding which was appropriated for the CIA.

The vacuum created by the failure to elaborate an affirmative policy has led to the ridiculous spectacle of alternative visits to our Congress and our communities by the FSLN and the FDN in a protracted morality play designed to gain short-term propaganda advantages. In Nicaragua, they know there is no real US policy, and all sides are therefore engaged in a form of ritualized theatrics designed to create one by default.

It is time for this government to take charge of its own policy. What we must begin to do is to establish some guiding principles. These principles can provide a context for debate, and establish standards by which we can measure success. It is vital that such a policy be directed uniformly toward all of Central America, and not just the country which attracts our attention at the moment. Central America is a tightly interdependent region, and the democratic revolution cannot succeed if it is hampered in any country, whether because of leftist or rightist repression. We must build into our policy the elements of consistency, accountability, credibility, and consonance with law which we demand of a foreign policy elsewhere. And above all else, we should not confuse the instruments of policy itself.

I believe that our policy should be shaped by six general principles.

The first principle: We must recognize that a long-term commitment to policy requires the active support of the public and its Congress. This means that a policy must be built on an affirmative vision of the future, and must avoid senseless confrontation over peripheral issues like the paramilitary program. If the President makes a $14 million program the centerpiece of his policy, he will only stoke the fires of controversy in this country. Win or lose, the game will ultimately be the Sandinista's, not ours.

The previous formula for covert assistance is simply at a dead end. The dispute between Congress and the Administration has been over whether money should be appropriated to resume covert, military support of the Nicaraguan insurgents. Congress won't be a party to the illogical and illegal absurdity of pretending that we are not providing military assistance when it is widely and publicly known that we are.

The insistence on covert aid convinces the Central Americans that we are not openly committed to our objectives and, therefore, not steadfast. Moreover, the American people don't understand why we have to act in an underhanded way if our policy objectives are right. Finally, it is not clear why covert aid is the critical action upon which our policy must stand or fall. The controversy is joined on the wrong issue—the method rather than the goal of supporting the FDN—and a negative vote on that issue implies, incorrectly, that Congress and the Administration are not in agreement on the need to oppose the Sandinistas and all they stand for. Confrontation should be in Managua, not in Washington.

The second principle: Our policy must have the element of credibility which comes from an evident willingness to undertake difficult, and potentially expensive actions. Without credibility, our actions raise doubts and questions.

There is considerable hand-wringing about the arms buildup in Nicaragua, but it continues. Why, people must ask, do we permit it? Surely, $14 million in covert aid to the FDN is not going to make any difference. We assert that MG-21s will not be permitted, yet the construction of Puenta Huete Airfield continues, and we permit the deployment of sophisticated MI-24 helicopters. Have we drawn a line on military equipment? If so, where? If not, why not?

Equally, we claim to support the democratic opposition in Nicaragua. If so, people must ask, where is the tangible sign of that support? If we oppose the regime in Managua, why do we buy Nicaraguan beef and ba-

nanas when Honduras could use our trade? And if we truly feel that the Sandinistas have lost their legitimacy because of their failure to adhere to the conditions for their recognition by the OAS, why do we continue diplomatic relations?

Thus far, our rhetoric has vastly exceeded our actions. The longer this continues, the more certain that nobody—democratic ally or Sandinista ideologue—will believe that the U.S. is serious about defending its interest in the short-term or advancing them in the long.

The third principle: We should make greater use of the economic tools at our disposal. Our greatest resource is not our ability to arm people, but to feed them, and to help them develop sound and growing economies.

To this day, we continue to let protectionism dominate our dealings with the Central American economies. We continue to parcel out humanitarian and development assistance in small and infrequent doses. We continue to focus on the short-term gain, not the long-term good.

Economic stability goes hand in hand with political stability. The sounder a nation's economy, the more it can resist aggression or subversion. It is in our own national interest to make a significant commitment to economic development in Central America.

We have the economic capacity, the strategic interest, and the plan of action to do so. But rather than moving ahead with the urgently-needed Jackson Plan, Congress has wasted its time and undercut our credibility by engaging in kaleidescopic policymaking with a string of haphazard amendments. It is time to move forward on the Jackson Plan, and to quit distracting ourselves with targets of political opportunity.

The fourth principle: We must make clear that our support for the democratic revolution means that we are willing to live with diversity so long as a nation's core values involve a commitment to the democratic process.

Policy disagreements among democracies are ultimately less important than their adherence to common values. Our relations with many genuine democracies have occasionally been strained. But at no time have we had a fundamental disagreement over vital and core issues with a true democracy. All democracies have a strong community of interest against tyranny, and it is tyranny in its most naked form that we spend billions each year to deter.

Governments do not have to look like ours to be democratic, nor do they have to sign off on the U.S. policy line. Yet too often in the past, we have signalled that by "democratic," we mean only pro-U.S. and anti-communist. Too often, we have failed to support social justice when the basic choice has been between reform and tyranny.

If the Sandinistas adjust their policies in the ways we have outlined at Manzanillo and elsewhere, and manifest a commitment to the democratic process, we should be willing to develop close and supportive ties with Nicaragua. But we should also be prepared to isolate Nicaragua if the Sandinistas continue on a collision course with their neighbors. Recently, the UNIR offered to lay down its arms and undertake unconditional talks on national reconciliation, with the Church acting as mediator. This could be the Nicaraguan counterpart to President Duarte's dramatic meeting at La Palma, and could represent the start of a process of democratization. The response of the Sandinista National Directorate should shape our policy decisions.

The fifth principle: Any policy which we undertake, must be predicated on Central American unity and leadership. This is not our struggle alone, and if we attempt to make it so we are due for frustration.

It is time for those who have undertaken the democratic revolution to stand up for the principles of democracy throughout the region. If the nations of Central America do not act together, they risk collapsing one by one. The region is tightly interdependent, and it cannot continue the democratic revolution, unless it acts in a united way.

It is understandable, given the long history of U.S. neglect, that the democracies would be reluctant to take the lead in a policy designed to bring to Nicaragua the processes which have taken root in Costa Rica and elsewhere. Nobody would want to risk further intimidation by Nicaragua in a hopeless quest. So it is vital that the United States make clear that, if the nations of the region undertake collective action, we will meet our obligations under the OAS Charter and the Rio Treaty.

Regional collective action is a tool we have simply overlooked thus far, preferring to rely on unilateral programs and declarations. Article 25 of the OAS Charter, and Articles 6 and 8 of the Rio Pact, provide a sound legal and diplomatic basis for individual and collective action against a country which engages in either direct military incursion or in aggression by indirect means. A reliance on these principles and provisions will make clear that the problem is real, and not simply an ideological difference between Republicans and Sandinistas.

Moreover, a declaration of collective action makes clear that it is Latins themselves, and not the Yanquis, who are concerned. We cannot afford to revive the image of the colossus to the north. And I am certain that political leaders like Presidents Duarte and Monge are far more effective in obtaining U.S. support than the parade of FDN military commanders who have recently come through Washington.

The sixth, and last, principle: We should be cautious about reliance on tools that can only support a political goal, not define one. Two such tools are military action and negotiations.

We should demonstrate that our commitment to the region is political and durable. As part of that commitment, we should make clear our willingness to provide military assistance in accordance with our Rio Pact obligations, but only as requested by the Rio Pact members themselves. We should avoid the unilateral impulse to push until somebody yells, "uncle". Military action should never be ruled out. But no such action can be undertaken without a clear consensus in this country and in the region.

Equally, we must keep open the door to negotiations with the government of Nicaragua, but we must realize that in every case, bilaterally and unilaterally, they have negotiated with a cynical and unproductive attitude. We can no longer base our policy on an assumption that the Sandinistas have a motivation or inclination to willingly cede any of their objectives, inside or outside their country. We must understand that their objective remains consolidation of power—an objective they will not willingly concede through negotiations unless our diplomacy is framed in terms of a clear enunciation of our long-term goals, and backed by sufficient strength to express our will.

In summary, no element of policy—whether economic assistance or covert action—can be intelligently discussed unless we have first decided upon the broad principles we are seeking to advance. Only then can our debate about Central America cease to be artificial and artificially narrow.

It is unusual that the Chairman of the Intelligence Committee should address these points, for customarily intelligence is supposed to inform the policy-maker, not shape policy. But the means chosen by the Administration to pursue policy in Central America have thrust both the CIA and the oversight committees with the public debate. We can return to our traditional roles when we are offered a policy to support.●

RULES OF PROCEDURE FOR THE COMMITTEE ON RULES AND ADMINISTRATION

● Mr. MATHIAS. Mr. President, paragraph 2 of rule XXVI of the Standing Rules of the Senate requires each standing, select, or special committee of the Senate, at the beginning of each session, to publish in the CONGRESSIONAL RECORD the rules the committee has adopted to govern procedures within the committee.

Pursuant to that requirement, I ask that the current rules of the Committee on Rules and Administration be printed in the RECORD.

The material follows:

RULES OF PROCEDURE OF THE SENATE COMMITTEE ON RULES AND ADMINISTRATION

(Adopted March 28, 1985)

TITLE I—MEETINGS OF THE COMMITTEE

1. The regular meeting dates of the committee shall be the second and fourth Wednesdays of each month at 10 a.m., in room SR 301, Russell Senate Office Building. Additional meetings may be called by the chairman as he may deem necessary or pursuant to the provisions of paragraph 3 of rule XXVI of the Standing Rules of the Senate.

2. Meetings of the committee, including meetings to conduct hearings, shall be open to the public, except that a meeting or series of meetings by the committee on the same subject for a period of no more than 14 calendar days may be closed to the public on a motion made and seconded to go into closed session to discuss only whether the matters enumerated in subparagraphs (A) through (F) would require the meeting to be closed followed immediately by a record vote in open session by a majority of the members of the committee when it is determined that the matters to be discussed or the testimony to be taken at such meeting or meetings—

(A) will disclose matters necessary to be kept secret in the interests of national defense or the confidential conduct of the foreign relations of the United States;

(B) will relate solely to matters of committee staff personnel or internal staff management or procedure;

(C) will tend to charge an individual with crime or misconduct, to disagree or injure the professional standing of an individual, or otherwise to expose an individual to public contempt or obloquy, or will represent a clearly unwarranted invasion of the privacy of an individual;

(D) will disclose the identity of any informer or law inforcement agent or will disclose any information relating to the inves-

tigation or prosecution of a criminal offense that is required to be kept secret in the interests of effective law enforcement;

(E) will disclose information relating to the trade secrets of financial or commercial information pertaining specifically to a given person if—

(1) an Act of Congress requires the information to be kept confidential by Government officers and employees; or

(2) the information has been obtained by the Government on a confidential basis, other than through an application by such person for a specific Government financial or other benefit, and is required to be kept secret in order to prevent undue injury to the competitive position of such person; or

(F) may divulge matters required to be kept confidential under other provisions of law or Government regulations. (Paragraph 5(b) of rule XXVI of the Standing Rules.)

3. Written notice of committee meetings will normally be sent by the committee's staff director to all members of the committee at least 3 days in advance. In addition, the committee staff will telephone reminders of committee meetings to all members of the committee or to the appropriate staff assistants in their offices.

4. A copy of the committee's intended agenda enumerating separate items of legislative business and committee business will normally be sent to all members of the committee by the staff director at least 1 day in advance of all meetings. This does not preclude any member of the committee from raising appropriate non-agenda topics.

TITLE II—QUORUMS

1. Pursuant to paragraph 7(a)(1) of rule XXVI of the Standing Rules, 8 members of the committee shall constitute a quorum for the reporting of legislative measures.

2. Pursuant to paragraph 7(a)(1) of rule XXVI of the Standing Rules, 5 members shall constitute a quorum for the transaction of business, including action on amendments to measures prior to voting to report the measure to the Senate.

3. Pursuant to paragraph 7(a)(2) of rule XXVI of the Senate Rules, 4 members of the committee shall constitute a quorum for the purpose of taking testimony under oath; provided, however, that once a quorum is established, any one member can continue to take such testimony.

4. Under no circumstance may proxies be considered for the establishment of a quorum.

TITLE III—VOTING

1. Voting in the committee on any issue will normally be by voice vote.

2. If a third of the members present so demand, a record vote will be taken on any question by rollcall.

3. The results of rollcall votes in any meeting upon any measure, or any amendment thereto, shall be stated in the committee report on that measure unless previously announced by the committee, and such report or announcement shall include a tabulation of the votes cast in favor of and the votes cast in opposition to each such measure and amendment by each member of the committee. (Paragraph 7 (b) and (c) of rule XXVI of the Standing Rules.)

4. Proxy voting shall be allowed on all measures and matters before the committee. However, the vote of the committee to report a measure or matter shall require the concurrence of a majority of the members of the committee who are physically present at the time of the vote. Proxies will be allowed in such cases solely for the purpose of recording a member's position on the question and then only in those instances when the absentee committee member has been informed of the question and has affirmatively requested that he be recorded. (Paragraph 7(a)(3) of rule XXVI of the Standing Rules.)

TITLE IV—DELEGATION OF AUTHORITY TO COMMITTEE CHAIRMAN

1. The chairman is authorized to sign himself or by delegation all necessary vouchers and routine papers for which the committee's approval is required and to decide in the committee's behalf all routine business.

2. The chairman is authorized to engage commercial reporters for the preparation of transcripts of committee meetings and hearings.

3. The chairman is authorized to issue, in behalf of the committee, regulations normally promulgated by the committee at the beginning of each session.●

TWO GOOD REASONS WHY NOT TO RATIFY THE GENOCIDE CONVENTION

● Mr. SYMMS. Mr. President, I recently read an insightful article written by Connaught Marshner, of the Committee for a Free Congress. In that article, Mrs. Marshner illustrates the two major flaws in the Genocide Convention: (1) First, its constitutional problems; and second, its vague and deficient definition of the term "genocide."

American citizens accused of genocide under the terms of the Convention could stand trial in international penal tribunals, under foreign judges, without the benefit of the protections contained in the American Constitution, or the Bill of Rights. American citizens could be subject to this process even if their actions were not offensive or illegal under American law.

Mass murders and atrocities committed by Communist regimes like the Khmer Rouge in Cambodia or the Soviets in Afganistan would not be covered under the treaty because political aggression against a group does not qualify as genocide.

For these and other reasons outlined in this article, the Senate would be doing a disservice to our constituents, and our Constitution if we ratify the Genocide Convention without extensive amendment. Furthermore, ratifying the Genocide Convention without extensive amendment would sanction past, present, and future acts of genocide by shielding those regimes from the force of international law.

Mr. President, I ask that the text of "The Genocide Convention: Not Enough For the U.S.," written by Connaught Marshner, be printed in the RECORD.

The article follows:

THE GENOCIDE CONVENTION: NOT ENOUGH FOR THE U.S.

(By Connaught Marshner)

The Genocide Convention, or treaty, is an international agreement that has been signed by 96 nations, including the Soviet Union. It sounds at first like a Mom-and-apple-pie idea, because it is generally presented as a way to "outlaw genocide," and everyone wants to do that.

Yet the treaty has consistently failed to earn ratification by the Senate since it was first submitted in 1948. Why is this? Because our senators are racists and want to leave the door open to genocide? No. It's because our senators can read, and a great many of them have read the treaty.

The flaws of the treaty are in two main areas: constitutional problems, and problems of definition.

What the Genocide Convention primarily does is to empower the World Court to judge and punish crimes of genocide. The World Court, also known as the International Court of Justice, is based in the Hague, Holland. Its judicial staff rotates; at present it is made up mainly of judges from Sweden, Syria, and Byelorussia, which is part of the Soviet Union.

Thus, the treaty presents the same problems as submitting to the World Court in the first place, no matter how many reservations we place on our obedience to it. The U.S. Constitution asserts its own supremacy within the United States. The World Court, being supra-national, necessarily asserts its supremacy over all national constitutions. What happens when the two conflict? What happens when the World Court obliges the United States to act against its natural interest? Well, the president's oath of office would lead him to choose the Constitution over the World Court—we hope.

The Genocide Convention considerably expands the powers of the World Court, even to the point where Americans could be tried for acts that fit the treaty's odd definitions of genocide, even if those acts were committed in the United States, and even if they are not illegal or even offensive acts under American law.

This brings us to the problem of the definitions. The treaty defines genocide as aggression against a "racial, ethnical, or religious group." Missing from that list is "political," which is precisely the category into which the many mass killings by communist governments would fall.

It is not an accident or an oversight that the treaty fails to include political groups as potential victims of genocide. The word "political" was removed from the treaty at the insistence of the Soviet delegates at the time the treaty was being drawn up by the U.N. General Assembly.

But just as interesting as what the treaty leaves out is the issue of what it includes.

In order to commit genocide by the treaty's definitions, you would not have to kill large numbers of members of a "racial, ethnical, or religious group." The treaty includes those who "cause . . . mental harm" to such groups "in whole or in part" as persons guilty of genocide. Thus, an ethnic joke could do it. Now, ethnic jokes are coarse and unkind. But genocide?

Or you could trip the wire by speaking out against policies deemed desirable by spokesmen for an ethnic group. Say, busing, which is widely considered to be in black people's interest, despite both the facts and the majority of black opinion. The Genocide Convention raises the possibility that opponents of busing or of racial quotas, or makers of uncouth remarks, could be hauled off to the Hague to stand trial, without a jury, without the American Bill of Rights, before judges who may very well come from Soviet-bloc countries.

If this seems far-fetched, if the United States would "never let that happen," then one has to ask why some senators are pushing hard for the ratification of this treaty.

If the purpose is merely to put the United States on record against genocide, then by all means let's do that. Let's revise the treaty so that it will punish real aggression against groups, so that acts such as the slaughter of the Khmer people by the Khmer Rouge, or the starvation of the Ethiopians while the Marxist government of Ethiopia spent millions on birthday parties for itself, would not be excluded. And then let's pass it.

Of course, it's not quite that simple. We would then have passed a treaty different from the one signed by many other nations. But that is no reason to put the moral weight of the United States behind a Soviet-tailored definition of genocide and expose our citizens to legal action where they would be shorn of their rights as Americans.

If we were to draw up a new Genocide Convention, the Soviets would probably reject it, but in so doing they would be showing the world their true colors. The process of getting it ratified by the rest of the world would be long, but it would be an opportunity for the United States to assert moral leadership—which it would certainly not be doing by ratifying the treaty in its disastrous present form.●

THE HARASSMENT OF JEWS IN THE SOVIET UNION

● Mr. BURDICK. Mr. President, since I last spoke to my colleagues about the plight of Jews in the Soviet Union, Konstantin Chernenko has died, and a vigorous Mikhail Gorbachev has assumed the top leadership role in the Soviet Union.

The accession of Mr. Gorbachev may open up a new chapter in United States-Soviet relations. At the very least, we are hoping for some improvement in a relationship which has been marked by a high degree of tension and discord in the past few years.

The opportunity is there for Mr. Reagan and Mr. Gorbachev to attempt to put United States-Soviet relations on a more stable footing. It is heartening that Gorbachev has apparently accepted the President's invitation to meet in the near future. A face-to-face meeting could be the initial step in a process which eventually produces greater accord on a number of issues, including the deescalation of the nuclear arms race.

Perhaps an improvement in the atmosphere in which United States-Soviet relations are conducted will also lead to an easing of the restrictions on Jewish emigration, and an end to the Soviet Government's campaign against Jewish activists and dissidents.

The suffering of Soviet Jews touches all of us who are committed to a standard of basic human rights. The Soviet Government's harassment of the Jewish community, and the almost automatic denial of most emigration applications is an affront to the Helsinki process, and cannot be condoned or ignored by anyone who hopes to preserve the integrity of those accords.

We have said time and time again that we cannot be indifferent to the persecution of Jews in the Soviet Union. We understand that this is a very sensitive issue for the Soviet Government, but it is an issue that cannot be sidestepped.

When the President meets with Mr. Gorbachev, he should explain in forthright terms that the well-being of the Soviet Jewish community is a matter of utmost concern to the American people and the American Congress.

We ask Mr. Gorbachev to carefully reevaluate his government's policies toward Jewish emigration, and take positive steps to break the impasse that has brought such hardship to Soviet Jewish families, and caused so much friction in the United States-Soviet relationship.●

IS ABORTION MURDER

● Mr. PACKWOOD. Mr. President, yesterday, a hearing was held before the full Judiciary Committee on Senator HATCH's bill S. 522, which according to Senator HATCH, amends title VI of the 1964 Civil Rights Act to "protect the rights of the unborn." In light of this hearing, I thought the editorial titled "Abortion: The Punishment Dilemma," which appeared in today's Baltimore Sun, was particularly timely. The editorial is by Ronald K.L. Collins, who teaches law at Willamette University in Salem, OR. I ask to have the editorial by my constituent from Oregon printed in the RECORD immediately following my remarks.

The material follows:

[From the Baltimore (MD) Sun, Apr. 3, 1985]

ABORTION: THE PUNISHMENT DILEMMA

(By Ronald K.L. Collins)

WASHINGTON.—One test of a moral principle is the conviction with which it is applied. By that measure, there is something disturbing about the "right to life" campaign currently being waged. The unsettling question is how to punish abortion should it ever be outlawed.

"Abortion is murder," proclaim the demonstrators marching down Constitution Avenue. It is a form of Nazi genocide, say spokesmen of the "no compromise" wing of the "pro-life" movement. These are powerful declarations intended to convey outrage over this nation's abortion policies. As expressions of sincere indignation, they are all too human. But as moral principles worthy of legal enactment, they are at best questionable and at worst ill-conceived.

Political and religious leaders have likewise cast the abortion issue in such absolutist terms. "The real question," declared President Reagan, "is whether that tiny human life has a God-given right to be protected by the law—the same right we have." Consistent with that aim, members of the 99th Congress have introduced constitutional amendments and statutes that classify a fetus as a person entitled to the law's full protection. Short of such action, the Rev. Jerry Falwell warns, the "biological holocaust" ushered in by the Supreme Court's 1973 abortion ruling is likely to continue.

But is abortion really murder?

What does it mean to say, as U.S. Surgeon General C. Evertt Koop has, that abortion is "homicide"? One way to answer these questions is to examine abortion laws and how they have been enforced.

Implicit in the assertion that abortion is murder is the idea that the penalty will reflect the gravity of the wrong. Thus, Britain's Offenses Against the Person Act of 1861 required judges to punish all abortionists by "penal servitude for life." (This act remains on the books in Ireland). It is entirely consistent with such penalty schemes to hold a woman criminally accountable, as an 1881 Indiana law did, for consenting to an abortion.

The general history of abortion laws, however, has been much different. At the time of the 1973 Supreme Court decision, for example, nowhere in this country was the crime of abortion punishable by a life sentence. Ten years was the maximum penalty an abortionist could receive, provided the woman did not die. Moreover, only seven states had laws that expressly penalized women for soliciting abortions. In those jurisdictions the harshest penalty for soliciting the "murder" of a fetus was a five-year sentence. A woman was altogether beyond the law's reach for such actions in most other states.

Before the 1973 *Roe* v. *Wade* decision legalizing certain abortions, experts estimate that the annual number of illegal abortions ranged from 200,000 to well over one million. Criminal convictions were few, numbering about 1,000 a year. And in the majority of these cases the penalties were typically short of the maximum sentence. Notably, there are virtually no appellate records of a woman being indicted for procuring an abortion.

In other countries similar laws and practices are common. For example, in West Germany, where in 1975 the high court declared abortion on demand unconstitutional, an abortionist in a typical case faces no more than a three-year sentence for intentionally terminating a "human life." Such penalties are rarely meted out and do not apply to the woman. In the Philippines, where all classes of abortion are illegal, the law imposes a mere six-year maximum sentence on both the abortionist and the woman treated. By stark contrast, Ireland's laws continue to exact a life sentence from convicted abortionists.

It is next-to-impossible to square the rhetoric of today's "Pro-life" movement with the truth of the historical experience. That may account for the glaring absence of any criminal sanctions in the many anti-abortion measures proposed in the past decade. To solve this riddle the "right to life" supporters need only endorse laws like the 1861 British one, complete with criminal penalties for women who seek or consent to abortions.

Confronted with the reality of a yearly rate of 1.5 million abortions, "pro-life" advocates pause when it comes to accepting the logical consequences of their convictions. President Reagan is uncertain about the penalty question: "Well, I haven't though about it from that standpoint." According to a recent study, while most U.S. Catholic theologians and biblical scholars surveyed believe abortion is immoral, 62 percent do not think it constitutes murder. And Baptist minister Falwell doesn't believe that the

law's retribution should extend to women who invite the "destruction" of "innocent, unborn babies."

Simply because abortion may be repugnant to people of conscience does not necessarily mean that it is murder or that a fetus is a person. Unless hypocrisy is to be the rule, that much must be conceded by abortion foes until they are prepared to reconcile principle with penalty.●

LIBRARIES AND TELECOMMUNICATIONS

● Mr. PRESSLER. Mr. President, I have spoken before about the effect of escalating telecommunications rates on the services provided by our Nation's libraries. Together with many of my colleagues, I remain concerned that certain pending increases fall unduly heavily on services libraries depend on to provide rapid access to information.

Thousands of libraries, serving perhaps half the Nation's population, use private lines leased from AT&T to gain access through State and regional networks to nationwide bibliographic data bases. These linkages, often established with the stimulus of Federal funds, enable libraries to reduce the labor-intensive nature of library materials processing and enable any library users to gain access to the country's library resources.

The continued ability of libraries to improve services through telecommunications has been severely shaken by a series of private line tariffs filed over the last year and a half as a result of Federal deregulation policies and Bell System divestiture. The first of these tariffs was filed back in October 1983 and would have doubled costs for some libraries.

The effect would have been devastating, particularly on small and rural libraries faced with disconnecting terminals or abandoning plans to join nationwide bibliographic systems. This would have been an enormous step backward in information access, for the users of even the smallest or most isolated library gain access to resources throughout the country when linked through telecommunications. In addition, most libraries are publicly funded, operate on fixed budgets, and cannot pass increased costs along to their patrons.

Over 1 year ago, I filed an amendment to pending telephone legislation (S. 1660) which would have required the Federal Communications Commission to take a long hard look at the public interest served by libraries before allowing new charges to be levied. Unfortunately, action on S. 1660 did not go forward.

In May of last year, I wrote to FCC Chairman Mark Fowler, in a letter cosigned by 26 of my Senate colleagues, to request consideration of a library private line service so that cost increases would not prevent libraries from performing their historic role of providing universal information access to the public.

The October 1983 AT&T private line tariffs were deferred, revised, and eventually found unlawful by the FCC. However, a new set of tariffs was filed in January of this year, with only slightly less devastating impact. These tariffs have also been deferred and revised, and are now pending before the FCC with a scheduled effective date of April 6. The increase for some libraries may be as high as 67 percent, with the average for the largest library database 24 percent—over three times the average increase for all AT&T private line customers.

This disproportionate effect has been admitted by AT&T, and remarked on by the FCC in the course of the public proceedings on these tariffs—proceedings in which the library community has participated actively, but at a considerable disadvantage. Often libraries have not had data on the impact of each version of the tariffs until after the brief comment period allowed by the FCC.

Because of the importance to the Nation of the information libraries provide to all citizens, regardless of age, income level, or educational background, and because of the limited resources libraries have available to participate in tariff proceedings, I have again written to the FCC, both individually on February 1 and together with 27 of my Senate colleagues on February 27.

These letters urge the FCC to consider the comments of the library community, to delay the tariffs for further investigation and input, or, if the tariffs are to be approved, to phase in increases. The letters again recommend a special rulemaking to consider a private line service for libraries. I continue to believe that, without some relief, universal access to information through libraries will be seriously jeopardized.

Mr. President, I ask that excerpts of letters from libraries on this issue, and the texts of the two letters I mentioned previously, along with the reply to each letter from the FCC, be printed in the RECORD immediately following my remarks. I have been disappointed in Chairman Fowler's responses to my letters on libraries. The responses seem to miss my point on the uniqueness of libraries among private line users in their mission of providing library and information services to their user communities. This exchange of correspondence deserves wider attention.

The material follows:

EXCERPTS OF LETTERS FROM LIBRARIANS

South Dakota, North American Baptist Seminary: Our own library cannot hope to bear cost increases such as are being proposed and still maintain or increase existing levels of service to our patrons. Our plans to further automate through the acquisition of an OCLC M300 terminal, linked by private line to computers in Columbus, Ohio, would be quashed under such a dramatic increase.

South Dakota, Augustana College: Last year our library used our telecommunication line and OCLC to process approximately 3000 interlibrary loan transactions, 2000 of which were requests from other libraries to borrow materials from the Mikkelsen Library. We loan materials, as do many other libraries, at no charge to the borrower. Drastic and unexpected increases in telecommunications charges of the nature now proposed by AT&T would have a disastrous effect on all libraries' ability to continue maintaining this information network.

Rhode Island, Department of State Library Services, Providence: This would present serious problems for our libraries, many of which have very limited budgets, as such increases were not projected for this year and most requests for the next fiscal year have already been submitted. Such an increase could very well eliminate automated services for most libraries at the very time they are becoming vital to the effectiveness of the services that these libraries provide.

Illinois Library Association: To give you some indication of how increased tariffs might affect our libraries, 180, or almost a third of all public libraries in Illinois operate on budgets of less than $20,000 per year. That $20,000 of taxpayers' money has to cover the cost of rent, of mortgage, utilities, salaries, books and other library materials. Every penny is counted carefully and expended to do the very best in serving the information needs of the community.

New York, New York University: To order and process over 40,000 new items annually, we use the Research Libraries Group's computer utility in Palo Alto, California. This utility enables us to share cataloging data with many other libraries including the Library of Congress, reducing our own processing costs 5-fold and enhancing our abilities to share resources with other libraries throughout the country. But these services are not free. Just for dedicated telephone lines to California, we paid $33,264 last year. In addition, we accessed other data bases for our patrons via value added networks and linked our own computer services to other libraries via dedicated telephone lines at an annual charge of $6,000.

Florida, Flagler College, St. Augustine: At present we are in a consortium of 2,000 libraries connected by leased lines for cataloging, interlibrary loans, and mutual support. With a drastic increase in telephone lines, we probably will not be able to continue in the system, and consequently, will have to curtail many of our services to our students.

U.S. SENATE,
Washington, DC, February 1, 1985.

Re: Investigation of Access and Divestiture Related Tariffs, CC Docket No. 83-1145, Phase II, Part 2—AT&T Communications Tariff, F.C.C. Nos. 9, 10, 11 Transmittal No. 285

Mr. MARK FOWLER,
Chairman, Federal Communications Commission, Washington, DC.

DEAR MR. CHAIRMAN: I am writing to ask the Commission to consider extending the comment period on the above captioned tariffs which would completely restructure AT&T Communications' private line service. While I understand that a 3-day extension has been made due to the impact of a three-

day holiday weekend, I believe a further extension is needed. The tariffs and supporting materials are voluminous and complex analyses are necessary to determine their impact.

Libraries do not have the data available to perform these analyses, which must be done on a network by network basis, and require AT&T assistance. AT&T has indicated the overall impact on libraries will be significant, but has not yet provided specific data, and will not be able to provide all this data until February 8th. With the currently scheduled deadline of February 7th, the Commission will not have the benefit of a full analysis by library customers.

I am particularly concerned, as you know, about the impact of access and divestiture related tariffs upon the nation's libraries. The private line tariff proposed by AT&T in October of 1983 would have had a devastating effect on the ability of libraries to connect to a system of nationwide bibliographic databases laboriously developed over the last fifteen years.

The largest of these "bibliographic utilities" is OCLC (Online Computer Library Center) which uses a system of 260 dedicated, multipoint lines leased from AT&T to serve 5,600 terminals in libraries across the U.S. Each circuit in this system must be analyzed manually (since computer models for analyzing the new tariff structure are not available) in light of the tariff proposals and AT&T-provided data in order to determine the impact on libraries in each regional or state library network.

I wrote you in May of last year, along with 26 of my Senate colleagues, to urge the Commission's consideration of a library private line service. In your response, you assured me that the Commission was aware of the concerns of the nation's libraries, that you shared my concern over the substantial rate level and rate structure changes proposed by AT&T, and that the Commission would address these concerns before the effective date of the tariff. That earlier tariff was subsequently found unlawful by the Commission.

However, AT&T has given broad indications that this new tariff will cause increases at least as high as the previous tariff had proposed for library users of AT&T's private line services. Therefore, I urge you to extend the February 7 deadline so that affected entities with limited resources such as libraries can analyze the impact of the tariff and respond.

Although the tariff would have a major impact on the public's access to information through libraries and would keep many small libraries from participating in computerized systems, the added revenues sought from libraries would mean little in the overall private line picture. In 1983 libraries accounted for $6.8 million or 0.3 percent of AT&T private line revenues. Thus movement on the library private line service proceeding proposed in my May 1984 letter to you is in order. In the interim, libraries should be provided the opportunity to comment fully on these tariffs.

Once impact data are available within the library community, and have been communicated to the Commission, I urge you to give careful consideration to the impact of these private line tariffs on libraries. Since October 1983 libraries have been planning technological adjustments to minimize the impact of new tariffs, but such developments cannot be implemented quickly. Technological change in libraries, while significant, is gradual due to their limited capital, and inability to pass cost along to their users. Of course, libraries are unique among users of private line services in that the basic access to information they provide is done without remuneration from fixed annual budgets.

In view of these considerations, please apprise me as to whether the Commission is favorably disposed toward extending the comment period for these tariffs.

Sincerely,

LARRY PRESSLER,
U.S. Senator.

FEDERAL COMMUNICATIONS COMMISSION,
Washington, DC, February 11, 1985.

Re: AT&T-Communications Private Line Tariffs, Tariff FCC Nos. 9, 10, 11, Transmittal No. 285.

Hon. LARRY PRESSLER,
U.S. Senate,
Washington, DC.

DEAR SENATOR PRESSLER: Thank you for your letter of February 1, 1985 regarding the private line tariff proposals filed by the American Telephone and Telegraph Company ("AT&T") on January 18, 1985. In your letter, you expressed your concern with the impact that new private line rates could have on libraries that use private lines to interconnect bibliographic data bases nation-wide. You asked the Commission to consider extending the period for comments on AT&T's filing beyond the three-day extension (to February 7, 1985) already granted so that library customers of AT&T's private line services would be able to assess the potential effects of the proposed rates.

The Commission's decision not to grant a further extension was the result of a careful weighing of competing factors. We share your concern regarding the potential impact on users like the nation's libraries of increases in private line rates which may result from the AT&T tariff. The Commission's statutory mandate, however, is to ensure that rates are just and reasonable. Accordingly, our analysis of AT&T's tariff focuses principally on the question of whether AT&T's proposed rates are fully justified when compared to its stated revenue requirement.

A large part of the proposed private rate increase is prompted by the fact that AT&T will be passing through increases in the "special access" rates charged to it by local exchange carriers or terminating AT&T's private line channels. These special access rate impact issues have been fully explored in a separate proceeding (Investigation of Access and Divestiture Related Tariffs, CC Docket No. 83-1145, Phase I and Phase II, Part I) in which commenters have had an extensive opportunity to raise rate impact arguments.

Both of these proceedings were initiated some time ago. Because of the length of the private line proceeding, during which an outdated tariff structure has continued in effect, there is an overriding public interest in permitting updated private line tariffs to take effect as soon as possible. The Commission has previously considered requests for extension of time in the AT&T private line proceeding and decided to grant a limited extension to compensate for a "lost holiday weekend during which commenters were unable to obtain copies of the new AT&T tariff proposals. It is our view that the limited extension already granted was sufficient to protect the interests of parties to the proceeding and that it served our overall goal of putting into effect a lawful tariff structure as quickly as possible. Accordingly, we concluded that granting a further extension at this time as you have requested would not be in the public interest.

I trust this explanation is responsive to your concerns.

Sincerely,

MARK S. FOWLER,
Chairman,
Federal Communications Commission.

U.S. SENATE,
Washington, DC. February 27, 1985.

Re: AT&T Communications Tariff FCC Nos. 9, 10 and 11 Transmittal No. 285.

Hon. MARK S. FOWLER,
Chairman, Federal Communications Commission, Washington, D.C.

DEAR MR. CHAIRMAN: We are writing to ask the Commission to consider the serious impact the above-captioned tariffs would have on the nation's libraries.

We are aware that the comment period has ended and the effective date of the tariffs is very close. We believe, however, that the libraries are among those few customers who would suffer the highest rate of increases if the tariffs are approved as filed. Information provided by AT&T after the end of the comment period makes that clear.

It is also clear that the impact of the tariff is uneven, with some libraries facing increases in the 50 to 100 percent range. This will have a devastating effect on the ability of the libraries to connect a system of nationwide bibliographic databases laboriously developed over the last 15 years. Without such access, libraries could not cope with the explosion of information published in the last few decades, and small libraries would once again be isolated entities whose users would lack access to materials.

There are alternatives open to the Commission to prevent such rate shock for a class of customers so ill-equipped to deal with high increases on short notice. We are convinced that the library community has been dealt a procedural injustice in this proceeding. With over 3,000 pages of tariff material and a complex system of multipoint private lines for which to analyze data, it is not surprising that libraries were not able to fully analyze the impact of the proposed tariff.

We believe the Commission should suspend the tariffs for a reasonable period and conduct an investigation with additional public input. This would allow all affected parties to participate more meaningfully in this proceeding.

If you intend to move ahead on these tariffs, the impact on our libraries could be mitigated by exercising the option of phasing in the tariffs. If you would require revisions so that increases would be phased in over a 2-3 year period, the bibliographic databases which lease lines could phase in the increases to those libraries which would be facing the above average increases.

In this way, the damage to library services would be minimized and time would be provided for the library community to make budget plans. It is clear to us that the tariffs as filed pose a major problem. Libraries are typically publicly funded and supported, and operate on fixed budgets. Small libraries may have to discontinue automated services or postpone plans to begin them. Libraries represent only 0.3 percent of AT&T private line revenues, and those revenues as a whole are only about 15 percent of all AT&T interstate revenues.

Attached to our letter is a position paper developed by the library community which

spells out the impact of the tariffs. We find these points to be sound and urge your consideration of them.

The Commission decided last May that a request by 27 Senators for a special rulemaking to consider a private line service for libraries was premature. This suggestion may now need your consideration. We continue to believe that without some relief, universal access to information through libraries will be seriously jeopardized. We recommend careful consideration of the public interest involved through a separate rulemaking proceeding.

In summary, we ask the Commission to suspend the tariff for a reasonable period and conduct an investigation with additional public input or in the alternative to provide a special rulemaking to consider a private line service for libraries. If the proposed tariffs are to be approved, we hope that a phase-in will be considered.

We look forward to hearing from you.

Sincerely,

Larry Pressler, Robert T. Stafford, James Abdnor, Claiborne Pell, Wendell Ford, John Melcher, Mark Andrews, Chic Hecht, Paul Laxalt, Rudy Boschwitz, Max Baucus, Quentin N. Burdick, Bill Bradley, Alan J. Dixon, Strom Thurmond, Dan Quayle, Richard G. Lugar, John C. Stennis, Daniel Patrick Moynihan, Tom Harkin, Thomas F. Eagleton, Albert Gore, Carl Levin, Paul Simon, Howard M. Metzenbaum, Daniel J. Evans, John Glenn, Paul S. Sarbanes.

FEDERAL COMMUNICATIONS COMMISSION,
Washington, DC, March 8, 1985.

Hon. LARRY PRESSLER,
U.S. Senate,
Washington, DC.

DEAR SENATOR PRESSLER: This is in response to your February 27, 1985, correspondence, signed by you and 27 of your colleagues, regarding AT&T Communications' (ATTCOM) proposed private line tariffs and the effect these tariffs would have on the nation's libraries.

Your letter states that, if the proposed tariffs are permitted to take effect, the price for interconnection of computerized bibliographic data bases may rise by as much as 50 to 100 percent, and that many libraries may no longer be able to afford access to the data bases. Your letter also states that the library community has not been given ample time to review and analyze the tariff filing, and requests suspension and an additional comment period. If the proposed tariffs are approved, you request that the Commission order that rate increases be phased in over a two to three year period, thereby permitting libraries to make budgetary adjustments. Alternatively, you request that the Commission initiate a special rulemaking to devise a separate private line rate for library services.

Recent Commission action, as well as recent revisions to ATTCOM's private line tariffs, have mitigated the impact of rate increases that the nation's libraries may experience. On March 1, 1985, the Commission adopted an order that allows the special access tariffs, which govern the rates charged by local exchange carriers for originating and terminating private line communications, to become effective April 1, 1985, subject to certain modifications. As I have indicated to you in previous correspondence, a large part of the increase proposed for the private line rates is prompted by increased charges for the special access connections that originate and terminate the communication. The Commission found that reductions of the special access rates proposed by certain carriers are required to correct problems with the carriers' cost projections, as well as their cost and demand methodologies. The Commission also ordered the carriers not to impose a general charge on customers for wiring inside customer premises in cases where this wiring is not actually provided. This will further reduce rates for some customers. Pursuant to the Commission's action, eleven Bell Operating Companies are expected to reduce their special access rates by various percentages, ranging from 1 to 29 percent, before the tariffs become effective. The benefits of these reductions will flow through to libraries, commenters in this proceeding.

ATTCOM has also been granted permission to file revisions to its private line tariffs incorporating changes that reflect the special access decision as well as other reductions. On March 4, 1985, the Tariff Division of the Common Carrier Bureau issued a letter granting permission to file revisions and postponing the effective date of ATTCOM's tariff to April 6, 1985. These revisions were filed on March 6. Here again, the Commission anticipates that the effect of the revisions will be to lessen the rate impact on certain users of ATTCOM's private line services, including libraries.

With reference to the comment period afforded verious library associations on ATTCOM's tariff proposals, ATTCOM filed its initial version of these tariffs in October 1983. After review of the library association comments as well as others, the ATTCOM tariff was found to be unlawful on June 27, 1984. On September 26, 1984, and again on January 18, 1985, ATTCOM submitted new proposals. The Commission issued public notices and accepted comments on both the September and January filings. Library associations participated in these proceedings and again will have an opportunity to comment as a result of ATTCOM's March 6, 1985 filing. Interested parties will have until March 15 to submit comments.

Any decision regarding whether to suspend and investigate proposed tariffs requires a careful balancing of competing factors. In the present case, due to the impending effective date of the special access tariffs, it is especially crucial that the outdated private line tariffs now in effect be replaced with tariffs that allow ATTCOM to recover its revenue requirement in a just and reasonable manner. Phasing in the new private line rates for a particular class of customers, without a requirement that rates of other customers be raised to cover the shortfall, would raise serious legal questions because ATTCOM would not recover its revenue requirements for private line services.

Indeed, under the present interim arrangements, ATTCOM recovers only a fraction of the cost of circuit segments it must obtain from the exchange carriers. Many other historical disparities of rate treatment apply to similarly situated customers. These will be reduced or eliminated by reformation of ATTCOM's tariffs to (i) reflect post-divestiture circumstances, including the necessity to purchase private lines' local exchange segment from other companies, and (ii) remove constraints on customers seeking to compare and flexibly combine service functions. To treat libraries or any other group of customers as a "special case" works at the expense of other customers and raises serious questions of discrimination under Section 202 of the Communications Act.

Our review of ATTCOM's private line tariffs is continuing, and we expect Commission action shortly. We shall continue to work to lower overall rates where possible, as we have done in the special access area. Your views, along with the numerous letters and pleadings filed on behalf of the nation's libraries, are being given every consideration as the Commission resolves the issues presented by ATTCOM's filing. I have asked my staff to place a copy of your letter in the record of this proceeding. Thank you for your interest. I trust that this letter has been responsive to your concerns.

Sincerely,

MARK S. FOWLER,
Chairman.●

PROCEDURAL RULES OF THE SELECT COMMITTEE ON ETHICS

● Mr. RUDMAN. Mr. President, in accordance with the requirement to publish the rules of each Senate committee in the RECORD each year, I submit the procedural rules of the select committee and ask that they be printed in the RECORD.

The procedural rules follow:

RULES OF THE SELECT COMMITTEE ON ETHICS

(Adopted February 23, 1978)

PART I—ORGANIC AUTHORITY

Subpart A—S. Res. 338 as amended

Resolved, That (a) there is hereby established a permanent select committee of the Senate to be known as the Select Committee on Ethics [1] (referred to hereinafter as the "Select Committee") consisting of six Members of the Senate, of whom three shall be selected from members of the majority party and three shall be selected from members of the minority party. Members thereof shall be appointed by the Senate in accordance with the provisions of Paragraph 1 of Rule XXIV of the standing rules of the Senate at the beginning of each Congress.[1] For purposes of paragraph 4 of rule XXV of the Standing Rules of the Senate, service of a Senator as a member or chairman of the Select Committee shall not be taken into account.

(b) Vacancies in the membership of the Select Committee shall not affect the authority of the remaining members to execute the functions of the committee, and shall be filled in the same manner as original appointments thereto are made.

(c)(1) A majority of the Members of the Select Committee shall constitute a quorum for the transaction of business involving complaints and allegations of misconduct, including the consideration of matters involving sworn complaints, unsworn allegations or information, resultant preliminary inquiries, initial reviews, investigations, hearings, recommendations or reports and matters relating to Senate Resolution 400, agreed to May 19, 1976.

(2) Three Members shall constitute a quorum for the transaction of routine business of the Select Committee not covered by the first paragraph of this subparagraph, including requests for opinions and interpretations concerning the Code of Official Conduct or any other statute or regulation

---

[1] Changed by Section 102 of S. Res. 4 (February 4, 1977).

under the jurisdiction of the Select Committee, if one Member of the quorum is a Member of the Majority Party and one Member of the quorum is a Member of the Minority Party. During the transaction of routine business any Member of the Select Committee constituting the quorum shall have the right to postpone further discussion of a pending matter until such time as a majority of the Members of the Select Committee are present.

(3) The Select Committee may fix a lesser number as a quorum for the purpose of taking sworn testimony.[2]

"(d)(1)[3] A member of the Select Committee shall be ineligible to participate in any initial review or investigation relating to his own conduct, the conduct of any officer or employee he supervises, or the conduct of any employee of any officer he supervises, or relating to any complaint filed by him, and the determinations and recommendations of the Select Committee with respect thereto. For purposes of this subparagraph, a Member of the Select Committee and an officer of the Senate shall be deemed to supervise any officer or employee consistent with the provision of paragraph 12 of rule XXXVII of the Standing Rules of the Senate.

"(2) A Member of the Select Committee may, at his discretion, disqualify himself from participating in any initial review or investigation pending before the Select Committee and the determinations and recommendations of the Select Committee with respect thereto. Notice of such disqualification shall be given in writing to the President of the Senate.

"(3) Whenever any member of the Select Committee is ineligible under paragraph (1) to participate in any initial review or investigation or disqualfies himself under paragraph (2) from participating in any initial review or investigation, another Member of the Senate shall, subject to the provisions of subsection (d), be appointed to serve as a member of the Select Committee solely for purposes of such initial review or investigation and the determinations and recommendations of the Select Committee with respect thereto. Any Member of the Senate appointed for such purposes shall be of the same party as the Member who is ineligible or disqualifies himself."

SEC. 2. (a) It shall be the duty of the Select Committee to—

(1) receive complaints and investigate allegations of improper conduct which may reflect upon the Senate, violations of law, violations of the Senate Code of Official Conduct[4] and violations of rules and regulations of the Senate, relating to the conduct of individuals in the performance of their duties as Member of the Senate, or as officers or employees of the Senate, and to make appropriate findings of fact and conclusions with respect thereto;

(2) recommend to the Senate by report or resolution by a majority vote of the full committee disciplinary action (including, but not limited to, in the case of a Member: censure, expulsion, or recommendation to the appropriate party conference regarding such Member's seniority or positions of responsibility; and, in the case of an officer or employee: suspension or dismissal)"[5] to be taken with respect to such violations which the Select Committee shall determine, after according to the individuals concerned due notice and opportunity for hearing, to have occurred;

(3) recommend to the Senate, by report or resolution, such additional rules or regulations as the Select Committee shall determine to be necessary or desirable to insure proper standards of conduct by Members of the Senate, and by officers or employees of the Senate, in the performance of their duties and the discharge of their responsibilities; and

(4) report violations by a majority vote of the full committee of any law to the proper Federal and State authorities.

"(b)(1) Each sworn complaint filed with the Select Committee shall be in writing, shall be in such form as the Select Committee may prescribe by regulation, and shall be under oath.

"(2) For purposes of this section, 'sworn complaint' means a statement of facts within the personal knowledge of the complainant alleging a violation of law, the Senate Code of Official Conduct, or any other rule or regulation of the Senate relating to the conduct of individuals in the performance of their duties as Members, officers, or employees of the Senate.

"(3) Any person who knowingly and willfully swears falsely to a sworn complaint does so under penalty of perjury, and the Select Committee may refer any such case to the Attorney General for prosecution.

"(4) For the purposes of this section, 'investigation' is a proceeding undertaken by the Select Committee after a finding, on the basis of an initial review, that there is substantial credible evidence which provides substantial cause for the Select Committee to conclude that a violation within the jurisdiction of the Select Committee has occurred.

"(c)(1) No investigation of conduct of a Member or officer of the Senate, and no report, resolution, or recommendation relating thereto, may be made unless approved by the affirmative recorded vote of not less than four members of the Select Committee.

"(2) No other resolution, report, recommendation, interpretative ruling, or advisory opinion may be made without an affirmative vote of a majority of the members of the Select Committee voting.

"(d)(1) When the Select Committee receives a sworn complaint against a Member or officer of the Senate, it shall promptly conduct an initial review of that complaint. The initial review shall be of duration and scope necessary to determine whether there is substantial credible evidence which provides substantial cause for the Select Committee to conclude that a violation within the jurisdiction of the Select Committee has occurred.

"(2) If as a result of an initial review under paragraph (1), the Select Committee determines by a recorded vote that there is not such substantial credible evidence, the Select Committee shall report such determination to the complainant and to the party charged together with an explanation of the basis of such determination.

"(3) If as a result of an initial review under paragraph (1), the Select Committee determines that a violation is inadvertent, technical or otherwise of a *de minimus* nature, the Select Committee may attempt to correct or prevent such a violation by informal methods.

"(4) If as a result of an initial review under paragraph (1), the Select Committee determines that there is such substantial credible evidence but that the violation, if proven is neither of a *de minimus* nature nor sufficiently serious to justify any of the penalties expressly referred to in subsection (a)(2), the Select Committee may propose a remedy it deems appropriate. If the matter is thereby resolved, a summary of the Select Committee's conclusions and the remedy proposed shall be filed as a public record with the Secretary of the Senate and a notice of such filing shall be printed in the Congressional Record.

"(5) If as the result of an initial review under paragraph (1), the Select Committee determines that there is such substantial credible evidence, the Select Committee shall promptly conduct an investigation if (A) the violation, if proven, would be sufficiently serious, in the judgment of the Select Committee, to warrant imposition of one or more of the penalties expressly referred to in subsection (a)(2), or (B) the violation, if proven, is less serious, but was not resolved pursuant to paragraph (4) above. Upon the conclusion of such investigation, the Select Committee shall report to the Senate, as soon as practicable, the results of such investigation together with its recommendations (if any) pursuant to subsection (a)(2).

"(6) Upon the conclusion of any other investigation respecting the conduct of a Member or officer undertaken by the Select Committee, the Select Committee shall report to the Senate, as soon as practicable, the results of such investigation together with its recommendations (if any) pursuant to subsection (a)(2).

"(e) When the Select Committee receives a sworn complaint against an employee of the Senate, it shall consider the complaint according to procedures it deems appropriate. If the Select Committee determines that the complaint is without substantial merit, it shall notify the complainant and the accused of its determination, together with an explanation of the basis of such determination.

"(f) The Select Committee may, in its discretion, employ hearing examiners to hear testimony and make findings of fact and/or recommendations to the Select Committee concerning the disposition of complaints.

"(g) Notwithstanding any other provision of this section, no initial review or investigation shall be made of any alleged violation of any law, the Senate Code of Official Conduct, rule, or regulation which was not in effect at the time the alleged violation occurred. No provisions of the Senate Code of Official Conduct shall apply to or require disclosure of any act, relationship, or transaction which occurred prior to the effective date of the applicable provision of the Code. The Select Committee may conduct an initial review or investigation of any alleged violation of a rule or law which was in effect prior to the enactment of the Senate Code of Official Conduct if the alleged violation occurred while such rule or law was in effect and the violation was not a matter resolved on the merits by the predecessor Select Committee.

"(h) The Select Committee shall adopt written rules setting forth procedures to be used in conducting investigations of complaints."[6]

---

[2] Changed by S. Res. 78 (February 24, 1981).

[3] Added by S. Res. 110 (April 2, 1977).

[4] Added by Section 201 of S. Res. 110 (April 2, 1977).

[5] Added by Section 205 of S. Res. 110 (April 2, 1977).

[6] Added by Section 202 of S. Res. 110 (April 2, 1977).

(i)[7] The Select Committee from time to time shall transmit to the Senate its recommendation as to any legislative measures which it may consider to be necessary for the effective discharge of its duties.

SEC. 3. (a) The Select Committee is authorized to (1) make such expenditures; (2) hold such hearings; (3) sit and act at such times and places during the sessions, recesses, and adjournment periods of the Senate; (4) require by subpoena or otherwise the attendance of such witnesses and the production of such correspondence, books, papers, and documents; (5) administer such oaths; (6) take such testimony orally or by deposition; (7) employ and fix the compensation of *a staff director, a counsel, an assistant counsel, one or more investigators, one or more hearing examiners,*[8] and such technical, clerical, and other assistants and consultants as it deems advisable; and (8) to procure the temporary services (not in excess of one year) or intermittent services of individual consultants, or organizations thereof, by contract as independent contractors or, in the case of individuals, by employment at daily rates of compensation not in excess of the per diem equivalent of the highest rate of compensation which may be paid to a regular employee of the Select Committee.[9]

(b)(1)[10] The Select Committee is authorized to retain and compensate counsel not employed by the Senate (or by any department or agency of the executive branch of the Government) whenever the Select Committee determines that the retention of outside counsel is necessary or appropriate for any action regarding any complaint or allegation, which, in the determination of the Select Committee is more appropriately conducted by counsel not employed by the Government of the United States as a regular employee.

"(2) Any investigation conducted under section 2 shall be conducted by outside counsel as authorized in paragraph (1), unless the Select Committee determines not to use outside counsel."; and

"(c)[11] With the prior consent of the department or agency concerned, the Select Committee may (1) utilize the services, information and facilities of any such department or agency of the Government," and (2) employ on a reimbursable basis or otherwise the services of such personnel of any such department or agency as it deems advisable.

With the consent of any other committee of the Senate, or any subcommittee thereof, the Select Committee may utilize the facilities and the services of the staff of such other committee or subcommitte whenever the chairman of the Select Committee determines that such action is necessary and appropriate.

"(d) Subpoenas may be issued (1) by the Select Committee or (2) by the chairman and vice chairman, acting jointly. Any such subpoena shall be signed by the chairman or the vice chairman and may be served by any person designated by such chairman or vice chairman. The chairman of the Select Committee or any member thereof may administer oaths to witnesses."[12]

"(e)(1)[13] The Select Committee shall prescribe and publish such regulations as it feels are necessary to implement the Senate Code of Official Conduct.

"(2) The Select Committee is authorized to issue interpretative rulings explaining and clarifying the application of any law, the Code of Official Conduct, or any rule or regulations of the Senate within its jurisdiction.

"(3) The Select Committee shall render an advisory opinion, in writing within a reasonable time, in response to a written request by a Member or officer of the Senate or a candidate for nomination for election, or election to the Senate, concerning the application of any law, the Senate Code of Official Conduct, or any rule or regulation of the Senate within its jurisdiction to a specific factual situation pertinent to the conduct or proposed conduct of the person seeking the advisory opinion.

"(4) The Select Committee may in its discretion render an advisory opinion in writing within a reasonable time in response to a written request by any employee of the Senate concerning the application of any law, the Senate Code of Official Conduct, or any rule or regulation of the Senate within its jurisdiction to a specific factual situation pertinent to the conduct or proposed conduct of the person seeking the advisory opinion.

"(5) Notwithstanding any provision of the Senate Code of Official Conduct or any rule or regulation of the Senate, any person who relies upon any provision or finding of an advisory opinion in accordance with the provisions of paragraphs (3) and (4) and who acts in good faith in accordance with the provisions and findings of such advisory opinion shall not, as a result of any such act, be subject to any sanction by the Senate.

"(6) Any advisory opinion rendered by the Select Committee under paragraphs (3) and (4) may be relied upon by (A) any person involved in the specific transaction or activity with respect to which such advisory opinion is rendered: *Provided, however,* That the request for such advisory opinion included a complete and accurate statement of the specific factual situation; and, (B) any person involved in any specific transaction or activity which is indistinguishable in all its material aspects from the transaction or activity with respect to which such advisory opinion is rendered.

"(7) Any advisory opinion issued in response to a request under paragraph (3) or (4) shall be printed in the Congressional Record with appropriate deletions to assure the privacy of the individual concerned. The Select Committee shall, to the extent practicable, before rendering an advisory opinion, provide any interested party with an opportunity to transmit written comments to the Select Committee with respect to the request for such advisory opinion. The advisory opinions issued by the Select Committee shall be compiled, indexed, reproduced, and made available on a periodic basis.

"(8) A brief description of a waiver granted under paragraph 2(c) of rule XXXIV or paragraph 1 of rule XXXV of the Standing Rules of the Senate shall be made available upon request in the Select Committee office with appropriate deletions to assure the privacy of the individual concerned."

SEC. 4. The expenses of the Select Committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the Select Committee.

SEC. 5. As used in this resolution, the term "officer or employee of the Senate" means—

(1) an elected officer of the Senate who is not a Member of the Senate;

(2) an employee of the Senate, any committee or subcommittee of the Senate, or any Member of the Senate;

(3) the Legislative Counsel of the Senate or any employee of his office;

(4) an Official Reporter of Debates of the Senate and any person employed by the Official Reporters of Debates of the Senate in connection with the performance of their official duties;

(5) a member of the Capitol Police force whose compensation is disbursed by the Secretary of the Senate;

(6) and employee of the Vice President if such employee's compensation is disbursed by the Secretary of the Senate; and

(7) an employee of a joint committee of the Congress whose compensation is disbursed by the Secretary of the Senate.

Subpart B—Public Law 93-191—Franked Mail, Provisions Relating to the Select Committee

SEC. 6. (a) The Select Committee on Standards and Conduct of the Senate shall provide guidance, assistance, advice and counsel, through advisory opinions or consultations, in connection with the mailing or contemplated mailing of franked mail under section 3210, 3211, 3212, 3218(2) or 3218, and in connection with the operation of section 3215, of title 39, United States Code, upon the request of any Member of the Senate or Member-elect, surviving spouse of any of the foregoing, or other Senate official, entitled to send mail as franked mail under any of those sections. The select committee shall prescribe regulations governing the proper use of the franking privilege under those sections by such persons.

(b) Any complaint filed by any person with the select committee that a violation of any section of title 39, United States Code, referred to in subsection (a) of this section is about to occur or has occurred within the immediately preceding period of 1 year, by any person referred to in such subsection (a), shall contain pertinent factual material and shall conform to regulations prescribed by the select committee. The select committee, if it determines there is reasonable justification for the complaint, shall conduct an investigation of the matter, including an investigation of reports and statements filed by that complainant with respect to the matter which is the subject of the complaint. The committee shall afford to the person who is the subject of the complaint due notice and, if it determines that there is substantial reason to believe that such violation has occurred or is about to occur, opportunity for all parties to participate in a hearing before the select committee. The select committee shall issue a written decision on each complaint under this subsection not later than thirty days after such a complaint has been filed or, if a hearing is held, not later than thirty days after the conclusion of such hearing. Such decision shall be based on written findings of fact in the case by the select committee. If the select committee finds, in its written decision, that a violation has occurred or is

[7] Changed by Section 202 of S. Res. 110 (April 2, 1977).
[8] Added by Section 204 of S. Res. 110 (April 2, 1977).
[9] Added by S. Res. 230 (July 25, 1977).
[10] Added by Section 204 of S. Res. 110 (April 2, 1977).
[11] Changed by Section 204 of S. Res. 110 (April 2, 1977).
[12] Section added by S. Res. 312 (Nov. 1, 1977).
[13] Section added by Section 206 of S. Res. 110 (April 2, 1977).

about to occur, the committee may take such action and enforcement as it considers appropriate in accordance with applicable rules, precedents, and standing orders of the Senate, and such other standards as may be prescribed by such committee.

(c) Notwithstanding any other provision of law, no court or administrative body in the United States or in any territory thereof shall have jurisdiction to entertain any civil action of any character concerning or related to a violation of the franking laws or an abuse of the franking privilege by any person listed under subsection (a) of this section as entitled to send mail as franked mail, until a complaint has rendered a decision under subsection (b) of this section.

(d) The select committee shall prescribe regulations for the holding of investigations and hearings, the conduct of proceedings, and the rendering of decisions under this subsection providing for equitable procedures and the protection of individual, public, and Government interests. The regulations shall, insofar as practicable, contain the substance of the administrative procedure provisions of sections 551-559 and 701-706, of title 5 United States Code. These regulations shall govern matters under this subsection subject to judicial review thereof.

(e) The select committee shall keep a complete record of all its actions, including a record of the votes on any question on which a record vote is demanded. All records, data and files of the select committee shall be the property of the Senate and shall be kept in the offices of the select committee or such other places as the committee may direct.

Subpart C—Standing Orders of the Senate Regarding Unauthorized Disclosure of Intelligence Information, S. Res. 400, 94th Congress, Provisions Relating to the Select Committee

SEC. 8. * * *

(c)(1) No information in the possession of the select committee relating to the lawful intelligence activities of any department or agency of the United States which has been classified under established security procedures and which the select committee, pursuant to subsection (a) or (b) of this section, has determined should not be disclosed, shall be made available to any person by a Member, officer, or employee of the Senate except in a closed session of the Senate or as provided in paragraph (2).

(2) The select committee may, under such regulations as the committee shall prescribe to protect the confidentiality of such information, make any information described in paragraph (1) available to any other committee or any other Member of the Senate. Whenever the select committee makes such information available, the committee shall keep a written record showing, in the case of any particular information, which committee or which Members of the Senate received such information. No Member of the Senate who, and no committee which, receives any information under this subsection, shall disclose such information except in a closed session of the Senate.

(d) It shall be the duty of the Select Committee on Standards and Conduct to investigate any unauthorized disclosure of intelligence information by a Member, officer or employee of the Senate in violation of subsection (c) and to report to the Senate concerning any allegation which it finds to be substantiated.

(e) Upon the request of any person who is subject to any such investigation, the Select Committee on Standards and Conduct shall release to such individual at the conclusion of its investigation a summary of its investigation together with its findings. If, at the conclusion of its investigation, the Select Committee on Standards and Conduct determines that there has been a significant breach of confidentiality or unauthorized disclosure by a Member, officer, or employee of the Senate, it shall report its findings to the Senate and recommend appropriate action such as censure, removal from committee membership, or expulsion from the Senate, in the case of a Member, or removal from office or employment or punishment for contempt, in the case of an officer or employee.

Subpart D—Public Law 95-105, Section 515, Relating to Receipt and Disposition of Foreign Gifts snd Decorations Received by Members, Officers and Employees of the Senate or Their Spouses or Dependents, Provisions Relating to the Select Committee on Ethics

SEC. 515. (a)(1) Section 7342 of title 5, United States Code, is amended to read as follows:

§ 7342. Receipt and disposition of foreign gifts and decorations.

"(a) For the purposes of this section—

* * * * *

"(6) 'employing agency' means—

"(A) the Committee on Standards of Official Conduct of the House of Representatives, for Members and employees of the House of Representatives, except that those responsibilities specified in subsections (c)(2)(A), (e), and (g)(2)(B) shall be carried out by the Clerk of the House;

"(B) the Select Committee on Ethics of the Senate, for Senators and employees of the Senate;

"(C) the Administrative Office of the United States Courts, for judges and judicial branch employees; and

"(D) the department, agency office, or other entity in which an employee is employed, for other legislative branch employees and for all executive branch employees.

"(b) An employee may not—

"(1) request or otherwise encourage the tender of a gift or decoration; or

"(2) accept a gift or decoration, other than in accordance with the provisions of subsections (c) and (d).

"(c)(1) The Congress consents to—

"(A) the accepting and retaining by an employee of a gift of minimal value tendered and received as a souvenir or mark of courtesy; and

"(B) the accepting by an employee of a gift of more than minimal value when such gift is in the nature of an educational scholarship or medical treatment or when it appears that to refuse the gift would likely cause offense or embarrassment or otherwise adversely affect the foreign relations of the United States, except that—

"(i) a tangible gift of more than minimal value is deemed to have been accepted on behalf of the United States and, upon acceptance, shall become the property of the United States; and

"(ii) an employee may accept gifts of travel or expenses for travel taking place entirely outside the United States (such as transportation, food, and lodging) of more than minimal value if such acceptance is appropriate, consistent with the interests of the United States, and permitted by the employing agency and any regulations which may be prescribed by the employing agency.

"(2) Within 60 days after accepting a tangible gift of more than minimal value (other than a gift described in paragraph (1)(B)(ii), an employee shall—

"(A) deposit the gift for disposal with his or her employing agency; or

"(B) subject to the approval of the employing agency, deposit the gift with that agency for official use. Within 30 days after terminating the official use of a gift under subparagraph (B), the employing agency shall forward the gift to the Administrator of General Services in accordance with subsection (e).

"(3) When an employee deposits a gift of more than minimal value for disposal or for official use pursuant to paragraph (2), or within 30 days after accepting travel or travel expenses as provided in paragraph (1)(B)(ii) unless such travel or travel expenses are accepted in accordance with specific instructions of his or her employing agency, the employee shall file a statement with his or her employing agency or its delegate containing the information prescribed in subsection (f) for that gift.

"(d) The Congress consents to the accepting, retaining, and wearing by an employee of a decoration tendered in recognition of active field service in time of combat operations or awarded for other outstanding or unusually meritorious performance, subject to the approval of the employing agency of such employee. Without this approval, the decoration is deemed to have been accepted on behalf of the United States, shall become the property of the United States, and shall be deposited by the employee, within sixty days of acceptance, with the employing agency for official use or forwarding to the Administrator of General Services for disposal in accordance with subsection (e).

"(e) Gifts and decorations that have been deposited with an employing agency for disposal shall be (1) returned to the donor, or (2) forwarded to the Administrator of General Services for transfer, donation, or other disposal in accordance with the provisions of the Federal Property and Administrative Services Act of 1949. However, no gift or decoration that has been deposited for disposal may be sold without the approval of the Secretary of State, upon a determination that the sale will not adversely affect the foreign relations of the United States. Gifts and decorations may be sold by negotiated sale.

"(f)(1) Not later than January 31 of each year, each employing agency or its delegate shall compile a listing of all statements filed during the preceding year by the employees of that agency pursuant to subsection (c)(3) and shall transmit such listing to the Secretary of State who shall publish a comprehensive listing of all such statements in the Federal Register.

"(2) Such listings shall include for each tangible gift reported—

"(A) the name and position of the employee;

"(B) a brief description of the gift and the circumstances justifying acceptance;

"(C) the identity, if known, of the foreign government and the name and position of the individual who presented the gift;

"(D) the date of acceptance of the gift;

"(E) the estimated value in the United States of the gift at the time of acceptance; and

"(F) disposition or current location of the gift.

"(3) Such listings shall include for each gift of travel or travel expenses—

"(A) the name and position of the employee;

"(B) a brief description of the gift and the circumstances justifying acceptance; and

"(C) the identity, if known, of the foreign government and the name and position of the individual who presented the gift.

"(4) In transmitting such listing for the Central Intelligence Agency, the Director of Central Intelligence may delete the information described in subparagraphs (A) and (C) of paragraphs (2) and (3) if the Director certifies in writing to the Secretary of State that the publication of such information could adversely affect United States intelligence sources.

"(g)(1) Each employing agency shall prescribe such regulations as may be necessary to carry out the purpose of this section. For all employing agencies in the executive branch, such regulations shall be prescribed pursuant to guidance provided by the Secretary of State. These regulations shall be implemented by each employing agency for its employees.

"(2) Each employing agency shall—

"(A) report to the Attorney General cases in which there is reason to believe that an employee has violated this section;

"(B) establish a procedure for obtaining an appraisal, when necessary, of the value of gifts; and

"(C) take any other actions necessary to carry out the purpose of this section.

"(h) The Attorney General may bring a civil action in any district court of the United States against any employee who knowingly solicits or accepts a gift from a foreign government not consented to by this section or who fails to deposit or report such gift as required by this section. The court in which such action is brought may assess a penalty against such employee in any amount not to exceed the retail value of the gift improperly solicited or received plus $5,000.

"(i) The President shall direct all Chiefs of a United States Diplomatic Mission to inform their host governments that it is a general policy of the United States Government to prohibit United States Government employees from receiving gifts or decorations of more than minimal value.

"(j) Nothing in this section shall be construed to derogate any regulation prescribed by any employing agency which provides for more stringent limitations on the receipt of gifts and decorations by its employees.

"(k) The provisions of this section do not apply to grants and other forms of assistance to which section 108A of the Mutual Educational and Cultural Exchange Act of 1961 applies."

(2) The amendment made by paragraph (1) of this subsection shall take effect on January 1, 1978.

RULE 1. GENERAL PROCEDURES

(a) Officers: The Committee shall select a Chairman and a Vice Chairman from among its members. In the absence of the Chairman, the duties of the Chair shall be filled by the Vice Chairman or, in the Vice Chairman's absence, a Committee member designated by the Chairman.

(b) Procedural Rules: The basic procedural rules of the Committee are stated as a part of the Standing Orders of the Senate in Senate Resolution 338, 88th Congress, as amended, as well as other resolutions and laws. Supplementary Procedural Rules are stated herein and are hereinafter referred to as the Rules. The Rules shall be published in the Congressional Record not later than thirty days after adoption, and copies shall be made available by the Committee office upon request.

(c) Meetings:

(1) The regular meeting of the Committee shall be the first Thursday of each month while the Congress is in session.

(2) Special meetings may be held at the call of the Chairman or Vice Chairman if at least forty-eight hours notice is furnished to all members. If all members agree, a special meeting may be held on less than forty-eight hours notice.

(3)(A) If any members of the Committee desires that a special meeting of the Committee be called, the member may file in the office of the Committee a written request to the Chairman or Vice Chairman for that special meeting.

(B) Immediately upon the filing of the request the Clerk of the Committee shall notify the Chairman and Vice Chairman of the filing of the request. If, within three calendar days after the filing of the request, the Chairman or the Vice Chairman does not call the requested special meeting, to be held within seven calendar days after the filing of the request, any three of the members of the Committee may file their written notice in the office of the Committee that a special meeting of the Committee will be held at a specified date and hour; such special meeting may not occur until forty-eight hours after the meeting may not occur until forty-eight hours after the notice is filed. The Clerk shall immediately notify all members of the Committee of the date and hour of the special meeting. The Committee shall meet at the specified date and hour.

(d) Quorum:

(1) A majority of the members of the Select Committee shall constitute a quorum for the transaction of business involving complaints and allegations of misconduct, including the consideration of matters involving sworn complaints, unsworn allegations or information, resultant preliminary inquires, initial reviews, investigations, hearings, recommendations or reports and matters relating to Senate Resolution 400, agreed to May 19, 1976.

(2) Three members shall constitute a quorum for the transaction of the routine business of the Select Committee not covered by the first subparagraph of this paragraph, including requests for opinions and interpretations concerning the Code of Official Conduct or any other statute or regulation under the jurisdiction of the Select Committee, if one member of the quorum is a Member of the Majority Party and one member of the quorum is a Member of the Minority Party. During the transaction of routine business any member of the Select Committee, constituting the quorum shall have the right to postpone further discussion of a pending matter until such time as a majority of the members of the Select Committee are present.

(3) The Select Committee may fix a lesser number as a quorum for the purpose of taking sworn testimony.

(e) Order of Business: Questions as to the order of business and the procedure of the Committee shall in the first instance be decided by the Chairman and Vice Chairman, subject to reversal by a vote by a majority of the Committee.

(f) Hearings Announcements: The Committee shall make public announcement of the date, place and subject matter of any hearing to be conducted by it at least one week before the commencement of that hearing, and shall publish such announcement in the Congressional Record. If the Committee determines that there is good cause to commence a hearing at an earlier date, such notice will be given at the earliest possible time.

(g) Open and Closed Committee Meetings: Meetings of the Committee shall be open to the public or closed to the public (executive session), as determined under the provisions of paragraphs 5(b) to (d) of Rule XXVI of the Standing Rules of the Senate. Executive session meetings of the Committee shall be closed except to the members and the staff of the Committee. On the motion of any member, and with the approval of a majority of the Committee members present, other individuals may be admitted to an executive session meeting for a specified period or purpose.

(h) Record of Testimony and Committee Action: An accurate stenographic or transcribed electronic record shall be kept of all Committee proceedings, whether in executive or public session. Such record shall include Senators' votes on any question on which a recorded vote is held. The record of a witness' testimony, whether in public or executive session, shall be made available for inspection to the witness or his counsel under Committee supervision; a copy of any testimony given by that witness in public session, or that part of the testimony given by the witness in executive session and subsequently quoted or made part of the record in a public session, shall be made available to any witness if he so requests. (See Rule 6 on Procedures for Conducting Hearings.)

(i) Secrecy of Executive Testimony and Action and of Complaint Proceedings:

(1) All testimony and action taken in executive session shall be kept secret and shall not be released outside the Committee to any individual or group, whether governmental or private, without the approval of a majority of the Committee.

(2) All testimony and action relating to a sworn complaint shall be kept secret and shall not be released by the Committee to any individual or group, whether governmental or private, except the respondent, without the approval of a majority of the Committee, until such time as a report to the Senate is required under Senate Resolution 338, 88th Congress, as amended, or unless otherwise permitted under these Rules. (See Rule 9 on Procedures for Handling Committee Sensitive and Classified Materials.)

(j) Release of Reports to Public: No information pertaining to, or copies of any Committee report, study, or other document which purports to express the view, findings, conclusions or recommendations of the Committee in connection with any of its activities or proceedings may be released to any individual or group whether governmental or private, without the authorization of the Committee. Whenever the Chairman or Vice Chairman is authorized to make any determination, then the determination may be released at his or her discretion. Each member of the Committee shall be given a reasonable opportunity to have separate views included as part of any Committee report. (See Rule 9 on Procedures for Handling Committee Sensitive and Classified Materials.)

(k) Ineligibility or Disqualification of Members and Staff:

(1) A member of the Committee shall be ineligible to participate in any Committee proceeding that relates specifically to any of the following:

(A) The member's own conduct;

(B) The conduct of any employee or officer that the member supervises, as defined

in paragraph 11 of Rule XXXVII of the Standing Rules of the Senate;

(C) The conduct of any employee or any officer that the member supervises; or

(D) A complaint, sworn or unsworn, that was filed by a member, or by any employee or officer that the member supervises.

(2) If any Committee proceeding appears to relate to a member of the Committee in a manner described in subparagraph (1) of this paragraph, the staff shall prepare a report to the Chairman and Vice Chairman. If either the Chairman or the Vice Chairman concludes from the report that it appears that the member may be ineligible, the member shall be notified in writing of the nature of the particular proceeding and the reason that it appears that the member may be ineligible to participate in it. If the member agrees that he or she is ineligible, the member shall so notify the Chairman or Vice Chairman. If the member believes that he or she is not ineligible, he or she may explain the reasons to the Chairman and Vice Chairman, and if they both agree that the member is not ineligible, the member shall continue to serve. But if either the Chairman or Vice Chairman continues to believe that the member is ineligible, while the member believes that he or she is not ineligible, the matter shall be promptly referred to the Committee. The member shall present his or her arguments to the Committee in executive session. Any contested questions concerning a member's eligibility shall be decided by a majority vote of the Committee, meeting in executive session, with the member in question not participating.

(3) A member may also disqualify himself from participating in a Committee proceeding in other circumstances not listed in subparagraph (k)(1).

(4) The President of the Senate shall be given written notice of the ineligiblity or disqualification of any member from any initial review, investigation or other proceeding requiring the appointment of another member in accordance with subparagraph (k)(5).

(5) Whenever a member of the Committee is ineligible to participate in or disqualifies himself from participating in any initial review, investigation, or other substantial Committee proceeding, another Member of the Senate who is of the same party shall be appointed by the Senate in accordance with the provisions of paragraph 1 of Rule XXIV of the Standing Rules of the Senate of the Senate, to serve as member of the Committee solely for the purposes of that proceeding.

(6) A member of the Committee staff shall be ineligible to participate in any Committee proceeding that the staff director or outside counsel determines relates specifically to any of the following.

(A) the staff member's own conduct;

(B) The conduct of any employee that the staff member supervises;

(C) the conduct of any Member, officer or employee for whom the staff member has worked for any substantial period; or

(D) a compliant, sworn or unsworn, that was filed by the staff member. At the direction or with the consent of the staff director or outside counsel, a staff member may also be disqualified from participating in a Committee proceeding in other circumstances not listed above.

(l) Recorded Votes: Any member may require a recorded vote on any matter.

(m) Proxies; Recording Votes of Absent Members:

(1) Proxy voting shall not be allowed when the question before the Committee is the initiation or continuation of an initial review or an investigation, or the issuance of a report or recommendation related thereto concerning a Member or officer of the Senate. In any such case an absent member's vote may be announced solely for purpose of recording the member's position and such announced votes shall not be counted for or against the motion.

(2) On matters other than matters listed in paragraph (m)(1) above, the Committee may order that the record be held open for the vote of absentees or recorded proxy votes if the absent Committee member has been informed of the matter on which the vote occurs and has affirmatively requested of the Chairman or Vice Chairman in writing that he be so recorded.

(3) All proxies shall be in writing, and shall be delivered to the Chairman or Vice Chairman to be recorded.

(4) Proxies shall not be considered for the purpose of establishing a quorum.

(n) Approval of Blind Trusts and Foreign Travel Requests Between Sessions and During Extended Recesses:

During any period in which the Senate stands in adjournment between sessions of the Congress or stands in a recess scheduled to extend beyond fourteen days, the Chairman and Vice Chairman, or their designees, acting jointly, are authorized to approve or disapprove blind trusts under the provision of Rule XXXIV, and to approve or disapprove foreign travel requests which require immediate resolution.

(o) Committee Use of Services or Employees of Other Agencies and Departments:

With the prior consent of the department or agency involved, the Committee may (1) utilize the services, information, or facilities of any such department or agency of the Government, and (2) employ on a reimbursable basis or otherwise the services of such personnel of any such department or agency as it deems advisable. With the consent of any other committee of the Senate, or any subcommittee, the Committee may utilize the facilities and the services of the staff of such other committee or subcommittee whenever the Chairman and Vice Chairman of the Committee, acting jointly, determine that such action is necessary and appropriate.

RULE 2: PROCEDURES FOR SWORN COMPLAINTS

(a) Sworn Complaints: Any person may file a sworn complaint with the Committee, alleging that any Senator, or officer, or employee of the Senate has violated a law, the Senate Code of Official Conduct, or any rule or regulation of the Senate relating to the conduct of any individual in the performance of his or her duty as a Member, officer, or employee of the Senate, or has engaged in improper conduct which may reflect upon the Senate.

(b) Form and Content of Complaints: A complaint filed under paragraph (a) shall be in writing and under oath, and shall set forth in simple, concise and direct statements:

(1) The name and legal address of the party filing the complaint (hereinafter, the complainant);

(2) The name and position or title of each Member, officer, or employee of the Senate who is specifically alleged to have engaged in the improper conduct or committed the violation (hereinafter, the respondent);

(3) The nature of the alleged improper conduct or violation, including if possible, the specific provision of the Senate Code of Official Conduct or other law, rule, or regulation alleged to have been violated.

(4)(A) A statement of the facts within the personal knowledge of the complainant that are alleged to constitute the improper conduct or violation.

(B) The term "personal knowledge" is not intended to and does not limit the complainant's statement to situations that he or she personally witnessed or to activities in which the complainant was a participant.

(C) Where allegations in the sworn complaint are made upon the information and belief of the complainant, the complaint shall so state, and shall set forth the basis for such information and belief.

(5) The complainant must swear that all of the information contained in the complaint either (a) is true, or (b) was obtained under circumstances such that the complainant has sufficient personal knowledge of the source of the information reasonably to believe that it is true. The complainant may so swear either by oath or by solemn affirmation before a notary public or other authorized official.

(6) All documents in the possession of the complainant relevant to or in support of his or her allegations may be appended to the complaint.

(c) Processing of Sworn Complaints:

(1) When the Committee receives a sworn complaint against a Member, officer or employee of the Senate, it shall determine by majority vote whether the complaint is in substantial compliance with paragraph (b) of this rule.

(2) If it is determined by the Committee that a sworn complaint does not substantially comply with the requirements of paragraph (b), the complaint shall be returned promptly to the complainant, with a statement explaining how the complaint fails to comply and a copy of the rules for filing sworn complaints. The complainant may resubmit the complaint in the proper form. If the complaint is not revised so that it substantially complies with the stated requirements, the Committee may in its discretion process the complaint in accordance with Rule 3.

(3) A sworn complaint against any Member, officer, or employee of the Senate that is determined by the Committee to be in substantial compliance shall be transmitted to the respondent within five days of that determination. The transmittal notice shall include the date upon which the complaint was received, a statement that the complaint conforms to the applicable rules, a statement that the Committee will immediately begin an initial review of the complaint, and a statement inviting the respondent to provide any information relevant to the complaint to the Committee. A copy of the Rules of the Committee shall be supplied with the notice.

RULE 3: PROCEDURES ON RECEIPT OF ALLEGATIONS OTHER THAN A SWORN COMPLAINT; PRELIMINARY INQUIRY

(a) Unsworn Allegations or Information: Any member or staff member of the Committee shall report to the Committee, and any other person may report to the Committee, any credible information available to him or her that indicates that any named or unnamed Member, officer or employee of the Senate may have—

(1) violated the Senate Code of Official Conduct;

(2) violated a law;

(3) violated any rule or regulation of the Senate relating to the conduct of individuals

in the performance of their duties as Members, officers, or employees of the Senate; or

(4) engaged in improper conduct which may reflect upon the Senate. Such allegations or information may be reported to the Chairman, the Vice Chairman, a Committee member, or a Committee staff member.

(b) Sources of Unsworn Allegations or Information: The information to be reported to the Committee under paragraph (a), may be obtained from a variety of sources, including but not limited to the following:

(1) sworn complaints that do not satisfy all of the requirements of Rule 2;

(2) anonymous or informal complaints, whether or not satisfying the requirements of Rule 2;

(3) information developed during a study or inquiry by the Committee or other committees or subcommittees of the Senate, including information obtained in connection with legislative or general oversight hearings;

(4) information reported by the news media; or

(5) information obtained from any individual, agency or department of the executive branch of the Federal Government.

(c) Preliminary Inquiry:

(1) When information is presented to the Committee pursuant to paragraph (a), it shall immediately be transmitted to the Chairman and the Vice Chairman, for one of the following actions.

(A) The Chairman and Vice Chairman, acting jointly, may conduct or may direct the Committee staff to conduct, a preliminary inquiry.

(B) The Chairman and Vice Chairman, acting jointly, may present the allegations or information received directly to the Committee for it to determine whether an initial review should be undertaken. (See paragraph (d).)

(2) A preliminary inquiry may include any inquiries or interviews that the Chairman and the Vice Chairman deem necessary or appropriate. In particular, the preliminary inquiry may seek independent credible evidence that tends to corroborate the information received and may also include discussions or correspondence with the complainant, if any, and the respondent, if any.

(3) At the conclusion of a preliminary inquiry, the Chairman and Vice Chairman shall receive a full report of its findings. The Chairman and Vice Chairman, acting jointly, shall then determine what further action, if any, is appropriate in the particular case, including any of the following:

(A) No further action is appropriate, because the alleged improper conduct or violation is clearly not within the jurisdiction of the Committee;

(B) No further action is appropriate, because there is no reason to believe that the alleged improper conduct or violation may have occurred; or

(C) The unsworn allegations or information, and a report on the preliminary inquiry, should be referred to the Committee, to determine whether an initial review should be undertaken. (See paragraph (d).)

(4) If the Chairman and Vice Chairman are unable to agree on a determination at the conclusion of a preliminary inquiry, then they shall refer the allegations or information to the Committee, with a report on the preliminary inquiry, for the Committee to determine whether an initial review should be undertaken. (See paragraph (d).)

(5) A preliminary inquiry shall be completed within sixty days after the unsworn allegations or information were received by the Chairman and Vice Chairman. The sixty day period may be extended for a specified period by the Chairman and Vice Chairman, acting jointly. A preliminary inquiry is completed when the Chairman and the Vice Chairman have made the determination required by subparagraphs (3) and (4) of this paragraph.

(d) Determination Whether to Conduct an Initial Review: When information or allegations are presented to the Committee by the Chairman and the Vice Chairman, the Committee shall determine whether an initial review should be undertaken.

(1) An initial review shall be undertaken when—

(A) there is reason to believe on the basis of the information before the Committee that the possible improper conduct or violation may be within the jurisdiction of the Committee; and

(B) there is reason to believe on the basis of the information before the Committee that the improper conduct or violation may have occurred.

(2) The determination whether to undertake an initial review shall be made by recorded vote within thirty days following the Committee's receipt of the unsworn allegations or information from the Chairman or Vice Chairman, or at the first meeting of the Committee thereafter if none occurs within thirty days, unless this time is extended for a specified period by the Committee.

(3) The Committee may determine that an initial review is not warranted because (a) there is no reason to believe on the basis of the information before the Committee that the improper conduct or violation may have occurred, or (b) the improper conduct or violation, even if proven, is not within the jurisdiction of the Committee.

(A) If the Committee determines that an initial review is not warranted, it shall promptly notify the complainant, if any, and any known respondent.

(B) If there is a complainant, he or she may also be invited to submit additional information, and notified of the procedures for filing a sworn complaint. If the complainant later provides additional information, not in the form of a sworn complaint, it shall be handled as a new allegation in accordance with the procedures of Rule 3. If he or she submits a sworn complaint, it shall be handled in accordance with Rule 2.

(4)(A) The Committee may determine that there is reason to believe on the basis of the information before it that the improper conduct or violation may have occurred and may be within the jurisdiction of the Committee, and that an initial review must therefore be conducted.

(B) If the Committee determines that an initial review will be conducted, it shall promptly notify the complainant, if any, and the respondent, if any.

(C) The notice required under subparagraph (B) shall include a general statement of the information or allegations before the Committee, and a statement that the Committee will immediately begin an initial review of the complaint. A copy of the Rules of the Committee shall be supplied with the notice.

(5) If a member of the Committee believes that the preliminary inquiry has provided sufficient information for the Committee to determine whether there is substantial credible evidence which provides substantial cause for the Committee to conclude that a violation within the jurisdiction of the Committee has occurred, the member may move that the Committee dispense with the initial review and move directly to the determinations described in Rule 4(f). The Committee may adopt such a motion by majority vote of the full Committee.

RULE 4: PROCEDURES FOR CONDUCTING AN INITIAL REVIEW

(a) Basis for Initial Review: The Committee shall promptly commence an initial review whenever it has received either (1) a sworn complaint that the Committee has determined is in substantial compliance with the requirements of Rule 2, or (2) unsworn allegations or information that have caused the Committee to determine in accordance with Rule 3 that an initial review must be conducted.

(b) Scope of Initial Review:

(1) The initial review shall be of such duration and scope as may be necessary to determine whether there is substantial credible evidence which provides substantial cause for the Committee to conclude that a violation within the jurisdiction of the Committee has occurred.

(2) The initial review may include any inquiries or interviews that the Committee deems appropriate to obtain the evidence upon which to make the determination required by subparagraph (1), including the taking of sworn statements and the use of subpoenas.

(c) Opportunity for Response: An initial review may include an opportunity for any known respondent or his designated representative, to present either a written or oral statement, or to respond orally to questions from the Committee. Such an oral statement or answers shall be transcribed and signed by the person providing the statement or answers.

(d) Status Reports: The Committee staff or outside counsel shall periodically report to the Committee in the form and according to the schedule prescribed by the Committee. The reports shall be confidential.

(e) Final Report: When the initial review is completed, the staff or outside counsel shall make a confidential report to the Committee on findings and recommendations.

(f) Committee Action: As soon as practicable following submission of the report on the initial review, the Committee shall determine by a recorded vote whether there is substantial credible evidence which provides substantial cause for the Committee to conclude that a violation within the jurisdiction of the Committee has occurred. The Committee may make any of the following determinations:

(1) The Committee may determine that there is not such substantial credible evidence. In this case, the Committee shall report its determination to the complainant, if any, and to the respondent, together with an explanation of the basis for the determination. The explanation may be as detailed as the Committee desires, but it is not required to include a complete discussion of the evidence collected in the initial review.

(2) The Committee may determine that there is such substantial credible evidence, but that the alleged violation is inadvertent, technical, or otherwise of a de minimis nature. In this case, the Committee may attempt to correct or to prevent such violation by informal methods. The Committee's final determination in this matter shall be reported to the complainant, if any, and to the respondent, if any.

(3) The Committee may determine that there is such substantial credible evidence,

but that the alleged violation, if proven, although not of a de minimis nature, would not be sufficiently serious to justify the severe disciplinary actions specified in Senate Resolution 338, 88th Congress, as amended (i.e., for a Member, censure, expulsion, or recommendation to the appropriate party conference regarding the Member's seniority or positions of responsibility; or for an officer or employee, suspension or dismissal). In this case, the Committee, by the recorded affirmative vote of at least four members, may propose a remedy that it deems appropriate. If the respondent agrees to the proposed remedy, a summary of the Committee's conclusions and the remedy proposed and agreed to shall be filed as a public record with the Secretary of the Senate and a notice of the filing shall be printed in the Congressional Record.

(4) The Committee may determine, by recorded affirmative vote of at least four members, that there is such substantial credible evidence, and also either:

(A) that the violation, if proved, would be sufficiently serious to warrant imposition of one of the severe disciplinary actions listed in paragraph (3); or

(B) that the violation, if proven, is less serious, but was not resolved pursuant to the procedure in paragraph (3). In either case, the Committee shall order that an investigation promptly be conducted in accordance with Rule 5.

RULE 5: PROCEDURES FOR CONDUCTING AN INVESTIGATION

(a) Definition of Investigation: An "investigation" is a proceeding undertaken by the Committee, by recorded affirmative vote of at least four members, after a finding on the basis of an initial review that there is substantial credible evidence which provides substantial cause for the Committee to conclude that a violation within its jurisdiction has occurred.

(b) Scope of Investigation: When the Committee decides to conduct an investigation, it shall be of such duration and scope as is necessary for the Committee to determine whether a violation within its jurisdiction has occurred. In the course of the investigation, designated outside counsel, or if the Committee determines not to use outside counsel, the Committee or its staff, may conduct inquiries or interviews, take sworn statements, use compulsory process as described in Rule 7, or take any other actions that the Committee deems appropriate to secure the evidence necessary to make this determination.

(c) Notice to Respondent: The Committee shall give written notice to any known respondent who is the subject of an investigation. The notice shall be sent to the respondent no later than five working days after the Committee has voted to conduct an investigation. The notice shall include a statement of the nature of the possible violation, and a description of the evidence indicating that a possible violation occurred. The Committee shall offer the respondent an opportunity to present a statement or to respond to questions from members of the Committee, the Committee staff, or outside counsel.

(d) Right to a Hearing: The Committee shall accord a respondent an opportunity for a hearing before it recommends disciplinary action against that respondent to the Senate.

(e) Progress Reports to Committee: The Committee staff or outside counsel shall periodically report to the Committee concerning the progress of the investigation. Such reports shall be delivered to the Committee in the form and according to the schedule prescribed by the Committee, and shall be confidential.

(f) Report of Investigation:

(1) Upon completion of an investigation, including any hearings held pursuant to Rule 6, the outside counsel or the staff shall submit a confidential written report to the Committee, which shall detail the factual findings of the investigations and which may recommend disciplinary action, if appropriate. Findings of fact of the investigation shall be detailed in this report whether or not disciplinary action is recommended.

(2) The Committee shall consider the report of the staff or outside counsel promptly following its submission. The Committee shall prepare and submit a report to the Senate, including a recommendation to the Senate concerning disciplinary action, if appropriate. A report shall be issued, stating in detail the Committee's findings of fact, whether or not disciplinary action is recommended. The report shall also explain fully the reasons underlying the Committee's recommendation concerning disciplinary action, if any. No recommendation or resolution of the Committee concerning the investigation of a Member, officer or employee of the Senate may be approved except by the affirmative recorded vote of not less than four members of the Committee.

(3) Promptly after the conclusion of the investigation, the Committee's report and recommendation shall be forwarded to the Secretary of the Senate, and a copy shall be provided to the complainant and the respondent. The full report and recommendation shall be printed and made public, unless the Committee determines by majority vote that it should remain confidential.

RULE 6: PROCEDURES FOR HEARINGS

(a) Right to a Hearing: The Committee may hold a public or executive hearing in any inquiry, initial review, investigation, or other proceeding. The Committee shall accord a respondent an opportunity for a hearing before it recommends disciplinary action against that respondent to the Senate. (See Rule 5(e).)

(b) Non-public Hearings: The Committee may at any time during a hearing determine in accordance with paragraph 5(b) of Rule XXVI of the Standing Rules of the Senate whether to receive the testimony of specific witnesses in executive session. If a witness desires to express a preference for testifying in public or in executive session, he or she shall so notify the Committee at least five days before he or she is scheduled to testify.

(c) Adjudicatory Hearings: The Committee may, by majority vote, designate any public or executive hearing as an adjudicatory hearing; and, any hearing which is concerned with possible disciplinary action against a respondent or respondents designated by the Committee shall be an adjudicatory hearing. In any adjudicatory hearing, the procedures described in paragraph (j) shall apply.

(d) Subpoena Power: The Committee may require, by subpoena or otherwise, the attendance and testimony of such witnesses and the production of such correspondence, books, papers, documents or other articles as it deems advisable. (See Rule 7.)

(e) Notice of Hearings: The Committee shall make public an announcement of the date, place, and subject matter of any hearing to be conducted by it, in accordance with Rule 1(f).

(f) Presiding Officer: The Chairman shall preside over the hearings, or in his absence the Vice Chairman. If the Vice Chairman is also absent, a Committee member designated by the Chairman shall preside. If an oath or affirmation is required, it shall be administered to a witness by the Presiding Officer, or in his absence, by any Committee member.

(g) Witnesses:

(1) A subpoena or other request to testify shall be served on a witness sufficiently in advance of his or her scheduled appearance to allow the witness a reasonable period of time, as determined by the Committee, to prepare for the hearing and to employ counsel if desired.

(2) The Committee may, by majority vote, rule that no member of the Committee or staff or outside counsel shall make public the name of any witness subpoenaed by the Committee before the date of that witness' scheduled appearance, except as specifically authorized by the Chairman and Vice Chairman, acting jointly.

(3) Any witness desiring to read a prepared or written statement in executive or public hearings shall file a copy of such statement with the Committee at least two working days in advance of the hearing at which the statement is to be presented. The Chairman and Vice Chairman shall determine whether such statements may be read or placed in the record of the hearing.

(4) Insofar as practicable, each witness shall be permitted to present a brief oral opening statement, if he or she desires to do so.

(h) Right to Testify: Any person whose name is mentioned or who is specifically identified or otherwise referred to in testimony or in statements made by a Committee member, staff member or outside counsel, or any witness, and who reasonably believes that the statement tends to adversely affect his or her reputation may—

(1) Request to appear personally before the Committee to testify in his or her own behalf; or

(2) File a sworn statement of facts relevant to the testimony or other evidence or statement of which he or she complained.

Such request and such statement shall be submitted to the Committee for its consideration and action.

(i) Conduct of Witnesses and Other Attendees: The Presiding Officer may punish any breaches of order and decorum by censure and exclusion from the hearings. The Committee, by majority vote, may recommend to the Senate that the offender be cited for contempt of Congress.

(j) Adjudicatory Hearing Procedures:

(1) Notice of Hearings: A copy of the public announcement of an adjudicatory hearing, required by paragraph (e), shall be furnished together with a copy of these Rules to all witnesses at the time that they are subpoenaed or otherwise summoned to testify.

(2) Preparation for Adjudicatory Hearings:

(A) At least five working days prior to the commencement of an adjudicatory hearing, the Committee shall provide the following information and documents to the respondent, if any:

(i) a list of proposed witnesses to be called at the hearing;

(ii) copies of all documents expected to be introduced as exhibits at the hearing; and

(iii) a brief statement as to the nature of the testimony expected to be given by each witness to be called at the hearing.

(B) At least two working days prior to the commencement of an adjudicatory hearing, the respondent, if any, shall provide the information and documents described in divisions (i), (ii) and (iii) of subparagraph (A) to the Committee.

(C) At the discretion of the Committee, the information and documents to be exchanged under this paragraph shall be subject to an appropriate agreement limiting access and disclosure.

(D) If a respondent refuses to provide the information and documents to the Committee (see (A) and (B) of this subparagraph), or if a respondent or other individual violates an agreement limiting access and disclosure, the Committee, by majority vote, may recommend to the Senate that the offender be cited for contempt of Congress.

(3) Swearing of Witnesses: All witnesses who testify at adjudicatory hearings shall be sworn unless the Presiding Officer, for good cause, decides that a witness does not have to be sworn.

(4) Right to Counsel: Any witness at an adjudicatory hearing may be accompanied by counsel of his or her own choosing, who shall be permitted to advise the witness of his or her legal rights during the testimony.

(5) Right to Cross-Examine and Call Witnesses:

(A) In adjudicatory hearings, any respondent who is the subject of an investigation, and any other person who obtains the permission of the Committee, may personally or through counsel cross-examine witnesses called by the Committee and may call witnesses in his or her own behalf.

(B) A respondent may apply to the Committee for the issuance of subopenas for the appearance of witnesses or the production of documents on his or her behalf. An application shall be approved upon a concise showing by the respondent that the proposed testimony or evidence is relevant and appropriate, as determined by the Chairman and Vice Chairman.

(C) With respect to witnesses called by a respondent, or other individual given permission by the Committee, each such witness shall first be examined by the party who called the witness or by that party's counsel.

(D) At least one working day before a witness' scheduled appearance, a witness or a witness counsel may submit to the Committee written questions proposed to be asked of that witness. If the Committee determines that it is necessary, such questions may be asked by any member of the Committee, or by any Committee staff member if directed by a Committee member. The witness or witness' counsel may also submit additional sworn testimony for the record within twenty-four hours after the last day that the witness has testified. The insertion of such testimony in that day's record is subject to the approval of the Chairman and Vice Chairman acting jointly within five days after the testimony is received.

(6) Admissibility of Evidence:

(A) The object of the hearing shall be to ascertain the truth. Any evidence that may be relevant and probative shall be admissible, unless privileged under the Federal Rules of Evidence. Rules of evidence shall not be applied strictly, but the Presiding Officer shall exclude irrelevant or unduly repetitious testimony. Objections going only to the weight that should be given evidence will not justify its exclusion.

(B) The Presiding Officer shall rule upon any question of the admissibility of testimony or other evidence presented to the Committee. Such rulings shall be final unless reversed or modified by a majority vote of the Committee before the recess of that day's hearings.

(7) Supplementary Hearing Procedures: The Committee may adopt any additional special hearing procedures that it deems necessary or appropriate to a particular adjudicatory hearing. Copies of such supplementary procedures shall be furnished to witnesses and respondents, and shall be made available upon request to any member of the public.

(k) Transcripts:

(1) An accurate stenographic or recorded transcript shall be made of all public and executive hearings. Any member of the Committee, Committee staff member, outside counsel retained by the Committee, or witness may examine a copy of the transcript retained by the Committee of his or her own remarks and may suggest to the official reporter any typographical or transcription errors. If the reporter declines to make the requested corretions, the member, staff member, outside counsel or witness may request a ruling by the Chairman and Vice Chairman, acting jointly. Any member or witness shall return the transcript with suggested corrections to the Committee offices within five working days after receipt of the transcript, or as soon thereafter as is practicable. If the testimony was given in executive session, the member or witness may only inspect the transcript at a location determined by the Chairman and Vice Chairman, acting jointly. Any questions arising with respect to the processing and correction of transcripts shall be decided by the Chairman and Vice Chairman, acting jointly.

(2) Except for the record of a hearing which is closed to the public, each transcript shall be printed as soon as is practicable after receipt of the corrected version. The Chairman and Vice Chairman, acting jointly, may order the transcript of a hearing to be printed without the corrections of a member or witness if they determine that such member or witness has been afforded a reasonable time to correct such transcript and such transcript has not been returned within such time.

(3) The Committee shall furnish each witness, at no cost, one transcript copy of that witness' testimony given at a public hearing. If the testimony was given in executive session, then a transcript copy shall be provided upon request, subject to appropriate conditions and restrictions prescribed by the Chairman and Vice Chairman. If any individual violates such conditions and restrictions, the Committee may recommend by majority vote that he or she be cited for contempt of Congress.

RULE 7: SUBPOENAS

(a) Procedure: Subpoenas may be issued either—

(1) by majority vote of the Committee, or

(2) by the Chairman and Vice Chairman, acting jointly.

All subpoenas shall be signed by the Chairman or the Vice Chairman and may be served by any person eighteen years of age or older, who is designated by the Chairman or Vice Chairman. Each subpoena shall be served with a copy of the Rules of the Committee and a brief statement of the purpose of the initial review, investigation, or other proceeding.

(b) Subpoena Power: Pursuant to Federal law (2 U.S.C. 190(b)), the Committee is authorized to sit and act at such times and places during the sessions, recesses, and adjourned periods of the Senate as it deems advisable. The Committee is similarly authorized to require by subpoena or otherwise the attendance of such witnesses or the production of such correspondence, books, papers, documents, or other articles as it deems advisable.

(c) Withdrawal of Subpoena: The Committee may, by majority vote, withdraw any subpoena issued by it or issued by the Chairman and Vice Chairman, acting jointly.

The Chairman and Vice Chairman, acting jointly, may withdraw any subpoena issued by them.

RULE 8: VIOLATIONS OF LAW; PERJURY; LEGISLATIVE RECOMMENDATIONS; AND APPLICABLE RULES AND STANDARDS OF CONDUCT

(a) Violations of Law: Whenever the Committee determines by majority vote that there is reason to believe that a violation of law may have occurred, it shall report such possible violation to the proper state and federal authorities.

(b) Perjury: Any person who knowingly and willfully swears falsely to a sworn complaint or any other sworn statement to the Committee does so under penalty of perjury. The Committee may refer any such case to the Attorney General for prosecution.

(c) Legislative Recommendations: The Committee shall recommend to the Senate by report or resolution such additional rules, regulations, or other legislative measures as it determines to be necessary or desirable to ensure proper standards of conduct by Members, officers, or employees of the Senate. The Committee may conduct such inquiries as it deems necessary to prepare such a report or resolution, including the holding of hearings in public or executive session and the use of subpoenas to compel the attendance of witnesses or the production of materials. The Committee may make legislative recommendations as a result of its findings in an initial review, investigation, or other proceeding.

(d) Applicable Rules and Standards of Conduct:

(1) No initial review or investigation shall be made of an alleged violation of any law, rule, regulation, or provision of the Senate Code of Official Conduct which was not in effect at the time the alleged violation occurred. No provision of the Senate Code of Official Conduct shall apply to, or require disclosure of any act, relationship, or transaction which occurred prior to the effective date of the applicable provision of the Code.

(2) The Committee may conduct an initial review or investigation of an alleged violation of a rule or law which was in effect prior to the enactment of the Senate Code of Official Conduct if the alleged violation occurred while such rule or law was in effect and the violation was not a matter resolved on the merits by the predecessor Committee.

RULE 9: PROCEDURES FOR HANDLING COMMITTEE SENSITIVE AND CLASSIFIED MATERIALS

(a) Procedures for Handling Committee Sensitive Materials:

(1) Committee Sensitive information or material is information or material in the possession of the Select Committee on Ethics which pertains to illegal or improper conduct by a present or former Member, officer, or employee of the Senate; to allegations or acquisition of such conduct; to any

resulting preliminary inquiry, initial review, or investigation by the Select Committee on Ethics into such allegations or conduct; to the investigative techniques and procedures of the Select Committee on Ethics; or to other information or material designated by the staff director, or outside counsel designed by the Chairman and Vice Chairman.

(2) The Chairman and Vice Chairman of the Committee shall establish such procedures as may be necessary to prevent the unauthorized disclosure of Committee Sensitive information in the possession of the Committee or its staff. Procedures for protecting Committee Sensitive materials shall be in writing and shall be given to each Committee staff member.

(b) Procedures for Handling Classified Materials:

(1) Classified information or material is information or material which is specifically designated as classified under the authority of Executive Order 11652 requiring protection of such information or material from unauthorized disclosure in order to prevent damage to the United States.

(2) The Chairman and Vice Chairman of the Committee shall establish such procedures as may be necessary to prevent the unauthorized disclosure of classified information in the possession of the Committee or its staff. Procedures for handling such information shall be in writing and a copy of the procedures shall be given to each staff member cleared for access to classified information.

(3) Each member of the Committee shall have access to classified material in the Committee's possession. Only Committee staff members with appropriate security clearances and a need-to-know, as approved by the Chairman and Vice Chairman, acting jointly, shall have access to classified information in the Committee's possession.

(c) Procedures for Handling Committee Sensitive and Classified Documents:

(1) Committee Sensitive and classified documents and materials shall be segregated in secure filing safes. Removal from the Committee offices of such documents or materials is prohibited except as necessary for use in, or preparation for, interviews or Committee meetings, including the taking of testimony, or as otherwise specifically approved by the staff director or by outside counsel designated by the Chairman and Vice Chairman.

(2) Each member of the Committee shall have access to all materials in the Committee's possession. The staffs of members shall not have access to Committee Sensitive or classified documents and materials without the specific approval in each instance of the Chairman, and Vice Chairman, acting jointly. Members may examine such materials in the Committee's offices. If necessary, requested materials may be taken by a member of the Committee staff to the office of a member of the Committee for his or her examination, but the Committee staff member shall remain with the Committee Sensitive or classified documents or materials at all times except as specifically authorized by The Chairman or Vice Chairman.

(3) Any Member of the Senate who is not a member of the Committee and who seeks access to any Committee Sensitive or classified documents or materials, other than documents or materials which are matters of public record, shall request access in writing. The Committee shall decide by majority vote whether to make documents or materials available. If access is granted, the Member shall not disclose the information except as authorized by the Committee.

(4) Whenever the Committee makes Committee Sensitive or classified documents or materials available to any Member of the Senate who is not a member of the Committee, or to a staff person of a Committee member in respose to a specific request to the Chairman and Vice Chairman, a written record shall be made identifying the Member of the Senate requesting such documents or materials and describing what was made available and to whom.

(d) Non-disclosure Policy and agreement:

(1) Except as provided in the last sentence of this paragraph, no member of the Select Committee on Ethics, its staff, or any person engaged by contract or otherwise to perform services for the Select Committee on Ethics shall release, divulge, publish, reveal by writing, word, conduct, or disclose in any way, in whole, or in part, or by way of summary, during tenure with the Select Committee on Ethics or anytime thereafter, any testimony given before the Select Committee on Ethics in executive session (including the name of any witness who appeared or was called to appear in executive session), any classified or Committee Sensitive information, document or material, received or generated by the Select Committee on Ethics or any classified or Committee Sensitive information which may come into the possession of such person during tenure with the Select Committee on Ethics or its staff. Such information, documents, or material may be released to an official of the executive branch properly cleared for access with a need-to-know, for any purpose or in connection with any proceeding, judicial or otherwise, as authorized by the Select Committee on Ethics, or in the event of termination of the Select Committee on Ethics, in such a manner as may be determined by its successor or by the Senate.

(2) No member of the Select Committee on Ethics staff or any person engaged by contract or otherwise to perform services for the Select Committee on Ethics, shall be granted access to classified or Committee Sensitive information or material in the possession of the Select Committee on Ethics unless and until such person agrees in writing, as a condition of employment, to the non-disclosure policy. The agreement shall become effective when signed by the Chairman and Vice Chairman on behalf of the Committee.

RULE 10: BROADCASTING AND NEWS COVERAGE OF COMMITTEE PROCEEDINGS

(a) Whenever any hearing or meeting of the Committee is open to the public, the Committee shall permit that hearing or meeting to be covered in whole or in part, by television broadcast, radio broadcast, still photography, or by any other methods of coverage, unless the Committee decides by majority vote that such coverage is not appropriate at a particular hearing or meeting.

(b) Any witness served with a subpoena by the Committee may request not to be photographed at any hearing or to give evidence or testimony while the broadcasting, reproduction, or coverage of that hearing, by radio, television, still photography, or other methods is occurring. At the request of any such witness who does not wish to be subjected to radio, television, still photography, or other methods of coverage, and subject to the approval of the Committee, all lenses shall be covered and all microphones used for coverage turned off.

(c) If coverage is permitted, it shall be in accordance with the following requirements:

(1) Photographers and reporters using mechanical recording, filming, or broadcasting apparatus shall position their equipment so as not to interfere with the seating, vision, and hearing of the Committee members and staff, or with the orderly process of the meeting or hearing.

(2) If the television or radio coverage of the hearing or meeting is to be presented to the public as live coverage, that coverage shall be conducted and presented without commercial sponsorship.

(3) Personnel providing coverage by the television and radio media shall be currently accredited to the Radio and Television Correspondents' Galleries.

(4) Personnel providing coverage by still photography shall be currently accredited to the Press Photographers' Gallery Committee of Press Photographers.

(5) Personnel providing coverage by the television and radio media and by still photography shall conduct themselves and the coverage activites in an orderly and unobtrusive manner.

RULE 11: PROCEDURES FOR ADVISORY OPINIONS

(a) When Advisory Opinions are Rendered:

(1) The Committee shall render an advisory opinion, in writing within a reasonable time, in response to a written request by a Member or officer of the Senate or a candidate for nomination for election, or election to the Senate, concerning the application of any law, the Senate Code of Official Conduct, or any rule or regulation of the Senate within the Committee's jurisdiction, to a specific factual situation pertinent to the conduct or proposed conduct of the person seeking the advisory opinion.

(2) The Committee may issue an advisory opinion in writing within a reasonable time in response to a written request by any employee of the Senate concerning the application of any law, the Senate Code of Official Conduct, or any rule or regulation of the Senate within the Committee's jurisdiction, to a specific factual situation pertinent to the conduct or proposed conduct of the person seeking the advisory opinion.

(b) Form of Request: A request for an advisory opinion shall be directed in writing to the Chairman of the Committee and shall include a complete and accurate statement of the specific factual situation with respect to which the request is made as well as the specific question or questions which the requestor wishes the Committee to address.

(c) Opportunity for Comment:

(1) The Committee will provide an opportunity for any interested party to comment on a request for an advisory opinion—

(A) which requires an interpretation on a significant question of first impression that will affect more than a few individuals; or

(B) when the Committee determines that comments from interested parties would be of assistance.

(2) Notice of any such request for an advisory opinion shall be published in the Congressional Record, with appropriate deletions to insure confidentiality, and interested parties will be asked to submit their comments in writing to the Committee within ten days.

(3) All relevant comments received on a timely basis will be considered.

(d) Issuance of an Advisory Opinion:

(1) The Committee staff shall prepare a proposed advisory opinion in draft form which will first be reviewed and approved by the Chairman and Vice Chairman, acting jointly, and will be presented to the Committee for final action. If (A) the Chairman and Vice Chairman cannot agree, or (B)

either the Chairman or Vice Chairman requests that it be taken directly to the Committee, then the proposed advisory opinion shall be referred to the Committee for its decision.

(2) An advisory opinion shall be issued only by the affirmative recorded vote of a majority of the members voting.

(3) Each advisory opinion issued by the Committee shall be promptly transmitted for publication in the Congressional Record after appropriate deletions are made to insure confidentiality. The Committee may at any time revise, withdraw, or elaborate on any advisory opinion.

(e) Reliance on Advisory Opinions:

(1) Any advisory opinion issued by the Committee under Senate Resolution 338, 88th Congress, as amended, and the rules may be relied upon by—

(A) Any person involved in the specific transaction or activity with respect to which such advisory opinion is rendered if the request for such advisory opinion included a complete and accurate statement of the specific factual situation; and

(B) any person involved in any specific transaction or activity which is indistinguishable in all its material aspects from the transaction or activity with respect to which such advisory opinion is rendered.

(2) Any person who relies upon any provision or finding of an advisory opinion in accordance with the provisions of Senate Resolution 338, 88th Congress, as amended, and of the rules, and who acts in good faith in accordance with the provisions and findings of such advisory opinion shall not, as a result of any such act, be subject to any sanction by the Senate.

RULE 12: PROCEDURES FOR INTERPRETATIVE RULINGS

(a) Basis for Interpretative Rulings: Senate Resolution 338, 88th Congress, as amended, authorizes the Committee to issue interpretative rulings explaining and clarifying the application of any law, the Code of Official Conduct, or any rule or regulation of the Senate within its jurisdiction. The Committee also may issue such rulings clarifying or explaining any rule or regulation of the Select Committee on Ethics.

(b) Request for Ruling: A request for such a ruling must be directed in writing to the Chairman or Vice Chairman of the Committee.

(c) Adoption of Ruling:

(1) The Chairman and Vice Chairman, acting jointly, shall issue a written interpretative ruling in response to any such request, unless—

(A) they cannot agree,

(B) it requires an interpretation of a significant question of first impression, or

(C) either requests that it be taken to the Committee, in which event the request shall be directed to the Committee for a ruling.

(2) A ruling on any request taken to the Committee under subparagraph (1) shall be adopted by a majority of the members voting and the ruling shall then be issued by the Chairman and Vice Chairman.

(d) Publication of Rulings: The Committee will publish in the Congressional Record, after making appropriate deletions to ensure confidentiality, any interpretative rulings issued under this Rule which the Committee determines may be of assistance or guidance to other Members, officers or employees. The Committee may at any time revise, withdraw, or elaborate on interpretative rulings.

(e) reliance on Rulings: Whenever an individual can demonstrate to the Committee's satisfaction that his or her conduct was in good faith reliance on an interpretative ruling issued in accordance with this Rule, the Committee will not recommend sanctions to the Senate as a result of such conduct.

(f) Rulings by Committee Staff: The Committee staff is not authorized to make rulings or give advice, orally or in writing, which binds the Committee in any way.

RULE 13: PROCEDURES FOR COMPLAINTS INVOLVING IMPROPER USE OF THE MAILING FRANK

(a) Authority to Receive Complaints: The Committee is directed by section 6(b) of Public Law 93-191 to receive and dispose of complaints that a violation of the use of the mailing frank has occurred or is about to occur by a Member or officer of the Senate or by a surviving spouse of a Member. All such complaints will be processed in accordance with the provisions of these Rules, except as provided in paragraph (b).

(b) Disposition of Complaints:

(1) The Committee may dispose of any such complaint by requiring restitution of the cost of the mailing if it finds that the franking violation was the result of a mistake.

(2) Any complaint disposed of by restitution that is made after the Committee has formally commenced an initial review or investigation, must be summarized, together with the disposition, in a notice promptly transmitted for publication in the Congressional Record.

(3) If a complaint is disposed of by restitution, the complainant, if any shall be notified of the disposition in writing.

(c) Advisory Opinions and Interpretative Rulings: Requests for advisory opinions or interpretative rulings involving franking questions shall be processed in accordance with Rules 11 and 12.

RULE 14: PROCEDURES FOR WAIVERS

(a) Authority for Waivers: The Committee is authorized to grant a waiver under the following provisions of the Standing Rules of the Senate:

(1) Section 101(h) of the Ethics in Government Act of 1978, as amended, (Rule XXXIV) relating to the filing of financial disclosure reports by individuals who are expected to perform or who have performed the duties of their offices or positions for less than one hundred and thirty days in a calendar year;

(2) Section 102(a)(2)(D) of the Ethics in Government Act, as amended, (Rule XXXIV) relating to the reporting of gifts;

(3) Paragraph 1 of Rule XXXV relating to acceptance of gifts; or

(4) Paragraph 5 of Rule XLI relating to applicability of any of the provisions of the Code of Official Conduct to an employee of the Senate hired on a per diem basis.

(b) Requests for Waivers: A request for a waiver under paragraph (a) must be directed to the Chairman or Vice Chairman in writing and must specify the nature of the waiver being sought and explain in detail the facts alleged to justify a waiver. In the case of a request submitted by an employee, the views of his or her supervisor (as determined under paragraph 11 of Rule XXXVII of the Standing Rules of the Senate) should be included with the waiver request.

(c) Ruling: The Committee shall rule on a waiver request by recorded vote, with a majority of those voting affirming the decision.

(d) Availability of Waiver Determinations: A brief description of any waiver granted by the Committee, with appropriate deletions to ensure confidentiality, shall be made available for review upon request in the Committee office. Waivers granted by the Committee pursuant to the Ethics in Government Act of 1978, as amended, may only be granted pursuant to a publicly available request as required by the Act.

RULE 15: DEFINITION OF "OFFICER OR EMPLOYEE"

(a) As used in the applicable resolutions and in these rules and procedures, the term "officer or employee of the Senate" means:

(1) An elected officer of the Senate who is not a Member of the Senate;

(2) An employee of the Senate, any committee or subcommittee of the Senate, or any Member of the Senate;

(3) The Legislative Counsel of the Senate or any employee of his office;

(4) An Official Reporter of Debates of the Senate and any person employed by the Official Reporters of Debates of the Senate in connection with the performance of their official duties;

(5) A member of the capitol Police force whose compensation is disbursed by the Secretary of the Senate;

(6) An employee of the Vice President, if such employee's compensation is disbursed by the Secretary of the Senate;

(7) An employee of a joint committee of the Congress whose compensation is disbursed by the Secretary of the Senate;

(8) An officer or employee of any department or agency of the Federal Government whose services are being utilized on a full-time and continuing basis by a Member, officer, employee, or committee of the Senate in accordance with Rule XLI(3) of the Standing Rules of the Senate; and

(9) Any other individual whose full-time services are utilized for more than ninety days in a calendar year by a Member, officer, employee, or committee of the Senate in the conduct of official duties in accordance with Rule XLI(4) of the Standing Rules of the Senate.

RULE 16: COMMITTEE STAFF

(a) Committee Policy:

(1) The staff is to be assembled and retained as a permanent, professional, nonpartisan staff.

(2) Each member of the staff shall be professional and demonstrably qualified for the position for which he or she is hired.

(3) The staff as a whole and each member of the staff shall perform all official duties in a nonpartisan manner.

(4) No member of the staff shall engage in any partisan political activity directly affecting any congressional or presidential election.

(5) No member of the staff or outside counsel may accept public speaking engagements or write for publication on any subject that is in any way related to his or her employment or duties with the Committee without specific advance permission from the Chairman and Vice Chairman.

(6) No member of the staff may make public, without Committee approval, any Committee Sensitive or classified information, documents, or other material obtained during the course of his or her employment with the Committee.

(b) Appointment of Staff:

(1) The appointment of all staff members shall be approved by the Chairman and Vice Chairman, acting jointly.

(2) The Committee may determine by majority vote that it is necessary to retain staff members, including a staff recommended by a special counsel, for the purpose of a particular initial review, investigation, or other

proceeding. Such staff shall be retained only for the duration of that particular undertaking.

(3) The Committee is authorized to retain and compensate counsel not employed by the Senate (or by any department or agency of the Executive Branch of the Government) whenever the Committee determines that the retention of outside counsel if necessary or appropriate for any action regarding any complaint or allegation, initial review, investigation, or other proceeding, which in the determination of the Committee, is more appropriately conducted by counsel not employed by the Government of the United States as a regular employee. The Committee shall retain and compensate outside counsel to conduct any investigation undertaken after an initial review of a sworn complaint, unless the Committee determines that the use of outside counsel is not appropriate in the particular case.

(c) Dismissal of Staff: A staff member may not be removed for partisan, political reasons, or merely as a consequence of the rotation of the Committee membership. The Chairman and Vice Chairman, acting jointly, shall approve the dismissal of any staff member.

(d) Staff Works for Committee as Whole: All staff employed by the Committee or housed in Committee offices shall work for the Committee as a whole, under the general direction of the Chairman and Vice Chairman, and the immediate direction of the staff director or outside counsel.

(e) Notice of Summons to Testify: Each member of the Committee staff shall immediately notify the Committee in the event that he or she is called upon by a properly constituted authority to testify or provide confidential information obtained as a result of and during his or her employment with the Committee.

RULE 17: CHANGES IN SUPPLEMENTARY PROCEDURAL RULES

(a) Adoption of Changes in Supplementary Rules: The Rules of the Committee, other than rules established by statute, or by the Standing Rules and Standing Orders of the Senate, may be modified, amended, or suspended at any time, pursuant to a majority vote of the entire membership taken at a meeting called with due notice when prior written notice of the proposed change has been provided each member of the Committee.

(b) Publication: Any amendments adopted to the Rules of the Committee shall be published in the CONGRESSIONAL RECORD not later than thirty days after adoption.●

HEALTH RESEARCH FUNDING

● Mr. CHAFEE. Mr. President, I am pleased to cosponsor Senate Joint Resolution 69. It directs that funds shall be made available to the National Institutes of Health [NIH] for new and competing research grants.

Last year both houses of Congress approved appropriations increasing the funding level for 1985 to provide for approximately 6,500 research grants.

Recently the Office of Management and Budget directed NIH to inform its grantees that 1,500 fewer research grants would be available in 1985, reducing the number to 5,000. OMB plans to commit fiscal year 1985 funds to award 650 of the 5,000 grants on a multiyear basis. Traditionally grants have been awarded for a 1-year period.

The actions taken by OMB clearly bypass the expressed wishes of Congress and set a foundation for reductions in funding for future years. Reduced funding will seriously disrupt the Nation's long-term research capacity and dim our hopes of reaching our national health research objectives. These objectives include increasing the representations of women and minorities in academic medicine and science and expanding the number of clinical investigators.

Science is closer than ever before to making critical breakthroughs in the diagnosis and treatment of diseases that impose hardships and suffering on millions of Americans. Reductions in Government support of these research projects at this crucial stage will have far reaching effects.

I am very proud of the extensive biomedical research underway in the State of Rhode Island. Important biomedical research, through grants from the National Institutes of Health, is being carried on at two major universities and eight teaching hospitals, all located within a 35-mile radius. The availability of facilities to conduct basic research and clinical studies, together with an extensive data base of medical information on an entire State of 1 million people, provides Rhode Island with a unique research community. Biomedical research is an important part of Rhode Island's economic development.

Important work has been accomplished to improve the health of the American people. We cannot allow our progress to come to a halt. I hope that Congress will act swiftly to prevent the disruption of our Nation's research by reaffirming our intent to fund 6,500 NIH awards.●

CURB SOVIET CHEATING

● Mr. McCONNELL. Mr. President, I should like to bring to the attention of my colleagues an article written by Senator MURKOWSKI which addresses the difficult issue of Soviet treaty violations. The Senator from Alaska provides a balanced presentation of the challenge posed by Soviet noncompliance with arms control agreements, and makes a reasoned call for executive and congressional cooperation in facing up to this security issue.

I share Senator MURKOWSKI's concern that the established forum for handling noncompliance matters, the Standing Consultative Commission [SCC], has proven an ineffective means for enforcing agreements. Beyond that, I would also endorse his proposals for executive branch action, including an analysis by the President's General Advisory Committee on Arms Control, to identify the main components of an effective compliance policy.

As members of the Select Committee on Intelligence, Senator MURKOWSKI and I are sensitive to the requirements of effective treaty verification. In his capacity as a member of the Foreign Relations Committee, Senator MURKOWSKI is also aware of the arms control policy implications of continued Soviet cheating. I believe that his article in today's Christian Science Monitor makes a positive contribution to our national debate on this subject, and I ask that it be printed in the RECORD.

The article follows:

[From the Christian Science Monitor, April 3, 1985]

CURB SOVIET CHEATING

(By Frank H. Murkowski)

The US-Soviet arms control negotiations in Geneva provide a significant opportunity for reducing nuclear weapons and the threat of war. Unfortunately, the effectiveness of any agreement which may be achieved will be substantially diminished unless the Soviets discontinue their practice of cheating on treaty commitments.

The Soviets have violated the Anti-Ballistic Missile [ABM] Treaty, SALT I, SALT II, the Biological Weapons Convention, the Helsinki Accords, and the Threshold Test Ban Treaty. They are currently constructing an anti-ballistic missile radar at Krasnoyarsk, testing two new land-based nuclear missiles (the SS-24 and SS-25), and encoding test date which makes it difficult for the US to verify their compliance with arms agreements.

It had generally been assumed that the US's ability to detect such cheating would keep the Soviets from violating treaties. Unfortunately, this has not proven to be true. Verifiable agreements often do little more than allow the US to confirm Soviet noncompliance. These agreements do not answer the question of what to do when the Soviets cheat. In the absence of strong enforcement measures, the Soviets have concluded that the strategic advantages of cheating outweigh the potential costs.

Traditionally, the United States has relied on the Standing Consultative Commission [SCC] to act on cases of noncompliance, but this group has been largely unsuccessful in altering Soviet behavior. In testimony before the Senate Foreign Relations Committee in 1979, Paul Nitze, currently a special adviser for arms control to the secretary of state, said that the SCC has resolved reports of Soviet transgressions "by accepting what had been done in violation."

It is clear that the SCC is to act as the institution for resolving treaty violations, its operation must be reevaluated and changes must be made.

More than 20 years ago, Dr. Fred Ikle, who now serves as undersecretary of defense for policy, wrote an article identifying a need for a coherent compliance policy. Dr. Ikle warned that it is not enough to be able to detect Soviet violations; the US, he added, must know how to respond and take appropriate actions.

Several principles should guide US policy:

First, the President should be prepared to explain to the American people the facts regarding Soviet violations. Secrecy and ignorance in these matters protect only the guilty. With support from Congress, the Reagan administration has done a credible job keeping our citizens informed. However,

this communication must be continued by future administrations.

Second, no agreement should have the effect of restricting US actions more severely than those of other signatories. The Soviet practice of unilaterally exploiting the terms of an accord places the US at a dangerous disadvantage. This principle, therefore, has direct application for continued US adherence to SALT II in face of ongoing Soviet violations.

Third, Congress must not forget the Soviet compliance record when considering US defense programs.

Beyond these basic guidelines, however, much work remains to be done. Formulation of a comprehensive policy to deter future Soviet cheating, as well as responding to existing noncompliance, should be based upon the following initiatives:

The GAC should be directed to identify the main components of an effective compliance policy.

The interagency group that worked on the violations reports should prepare a "lessons learned" memorandum to assist our negotiators in Geneva.

The Department of Defense should report to Congress on the security implications of Soviet treaty violations, together with recommendations on apopropriate countermeasures.

The time has clearly come for the executive branch and Congress to work together in a spirit of bipartisanship to check the challenge posed by Soviet cheating. A failure to do so may doom any hope for responsible arms control, and in the end of goals of peace and security will be sacrificed.●

RULES OF THE COMMITTEE ON LABOR AND HUMAN RESOURCES

● Mr. HATCH. Mr. President, paragraph 2 of rule XXVI of the Standing Rules of the Senate requires each standing, select, or special committee of the Senate, at the beginning of each session, to publish in the CONGRESSIONAL RECORD the rules the committee has adopted to govern procedures within the committee.

Thus, pursuant to that requirement, I ask that the current rules of the Comittee on Labor and Human Resources be printed in the RECORD.

The rules follow:

SENATE COMMITTEE ON LABOR AND HUMAN RESOURCES

(By Orrin G. Hatch, Chairman)

RULES OF PROCEDURE (AS AMENDED FEBRUARY 16, 1983)

Rule 1.—Subject to the provisions of Rule XXVI, paragraph 5, of the Standing Rules of the Senate, regular meetings of the Committee shall be held on the second and fourth Wednesday of each month, at 10:00 a.m., in room SD 430, Dirksen Senate Office Building. The Chairman may, upon proper notice, call such additional meetings as he may deem necessary.

Rule 2.—The Chairman of the Committee or of a subcommittee, or if the Chairman is not present, the ranking Majority member present, shall preside at all meetings.

Rule 3.—Meetings of the Committee or a subcommittee, including meetings to conduct hearings, shall be open to the public except as otherwise specifically provided in subsections (b) and (d) of Rule 26.5 of the Standing Rules of the Senate.

Rule 4.—*(a)* Subject to paragraph (b), one-third of the membership of the Committee, actually present, shall constitute a quorum for the purpose of transacting business. Any quorum of the Committee which is composed of less than a majority of the members of the Committee shall include at least one member of the Majority and one member of the Minority.

(b) A majority of the members of a subcommittee, actually present, shall constitute a quorum for the purpose of transacting business: provided, no measure or matter shall be ordered reported unless such majority shall include at least one member of the Minority who is a member of the subcommittee. If, at any subcommittee meeting, a measure or matter cannot be ordered reported because of the absence of such a Minority member, the measure or matter shall lay over for a day. If the presence of a member of the Minority is not then obtained, majority of the members of the subcommittee, actually present, may order such measure or matter reported.

(c) No measure or matter shall be reported from the Committee or a subcommittee unless a majority of the Committee or subcommittee is actually present at the time such action is taken.

Rule 5.—With the approval of the Chairman of the Committee or subcommittee, one member thereof may conduct public hearings other than taking sworn testimony.

Rule 6.—Proxy voting shall be allowed on all measures and matters before the Committee or a subcommittee if the absent member has been informed of the matter on which he is being recorded and has affirmatively requested that he be so recorded. While proxies may be voted on a motion to report a measure or matter from the Committee, such a motion shall also require the concurrence of a majority of the members who are actually present at the time such action is taken.

The Committee may poll any matters of Committee business as a matter of unanimous consent; provided that every member is polled and every poll consists of the following two questions:

(1) Do you agree or disagree to poll the proposal; and

(2) Do you favor or oppose the proposal.

Rule 7.—There shall be prepared and kept a complete transcript or electronic recording adequate to fully record the proceedings of each Committee or subcommittee meeting or conference whether or not such meetings or any part thereof is closed pursuant to the specific provisions of subsections (b) and (d) Rule 26.5 of the Standing Rules of the Senate, unless a majority of said members vote to forgo such a record. Such records shall contain the vote cast by each member of the Committee or subcommittee on any question on which a "yea and nay" vote is demanded, and shall be available for inspection by any Committee member. The Clerk of the Committee, or the Clerk's designee, shall have the responsibility to make appropriate arrangements to implement this Rule.

Rule 8.—The Committee and each subcommittee shall undertake, consistent with the provisions of Rule XXVI, paragraph 4, of the Standing Rules of the Senate, to issue public announcement of any hearing it intends to hold at least one week prior to the commencement of such hearing.

Rule 9.—The Committee or a subcommittee shall, so far as practicable, require all witnesses heard before it to file written statements of their proposed testimony at least 24 hours before a hearing, unless the Chairman and the ranking Minority member determine that there is good cause for failure to so file, and to limit their oral presentation to brief summaries of their arguments. The presiding officer at any hearing is authorized to limit the time of each witness appearing before the Committee or a subcommittee. The committee or a subcommittee shall, as far as practicable, utilize testimony previously taken on bills and measures similar to those before it for consideration.

Rule 10.—Should a subcommittee fail to report back to the full Committee on any measure within a reasonable time, the Chairman may withdraw the measure from such subcommittee and report that fact to the full Committee for further disposition.

Rule 11.—No subcommittee may schedule a meeting or hearing at a time designated for a hearing or meeting of the full Committee. No more than one subcommittee executive meeting may be held at the same time.

Rule 12.—It shall be the duty of the Chairman in accordance with section 133(c) of the Legislative Reorganization Act of 1946, as amended, to report or caused to be reported to the Senate, any measure or recommendation approved by the Committee and to take or cause to be taken, necessary steps to bring the matter to a vote in the Senate.

Rule 13.—Whenever a meeting of the Committee or subcommittee is closed pursuant to the provisions of subsection (b) or (d) of Rule 26.5 of the Standing Rules of the Senate, no person other than members of the Committee, members of the staff of the Committee, and designated assistants to members of the Committee shall be permitted to attend such closed session, except by special dispensation of the Committee or subcommittee or the Chairman thereof.

Rule 14.—The Chairman of the Committee or a subcommittee shall be empowered to adjourn any meeting of the Committee or a subcommittee if a quorum is not present within fifteen minutes of the time scheduled for such meeting.

Rule 15.—Whenever a bill or joint resolution repealing or amending any statute or part thereof shall be before the Committee or a subcommittee for final consideration, the Clerk shall place before each member of the Committee or subcommittee a print of the statute or the part or section thereof to be amended or replaced showing by stricken-through type, the part or parts to be omitted, and in italics, the matter proposed to be added.

Rule 16.—An appropriate opportunity shall be given the Minority to examine the proposed text of Committee reports prior to their filing or publication. In the event there are supplemental, minority, or additional views, an appropriate opportunity shall be given the Majority to examine the proposed text prior to filing or publication.

Rule 17.—*(a)* The Committee, or any subcommittee, may issue subpoenas, or hold hearings to take sworn testimony or hear subpoenaed witnesses, only if such investigative activity has been authorized by majority vote of the Committee.

(b) For the purpose of holding a hearing to take sworn testimony or hear subpoenaed witnesses, three members of the Committee or subcommittee shall constitute a quorum: provided, with the concurrence of the Chairman and ranking minority member of the Committee or subcommittee, a single

member may hear subpoenaed witnesses or take sworn testimony.

(c) The Committee may, by a majority vote, delegate the authority to issue subpoenas to the Chairman of the Committee or a subcommittee, or to any member designated by such Chairman. Prior to the issuance of each subpoena, the ranking minority member of the Committee or subcommittee, and any other member so requesting, shall be notified regarding the identity of the person to whom it will be issued and the nature of the information sought and its relationship to the authorized investigative activity, except where the Chairman of the Committee or subcommittee, in consultation with the ranking minority member, determines that such notice would unduly impede the investigation. All information obtained pursuant to such investigative activity shall be made available as promptly as possible to each member of the Committee requesting same, or to any assistant to a member of the Committee designated by such member in writing, but the use of any such information is subject to restrictions imposed by the Rules of the Senate. Such information, to the extent that it is relevant to the investigation shall, if requested by a member, be summarized in writing as soon as practicable. Upon the request of any member, the Chairman of the Committee or subcommittee shall call an executive session to discuss such investigative activity or the issuance of any subpoena in connection therewith.

(d) Any witness summoned to testify at a hearing, or any witness giving sworn testimony, may be accompanied by counsel of his own choosing who shall be permitted, while the witness is testifying, to advise him of his legal rights.

(e) No confidential testimony taken or confidential material presented in an executive hearing, or any report of the proceedings of such an executive hearing, shall be made public, either in whole or in part or by way of summary, unless authorized by a majority of the members of the Committee or subcommittee.

Rule 18.—Presidential nominees shall submit a statement of their background and financial interests, including the financial interests of their spouse and children living in their household, on a form approved by the Committee which shall be sworn to as to its completeness and accuracy. The Committee form shall be in two parts—

(I) information relating to employment, education and background of the nominee relating to the position to which the individual is nominated, and which is to be made public; and,

(II) information relating to financial and other background of the nominee, to be made public when the Committee determines that such information bears directly on the nominee's qualifications to hold the position to which the individual is nominated.

Information relating to background and financial interests (Part I and II) shall not be required of (a) candidates for appointment and promotion in the Public Health Service Corps; and (b) nominees for less than full-time appointments to councils, commissions or boards when the Committee determines that some or all of the information is not relevant to the nature of the position. Information relating to other background and financial interests (Part II) shall not be required of any nominee when the Committee determines that it is not relevant to the nature of the position.

Committee action on a nomination, including hearings or meetings to consider a motion to recommend confirmation, shall not be initiated until at least five days after the nominee submits the form required by this rule unless the Chairman, with the concurrence of the ranking minority member, waives this waiting period.

Rule 19.—Subject to statutory requirements imposed on the Committee with respect to procedure, the rules of the Committee may be changed, modified, amended or suspended at any time; provided, not less than a majority of the entire membership so determine at a regular meeting with due notice, or at a meeting specifically called for that purpose.

Rule 20.—In addition to the foregoing, the proceedings of the Committee shall be governed by the Standing Rules of the Senate and the provisions of the Legislative Reorganization Act of 1946, as amended.

[Excerpts from the Standing Rules of the Senate]

RULE XXV

STANDING COMMITTEES

1. The following standing committees shall be appointed at the commencement of each Congress, and shall continue and have the power to act until their successors are appointed, with leave to report by bill or otherwise on matters within their respective jurisdictions:

(m)(1) Committee on Labor and Human Resources, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating to the following subjects:

1. Measures relating to education, labor, health, and public welfare.
2. Aging.
3. Agricultural colleges.
4. Arts and humanities.
5. Biomedical research and development.
6. Child labor.
7. Convict labor and the entry of goods made by convicts into interstate commerce.
8. Domestic activities of the American National Red Cross.
9. Equal employment opportunity.
10. Gallaudet College, Howard University, and Saint Elizabeths Hospital.
11. Handicapped individuals.
12. Labor standards and labor statistics.
13. Mediation and arbitration of labor disputes.
14. Occupational safety and health, including the welfare of miners.
15. Private person plans.
16. Public health.
17. Railway labor and retirement.
18. Regulation of foreign laborers.
19. Student loans.
20. Wages and hours of labor.

(2) Such committee shall also study and review, on a comprehensive basis, matters relating to health, education and training, and public welfare, and report thereon from time to time.

RULE XXVI

COMMITTEE PROCEDURE

1.[1] Each standing committee, including any subcommittee of any such committee, is authorized to hold such hearings, to sit and act at such times and places during the session, recesses, and adjourned periods of the Senate, to require by subpena or otherwise the attendance of such witnesses and the production of such correspondence, books, papers, and documents, to take such testimony and to make such expenditures out of the contingent fund of the Senate as may be authorized by resolutions of the Senate. Each such committee may make investigations into any matter within its jurisdiction, may report such hearings as may be had by it, and may employ stenographic assistance at a cost not exceeding the amount prescribed by the Committee on Rules and Administration.[2] The expenses of the committee shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman.

5. (a) Notwithstanding any other provision of the rules, when the Senate is in session, no committee of the Senate or any subcommittee thereof may meet, without special leave, after the conclusion of the first two hours after the meeting of the Senate commenced and in no case after two o'clock postmeridian unless consent therefor has been obtained from the majority leader and the minority leader (or in the event of the absence of either of such leaders, from his designee). The prohibition contained in the preceding sentence shall not apply to the Committee on Appropriations or the Committee on the Budget. The majority leader or his designee shall announce to the Senate whenever consent has been given under this subparagraph and shall state the time and place of such meeting. The right to make such announcement of consent shall have the same priority as the filing of a cloture motion.

(b) Each meeting of a committee, or any subcommittee thereof, including meetings to conduct hearings, shall be open to the public, except that a meeting or series of meetings by a committee or a subcommittee thereof on the same subject for a period of no more than fourteen calendar days may be closed to the public on a motion made and seconded to go into closed session to discuss only whether the matters enumerated in clauses (1) through (6) would require the meeting to be closed, followed immediately by a record vote in open session by a majority of the members of the committee or subcommittee when it is determined that the matters to be discussed or the testimony to be taken at such meeting or meetings—

(1) will disclose matters necessary to be kept secret in the interests of national defense or the confidential conduct of the foreign relations of the United States;

(2) will relate solely to matters of committee staff personnel or internal staff management or procedure;

(3) will tend to charge an individual with crime or misconduct, to disgrace or injure the professional standing of an individual, or otherwise to expose an individual to public contempt or obloquy or will represent a clearly unwarranted invasion of the privacy of an individual;

(4) will disclose the identity of any informer or law enforcement agent or will disclose any information relating to the inves-

[1] As amended, S. Res. 281, 96-2, Mar. 11, 1980 (effective Feb. 28, 1981).

[2] Pursuant to section 68c of title 2, United States Code, the Committee on Rules and Administration issues "Regulations Governing Rates Payable to Commerical Reporting Forms for Reporting Committee Hearings in the Senate." Copies of the regulations currently in effect may be obtained from the Committee.

tigation or prosecution of a criminal offense that is required to be kept secret in the interests of effective law enforcement;

(5) will disclose information relating to the trade secrets of financial or commercial information pertaining specifically to a given person if—

(A) an Act of Congress requires the information to be kept confidential by Government officers and employees; or

(B) the information has been obtained by the Government on a confidential basis, other than through an application by such person for a specific Government finanical or other benefit, and is required to be kept secret in order to prevent undue injury to the competitive position of such person; or

(6) may divulge matters required to be kept confidential under other provisions of law or Government regulations.

(c) Whenever any hearing conducted by any such committee or subcommittee is open to the public, that hearing may be broadcast by radio or television, or both, under such rules as the committee or subcommittee may adopt.

(d) Whenever disorder arises during a committee meeting that is open to the public, or any demonstration of approval or disapproval is indulged in by any person in attendance of any such meeting, it shall be the duty of the Chair to enforce order on his own initiative and without any point of order being made by a Senator. When the Chair finds it necessary to maintain order, he shall have the power to clear the room, and the committee may act in closed session for so long as there is doubt of the assurance of order.

(e) Each committee shall prepare and keep a complete transcript or electronic recording adequate to fully record the proceeding of each meeting or conference whether or not such meeting or any part thereof is closed under this paragraph, unless a majority of its members vote to forego such a record.

GUIDELINES OF THE SENATE COMMITTEE ON LABOR AND HUMAN RESOURCES WITH RESPECT TO HEARINGS, MARK UP SESSIONS, AND RELATED MATTERS

HEARINGS

Section 133A(a) of the Legislative Reorganization Act requires each Committee of the Senate to publicly announce the date, place, and subject matter of any hearing at least one week prior to the commencement of such hearing.

The spirit of this requirement is to assure adequate notice to the public and other Members of the Senate as to the time and subject matter of proposed hearings. In the spirit of Section 133A(a) and in order to assure that members of the Committee are themselves fully informed and involved in the development of hearings:

1. Public notice of the date, place, and subject matter of each Committee or subcommittee hearing should be inserted in the Congressional Record seven days prior to the commencement of such hearing.

2. Seven days prior to public notice of each Committee or subcommittee hearing, the Committee or subcommittee should provide written notice to each member of the Committee of the time, place, and specific subject matter of such hearing, accompanied by a list of those witnesses who have been or are proposed to be invited to appear.

3. The Committee and its subcommittee should, to the maximum feasible extent, enforce the provisions of Rule 9 of the Committee rules as it relates to the submission of written statements of witnesses twenty-four hours in advance of a hearing. When statements are received in advance of a hearing, the Committee or subcommittee (as appropriate) should distribute copies of such statements to each of its members.

EXECUTIVE SESSIONS FOR THE PURPOSE OF MARKING UP BILLS

In order to expedite the process of marking up bills and to assist each member of the Committee so that there may be full and fair consideration of each bill which the Committee or a subcommittee is marking up their following precedures should be followed:

1. Seven days prior to the proposed date for an executive session for the purpose of marking up bills the Committee or subcommittee (as appropriate) should provide written notice to each of its members as to time, place, and specific subject matter of such session, including an agenda listing each bill or other matters to be considered and including:

(a) two copies of each bill, joint resolution, or other legislative matter (or Committee Print thereof) to be considered at such executive session; and

(b) two copies of a summary of the provisions of each bill, joint resolution, or other legislative matter to be considered at such executive session.

2. Three days prior to the scheduled date for an executive session for the purpose of marking up bills, the Committee or subcommittee (as appropriate) should deliver to each of its members two copies of a cordon print or an equivalent explanation of changes of existing law proposed to be made by each bill, joint resolution, or other legislative matter to be considered at such executive session.

3. Insofar as practical, prior to the scheduled date for an executive session for the purpose of marking up bills, each member of the Committee or a subcommittee (as appropriate) should provide to all other such members two written copies of any amendment or a description of any amendment which that member proposes to offer to each bill, joint resolution, or other legislative matter to be considered at such executive session.

4. Insofar as practical, prior to the scheduled date for an executive session for the purpose of marking up bills, the Committee or a subcommittee (as appropriate) should provide each member with a copy of the printed record or a summary of any hearings conducted by the Committee or a subcommittee with respect to each bill, joint resolution, or other legislative matter to be considered at such executive session.

COMMITTEE REPORTS, PUBLICATIONS, AND RELATED DOCUMENTS

Rule 16 of the Committee Rules requires that the Minority be given an opportunity to examine the proposed text of Committee reports prior to their filing and that the Majority be given an opportunity to examine the proposed text of supplemental, minority, or additional or individual views prior to their filing. The views of all members of the Committee should be taken fully and fairly into account with respect to all official documents filed or published by the Committee. Thus, consistent with the spirit of Rule 16, the proposed text of each Committee report, hearing record, and other related Committee document or publication should be provided to the Chairman and ranking minority member of the Committee and the Chairman and ranking minoirty member of the appropriate subcommittee at least forty-eight hours proior to its filing or publication.●

WOMAN DOCTOR CLOSES GENDER GAP

(By request of Mr. DOLE, the following statement was ordered to be printed in the RECORD:)

● Mr. DURENBERGER. Mr. President, for the first time in its history, the president of the Minnesota Medical Association will be a woman, Dr. M. Elizabeth Craig. The Minnesota Medical Association is fortunate to have an individual of the caliber and dedication of Dr. Craig as its next president. In the past, Dr. Craig has served as the chairperson of the Foundation for Health Care Evaluation, and was named the Woman Physician of the Year in 1984 by the 200-member Minnesota Women's Physicians Minnesota organization.

Dr. Craig's election to head the MMA is timely. Minnesota now has nearly 1,000 practicing women doctors, and approximately one-third of the students in Minnesota's medical schools are women. As medicine continues to undergo rapid change in terms of health care delivery as well as the composition of the medical profession, Dr. Craig is well suited to lead the Minnesota Medical Association into the future.

I ask to have printed in the RECORD an article about Dr. Craig from the St. Paul Pioneer Press and Dispatch. I am pleased that Dr. Craig has been named to this post, and I am sure that her tenure as president of the Minnesota Medical Association will prove to be very successful.

The article follows:

[From the St. Paul Pioneer Press Dispatch, Mar. 17, 1985]

WOMAN DOCTOR CLOSES GENDER GAP

This spring, for the first time, the voice of organized medicine in Minnesota will belong to a woman, Dr. M. Elizabeth "Peggy" Craig.

The veteran St. Louis Park pediatrician starts her one-year term as president of the Minnesota Medical Association at the group's convention, which begins May 8 in the Twin Cities.

A self-assured, warm but private person who will admit only to being in her early 60s, Craig is thrilled by the honor accorded by her peers. But like many successful women, she finds the inevitable focus on her gender disconcerting and a little off the point.

"I don't push that button," she said firmly. "I'm not where I am in the MMA because I'm a woman, but because I paid dues for a lot of years and worked my way up."

At the same time, women colleagues praise her efforts to use her position as an establishment insider to open doors for the growing number of women doctors in Minnesota. About 800 of the state's 6,000 practicing doctors are women, as are a third of the students in the state's medical schools.

"Peggy Craig hasn't been one to pull the ladder up. She pulls you up the ladder behind her," said Dr. Doris Brooker, a University of Minnesota pathologist and president of Minnesota Women Physicians, a three-year-old, 200-member group that last year named Craig Woman Physician of the Year. She said Craig has been a steadfast member of the group and adviser to young women in the profession.

Colleagues say Craig has unusual talents as a peacemaker that will serve her well atop the rough and tumble medical politics of the state medical association. Doctors have always had their inter-specialty rivalries, but many of them say the divisions go even deeper today over bread-and-butter issues such as these:

Is it unethical for doctors in prepaid health plans to accept "bonuses" for keeping costs below certain levels?

Should health maintenance organizations be allowed to force doctors to belong to only one HMO?

Are the interests of patients losing out as those who pay the bills—HMOs, employers, insurance companies and government—squeeze tighter and tighter to control costs? How should doctors respond?

"The big challenge is to hold those different groups together," said association board chairman Dr. Delwin Ohrt, a Mankato pathologist. "Dr. Craig is a very stabilizing influence. She can listen to various viewpoints and bring diverse groups to a consensus opinion. It's not something you can learn. You're born with it or you're not."

In 1983 Craig was chairwoman of the acute care committee of the Foundation for Heath Care Evaluation, a statewide doctors' group that reviews medical records to monitor quality and efficiency of care given Medicare patients by both doctors and hospitals. The acute care committee's job was to investigate and crack down, if the facts warranted, on providers whose care wasn't up to snuff or exceeded cost guidelines.

"I don't think she ever upbraided anyone in that job. One of her best traits is her ability to leverage change in people on a one-on-one basis without causing animosity," said Dr. Jack Graham, medical affairs director for Fairview Southdale Hospital and a Foundation colleague of Craig's.

Craig acknowledges that she came late, albeit necessarily, to the world of medical politics in her 37-year career. Other extracurricular activities—she was president of the University of Minnesota Alumni Association in 1977—also came later, after her two children, Craig Lincoln and Libby Lincoln, were raised.

Craig Lincoln, now diving coach at the University of Minnesota, won a bronze medal in diving at the 1972 Olympics. Libby, an attorney, is an executive with the Minnesota Medical Insurance Exchange, an affiliate of the medical association.

Craig lives in Minnetonka with her husband, Howard Lincoln, a retired Pillsbury Co. food scientist. Her brother, Dr. David Craig, is a St. Paul internist.

Libby Lincoln said while in retrospect she can see that their family's life was somewhat unusual because of her mother's busy career, at the time it didn't seem so.

"One of our favorite family stories is how it was mom who led my Girl Scout group because she was the only one who didn't have an excuse for Wednesday afternoons, which was her time off," she said. "Her time outside of work was always arranged around her family. She travely all over the place to be at gymnastic and diving meets to watch us."

Libby also recalled her mother's supportive attitude when she dropped out of law school to move to Chicago to try to become a dancer.

"She loved it, she said, 'Hey, I always wanted to be a singer with a jazz band. Go to it.' "

Craig, whose schedule now is jammed with 7 a.m. meetings, after-dinner meetings and weekend conferences in addition to her regular on-call stints, is pleased at others' view of her as a consensus forger. And she agrees that maintaining professional control over the practice of medicine will be a high priority during her year as president of the association. She said she also plans to continue support of public health measures she has long championed, such as quitting smoking and wearing seat belts.

There also are more controversial issues about which Craig feels strongly, including one known as compensation for cognitive practice. In brief, the issue is that the health insurance system favors payment for surgical procedures over less well-defined care, such as time spent managing coronary artery disease or counseling patients. As relatively fewer dollars are spent on health care, the issue is one doctors will have to face, she said.

On the whole, however, she said she does not accept the argument that prepaid medicine, shorter hospital stays and other attempts at cost-cutting have resulted in poorer quality of care in American medicine.

We're having a lot of difficulties in medicine right now, a lot of agony," Craig said. "But any time you go from a cottage industry through the equivalent of an industrial revolution people are bound to be threatened. It's a trying time in medicine, but very exciting."●

NOTICE OF DETERMINATIONS BY THE SELECT COMMITTEE ON ETHICS

● Mr. RUDMAN. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The select committee has received a request for a determination under rule 35 which would permit Mr. Bruce J. Heiman of the staff of Senator DANIEL P. MOYNIHAN, to participate in a program in Seoul, Korea, sponsored by the Seoul National University from April 5-14, 1985.

The committee has determined that participation by Mr. Heiman in the program in Korea, at the expense of Seoul National University to discuss United States-Korea trade relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Edwin S. Jayne, Jr., of the staff of Senator JEFF BINGAMAN, to participate in a program in Tokyo, sponsored by the Japan Center for International Exchange from April 7-14, 1985.

The committee has determined that participation by Mr. Jayne in the program in Tokyo, Japan, at the expense of the Japan Center for International Exchange, to discuss United States-Japan relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Ms. Polly L. Gault of the staff of the Subcommittee on Education, Arts and Humanities, Committee on Labor and Human Resources, to participate in a conference in Munich, West Germany, sponsored by the German Marshall Fund, from April 13-19, 1985.

The committee has determined that participation by Ms. Gault in the conference in Munich, West Germany, at the expense of the German Marshall Fund, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Ms. Sandra E. Taylor of the staff of Senator JOHN H. CHAFEE, to participate in a study and exchange program in Japan, sponsored by the Japan Center for International Exchange, from April 6-14, 1985.

The committee has determined that participation by Ms. Taylor in the program in Japan, at the expense of the Japan Center for International Exchange, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Ms. Loretta L. Dunn, a professional staff member of the Committee on Commerce, Science, and Transportation, to participate in a program in the People's Republic of China, sponsored by the Chinese People's Institute of Foreign Affairs in conjunction with the United States-Asia Institute from April 4-15, 1985.

The committee has determined that participation by Ms. Dunn in the program in the People's Republic of China at the expense of the Chinese People's Institute of Foreign Affairs in conjunction with the United States-Asia Institute is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Richard J. Doubrava, a member of the staff of Senator JAMES ABDNOR, to participate in a program in Taipei, Taiwan, sponsored by the Chinese Culture University, from April 4-14, 1985.

The committee has determined that participation by Mr. Doubrava in the program in Taipei, Taiwan, at the expense of the Chinese Culture University, to discuss United States-Taiwan re-

lations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Paul Freedenberg, a staff member of the Committee on Banking, Housing and Urban Affairs, to participate in a study and exchange program in Japan, sponsored by the Japan Center for International Exchange, from April 6-14, 1985.

The committee has determined that participation by Mr. Freedenberg in the program in Japan, at the expense of the Japan Center for International Exchange, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Dennis A. Parobek of the staff of Senator CHIC HECHT to participate in a program in Taipei, Taiwan, sponsored by Soochow University, from April 4-12, 1985.

The committee has determined that participation by Mr. Parobek in the program in Taipei, Taiwan, at the expense of Soochow University, to discuss United States-Taiwan relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Stephen L. Crow of the staff of the Committee on Appropriations, to participate in a program in Taipei, Taiwan, sponsored by the Chinese Culture University, in early April 1985.

The committee has determined that participation by Mr. Crow in the program in Taipei, at the expense of the Chinese Culture University, to discuss United States-Taiwan relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Peter D. Prowitt of the staff of Senator MAX BAUCUS, to participate in a program in Bonn, West Germany, sponsored by the Konrad Adenauer Stiftung, from April 14-21, 1985.

The committee has determined that participation by Mr. Prowitt in the program in Bonn, at the expense of the Konrad Adenauer Stiftung, to discuss United States-German relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Maurice Hausheer of the staff of Senator MARK ANDREWS, to participate in a program in Taipei, Taiwan, sponsored by Soochow University, from April 4-12, 1985.

The committee has determined that participation by Mr. Hausheer in the program in Taipei, Taiwan, at the expense of Soochow University, to participate in an educational and cultural tour, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Luke Albee of the staff of Senator PATRICK LEAHY to participate in a program in Taipei, Taiwan, sponsored by the Chinese Culture University, from April 5-13, 1985.

The committee has determined that participation by Mr. Albee in the program in Taipei, Taiwan, at the expense of the Chinese Culture University to discuss United States-Taiwan relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Timothy N. Bergan of the staff of Senator RUDY BOSCHWITZ to participate in a program in Taipei, Taiwan, sponsored by the Chinese Culture University, from April 4-15, 1985.

The committee has determined that participation by Mr. Bergan in the program in Taipei, Taiwan, at the expense of the Chinese Culture University, to discuss United States-Taiwan relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Mike Gilliland of the staff of Senator HOWELL HEFLIN to participate in a program in Taipei, Taiwan, sponsored by Soochow University, from April 4-12, 1985.

The committee has determined that participation by Mr. Gilliland in the program in Taiwan, at the expense of Soochow University, to discuss United States-Taiwan relations is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Mitchell S. Pettit of the staff of Senator BOB DOLE to participate in a program in the People's Republic of China, sponsored by the Chinese People's Institute of Foreign Affairs in conjunction with the United States-Asia Institute from April 4-14, 1985.

The committee has determined that participation by Mr. Pettit in the program in the People's Republic of China, sponsored by the Chinese People's Institute of Foreign Affairs in conjunction with the United States-Asia Institute, to discuss a variety of foreign policy, trade and academic issues, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. H. Edward Quick of the staff of Senator THOMAS EAGLETON to participate in a program in Bonn, West Germany from April 14-21, 1985, sponsored by the Konrad Adenauer Stiftung.

The committee has determined that participation by Mr. Quick in the program in West Germany, at the expense of the Konrad Adenauer Stiftung, to discuss United States-German relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Hans Binnendijk and Ms. Margaret Nalle, of the staff of Senator CHARLES MATHIAS, to participate in an educational trip to the People's Republic of China, sponsored by the Chinese People's Institute in conjunction with the United States-Asia Institute, from April 4-14, 1985.

The committee has determined that participation by Mr. Binnendijk and Ms. Nalle in the program in the People's Republic of China, to discuss United States-Chinese relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Ms. Ryan Conroy of the staff of Senator ALAN CRANSTON to participate in a program in Seoul, Korea, sponsored by Seoul National University, from April 4-14, 1985.

The committee has determined that participation by Ms. Conroy in the program in Seoul, Korea, at the expense of Seoul National University, to discuss United States-Korea relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Greg Musil of the staff of Senator NANCY KASSEBAUM to participate in a program in Taipei, Taiwan, sponsored by the Chinese Cultural University, from April 4-13, 1985.

The committee has determined that participation by Mr. Musil in the program in Taiwan, at the expense of the Chinese Cultural University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Mark Greenberg of the staff of Senator PAUL TRIBLE to participate in a program in Taipei, Taiwan, sponsored by Chinese Culture University, from April 6-13, 1985.

The committee has determined that participation by Mr. Greenberg in the program in Taiwan, at the expense of the Chinese Culture University, to discuss United States-Taiwan relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Alex Gliksman, a staff member on the Foreign Relations Committee, to participate in a program in Taiwan, sponsored by

the Chinese Cultural University from April 5 to 13, 1985.

The committee has determined that participation by Mr. Gliksman in the program in Taiwan, at the expense of the Chinese Cultural University, to discuss United States-Taiwan relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Lamar Smith, chief economist of the Banking, Housing and Urban Affairs Committee, to participate in the Second International Symposium for Savings Institutions in Tokyo, Japan from March 11-15, 1985, sponsored by the Postal Savings Promotion Society in Japan.

The committee has determined that participation by Mr. Smith in the symposium in Tokyo, Japan, at the expense of the Postal Savings Promotion Society in Japan, is in the interest of the Senate and the United States.

The select committee has received a request for a determination which permitted Mr. Robert Weidner and Ms. Jackie Clegg of the staff of Senator JAKE GARN, to participate in a program, in Taiwan, Republic of China. Ms. Clegg's visit took place from December 2-10, 1984 and was sponsored by Tamkang University. Mr. Weidner's visit took place from August 12-19, 1984 and was sponsored by Tunghai University.

The committee has determined that participation by Mr. Weidner and Ms. Clegg in the programs in Taiwan, at the expense of Tamkang University and Tunghai University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Leonard Santos, Trade Counsel to the Finance Committee, to participate in a program in Mexico City, Mexico, on February 12, 1985, to speak to Mexican businessmen, sponsored by the American Chamber of Commerce of Mexico.

The committee has determined that participation by Mr. Santos in the program in Mexico, at the expense of the American Chamber of Commerce of Mexico, to discuss United States/Mexico bilateral trade relationships, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Kenneth Carpi, of the staff of Senator PETE WILSON, to participate in a program in Taiwan, sponsored by Tamkang University, which took place from December 2 to 10, 1984.

The committee has determined that participation by Mr. Carpi in the program in Taiwan, at the expense of Tamkang University, to discuss United States-Taiwan relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Thomas M. Palmerlee of the staff of Senator MALCOLM WALLOP to participate in a program in the People's Republic of China, sponsored by the Chinese People's Institute of Foreign Affairs in conjunction with the United States-Asia Institute, from April 4 to 15, 1985.

The committee has determined that participation by Mr. Palmerlee in the program in the People's Republic of China to discuss a variety of trade and foreign policy matters, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Alex Gliksman, a staff member on the Foreign Relations Committee, to participate in a program in Taiwan, sponsored by the Chinese Cultural University from April 5-13, 1985.

The committee has determined that participation by Mr. Gliksman in the program in Taiwan, at the expense of the Chinese Cultural University, to discuss United States-Taiwan relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Ms. Joyce McClune of the staff of Senator BOB DOLE, to participate in a program in Taiwan, sponsored by the Chinese Cultural University from April 4-14, 1985.

The committee has determined that participation by Ms. McCluney in the program in Taiwan, to tour cultural and educational establishments, at the expense of the Chinese Cultural University, is in the interest of the Senate and the United States.●

THE JEWISH PRESS ON THE GENOCIDE TREATY

● Mr. SYMMS. Mr. President, the Jewish Press is the largest independent Anglo-Jewish weekly newspaper in the country, with an estimated readership of 300,000 persons.

This past week, the Jewish Press published an excellent editorial by Arnold Fine in opposition to the Genocide Treaty. After a brilliant and scholarly examination of the Genocide Treaty's contents, Fine concludes:

(T)he Treaty, as reworded by Russia, stands to hurt every American and especially Israel. * * * All the UN, controlled by Russia, would have to do is continue their anti-Israel stance and charge Israel with genocide for their position in opposing the terrorist PLO. Interestingly enough, it would be used as a club against the very nations it was designed to protect.

Mr. President, I intend to do my best to make sure that every Senator has the benefit of reading this excellent article. I ask that it be printed in the RECORD:

The article follows:

[From the Jewish Press, Mar. 22, 1985]

WHY THE UNITED STATES SHOULD NOT RATIFY THE GENOCIDE CONVENTION TREATY

(By Arnold Fine)

For the past 35 years the U.S. Senate has refused to ratify the Genocide Convention Treaty. That Treaty calls for the outlawing of the slaughter of human beings. So why has our Congress balked at signing the Treaty for the past 40 years? The answer lies in the fact that the Treaty, as reworded by Russia stands to hurt every American and especially Israel.

The argument presented by those who want to see the treaty signed claim it is a response to Nazi Germany's crimes against the Jews. However, in reality the slaughter of six million Jews actually has nothing to do with the language of the present Treaty.

Then what is this all about? According to the language in the treaty, which has been considerably modified by the Russians. Americans would lose their rights under the Constitution and Israel would become the prime target in the UN. All the UN, controlled by Russia, would have to do is continue their anti-Israel stance and charge Israel with genocide for their position in opposing the terrorist PLO. Interestingly enough, it would be used as a club against the very nations it was designed to protect.

Let's define genocide. It is considered the systematic, planned annihilation of a racial, political or cultural group. However, the definition as explained in the Genocide Treaty could easily be used against any individual or nation charged with killing even a single member of one of the groups named in the definition. The language in the treaty interprets genocide as "the intent to destroy, in whole or in part, a national, ethical, racial or religious group as such."

Since the phrase is subject to interpretation and with the absence of precise meaning, the treaty would present a terrible threat to this nation.

For example, when the Genocide Treaty was first proposed in 1940 its definition included political groups. The Soviets objected strenuously and the term political was deleted from the language of the treaty.

The Russians did not want that term included in the treaty because they consider their enemies as "enemies of the state"—in other words, political criminals. By Russia's own admission almost all of the Jews now being prevented from leaving Russian soil are considered political and those in prison are political criminals of the state.

When the UN first presented the treaty, the U.S. delegates felt the term ". . . with the complicity of the government" should be included in the language of the definition. It was felt, regardless of what an individual might do, it certainly could not be done without the sanction or force of the government. The Russians objected once more and that language was deleted.

By rejecting the language in the original treaty, the Communist governments exempted themselves from the treaty's intent. As a matter of fact, with that language deleted, the only nations that could then be liable for personal prosecution by an international tribunal could be any nation other than the Communist nations! So the Russians had that phrase deleted over and above the objections of Australia, Belgium, Brazil, Ceylon, Nationalist China, Cuba

(before the Russians became sponsors). Equador, Greece, Norway, the Netherlands and the United Kingdom.

How would the signing of the treaty affect the United States? Here's what would happen if the treaty were ratified. First it would supercede all State laws and could nulify acts of Congress and even treaties our President or Congress may have signed with other nations.

A person or group who might be charged with genocide would not be tried by a domestic court where legal due process is assured under our constitution. They would have to be tried by an international tribunal even if the charge is trumphed up. They would not have a guarantee against self-incrimination, the protection against unreasonable searches and seizures, the writ of habeas corpus and the right of due process of law. All of these would be meaningless in a foreign court.

The language of the treaty cuts across and overrides the Constitution of this nation. It could make an American citizen subject to extradition and prosecution without the safeguards afforded by our system of justice. At the same time the treaty would make Russia and their satelites immune from punishment because of the very language they injected into the treaty.

There is no doubt in any one's mind that the Russians would control the World Court where these cases would be tried. The nations who would sit on the World Court would be able to interpret the treaty as they saw fit when applied to an American citizen or an Israeli.

The treaty language further stipulates that genocide includes the causing of mental harm to members of a national, ethical, racial or religious group. Theoretically members of the FBI, the CIA and even a local Police Department could be accused of genocide because of their supposed harrassment of certain groups. By the same token migrant workers from Mexico could bring farmers before the World Court charging them with Genocide. During the Vietnam war the Russians accused the American soldiers of genocide. If there had been a treaty every Prisoner of War would have been tried in the World Court with the full support of the United Nations which is controlled by the Russians.

In a nutshell, if the United States signed this treaty it would remove Constitutional guarantees from all Americans and subject every American to the jurisdiction of the World Court.

In 1984 Jesse Helms, then a Senator asked the State Department whether the treaty applied to the Soviet's genocide against Afghanistan or the mass murder of Cambodians in the 1970's. The answer Helms got was "No." Because of the treaty's language, they felt it did not apply!

The treaty has become a propaganda tool of the Russians. It has been designed to embarrass us before the world. The Russians have nothing to lose if the treaty is signed, but we, as Americans, have much to lose—namely protection from persecution under our Constitution.●

CARBONDALE RESOLUTION ON AMTRAK

● Mr. SIMON. Mr. President, Amtrak is a working, dependable, integral part of daily community life in hundreds of cities and towns across the land, and that is certainly true in my State of Illinois, the rail gateway State.

Rail passenger service has been a central feature of our State's character for most of this century. In a State the size of Illinois, spanning a length of more than 400 miles, rail service is an especially vital element of our transportation infrastructure. We often hear it said that every town served by Amtrak is also served by other public transport. Mr. President, if Illinois is a reflection of what is happening elsewhere under intercity bus deregulation, the real trend is in precisely the other direction, with Amtrak providing the only public transportation available in many cities and in some entire regions.

One of many spontaneous showings of support for a strong Amtrak that I have received is an emphatic resolution voted by the city council of Carbondale, IL. It is indicative of the enthusiasm that is abroad in the land of Amtrak. As noted in this resolution, the loss of Amtrak service in southern Illinois would constitute a severe blow to the economy and to the quality of life in the region.

Mr. President, the proposal to eliminate Federal operating assistance for Amtrak is nothing less than a death warrant for rail passenger service everywhere but in the Northeast corridor. Amtrak was chartered to be a nationwide rail passenger service, not a regional one, and our prudent course is to continue the support necessary to honor this charter.

I submit for the RECORD the resolution I have described from the city of Carbondale, IL.

The resolution follows:

RESOLUTION URGING THE CONTINUANCE OF THE FEDERAL OPERATING SUBSIDY FOR AMTRAK

Whereas, Amtrak rail passenger service provides a necessary public service in the City of Carbondale and the entire Southern Illinois area by providing a direct transportation link between Southern Illinois and cities of Chicago, St. Louis and New Orleans, as well as points beyond; and

Whereas, Amtrak is considered a valuable resource of southern Illinois University at Carbondale because faculty, staff and students connected with the University rely heavily on Amtrak service; and

Whereas, President Reagan has proposed the complete elimination of the federal government's operating subsidy for Amtrak;

Whereas, the loss of Amtrak service in Southern Illinois would be devastating to the economy and quality of life in the entire region

Now, therefore, be it resolved by the city council of the city of Carbondale, Illinois, as follows:

1. That the City Council of the City of Carbondale, Illinois, strongly supports the continuation of the federal operating subsidy for Amtrak and urges its U.S. Congressmen to actively oppose the elimination of that subsidy;

2. That the City Clerk of the City of Carbondale, Illinois, is hereby directed to forward copies of this resolution to President Ronald Reagan, Transportation Secretary Elizabeth Dole, Senator Alan J. Dixon, Senator Paul Simon and Congressman Kenneth Gray; and

3. That the Mayor and City Manager of the City of Carbondale, Illinois, be and are hereby authorized to do any and all things reasonable, necessary and proper to carry out the intent and purposes of this resolution.

This resolution adopted at a regular meeting of the City Council of the City of Carbondale on the 18th day of March, 1985.●

SOVIET ATROCITIES COMMITTED IN AFGHANISTAN

● Mr. SYMMS. Mr. President, I submit for the RECORD a portion of an editorial by John Lofton from the Washington Times which details only a few of the many Soviet atrocities committed in Afghanistan. Mr. Lofton's article is very candid, and presents us with the cold, ugly truth about the nature of the Soviet regime which directs the slaughter ongoing in Afghanistan against not only the Afghan soldiers, but against Afghan women and children.

What we are witnessing in Afghanistan is a travesty of unsurpassed proportion. The events transpiring there demand that we denounce the Soviet Union's role there, and increase our efforts to provide effective aid to the brave Afghan resistance. I commend Afghanistan: The Horrors We Have Not Seen to all of my colleagues.

The material follows:

EXCERPT

In his visit to Washington last week as the leader of a Soviet delegation, Urkranian Communist Party boss Vladimir Shcherbitsky—a man the Ukranian National Information Service calls "the butcher of Ukranian identity"—paraphrased a Russian folk song, saying he and his comrades hope to give their children and grandchildren "peaceful and sunny skies over them and their mothers by their side."

At a congressional exhibit of children's art, Mr. Shcherbitsky said it was "moving to see the paintings done by children on the premises of the U.S. Congress." And on Capitol Hill, Mr. Shcherbitsky & Co. were the guests of honor at a House Foreign Affairs Committee luncheon where the mood was described by the Reuters news service as "cordial and sometimes exceedingly friendly."

But the photo exhibit that should have greeted Mr. Shcherbitsky should have been photographs of the wanton slaughter of innocent men, women, and children by the Soviet Red Army in Afghanistan. Because in Afghanistan there is anything but peaceful and sunny skies for children and their mothers.

Here is some of what the Red Army is doing in Afghanistan, according to eyewitness reports contained in a Helsinki Watch report on human rights in that country, specifically Chapter 3, titled "Mass Destruction in the Countryside: Cries Against the Rural Population:"

The Soviets are "killing civilians, especially the children and the women who cannot run away from their houses." Their "main targets" are "children whose hands and arms are blown off" by booby-trapped terror weapons shaped to look like toy plas-

tic pens or small red trucks. Soviet soldiers also leave antipersonnel mines in food bins and other parts of houses the people have fled. They have left mines in mosques where people worship. And they have even booby-trapped dead bodies to explode when relatives attempt to move them.

One eyewitness tells how a Russian seized a 10- or 12-year-old boy, and another Russian "took a sickle from a villager and with a powerful and quick movement of the hand, he cut open the boy's throat and threw the sickle away. It all happened very fast. Then one of the Russians did a strange thing: he dragged the dead boy to a higher ground, covered him with a rug, and put a bed upside down on the body."

An 11-year-old girl, who survived a massacre, saw Soviet soldiers and an Afghan officer herd "women and children into a room and kill them by lobbing grenades through the window and bayoneting the survivors."

The parents of a badly burned 12-year-old boy say Russian soldiers came to their village "and held their son's arm over a fire" while they asked about the location of the anti-Communist freedom fighters called the Mujahedin.

One villager tells how he found "everyone dead"—his wife; his 9-year-old daughter, who looked as if she had been shot while trying to escape through a window; and his 13-year-old son, who "lay crumpled in another corner with his head shot away." The father who witnessed this atrocity says: "I threw up."

A former professor of Islamic law who returned to his village says that when three old men told the Soviets they had no sons, two were murdered with automatic weapons fire and the third was "put against a tree and with a big nail (apparently a detached bayonet) a soldier stabbed him in the chest and nailed him to the tree."

In another atrocity, the Soviets took 40 civilians, old and young, men, women, and children, "tied them up and piled them like wood. Then they poured gasoline over them and burned them alive."

At one village, when more than 70 freedom fighters and children hid in an irrigation ditch, the Soviets poured what is believed to have been oil into the ditch's openings and set it on fire. When they saw that this operation succeeded, and all in this ditch were dead, the Soviets "applauded and laughed as they left."

The Soviets have reportedly bombed each village in Afghanistan at least once in the past four years, with the result that 4–5 million refugees (at least one-quarter to one-third of Afghanistan's pre-war population) have sought shelter in Pakistan and Iran.

At another village, innocent people were "bombed by jet fighters and buried under the mud. They were thrown down from the airplanes, and some were put under tanks alive, and the tanks crushed them. They were all unarmed people. Some of them were given electricity and killed that way. Some were cut into pieces alive." Said one eye-witness: "These are things we could not remember even from the reign of Genghis Khan."

The Soviets have put dynamite on the backs of some people and blown them up alive. They have "cut peoples's lips and ears and have gouged out their eyes." And at one place, the Soviets strangled some Afghan gardeners with their bare hands.

The Soviets have even murdered "large numbers of people at weddings and funerals."

And "numerous reports" tell of Soviet soldiers burning the bodies of their victims, which is said to be "an affront to Moslem religious practice, which places great emphasis on a decent burial and respect for the dead."

So, here we have an all-too-brief look at what Vladimir Shcherbitsky and the group of Communist thugs who visited this country with him represent. And to think that these beasts who walk like men were actually welcomed by representatives of our Congress and our president.

Indeed. And what these meetings symbolize makes me feel like the Afghan father who looked at his family murdered by the Soviets: I want to throw up.●

TRIBUTE TO MR. DALE TOOLEY

● Mr. HART. Mr. President, I should like to pay tribute today to one of the finest public servants I have had the privilege to know, the former district attorney of Denver, Dale Tooley. Mr. Tooley passed away this week after a valiant struggle with cancer.

Mr. President, in the years Dale Tooley served as district attorney, he gained the reputation as a skilled attorney and a person of integrity whose relentless pursuit of criminals was exceeded only by his compassion for their victims. In the very finest sense of the word, he was the champion of anyone who strives to live their lives in the security and freedom that are only possible in a just and law-abiding society.

Three times Dale Tooley was a candidate for the office of mayor and three times he conducted those campaigns with class and an energy that was borne, not of personal ambition, but of a passion and an appreciation for a city he loved like few people in Denver's history. In every race, he brought a style and a wonderful Irish humor to the political arena that will not soon be forgotten.

Mr. President, in the final days of his life—a life that enriched the lives of countless others—Dale Tooley conducted himself with a courage and special dignity that will give strength to every American struggling with a terminal illness. In death, as in life, he has won a special place in the hearts of his fellow citizens and we will wish him forever that gentle Irish blessing, "May God hold him in the palm of his hand."●

PATRICIA ROBERT HARRIS

● Mr. SIMON. Mr. President, on Saturday, the Nation lost another drum major for justice, Patricia Roberts Harris, a native of Matoom, IL, died at the young age of 60. A Secretary of Housing and Urban Development, a Secretary of Health, Education and Welfare, a Secretary of Health and Human Services, and an Ambassador to Luxembourg—her short life was filled with public service to the Nation and especially to the citizens of Washington, DC.

We in Illinois, are proud to have given to the Nation this daughter of a Pullman car waiter to serve some of America's most down-trodden and disadvantaged citizens. Her service under Presidents Johnson and Carter was both historical and of high calibre. As the first black woman to serve as a cabinet Secretary, she was a capable administrator and a sensitive partisan of programs for the poor. Compassionate and competent are two words which describe her outstanding record of public service. Although she offended some with her tough and forceful leadership, she received high marks from those who worked for her and with her in Government, as a professor and the dean of the Howard University School of Law, and as a lawyer and ambassador.

I remember Pat Harris as a friend, a patron of the arts, and an advocate. We often exchanged views even between performances at the John F. Kennedy Center for the Performing Arts.

I ask that the two articles be printed in full.

The articles follows:

[From the Washington Post, Mar. 25, 1985]

PATRICIA ROBERTS HARRIS

The Post's account of the life of Patricia Roberts Harris, who died Staturday at the age of 60, emphasized the "firsts"—first black to serve as a delegate to the U.N., first black woman to become law school dean, ambassador, Cabinet member. One thing about firsts is that people sometimes tend to forget them as they are succeeded by seconds, thirds and so on.

Sen. William Proxmire made this mistake during hearings on Mrs. Harris' nomination to be secretary of housing and urban development in the Carter administration. Sen. Proxmire saw before him a woman whose career was marked by success and whose reputation stood high in the governing establishment, and he wondered aloud about her ability to be "sympathetic to the problems of the poor:"

"You do not understand who I am," Mrs. Harris replied. "I am a black woman, the daughter of a Pullman car waiter. I am a black woman who even eight years ago could not buy a house in parts of the District of Columbia. I didn't start out as a member of a prestigious law firm, but as a woman who needed a scholarship to go to school. If you think I have forgotten that, you are wrong."

Mrs. Harris' statement was characteristically, tough and forceful—attributes that often go with being first in areas where, for no good reason, you are not wanted—such as a segregated Washington lunch counter where Mrs. Harris led a sit-in by a group of fellow Howard University students in 1943. If some complained that she wasn't playing an activist role in the civil rights movement in the '60s, she could reply, "When I sat in there was nobody else to do it."

Her Cabinet tenure was in departments whose constituency is made up of people living on the edge. She ran the departments hard and fought for them fiercely. "She always impressed me as someone who cared very much about people who were not getting a decent shake, and she also impressed

me as being tough as nails when it came to taking care of their interests," said Jody Powell, who was President Carter's press secretary.

Along with the firsts and the ups in her career there were the downs—a term as dean of the Howard University Law School cut short by a dispute over student protest, and her defeat in the 1982 race for mayor of this city. But no one should doubt that in all her work she showed—as she made clear to Sen. Proxmire that day eight years ago—that she had not forgotten either her own past or some of the darkest moments of this country's past.

PAT HARRIS: A FRIENDSHIP

When I met Pat Harris 16 years ago, she was recovering from the shock of her one-month career as dean of the Howard University Law School. I went to her house on Holly Street for an interview and we talked the afternoon away in her big sunny living room. The subject was the circumstances that had led to her abrupt departure from Howard amid great controversy. So it was a working encounter. But we also became friends that day.

Over the years, this friendship grew and it was, as you would expect, put severely to the test as she took on a series of public jobs and I found myself in the role of editorial commentator on them. There were some awful ruckuses during her time at HUD, and when The Post endorsed her opponent, Marion Barry, in the last mayoralty election, communication all but ceased for a year. It resumed, though, as did the friendship. Over the years, there were many more amicable times than strained ones.

I admired Pat for precisely those qualities that ended her in the soup so often and which made her, I thought, hopeless as a practicing politican, but awesome as a public figure. She was a woman of stunning, electric intelligence, obdurate, uncompromising, given to searching out the moral prinicipal in an issue and, once deciding she had found it, refusing, come what may, to budge. Pat was always independent and (therefore) often desolately alone.

There was a poignancy in this. I felt it that first day we met as I came to understand both the temptation she had resisted in the Howard Law School conflict and the terrific assault she was taking as a result. The students were protesting violently. Their grievances had been essentially against law school teachers and officials who were there before this brand new dean took over. She in fact sympathized with some of the students' complaints.

But they had, among other things, seized the law school building and held it for a time, and she would not, absolutely not—that's spelled n-o-t—negotiate under that sort of unlawful pressure. She was outraged that law students of all people should do such things. Just about everybody on all sides of the dispute—the protestors and the old regime that was being protested against—wanted her to give in on this point. She wouldn't. She was ousted. She was right.

The Pat Harris I saw that day in the living room on Holly Street was the woman I was to see many times again over the years, as she recurrently got in this kind of predicament: strong, sad, angry, beat-up and yet undefeated all at once. There was a vulnerability, a gentleness mixed with her ferocity.

I sensed and saw this complexity of feelings as Pat fought her way through the baffles of the past decade and a half, talking stands on racial issues and questions of public policy that often alienated people she wanted as friends and that regularly defied the easy, fashionable, self-protective wisdom of the moment.

But I never saw this particular spirit so strong or moving as it was when I visited her in the hospital and spoke with her on the phone in the last painful months of her life. She had lost Bill and now she was losing her battle to cancer. Pat was, as usual, forthright, strong, outspoken about her illness and her prospects, concerned about how she should die, determined to do the thing right. And all the while, in her physical agony and what must have been deep fear, she maintained the familiar sharp interest in what was going on in the public world around her. Pat Harris finally had to yield. But she never gave up.●

STATUS REPORT ON THE BUDGET

● Mr. DOMENICI. Mr. President, I hereby submit to the Senate a status report on the budget for fiscal year 1985 pursuant to section 311 of the Congressional Budget Act.

Since my last report, the Congress has cleared urgent supplemental appropriations for Emergency Famine Relief and Recovery in Africa, H.R. 1239, for the President's signature.

The report follows:

REPORT TO THE PRESIDENT OF THE U.S. SENATE FROM THE COMMITTEE ON THE BUDGET STATUS OF THE FISCAL YEAR 1985 CONGRESSIONAL BUDGET ADOPTED IN HOUSE CONCURRENT RESOLUTION 280, REFLECTING COMPLETED ACTION AS OF APR. 2, 1985

[In millions of dollars]

	Budget authority	Outlays	Revenues
Budget resolution level	1,021,350	932,050	750,900
Current level	1,015,813	933,204	750,739
Amount remaining	5,537	0	0

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and which exceeds $5,537 million for fiscal year 1985, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 280 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and which would result in outlays exceeding $0 million for fiscal year 1985, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in H. Con. Res. 280 to be exceeded.

REVENUES

Any measure that would result in revenue loss exceeding $0 million for fiscal year 1985, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 280.●

P.D. HUMPHREY CO.: SMALL BUSINESS, NEW ENGLAND STYLE

● Mr. PELL. Mr. President, I would like to call attention to the 100th anniversary on April 13, 1985, of one of Rhode Island's venerable small businesses, the P.D. Humphrey Co., dealers in lumber, hardware, and oil in Tiverton, one of our more rural towns.

P.D. Humphrey does not quite fit the stereotype of youthful, high tech small businesses that abound today, although we have plenty of them today. The Humphrey firm not only is 100 years old, but its owners trace their roots in Tiverton to the first years of our national existence.

The firm was started in 1885 by Peleg Durfee Humphrey, whose ancestors settled in Tiverton on land granted as compensation for service in the Revolutionary War. The firm has been operated by five generations of the Humphrey family, the latest of whom was represented by William "Jay" Humphrey, Jr., who served as an intern in my office in 1978.

Jay Humphrey recalls that the firm in its early years was oriented toward the waterfront, receiving its shipments of coal and lumber by boat and barge at its wharves at the head of the Sakonnet River. Its waterfront operation was wiped out by a hurricane in the 1950's and the firm moved a few miles inland to its present location. It employs some 70 people and today, instead of coal, it markets heating oil. But it still provides the same essential services to the community as it did 100 years ago and it stands as a symbol of continuity and stability in the New England economy.

I congratulate the descendants of Peleg Humphrey on their durability, and wish them several more centuries of good business in Rhode Island.●

CONDITIONS INSIDE AFGHANISTAN

● Mr. HUMPHREY. Mr. President, in recent weeks I have attempted to keep this body informed on a regular basis of the tragic situation which occurs inside Afghanistan. I say attempt because mere words simply do not describe the horrible atrocities which are being committed on a daily basis by Soviet occupation forces. Not since the era of Ghengis Khan and Mongol hordes has Central Asia been victimized by such a reign of vicious devastation; not since the grim period of Adolf Hitler and Nazi terror has the Western World been witness to such extremes as this attempt to annihilate an entire people.

Indeed, Mr. President, as I read more and more about what is happening in Afghanistan, as I discuss the tragedy there with representatives of the Afghan people, with academics, and with diplomats, I am often over-

whelmed by the grisly accounts of savagery. I find it difficult myself to describe fully the absolutely inhuman brutality of Soviet military forces, which defies all notion of the Judeo-Christian ethic.

One expert on the plight of the Afghan people has put his thoughts and his eyewitness experiences to paper, and it is his account which I would like to share with the Senate during the next several days. Dr. Claude Malhuret is executive director of the Paris-based Medecins sans Frontieres—doctors without borders. This organization, along with one or two other humanitarian groups, have courageously braved the life-threatening situation in Afghanistan to bring medical assistance to the Afghan people—medical assistance deprived them by the Soviet occupation troops, which view epidemic as a convenient way to depopulate the countryside, and unattended injuries an effective way to burden the resistance.

Mr. President, at the same time that they attend to these people sickened by poison water, weak from forced starvation tactics, and injured by so-called "toy bombs," the doctors of Medecins san Frontieres have been able to assemble a clear picture of the war in Afghanistan. In an article entitled "Report From Afghanistan," which appeared in Foreign Affairs magazine, Dr. Malhuret describes that war from the perspective of a humanitarian organization. His account, to understate its impact, is startling, and should be examined especially by those who would prefer to view Afghanistan from solely abstract geopolitical considerations. Though the article is somewhat more than a year old, its description, its prophesy and its impact remain accurate and compelling.

I ask that the first portion of Dr. Malhuret's article be printed in the RECORD.

The material follows:

REPORT FROM AFGHANISTAN

(Claude Malhuret)

For three years now, Medecins sans Frontierés—Doctors Without Borders—has been in Afghanistan. The first medical teams it sent arrived in May 1980, five months after the Soviet invasion. Since then, we have sent 162 physicians and nurses who replace each other in relays for periods of four to eight months, providing an uninterrupted MSF presence. We have equipped and operated a total of 12 hospitals in the provinces of Nuristan, Paktia, Badakhshan (close to the Soviet border), Wardak (some 40 km from Kabul), Bamiyan, Uruzgan, and Zabul. Four of these hospitals were deliberately bombed and destroyed by Soviet planes in the fall of 1981. We evacuated two other hospitals in areas where we felt the need for medical services was limited and where local medics whom we have trained have been able to take over. At the present time, the MSF has 22 persons working in six hospitals. From our uninterrupted presence in Afghanistan, we have been able to evaluate the situation in the country since the beginning of the war, specifically in the areas where we are working. The current situation in Afghanistan is one of protracted war. The duration and character of the war derive directly from the Soviet style of anti-guerrilla warfare.[1]

Guerrilla warfare has already demonstrated its effectiveness elsewhere, and until recently no one has known how to counter it. The scattering of populations, the creation of village strongholds, and control and card-indexing of inhabitants have proved to be very useful means of restricting guerrilla advances, but the resistance fighters have always won out in the end.

It is true that there are examples to the contrary, such as the victory of the British army in Malaysia, and that of the French expeditionary corps in Algeria. But in the latter case, de Gaulle realized that France's long-term position was untenable and so he complied with the demands of the National Liberation Front, even though the Front was in a very poor military position when negotiations began.

Totalitarian regimes have analyzed these repeated failures and found a new answer to the guerrilla "problem," one that is simple, logical and effective. Since the basis of the strength of a resistance movement lies in the practice that Mao Zedong called "the fish taking to the water," the easiest way to separate the guerrillas from the population is to empty the fish bowl and capture its contents. In other words, an effective counter-strategy in the face of guerrilla action involves massive reprisals against the population, sometimes including the extermination of a large part of that population.

Some might think that such prospects would be repulsive to even the most determined invader. But this has not been the case; this philosophy has become a reality before our very eyes over the past several years. In the province of Ogaden, which revolted against the regime in power in Ethiopia, towns and villages were leveled one after the other. Nearly one million refugees—almost all the inhabitants—are now in refugee camps in nearby Somalia. And air units from Addis Ababa have no scruples about making raids on the camps.

In Kampuchea, the Vietnamese victory over the Khmer Rouge four years ago would never have been possible if the people had not been starved into submission by the Vietnamese, who feared that part of the relief support might fall to the enemy forces of Pol Pot. While tens of thousands of Kampucheans died of hunger and hundreds of thousands fled into Thailand, thousands of tons of food provided by international relief organizations spoiled on the docks of Kompong Som. The only portions of these supplies that were used went to feed the occupying Vietnamese forces and the Kampucheans under control in the pacified areas.

This type of warfare is currently being used in Afghanistan, the only difference being that the Afghan resistance groups have thus far made it fail. It may therefore be more difficult to recognize the pattern in all of these anti-guerrilla campaigns, but their common characteristics can be divided into three main categories: how the Soviet version of anti-guerrilla warfare compares with traditional Western anti-guerrilla warfare; what specific means it uses; and what the final outcome is.

One difference between the type of warfare used by the Russians in Afghanistan and that used by Western armies, such as the French in Algeria or the Americans in Vietnam, is that Western armies try to control the population and make every effort to prevent infiltration by guerrillas. From the bases they set up in towns, they try to establish a sphere of influence, to find support in the villages and hamlets, and to create militias to defend areas that might be attacked by guerrilla fighters before reinforcements from the regular army arrive. To ensure that resistance groups cannot get supplies from the people, the Western armies set up protected villages where the people are brought together and where food, supplies, and livestock are stored.

Manhunts are continuously organized, from the bases that are considered safe, to capture or kill guerrillas or to seize their caches of arms and ammunition. In all despite the irresponsible acts committed by the French army in Algeria and the U.S. Army in Vietnam, their anti-guerrilla warfare was based on one principle: to obtain the support of the population by any means, such as by giving privileges to newfound allies and by waging a hard war against the *enemy*. I have already noted the poor results of this type of warfare.

The Soviets operate differently. In Afghanistan, the towns held by the occupying Soviet forces are not used as bases to secure a hold over the neighboring areas. The towns are used as garrisons and as logistical stepping-stones. They provide storage facilities, aviation bases, barracks, and strongholds. The rest of the country is not under Soviet control. Protected villages do not exist. No effort is made to offer privileges to try to win over the population. The few military operations that involve ground forces are merely for strategic purposes. Some examples are the engagements that have taken place on the road from Kabul to the Soviet border, in the Panjshir Valley and the Wakhan corridor; operations there are not designed to capture resistance fighters.

The reason for this difference in anti-guerrilla tactics is very simple: the Soviets are not as naïve as the Westerners. They understood long ago—perhaps back at the time of the 1933 Ukrainian genocide when this tactic was used quite successfully—that a war involving guerrillas and anti-guerrilla fighters would never be won by either side if the emphasis was placed on being in the good graces of the population. On the contrary, the war would be won by the side that succeeded in making terror reign.

This brings me to the second aspect: specific means used to counter resistance movements. This does not involve a warm bath/cold shower tactic, but the exclusive use of boiling water—again and again and again, until both the Guerrilla fighters and the population ask for mercy.

During the first phase, until late 1980, air and ground equipment and infantry units were brought together to establish the reign of terror in this fashion. To mention just one example in the province of Hazarajat in central Afghanistan, several hundred armored vehicles would leave either Kabul or Jaghori and occupy a valley that could easily be entered. The population, which had warning either by rumor or because they had seen the helicopter movement fled into the mountains. The Soviet troops

[1] Medecins sans Frontieres (Doctors Without Borders) was created in 1971 by a group of physicians who had worked in Biafra during the Nigerian civil war of the 1960s. This rapid-deployment medical organization has sent teams to conflict-torn areas in Southeast Asia, Lebanon, Chad, East Africa, Angola, Central America, and Iranian Kurdistan, often despite the opposition of host governments.

therefore entered empty villages where they remained for a few days, harassed by the Muslim resistance groups—the Mujahedeen—who also barred their access to the upper valleys. During those few days, the soldiers pillaged and burned homes, set fire to crops and dragged off with them the few inhabitants left behind—mostly old people, whom they interrogated or summarily executed.

In 1980, three of these raids by Soviet troops took place along the Shibar Pass road; the soldiers thereby managed to occupy Bamiyan, Yakaolang, and Panjau for about ten days in June with 300 armored vehicles, in August (again with 300 armored vehicles), and in September (with 120 armored vehicles). In their last attack the Russians destroyed everything in sight, set fire to crops and burned bazaars to the ground in Panjau, Yakaolang, and several villages on the road to Shibar. They left the former American hospital in Yakaolang in ruins.

During a similar expedition in the fall of 1980, many homes were burned down in the region of Turkmen, west of Kabul, and the small hospital in Lolenj was also completely destroyed. The same kinds of destruction took place in mid-December in the northern part of Ghazni province. When one of our medical teams arrived two days after the end of the fighting, fires were still smoldering in a number of villages, and people were being wounded by booby traps left behind by the Soviet troops. Once again, the effect sought was terror, not strictly military victory.

Since late 1980, warfare using such operations has dropped off, probably because the Red Army has lost too many of its troops. But the Russians have now found other ways to impose a reign of terror, particularly by the use of air raids against which the poorly equipped resistance fighters are completely defenseless. In the Hazarajat region, for example, the villages bombed in the last two years are much too numerous to be listed here in full. Just a few of the targets were Jaghori, Panjau, Behsud, Jalrez and Waras. In Jalrez, a home where a wedding was taking place was bombed and the tragedy left several dozen victims. In Waras, where the independent provisional govenment of Hazarajat has its headquarters, the helicopters by-passed this organization, which should have been a tempting target, and attacked the village bazaar.

Military intervention carried out mainly by helicopter also includes dropping mines and booby-trapped toys. I shall not go into detail, but only stress two points. First, camouflaged anti-personnel mines are not designed to kill, but to injure. The Russians know quite well that in this type of war, an injured person is much more trouble than a dead person. The injured person demobilizes fighters who have to transport him, and, of course, he can no longer fight. In many cases, he will die several days or weeks later from gangrene or from staphylococcus or gram-negative septicemia, with atrocious suffering, which further depresses those who must watch him die. The MSF has also seen the damage caused by the explosion of booby-trapped toys, in most cases plastic pens or small red trucks, which are choice terror weapons. Their main targets are children whose hands and arms are blown off. It is impossible to imagine any objective that is more removed from conventional military strategy, which forswears civilian targets.

The second aim of dropping of anti-personnel mines is to affect the economy. First, troops try to set up a blockade using mines that are scattered by the thousands along the passes leading to Pakistan (but with almost no success), and second, they try to scatter the people's livestock. When I arrived in Afghanistan for the first time in 1980, I was immediately struck by the number of goats and cows that had legs in splints made of bamboo sticks and tied with wire. The herdsmen explained to me what had happened: these animals had stepped on mines and been injured as a result of the explosion. But the greatest loss, the herdsmen told me, is not so much the ones with splints, but rather all those animals that were killed from secondary infections. And although the Afghans clear the mines from the roads to prevent more human deaths, the animals in the fields continue to get killed. Livestock in several regions of the country has been slaughtered in this way. The effect of this slaughtering on the food supply in Afghanistan is clear.

Another point to be considered is the question of refugees—those still in Afghanistan as well as those who have fled. These refugees should not be considered in the traditional way, as an unfortunate but unintended consequences of the war, but rather as part of Soviet Warfare Strategy, the same that was used in Kampuchea, the Ogaden and Eritrea. The objective is, as mentioned earlier, to evacuate the country in order to isolate the guerrilla fighters.

The methodical pursuit of this objective is the only possible explanation for the incredible number of Afghan refugees. Some flee the country to Iran and Pakistan, where they are once again "used" by the Russians, whose agents infiltrate the refugees' ranks to further aggravate the conflicts that exist in Pakistan between different ethnic groups, as many believe is happening in Baluchistan. The figures for Afghan refugees in Pakistan and Iran as reported to international bodies run in excess of four million.2 Out of an Afghan population of 15 to 17 million, this figure is already enormous.

But to this figure must be added the hundreds of thousands of "internal" refugees who remain within Afghanistan. They have fled to the main towns, where they come under the control of the state army. Thus, this enlarged refugee count should be compared not to be total population of Afghanistan, but to the population in the rural areas that are held by the resistance fighters. When one adds to that the number of persons killed either in the fighting or by diseases that frequently find their cause in malnutrition—especially among children—one can better understand why that Soviet strategy is highly effective and that it has no doubt been responsible for chasing nearly half of the population away from guerrilla strongholds.

Also, several thousand children are sent to the Soviet Union to study to be officers one day in the Socialist Republic of Afghanistan; this offers a very close comparison with the Russian' "liberation" of the southern republics of the U.S.S.R. in the 1920s and 1930s, which led to a total victory over what has been called the Basmachi ("bandit") revolt.●

SOVIET JEWISH EMIGRATION

● Mr. MOYNIHAN. Mr. President, today's New York Times carries an unconfirmed report from Jerusalem that the Government of the Soviet Union will permit 280 Jewish families, about 1,000 persons, to emigrate to Israel in the next few days. This would be welcome news indeed, if true, and could only be interpreted as a signal of a Soviet desire to improve upon a very dismal record in this area—something to be encouraged and expanded in every way possible.

I would like to take this opportunity to urge President Reagan to build on such good will as this may indicate is present on the part of the new Soviet leadership, and to enter negotiations with the Soviet Government that could lead both to a regularization of Soviet emigration policy and a lessening of the harassment of Soviet Jews who remain in the U.S.S.R. that was clearly the policy of Mikhail Gorbachev's predecessors.

It will be recalled that on March 8, 1985, I was joined by my colleague from New York, Representative JACK KEMP, at a press conference where we announced that 249 of our congressional colleagues had joined us in signing a letter to President Reagan, urging that he initiate such negotiations with the Soviet Union. As many Senators are aware, the number of Soviet Jews permitted to emigrate has in recent years declined to miniscule proportions, even as officially sanctioned harassment of Soviet Jews has increased.

Our letter urged the President to invite the Soviet Union to enter into discussions dealing solely with the free emigration of the large number of Jews who seek to leave the Soviet Union, and with release of the prisoners of Zion, in keeping with the Helsinki Final Act of 1975.

The reference to the Final Act of the Conference on Security and Cooperation in Europe, signed at Helsinki, August 1, 1975, was carefully made. The Helsinki Final Act was of course not addressed only to emigration. It was a broadly conceived package of pledges undertaken by the 35 nations of Europe and North America to one another on military, economic, social, political, and humanitarian subjects.

It was not a treaty, as that term is normally understood in international law. The Senate has never been asked, nor has it given, its advice and consent.

As was stated in a memorandum prepared by the Congressional Research Service of the Library of Congress July 28, 1976—a portion of which I would ask be included in the RECORD at the conclusion of my remarks—

The document signed at the end of the Conference on Security and Cooperation in Europe was entitled a Final Act, after considerable debate, to indicate that it was not a legally binding treaty or international agreement. . . . President Ford, Secretary of State Kissinger and other Administration officials have stressed the non-juridical nature of the Final Act, comparing it to

such documents as the Universal Declaration on Human Rights and the UN Friendly Relations Declaration. Several other CSCE participant states have given the Final Act similar interpretations . . . Other nations have emphasized that existing treaties would not be effected and that a new regional international law would not emerge from the Conference.

One's right to "leave any country, including his own, and to return" has long been recognized in international law—most explicitly and bindingly in the Universal Declaration of Human Rights adopted by the U.N. General Assembly in 1948. The widespread publication of the Final Act by the Eastern European governments themselves, however, meant that for the first time whole segments of the populations of those countries became aware of a right which, although greatly restricted, was theirs long before August 1, 1975.

Largely for this reason of the widespread awareness of it, the Helsinki Final Act—including its reaffirmations of one's right to communicate, travel, and enter into associations across national boundaries—has, despite its nonjudicial nature, become a part of customary international law.

This was stated most clearly and succinctly in a report prepared by the Commission on Security and Cooperation in Europe, entitled "Implementation of the Final Act of the Conference on Security and Cooperation in Europe: Findings and Recommendations Two Years After Helsinki," published September 23, 1977, excerpts of which I would ask be printed in the RECORD at this point.

The material follows:

EXCERPTS FROM IMPLEMENTATION OF THE FINAL ACT OF THE CONFERENCE ON SECURITY AND COOPERATION IN EUROPE: FINDINGS AND RECOMMENDATIONS TWO YEARS AFTER HELSINKI

Freedom of movement has been recognized as a natural right by most Western civilizations since ancient Greece. In fact, it has been called the first and most fundamental of man's liberties.[1] Disregard of this freedom—frequently gives rise to discrimination in respect to other human rights and fundamental freedoms, resulting at times in the complete denial of those rights and freedoms.[2]

The first Western national law to guarantee the right of everyone to leave his country was the Magna Carta of 1215. The French Constitution of 1791 secured—the freedom of everyone to go, to stay, or to leave without being halted or arrested unless in accordance with procedures established by the Constitution.

In 1868, an act of the United States Congress declared: "The right of expatriation is a natural and inherent right of all people, indispensable to the enjoyment of the rights of life, liberty and the pursuit of happiness."

These three provisions served as legal antecedents to modern national laws on the subject of free movement until 1948. In December of that year, the United Nations General Assembly adopted the Universal Declaration of Human Rights and the right to leave one's country for travel or emigration become an internationally accepted human right. Article 13 (2) states that "Everyone has the right to leave any country, including his own, and to return to his country." Although not a legally binding instrument, the declaration has became part of customary international law.

The right to travel and emigrate is, however, also endorsed in several international documents which do have the force of law. Specifically, Article 12(2) of the International Covenant on Civil and Political Rights, adopted by the United Nations in 1966, declares that "Everyone shall be free to leave any country, including his own." The International Convention on the Elimination of All Forms of Racial Discrimination, adopted by the General Assembly in 1965, provides that each party to the treaty guarantee that everyone enjoy, among others, "the right to leave any country, including his own and to return to his own country."

FINAL ACT PROVISIONS

In comparison to these formulations, the Final Act provisions relating to this right are much narrower. Rather than broadly guaranteeing free movement, the human contacts section of Basket III attempts to set a standard of conduct protecting a citizen's right to reunite or meet with his family, to marry the one he loves, or to travel. The ultimate goal is for the participating states "to facilitate freer movement and contacts . . . and to contribute to the solution of humanitarian problems that arise in that connection."

More specifically, the 35 nations agreed to "favorably consider applications for travel . . . in order to visit members of their families," to "deal in a positive and humanitarian spirit with the applications of persons who wish to be reunited with members of their family, with special attention being given to requests of an urgent character," to "examine favorably and on the basis of humanitarian considerations request for exit or entry permits from persons who have decided to marry a citizen from another participating state." While not mandating that all such applications be immediately granted, the language of the Final Act directs, in effect, that applications for these purposes not be capriciously rejected.

The Final Act further directs the signatory states to simplify, shorten, and ease the procedures necessary for travel for the purposes of family visits, reunification or marriage:

Time.—"The preparation and issue of such documents and visas will be effected within reasonable time limits . . . as expeditiously as possible. . ."[3]

Fees.—"They will take such steps as may be necessary to ensure that the fees for official travel documents and visas are acceptable . . . they will lower where necessary the fees charged in connection with these applications to ensure that they are at a moderate level. . ."[4]

Renewals.—"Applications for the purpose of family reunification which are not granted may be renewed at the appropriate level and will be reconsidered at reasonably short intervals . . . fees will be charged only where applications are granted."

Non-discrimination.—". . . the presentation of an application will not modify the rights and obligations of the applicant or of members of his family" and "Applications for temporary visits to meet members of their families will be dealt with without distinction as to the country of origin or destination . . ." "Persons whose applications for family reunification are granted may bring with them or ship their household and personal effects . . ."

Other travel.—Increased human contacts also require the states "to facilitate wider travel by their citizens." To this end, they must strive "gradually to simplify and to administer flexibly the procedures for exit and entry" and "to lower, where necessary, the fees for visas and official travel documents." They must also allow religious faiths, institutions and organizations to "have contacts and meetings among themselves and exchange information" and encourage increased contacts among young people and athletes. Tourism is to be promoted "by encouraging the provision of appropriate facilities and the simplification and expediting of necessary formalities relating to such visits."

By making it easier for people to leave and enter the boundaries of states for personal, professional or touristic reasons, "an important element in the strengthening of friendly relations and trust among peoples" can be secured and can contribute "to the growth of understanding among peoples."

LINK TO PRINCIPLES VII AND X

Directly related to the specific Basket III provisions on freedom of movement is the broader, supportive undertaking of Principle VII: "In the field of fundamental freedoms and human rights, the participating states will act in conformity with the purposes and principles of the Charter of the United Nations and with the Universal Declaration of Human Rights. They will also fulfill their obligations as set forth in the international declarations and agreements in this field, including inter alia, the International Covenants on Human Rights, by which they may be bound."

This reaffirmation in Principle VII of the observance of existing international instruments is strengthened by another Basket I principle: Principle X on—Fulfillment in good faith of obligations under international law, in which the participating states pledge themselves to fulfill both those obligations arising from the generally recognized principles and rules of international law and those obligations arising from treaties and other agreements. . . .

Thus, although the right of anyone to free movement—travel or emigration—is not directly proclaimed in the Final Act, it is supported in the Final Act's pledges to "facilitate freer movement." Those pledges include the specific provisions on family reunification, binational marriage, travel for personal, professional, and touristic reasons. Broadly, however, the Final Act reaffirms other international instruments which, whether as a guide or a legally binding com-

mitment, stipulate the general freedom to leave one's country.

Mr. MOYNIHAN. It is therefore clear that, while the Helsinki accords are not legally binding in the sense in which international law is properly thought to be, its provisions are very much consistent with—and among the most prominent affirmations of—international obligation.

The Government of the Soviet Union has voluntarily undertaken to guarantee to its citizens the right to associate and travel across borders, and for families to be reunited through emigration. Leonid Brezhnev did not sign the Final Act at Helsinki under duress. His successor, Mikhail Gorbachev, is bound to uphold it, as his government is bound to abide by the terms of the Universal Declaration of Human Rights and other similar international covenents to which Soviet leaders have affixed their signatures.

If there is to be the improvement in relations that Soviet leaders at times say they desire, then it is vital that they demonstrate a willingness to treat their citizens by these standards that define and describe civilized society.

Today's report from Jerusalem, regarding the prospect of a resurgence in Soviet Jewish emigration, raises hopes that the new Soviet Government may be prepared to live up to at least some of its international obligations.

Again, I would urge President Reagan and his administration to explore ways to regularize this emigration, through negotiations based on treaty law as it applies and customary international law as it is relevant.

I would also ask that there be printed in the RECORD at this point the complete text of the March 8 letter to the President, and the names of those who signed it.

The material follows:

CONGRESS OF THE UNITED STATES
Washington, DC, March 8, 1985.

DEAR MR. PRESIDENT, the people of the United States share a tradition of moral commitment to the cause of freedom throughout the world. It is a tradition that we, as elected officials, have a special obligation to uphold.

American history is the history of a nation that sees its national purpose bound up with the ideal of freedom. This concept has inspired Americans for more than 200 years.

Over the past years both you and the Members of Congress have therefore pressed for the right of emigration for Soviet Jews and for the release of those "prisoners of Zion" imprisoned by Soviet authorities for seeking freedom.

Despite these efforts, nearly 400,000 Jews who have indicated their desire to emigrate are still being held hostage. The Iron Curtain has slammed shut on Jewish emigration from the Soviet Union.

"Prisoners of Zion" like Anatoly Shcharansky and Iosef Begun languish in Soviet jails and work camps. Recent months have seen additional arrests. This persecution has reached a new high just as a generation of young Soviet Jews insists on its tradition of living proudly as Jews.

That the Soviet Union has rebuffed our efforts to deal with this issue now argue for a direct attempt to bring this painful chapter in human history to a speedy and favorable conclusion.

We urge you, Mr. President, to call upon the Soviet Union to enter into discussions dealing solely with the free emigration of the large number of Jews who seek to leave the Soviet Union, and with the release of the 'prisoners of Zion,' in keeping with the Helsinki Final Act of 1975.

The Soviets should be required to adhere to those provisions which would provide for the removal of all obstacles to emigration for those who wish to apply.

Keeping faith with American history demands no less. Americans of all previous generations have placed the responsibility of working for freedom squarely and confidently on our shoulders.

We pledge you our support in pursuing this historic task.

DANIEL PATRICK MOYNIHAN,
U.S. Senator.
JACK KEMP,
Member of Congress.

To: Subcommittee on International Political and Military Affairs, House International Relations Committee. Attn: Mike Finley.

From: Francis T. Miko, Analyst in European Affairs.

Via: Head, Europe Section.

Subject: The Conference on Security and Cooperation in Europe.

This memorandum is in response to your request for information on the legal status of the Final Act of the Conference on Security and Cooperation in Europe and a listing of Congressional action on human rights in the Soviet Union and Eastern Europe. Two bibliographies on CSCE are attached. One is a computer print-out of articles published since 1974. The other bibliography contains selected material from Western and communist sources published prior to 1975.

LEGAL STATUS OF THE CSCE FINAL ACT

The document signed at the end of the Conference on Security and Cooperation in Europe was entitled a Final Act, after considerable debate, to indicate that it was not a legally binding treaty or international agreement. The participating states disagreed on the question of how explicitly this fact should be stated in the document.

Soviet negotiators, supported by those of some other countries, maintained that the text should stress what the Final Act is and not what it is not. Consequently, the only reference to the fact that the document is not legally binding appears in a paragraph stating that it is not to be registered under article 102 of the United Nations Charter as a treaty or international agreement. In a separate letter transmitting the Final Act to the UN General Secretary, it is stated that the document is a legally non-binding instrument.

President Ford, Secretary of State Kissinger, and other Administration officials have stressed the non-juridical nature of the Final Act, comparing it to such documents as the Universal Declaration on Human Rights and the UN Friendly Relations Declaration. Several other CSCE participant states have given the Final Act similar interpretations. West Germany has sought to underline the fact that the document is not a substitute peace treaty. Other nations have emphasized that existing treaties would not be affected and that a new regional international law for Europe would not emerge from the Conference, and that the role of the UN would not be infringed.

The Soviet Union and several East European countries have given the status of the Final Act a different interpretation. Soviet leaders and commentators have denounced what they see as Western efforts to minimize the significance of the document. They have characterized the Western arguments on the non-binding nature of the Final Act as inaccurate, both politically and juridically, Western attempts to differentiate between the Final Act and other international agreements have been rejected.

On another dimension, Eastern and Western participants appear to agree that the Final Act of CSCE carries considerable political and moral weight, particularly in view of the fact that it was signed at the heads-of-state level.

[From the New York Times, Apr. 3, 1985]

SOVIET REPORTED READY TO LET 1,000 JEWS GO

JERUSALEM, April 2.—The Soviet Union plans to allow 280 Jewish families—about 1,000 people—to emigrate to Israel in April, a sharp increase from recent months, Israeli radio said today.

There was no official comment on the report.

The radio quoted Yuri Stern, director of a Soviet Jewry Information Center, as saying that 280 Jewish families in the Soviet Union had been officially told that they would receive emigration documents "in a few days."

Mr. Stern said the group included several activists whose previous requests to leave had been rejected.

Soviet Jewish emigration reached a peak in 1979, when 51,320 Jews left, but fell drastically as United States-Soviet relations worsened.

Mr. Stern was quoted as saying that any increase in Jewish emigration could represent a change in Kremlin policy since Mikhail S. Gorbachev became Soviet leader last month.●

VICTIMS OF CRIME

● Mr. DENTON. Mr. President, on October 12, 1984, President Reagan signed the Victims of Crime Act of 1984 into law. The law represents a major step toward offering the innocent victims of crime the support and compassion they deserve as citizens of a nation promising justice for all. As President Reagan stated when he signed the law, "We have diligently attended to the rights and needs of defendants and convicted criminals. It is only proper and just that we balance our criminal justice system."

President Reagan, himself a victim of crime, has taken a leadership role in providing for assistance to innocent members of our society who suffer at the hands of criminals. I commend the President for his leadership in this area.

As further commendation, I wish to make part of the RECORD a resolution drafted by the Victims of Crime and Leniency [VOCAL] of Tuscaloosa, AL. The timing of the resolution is appropriate in light of the designation by the Governor of Alabama, of April 14 through 20, 1985, as "Victims Rights Week."

I ask that the text of the resolution be printed in the RECORD.

The text of the resolution follows:

RESOLUTION

Victims of Crime and Leniency is a non-profit organization operating in Tuscaloosa, Alabama under the State Charter in Montgomery, Alabama. The mission is to provide help, aid and comfort for a victim of crime in this area, as well as focus attention for the needs of change in our society to protect victims. We have been able to get several laws passed. The chapter meets periodically and members are sitting in court when the victims are required to testify. In addition, we are attending when cases come up for appeal in the state courts. The purpose of this resolution is to recognize our President-Commander and Chief, Ronald Reagan, for aggressively leading the national movement for victims in our society.

Whereas, President Ronald Reagan, demonstrated his leadership abilities years ago by being straight forward and right to the point in performing community duties.

Whereas, President Ronald Reagan recognized various social needs of society long before his inaugural service for President in 1981; after officially accepting the duties, action was started.

Whereas, President Ronald Reagan became a victim of crime in his first term of office. After his recovery, the President's desire to help the victim was intensified.

Whereas, the majority of people in the United States realize that President Ronald Reagan is facing some of the toughest problems a leader ever faced, it is gratifying to know how he feels about victims of crime; and how he so eloquently related in his public address, to an elderly widow trying to get her groceries home from the shopping center—this applies also to rape, murder and theft among the elderly population.

Whereas, President Ronald Reagan has often provided, or caused so many services to be provided for victims of crime there's possibly no way to evaluate it. The President has just made life better in this country.

Now, therefore, be it resolved, That Victims of Crime and Leniency present this resolution to the Honorable President Ronald Reagan for outstanding service and accomplishments in our society.

Be it further resolved, That the Victims of Crime and Leniency will continue to admire President Ronald Reagan and support his national effort to help a victim of crime where there is a need.●

HOUSING PROGRAMS FOR THE ELDERLY AND THE HANDICAPPED

● Mr. SIMON. Mr. President, I would like to express my strong support for the continuation of funding for housing programs for the elderly and the handicapped. We must never forget our citizens who may not be able to afford decent and safe housing without section 202 funding. As members of the U.S. Senate, we have all heard stories which demonstrate the need for publicly funded housing.

We are all fortunate that we do not have to worry about a decent place to live. I recently received a letter from Ms. Agnes Doherty of Lansing, IL. The poignancy, and directness of her letter state the need for continued funding better than any speech that I could make.

I ask that the letter from Ms. Doherty be printed in the RECORD.

The letter follows:

MARCH 16, 1985.

Hon. PAUL SIMON,
462 Dirksen Building, Washington, DC.

Re Section 202 New Housing.

DEAR SIR: I am a resident of Buford Walker Senior Housing Building at 17725 Arcadia, Lansing, Illinois.

I am a widow, age 69, who, like many who live here, was caught in the winds of inflation and unforeseen circumstances.

Living here in this lovely building has given me a real sense of dignity and self-worth. I simply could not afford such living on my income of Social Security, $396 per month. I am a person who contributed to society as a working taxpayer for 25 years. Unfortunately, for me, did not have an additional pension, and as you know, Social Security does not pay me my own Social Security plus my benefits as my husband's widow.

I have seen other residents of this building much older than I who have been able to enjoy life so much better here than living alone somewhere else.

The social activities, the caring concern of management and of other residents makes living here a real necessity for aging gracefully and with dignity.

Please support the Section 202 program so that others may benefit from the same needed housing.

Sincerely,

MRS. AGNES DOHERTY.●

THE BOY SCOUTS OF AMERICA

● Mr. SYMMS. Mr. President, today I join several of my distinguished colleagues in cosponsoring a resolution honoring the Boy Scouts of America on its 75th anniversary. Because of the exemplary way Scouting has served our Nation, it is appropriate that we commemorate this milestone in the history of the Boy Scouts of America.

In 1910, William Boyce brought the Boy Scout organization to America in order to teach young men the characteristics necessary to become good citizens. Today we honor this great organization because it reflects the principles and values that have helped make our Nation great.

In the Scout oath and Scout law, we find the attributes for which every Scout strives. Along with the oath and law, the Boy Scouts of America provides 116 merit badges for mastering skills in areas ranging from American business to woodwork. It is through diligent effort toward earning merit badges that the Boy Scout builds character, strengthens morals, and develops leadership qualities that are valuable assets in his life. Additional opportunities for growth and development occur in the numerous overnight camping trips in which Boy Scouts are encouraged to participate. In the unique atmosphere of camping in the out of doors, the Boy Scout makes friends and memories he will carry with him the rest of his life.

As a Senator from Idaho, I am keenly aware of the contribution of the Boy Scouts. Many of the activities so often related with Scouting were engrained in Idaho life even before 1912 when Scouting became an official organization in the State of Idaho. With its majestic mountains and innumerable clear lakes and streams, Idaho is literally a Boy Scout's paradise. In fact, the first World Scout Jamboree ever held in the United States took place in Idaho at Farragut State Park in 1967. Idaho continues to be a national leader in scouting as there are currently 35,643 registered Boy Scouts in Idaho, making it among the highest in the Nation in per capita Boy Scout participation.

Many prominent people from Idaho owe much of their success to the traits they learned in scouting. It is not surprising the list of Scouts from Idaho includes people who have contributed to all sectors of society, including politics, education, and religion. One such person is former Secretary of Agriculture Ezra Taft Benson, an Idaho native and Scouting ethusiast who has earned Scouting's highest honors. Reflecting on his own experience in Scouting, Secretary Benson said the following:

> I would hope that every young man of scouting age in America could have the benefits and blessing of this great program. It is truly a builder of character, not only in the young men, but also in the men who provide the leadership. And character, after all, is a priceless quality we develop . . .

Indeed, the Boy Scouts and Idaho have shared a long and rich relationship. It is because of this heritage that I stand today to salute the Boy Scouts of America on its 75th anniversary on behalf of the people of the great State of Idaho.●

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the following nominations of Faith Ryan Whittlesey, reported out of the Senate Foreign Relations Committee, and Donna M. Alvarado, reported out of the Labor Committee today, and the following judges:

Reported out of Judiciary Committee today:

Thomas J. Aquilino, Jr., Frank H. Easterbrook, Melvin T. Brunett, Edith H. Jones, Carol Los Mansmann, Walter K. Stapleton, James F. Holderman, J. Thomas Greene, William G. Young, Charles C. Lovell, Howell Cobb, George La Plata, Ronald E. Meredith, Alice M. Batchelder, Herman J. Weber, Carolyn R. Dimmick, Mark L. Wolf, and Ann C. Williams.

I ask unanimous consent that all nominations placed on the Secretary's desk be considered.

Mr. BYRD. Mr. President, reserving the right to object—and I do not expect to—I remove my reservation, Mr. President.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nominations will be stated.

Mr. DOLE. I ask unanimous consent that the nominations be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations are considered and confirmed en bloc.

The nominations considered and confirmed in bloc are as follows:

DEPARTMENT OF STATE

Faith Ryan Whittlesey, of Pennsylvaina, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Switzerland.

DEPARTMENT OF JUSTICE

Thomas J. Aquilino, Jr., of New York, to be a judge of the U.S. Court of International Trade.

Frank H. Easterbrook, of Illinois, to be U.S. circuit judge for the seventh circuit.

Melvin T. Brunetti, of Nevada, to be U.S. circuit judge for the ninth circuit.

Edith H. Jones, of Texas, to be U.S. circuit judge for the fifth circuit.

Carol Los Mansmann, of Pennsylvania, to be U.S. circuit judge for the third circuit.

Walter K. Stapleton, of Delaware, to be U.S. circuit judge for the third circuit.

James F. Holderman, Jr., of Illinois, to be U.S. district judge for the northern district of Illinois.

Howell Cobb, of Texas, to be U.S. district judge for the eastern district of Texas.

George La Plata, of Michigan, to be U.S. district judge for the eastern district of Michigan.

Ronald E. Meredit, of Kentucky, to be U.S. district judge for the western district of Kentucky.

Alice M. Batchelder, of Ohio, to be U.S. district judge for the northern district of Ohio.

Herman J. Weber, of Ohio, to be U.S. district judge for the southern district of Ohio.

J. Thomas Greene, of Utah, to be U.S. district judge for the district of Utah.

Mark L. Wolf, of Massachusetts, to be U.S. district judge for the district of Massachusetts.

William G. Young, of Massachusetts, to be U.S. district judge for the district of Massachusetts.

Ann C. Williams, of Illinois, to be U.S. district judge for the northern district of Illinois.

Charles C. Lovell, of Montana, to be U.S. district judge for the district of Montana.

Carolyn R. Dimmick, of Washington, to be U.S. district judge for the western district of Washington.

ACTION AGENCY

Donna M. Alvarado, of Virginia, to be Director of the ACTION Agency.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE COAST GUARD

Coast Guard nominations beginning James Adase, and ending George F. Hillegas, which nominations were received by the Senate and appeared in the Congressional Record of March 20, 1985.

Mr. DOLE. I move to reconsider the vote on the nominations.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONFIRMATION OF FAITH RYAN WHITTLESEY TO BE U.S. AMBASSADOR TO SWITZERLAND

Mr. DOLE. Mr. President, I am pleased to support the confirmation of Faith Ryan Whittlesey to be Ambassador to Switzerland.

Faith will be returning to this job after nearly 2 years of outstanding service as the President's liaison for public affairs. I have to say, with all due immodesty, that Faith's predecessor in that job was a woman of extraordinary talents and ability—a tough act to follow—in a position which, like Ambassador, requires a great amount of diplomatic skill. But Faith rallied to the task and proved to be an effective and forceful advocate for President Reagan's constituencies. She served him honorably and she served him well.

Faith began her career in public service in 1964, as a special assistant attorney general in Pennsylvania. She continued in the area of law enforcement until 1972, when she became a member of the Pennsylvania House of Representatives. It was her service in the Pennsylvania House and subsequently on the Delaware County Council in Pennsylvania, which demonstrated that she was not only a good lawyer, but a skilled legislator and politician. Her achievements in Pennsylvania politics brought her to the attention of the Reagan administration, which, in 1981, awarded her with her first ambassadorship to Switzerland.

She returned to the country in 1983 to assume the public relations post. Faith was relatively inexperienced when she first came to the White

House—as she quipped a few weeks ago during a dinner held in her honor, "It took me a long time to realize that 'star wars' referred to White House dinner seating lists." But because she was a quick learner, Faith didn't take much time to put her team in place and establish herself as an influential voice in the White House. She became known as a candid, straightforward person: A proud conservative and an articulate spokesperson for conservative views.

The President could find a no more loyal and dedicated person to serve him than Faith Ryan Whittlesey, whether in the White House or as his representative overseas. I know he will miss her, as we will all miss her, and I urge my colleagues to join me in wishing her the very best.

CONFIRMATION OF WALTER K. STAPLETON

Mr. BIDEN. Mr. President, I offer my strongest congratulations to Judge Stapleton on his nomination to one of the newly created positions on the Court of Appeals for the Third Circuit. I also would like to extend congratulations to my distinguished colleague Senator ROTH, who, with this excellent choice, has demonstrated, once again, how seriously he takes his responsibility of recommending judicial nominees. I don't think Senator ROTH could have found anyone with a more distinguished reputation in the Delaware legal community. Judge Stapleton graduated cum laude from Princeton University, he graduated cum laude from Harvard Law School, and just 1 year ago, he received a master of law degree from the University of Virginia School of Law, an extraordinary accomplishment when one considers that he did that while carrying the heavy workload of a Federal district judge.

After law school, Judge Stapleton joined one of the most distinguished law firms in Delaware—Morris, Nichols, Arsht, and Tunnell—and after only 11 years of practice, was appointed to the Federal district court in Delaware. Since 1983, he has been chief judge of that court.

Judge Stapleton has a reputation as an extremely hardworking, exceptionally competent judge. Anyone who knows him will vouch to his unimpeachable character and judicial temperament.

Again, I heartily congratulate Judge Stapleton, and hope he has an enjoyable tenure on the court of appeals.

CONFIRMATION OF CHARLES C. LOVELL

Mr. BAUCUS. Mr. President, I am proud to speak on behalf of Mr. Charles (Chuck) Lovell, who has been nominated to be Montana's new Federal district judge.

Chuck is one of Montana's truly distinguished native sons.

He was born and raised in Montana. He received his undergraduate and graduate degrees from the University of Montana.

After law school, Chuck joined one of the most prestigious law firms in Great Falls—the firm of Church, Harris, Johnson & Williams.

Since that time, Chuck has devoted his legal career to serving the people of Montana. His peers and his clients have nothing but the highest praise for him.

In short, Mr. President, I believe Chuck Lovell is an ideal candidate for a Federal Judge.

I would like to relate just one anecdote that sums up how Montanans feel about Chuck's nomination:

As Senators know, the FBI conducts a thorough background check of every nominee for a Federal judgeship.

Chuck was no exception.

One of the people the FBI contacted about Chuck was the sheriff of Cascade County. In fact, three different agents called the sheriff on three separate occasions.

One might have concluded that the FBI had found something suspicious in Chuck's background.

But that was not the case. The FBI agents were simply flabbergasted that they could not find anyone in Montana who had anything bad to say about Chuck. They could not believe it.

Mr. President, I have had the same experience as those FBI agents.

Everyone I have talked to in Montana agrees that Chuck is an exceptional candidate.

I compliment the President on his choice.

I believe Montana and the Federal judicial system will be well served by a man of Chuck's character, competence, and integrity.

I urge the committee to act quickly on Chuck's nomination.

CONFIRMATION OF DONNA ALVARADO

Mr. HATCH. Mr. President, I am pleased to support Donna Alvarado, President Reagan's nominee as Director of the ACTION Agency. The Senate Labor and Human Resources Committee approved her nominaton today without objection and I strongly urge my fellow Senate colleagues to confirm her nomination without delay.

I support Donna Alvarado's nomination for two major reasons: First, without reservation, she will continue President Reagan's commitment to voluntarism in our country. She has committed herself to becoming a strong advocate on the valuable programs administered by the ACTION Agency. Programs like the Senior Companions Program, the Foster Grandparents Program, and Young Volunteers in Action, to name a few, have garnered tremendous support throughout our Nation. Donna Alvarado has assured the members of the Senate Committee on Labor and Human Resources that she will continue strong support of these programs and I am certain that with her keen leadership, these programs will become even more of an integral part of our community voluntary effort.

Second, Donna Alvarado will be an excellent administrator. She has served our Nation in many capacities—in the legislative branch as a capable staffer to Members of Congress, and in the administrative branch as the Deputy Assistant Secretary of Defense, Equal Opportunity and Safety Policy. I am pleased that she will continue her public service in directing the ACTION Agency and that her skills and talents will be fully utilized in that capacity.

Again, I urge my colleagues to support Miss Alvarado's nomination as Director of the ACTION Agency. The continued excellent administration of this Agency is of paramount importance to me. Tom Pauken, the current Administrator of ACTION Agency, who is resigning to return to the private sector, has been a superior leader and I am sorry to see him leave. But I have comfort in knowing that Donna Alvarado will follow his guidance in continuing the commitment to voluntarism through the ACTION Agency.

Mr. TRIBLE. Mr. President, I am pleased to support the nomination of Donna Alvarado to be Director of ACTION. I can think of no finer candidate for this post.

She brings to this position a wealth of governmental and academic experience. She has served as Deputy Assistant Secretary of Defense, Counsel to the Senate Judiciary Committee, as well as working on a doctoral degree from the University of Oklahoma. In addition, she has served on governmental task forces on legal equality for women, women's business enterprise, employment of the handicapped and women in the services.

As Director of ACTION she will oversee volunteer programs which are intended to meet basic human needs and support the self-help efforts of low-income individuals and communities. At a time when budget deficits impinge on the ability of the Federal Government to expand its services, volunteer efforts grow in importance. And few are better able to direct that invaluable resource—the boundless good will of the American people—than Donna Alvarado.

Whatever the need, ACTION will be better able to respond. Her commitment to those who need assistance is unending and her energy without limit.

Mr. President, our elderly, our poor, and our children with special needs throughout the Nation rely on the volunteer efforts directed by ACTION. I can say without reservation that with the confirmation of the nomination of

Donna Alvarado, their future is in good hands.

Mr. DOLE. I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. DOLE. I ask unanimous consent that we return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

LAND HELD IN TRUST FOR COCOPAH INDIAN TRIBE

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of H.R. 730, a bill to declare that the United States holds in trust for the Cocopah Indian Tribe of Arizona, certain land in Yuma County, AZ, which is being held at the desk by unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the bill.

The legislative clerk read as follows:

A bill (H.R. 730) to declare that the United States holds in trust for the Cocopah Indian Tribe of Arizona certain land in Yuma County, Arizona.

The bill (H.R. 730) was considered and agreed to.

Mr. DOLE. I move to reconsider the vote.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UNITED STATES SENTENCING COMMISSION

Mr. DOLE. Mr. President, I call up H.R. 1847, a bill to amend Title 28 of the United States Code with respect to the United States Sentencing Commission.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 1847) to amend title 28, United States Code, with respect to the United States Sentencing Commission.

The PRESIDING OFFICER. Is there objection to the request for consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. DOLE. Mr. President, this bill makes two minor changes in the Sentencing Reform Act 1984, enacted last October.

Mr. THURMOND. Mr. President, I express my strong support for H.R. 1847, a bill which would make two minor changes in the Sentencing Reform Act of 1984, which was enacted last October as chapter II of the Comprehensive Crime Control Act, Public Law 98-473.

H.R. 1847 would accomplish two significant objectives. First, in response to concerns expressed by Chief Justice Burger and the Judicial Conference of the United States, it would permit senior status judges to serve as members of the Sentencing Commission. Under current law, only judges in regular active service are eligible. Although we are making this change in order to permit greater flexibility and to accommodate caseload concerns, we envision that a majority of judges on the Commission would nonetheless be in regular active service.

The second change made by H.R. 1847 would permit the Administrative Office of the U.S. Courts to make an initial appropriation request for the Commission. Current law authorizes the Chairman of the Commission to make that request. Obviously, the Chairman cannot do so at this point, since the nomination has not yet been made. In any event, in cooperation with my interested colleagues on the Judiciary Committee, and the leadership of the Appropriations Committee, I intend to offer an amendment to the first available and suitable appropriations vehicle to provide startup funds for the Commission.

One related issue about which the Judicial Conference has expressed concern is not specifically addressed in this bill, but is worthy of comment. In view of our preference that active judges serve on the Commission, we must be mindful that, in some instances, caseload situations may necessitate that Federal judges retain some portion of their caseload. In my view, this would not conflict with the mandate in the act that judges serve on the Commission in a full-time capacity. This approach was clearly endorsed in the Judiciary Committee report on the act. While it notes that members' positions are full time "[b]ecause of the complex nature of the functions of the Commission, and in order to avoid potential schedule conflicts for the members," it specifically acknowledges at least one instance in which judges might retain a portion of their caseload:

The judicial and other members may complete work on cases in progress if they are so far involved that it is impractical for the work to be turned over to another person. (S. Rept. No. 98-225 at 160 n. 385.)

Another instance where demanding circumstances might necessitate that a Federal judge retain some of his caseload would involve judicial workload burdens in particular districts.

While the Judicial Conference has endorsed deleting the "full time" requirement from the statute, I believe that the legislative history surrounding the act makes it clear that members of the Commission may devote themselves to its work on a full-time basis, while continuing to perform certain important judicial duties. Indeed, the sponsor of the separate Sentencing Reform Act, Senator KENNEDY, recently commented in a law review article:

With competent staff, 28 U.S.C. § 996, and cooperative utilization of the expertise and resources of the Federal Judicial Center and the Administration Office of the U.S. Courts, 28 U.S.C. 995(b), it may be possible for judge members to retain a portion of their caseload. Congress, however, clearly expected that the work of the Commission should not be subordinated to other work of the members and preferred a substantial full-time commitment from all initial members. (32 Fed. Bar News & J., 66 n.61.)

I want to associate myself with these remarks.

As many of my colleagues are aware, the 18-month period during which the Sentencing Commission is required to develop its recommended set of guidelines runs from the date of enactment—October 12, 1984. Thus, almost one-third of their time has expired. It is, therefore, imperative that Commissioners be appointed, and the Commission begin operations, immediately. When the Commission commences its work, the members' full attention will be needed in order to meet the deadline imposed by the Sentencing Reform Act. While circumstances may necessitate that judge members perform some other duties, I am confident that they will ensure that those activities will not interfere with their serious devotion to the crucial work of this Commission.

Mr. President, again, I express my strong support for H.R. 1847.

Mr. KENNEDY. Mr. President, I join the distinguished chairman of the Senate Judiciary Committee in supporting this legislation which makes two technical changes in order to ensure the prompt implementation of the Sentencing Reform Act of 1984, enacted last October as chapter II of the Comprehensive Crime Control Act (Public Law 98-473).

For over a decade I have sponsored legislation designed to reform the Federal sentencing process. The passage of the Sentencing Reform Act of 1984, with the close cooperation and bipartisan commitment of Senators THURMOND, BIDEN, MATHIAS and many others was a giant step forward toward fairer and more uniform Federal sentencing. The comprehensive overhaul of our present chaotic sentencing laws contained in that landmark legislation is long overdue.

We have come too far to fall short of needed sentencing reform. The Sentencing Reform Act of 1984 created a new Sentencing Commission and required it to develop sentencing guidelines by April 1986. Now almost 6 months have passed and we are only 1 year from the Sentencing Commission's statutory deadline so it is critical that Commissioners be appointed,

and the Sentencing Commission begin operations without further delay.

H.R. 1847 makes two minor amendments to the Sentencing Reform Act of 1984 designed to eliminate problems that have slowed implementation of the act.

First, as presently drafted, the Sentencing Reform Act of 1984 reserves three positions on the Sentencing Commission for Federal judges in "regular active service." This bill (H.R. 1847) would permit senior judges to be considered as well. I believe it is appropriate to make senior judges eligible for a position on the Commission, in response to concerns expressed by Chief Justice Burger and the Judicial Conference of the United States, and in order to give the President greater flexibility. The experience and talent of senior judges, especially those who have been so active in the past in seeking sentencing reform is an invaluable resource that could usefully complement the work of the active judges who I expect will comprise the majority of the judges on the Commission.

The second problem addressed in this bill has to do with funding. No funds have yet been appropriated for the Commission. The Sentencing Reform Act authorizes only the Commission to request funds, but there are no Commissioners yet to do so. This bill authorizes the Administrative Office of the U.S. Courts to request initial funding for the Commission. The availability of such startup funds is important because it will help the Commission get off to a running start under its tight deadline. In fact, I will join bipartisan efforts to further expedite initial funding of the Commission through an upcoming appropriations amendment and I applaud Chairman THURMOND's leadership in this regard.

This bill has bipartisan support in both the House, which passed the bill yesterday, and in the Senate. It is supported by the Department of Justice and the Judicial Conference. It is my understanding that the bill will remove all remaining obstacles to swift selection of a Sentencing Commission and that the selection will not be slowed by expanding the field of potential judicial nominees or by the time needed to process this legislation.

Therefore, Mr. President, I support this legislation and urge my colleagues to join me in voting for these two simple adjustments needed to launch the new sentencing system. In order to provide my colleagues with further information about the Sentencing Reform Act, I ask unanimous consent that my recent law review article referred to by Chairman THURMOND be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE SENTENCING REFORM ACT OF 1984

(By Edward M. Kennedy)

BIPARTISAN SUPPORT FOR NEEDED REFORM

The *Sentencing Reform Act of 1984* is the first comprehensive federal sentencing law and the most far reaching reform contained in the 23 chapters of the massive anti-crime package enacted at the close of the 98th Congress.[1] *The Sentencing Reform Act*, which I originally introduced in 1977,[2] will completely revamp the existing irrational federal sentencing structure, which is a national disgrace. The most dramatic change is the creation of an independent nonpartisan commission to develop sentencing guidelines for fairer and more uniform sentencing of federal offenders. Appellate review of sentences outside the guidelines will be granted to both the prosecution and the defense. Another key component is the abolition of parole, in order to guarantee that the sentence imposed will actually be the sentence served and to eliminate sentencing disparity.

These landmark changes mark the culmination of over a decade of effort and reflect a long history of bipartisan support in Congress. After extensive Congressional hearings on the *1971 Final Report* of the National Commission on Reform of Federal Criminal Laws,[3] and subsequent sentencing proposals resulting in refinement of the legislation,[4] I introduced sentencing reform legislation in the 95th Congress which overwhelmingly passed the Senate as part of a larger crime package.[5] These comprehensive sentencing provisions were carried forward in succeeding Congresses,[6] received the strong endorsement of the Attorney General's Task Force on Violent Crime in 1981,[7] and after passing the Senate by nearly unanimous vote, were finally adopted by Congress as part of the *Comprehensive Crime Control Act of 1984.*[8]

A complete overhaul of our archaic sentencing laws is long overdue. Until now, federal criminal sentencing policy has been marked by rampant inconsistency and uncertainty. Few, if any, judges back away from their sentencing responsibilities—perhaps the toughest part of their demanding jobs. But it is fair to observe that judges around the country approach the task and attempt to meet their sentencing responsibilities in a variety of ways.[9] For example, a study done for the Department of Justice reveals fundamental disagreement among federal judges even about the purposes of sentencing.[10] One-fourth of the 200 judges questioned thought rehabilitation was an extremely important goal of sentencing, while another 19% thought it was only "slightly" important. Twenty-five percent of the judges ranked "just desserts" as an extremely important goal of sentencing, while 45% thought "just desserts" was not important at all.

Past criminal sentencing has been based largely on an outmoded rehabilitation model of the criminal justice system. In theory, the judge sets the maximum term of imprisonment and the Parole Commission determines when to release the prisoner because he is "rehabilitated." Recent studies—and the serious problem of recidivism—strongly suggest that this approach has failed.[11] Throughout the criminal justice system there is now widespread doubt that the desirable objective of rehabilitation can be achieved reliably in a prison setting.[12] We know too little about human behavior to be able to rehabilitate most offenders, or even to determine when or whether a particular criminal has been rehabilitated.

Footnotes at end of article.

In the absence of statutory guidance, judges were left to apply their own subjective notions of the purposes of sentencing. Statutory sentencing ranges were often too broad, leaving federal judges free to routinely set unjustifiably different sentences for comparable offenders convicted of similar crimes.[13] One defendant might receive probation, while another—convicted of the same crime and having comparable criminal background—might be sentenced to a lengthy term in prison. In a leading study,[14] fifty federal district judges in the Second Circuit were given twenty identical files based on actual cases and asked what sentence they would impose on each defendant. The disparities were astonishing. In one extortion case, the range in sentences varied from twenty years imprisonment and a $65,000 fine, to three years imprisonment and no fine at all. Other studies in many jurisdictions confirm the existence of widespread sentencing disparity.[15] For example, a survey conducted by the U.S. Attorney for the Southern District of New York [16] found remarkable discrepancies, including: an average sentence for forgery varying from 30 months in the Third Circuit to 82 months in the D.C. Circuit, and an average sentence for interstate transportation of stolen cars varying from 22 months in the First Circuit to 42 months in the Tenth Circuit. This disparity and irrationality in sentencing practices is one of the principal causes for loss of public confidence in the criminal justice system.[17]

The lack of certainty and consistency in sentencing is exacerbated when the Parole Commission releases prisoners according to its own view of the appropriate term of imprisonment. By dividing sentencing authority between the trial judge and the Parole Commission and by pegging release to the elusive concept of rehabilitation, neither the offender, the victim nor the public can be sure of the eventual prison release date. Early release on parole is part of the discredited corrections theory that offenders can be rehabilitated in prison by tying their prison release date to the successful completion of certain vocational, education, and counseling programs within the prison. The role of the Parole Commission and the possibility of early release invite additional fluctuation in judicial sentencing by encouraging judges to keep the availability of parole in mind when they impose sentences and to sentence a defendant on the basis of when they believe the Parole Commission will release him.[18] Some judges deliberately impose relatively high sentences so that an offender is not eligible for parole until well after the incarceration period indicated as appropriate by Parole Commission guidelines.[19] Other judges, on the assumption that the offender would not be paroled before serving his full term, retain control over the release date by imposing sentences below the Parole Commission guidelines.[20]

As a consequence of the practices of the federal courts and the Parole Commission, the existing federal sentencing system lacks the sureness, uniformity, and fairness that criminal justice must provide if it is to retain the confidence and command the respect for American society. In response to this problem, an unusual bipartisan consensus emerged for basic statutory reform of criminal sentencing. With extraordinary broad-based cooperation in both the Senate and the House of Representatives, and the support of Administrations past and present, we have finally taken a giant step toward that goal.

MAJOR PROVISIONS OF THE ACT

Legislatively Prescribed Purposes

The Act gives legislative recognition for the first time to the appropriate purposes of sentencing. The four stated purposes are: (1) to provide just punishment; (2) to afford adequate deterrence to criminal conduct; (3) to protect the public from further crimes by the defendant; and (4) to provide rehabilitation in the form of educational or vocational training, medical care, or other treatment.[21] Each of the four purposes is to be considered in a particular case.[22]

The Basic Framework

All federal judges are directed to sentence with these four purposes in mind, pursuant to guidelines to be established by an independent United States Sentencing Commission.[23] An individual may be sentenced to a term of probation, a fine, or a term of imprisonment, or to a combination of a fine and probation or a combination of a fine and imprisonment.[24] An organization may be sentenced to a term of probation or a fine, or to a combination of these options.[25] Either an individual or an organization may be ordered as a part of the sentence to forfeit any interest in a racketeering syndicate,[26] to give notice to victims of a fraudulent offense,[27] or to make restitution to the victim of an offense that causes bodily injury or death or that results in damage to, or loss or destruction of, property.[28]

The Act creates a grading scheme by which each offense can be ranked according to its relative seriousness.[29] This device is used to define the maximum term of imprisonment,[30] the maximum fine,[31] the maximum term of probation,[32] and the maximum term of supervised release [33] for each grade of offense. The definition of maximum prison term does not alter current statutory maximums—the existing federal statutes still determine the maximum term of imprisonment.[34] The provision merely provides a useful scheme for future Congressional classification of criminal statutes. On the other hand, the new maximums for fines (to the extent they are greater than existing statutory levels), probation, and supervised release supersede existing law.[35]

The guidelines system is intended to treat all classes of offenses committed by all categories of offenders consistently.[36] The guidelines will be supplemented by policy statements that will address questions concerning the appropriate use of the sanctions of criminal forfeiture, notice to victims, restitution, and conditions of probation and post-release supervision. The formulation of the guidelines and policy statements will provide an unprecedented opportunity in the federal system to examine sentencing patterns as a whole to assure that the sentences imposed are consistent with the purposes of sentencing. At the same time, the use of sentencing guidelines and policy statements is intended to assure that each sentence is fair compared to all other sentences.[37]

The Sentencing Commission

The Sentencing Commission is an independent agency within the judicial branch, consisting of seven voting members appointed by the President with advice and consent of the Senate. In addition, one of the seven is to be appointed chairman with advice and consent of the Senate. The Attorney General or his designee is an ex officio, non-voting member. The Commission is directed to draft guidelines for use by federal judges, taking into consideration characteristics of offenses and offenders that appear relevant to the specific purposes of sentencing. For each federal offense, the guidelines are expected to specify a variety of appropriate sentencing ranges, depending upon different combinations of offense and offender characteristics. Development of the guidelines is subject to the public hearing process of the Administrative Procedure Act. The initial guidelines, and all subsequent modifications, are to be transmitted by the Commission to the Congress by April, 1986, for review and possible modification. Absent Congressional rejection of the guidelines, they will take effect six months later in October, 1986.[38]

Generally, the Act provides detailed guidance to the Commission, considerably more than comparable state sentencing legislation in New York, for example.[39] In areas such as serious recidivism, drug and organized crime, and first offenders, the Act provides legislative direction to the Commission as to the kind of sentence and its severity that would seem to be appropriate for the guidelines.[40] These provisions are intended to accord guidance to the Commission without circumscribing its consideration of countervailing factors. These provisions involve areas that otherwise would be likely candidates for legislatively directed mandatory sentences.

Judicial Application of the Guidelines

For each federal offense, the guidelines will specify a variety of appropriate sentencing ranges depending upon the particular history and characteristics of the defendant and the particular circumstances of the offense. Each offense, therefore, may have a dozen or so sentencing ranges specified, only one of which will fit a given case.[41]

In practice, judges will hold a sentencing hearing and determine the particular guideline range applicable to the offender and the offense.[42] They will then be expected to impose sentence within the narrow range specified. If this sentence is above or below the guideline range the judge must give specific reasons for this action.[43]

Sentencing Options

1. *Probation*—Probation is cast by the Act as a penalty in itself, rather than as a deferred penalty. A judge is required to impose as a condition of probation in a felony case that the defendant pay a fine, make restitution to the victim, or engage in community service. The judge is required, for every crime, to impose a prohibition against the defendant's committing another crime during the probationary period. A variety of potentially useful discretionary conditions of probation (including vocational training or medical or psychiatric treatment) are set forth in the Act for the consideration of the Sentencing Commission and the judges.[44]

2. *Fines*—The maximum fine levels under the Act are dramatically increased. For felonies the maximum reaches a quarter of a million dollars for an organizational defendant, although the actual amount imposed is to be predicated upon the defendant's ability to pay as well as upon the gravity of the offense and related considerations.[45] Lien procedures, like those in the tax laws, are provided to assure an effective means of collecting imposed fines.[46]

3. *Imprisonment*—The Act makes a major change in prison sentences. It moves to a determinate system, abolishing early release on parole and providing for the first time that the sentence announced by the sentencing judge will be for almost all cases the sentence actually served by the defendant, with a 15 percent credit for "good time".[47] Such sentences will not involve the artificially lengthy terms imposed today in the expectation that they will be shortened later by parole authorities. If a judge believes that a defendant should be supervised for a period after the expiration of his term of imprisonment, he may order a term of postrelease supervision.[48] Terms of imprisonment ordinarily will not be subject to later modification.[49]

4. *Collateral Sentencing Orders*—In addition to the penalties traditionally applicable, a court is empowered by the Act to order a defendant found guilty of an offense causing bodily injury, or property damage or loss, to make direct restitution to the victim of the offense, even if a term of imprisonment is also imposed.[50] This was not possible under current law. A defendant convicted of a fraud or intentional deceptive practices—a situation in which an appropriate amount of restitution might be difficult to ascertain in an ordinary sentencing hearing—may be ordered to give notice of the conviction to the victims of the offense in order to facilitate their bringing of private recovery actions.[51] Finally, the Act provides for the forfeiture of criminal property in organized crime and drug cases and thereby assures, as under existing law, for an expanded range of sentencing options in these major crime areas.[52]

Appellate Review of Sentences

To assure fairness, the Act provides an appellate process—which has no counterpart under current law—to review a sentence imposed in violation of law, as a result of an incorrect application of the sentencing guidelines, or which is unreasonably outside the range of applicable guidelines.[53] By incorporating the appeal procedures into the general structure of the guideline system, the Act assures that the extremes of sentencing that most deserve review may be called to the attention of an appellate court, without overburdening the court with challenges to sentences that are within the bounds of reasonableness. The defendant is permitted to appeal a term of imprisonment, a restrictive condition of probation, or a fine, above the range specified in the applicable guideline; he may also appeal a restitution order or a notice order.[54] The Act also permits the government, on behalf of the public, to seek review of a sentence that falls below the applicable guideline range, if the Attorney General or the Solicitor General personally approves the appeal.[55] In each situation, the standard on appeal is whether the sentence imposed is, under the circumstances, "clearly erroneous." [56]

FUTURE CHALLENGES: SELECTION OF THE GUIDELINES COMMISSION

Among the most important appointments to be made by the President in 1985 are the seven voting members of the new Sentencing Guidelines Commission. Three of the seven Commission members must be federal judges in "regular active services." [57] No more than four members may be from the same political party. Before making appointments the President is required to consult with "judges, prosecuting attorneys, defense attorneys, law enforcement officials, senior citizens, victims of crime and others interested in the criminal justice process." [58]

The Senate Report on the Act explains: "The extraordinary powers and responsibilities vested in the Commission, as well as the enormous potential for unparalleled improvement in the fairness and effectiveness of Federal criminal justice as a whole, demand the highest quality of membership.

For such a critical position, Presidential appointments based on politics rather than merit would, and should, be an embarrassment to the appointing authority . . . without superior and professional members the Commission, and indeed sentencing reform, can never achieve the progress so sorely needed."[59]

Time is short for the fledgling Commission to accomplish its task. It must write new guidelines for controlling all sentences for all federal crimes and report its initial recommendations to Congress by April, 1986. Because of the complex nature and scope of the functions of the Commission, the positions will be essentially full time jobs for the first several years[60] including members who are active federal judges.[61] Whether the new system succeeds or fails hinges on the work of the Commission. Its members must have broad knowledge of criminal law and penology and the compassion and good sense to balance the community's interests and those of the offender.

PRISON OVERCROWDING

Throughout the lengthy consideration of this legislation concerns were often expressed, and thoroughly considered, over the potential impact of the guidelines on the problem of prison overcrowding.[62] It is imperative that the new Sentencing Commission helps to avoid reasonably preventable overburdening of the federal prison system. Sentences under the new guidelines should be neither too lenient to protect the public nor so high that they will unavoidably exacerbate conditions in already overcrowded facilities. Under the Act the principal means of accomplishing this is giving Congress fair warning of the anticipated effects of the new guidelines. In addition, the Commission can encourage the use of underutilized facilities and "contract" facilities to avoid crowding that might result from imposition of appropriate sentences.

The Act directs the Sentencing Commission to "minimize the likelihood that the Federal prison population will exceed the capacity of the Federal prisons."[63] It further instructs the Commission to be mindful of the capacity of prisons, and as a starting point to ascertain the length of terms actually served under current law in order to avoid any inadvertent dislocation.[64] Further the Act calls for the Commission to recommend any changes or expansion in the nature or capacity of existing facilities that might become necessary.[65] These provisions evidence the clear Congressional intent that the guidelines should not contribute to prison overcrowding.

The Act also requires the initial guidelines, and thereafter any amendments to the guidelines, to be submitted to Congress six months before they go into effect.[66] During the inital Congressional review, the General Accounting Office is to examine the guidelines and compare their potential impact with the present system.[67] The Act requires another GAO study four years later.[68] Armed with this information Congress may act to adjust the guidelines if necessary.

The creation of a more rational sentencing system without artifical constraints in itself should help to bring prison populations in line with prison resources. Indeed, the reforms in the Act have already been effective in ameliorating prison overcrowing at the state level. Several states have recently adopted sentencing reform measures.[69] The Minnesota experience is widely regarded as a leading example of effective sentencing reform. The Minnesota legislation created a Sentencing Guidelines Commission for the state and required it to "take into substantial consideration . . . correctional resources including but not limited to the capacities of local and state correctional facilities.[70] Under its system, Minnesota became one of the few states whose prison population has actually declined.

Sentencing is the point in the criminal justice system where overcrowding conditions can most effectively be controlled.[71] It is the judge who actually commits prison beds and determines who goes to prison and for how long. Under the former non-system of ad hoc sentencing, federal prisons filled beyond capacity while making future space needs difficult to predict. This morass was compounded by the possibility of parole, which prompted judges to impose longer sentences to prevent premature release. By abolishing parole and establishing a coherent federal sentencing policy, the Act lays the groundwork for a national solution to prison overcrowding.[72]

PROSECUTORIAL DISCRETION

House Judiciary Committee Chairman Peter Rodino (D-N.J.), among others, has voiced concern that "even the most tightly drawn sentencing guidelines could be willfully or unknowingly circumvented through unfettered use of prosecutorial discretion" through plea bargaining arrangements.[73]

Under a sentencing guideline system, control of sentencing could be shifted to the prosecutor, who determines the charges brought against a defendant and thereby potentially dictates the applicable sentencing range. Persons with similar criminal histories who have committed similar offenses could still receive different sentences, depending on their success in plea bargaining.

The Act, however, contains a provision designed to bring plea bargaining into the open and to avoid possible abuses.[74] The Sentencing Commission is required to develop standards for consideration by judges in deciding whether to accept a plea arrangement. Judicial review of plea bargaining under such policy statements should alleviate potential problems. But this is an area that will have to be monitored closely, as the Act requires.[75] United States Attorneys have broad prosecutorial discretion and only imperfect standards to guide its exercise. If the new guidelines and policy statements succeed, they could point the way toward further improvements in the exercise of prosecutorial discretion.

JUDICIAL ROLE

The success of the *Sentencing Reform Act* also depends on judicial acceptance of the primary responsibility for the new system. At the institutional level, the Judicial Branch, through the Judicial Conference, must be closely involved in the selection and launching of the new Sentencing Commission.[76] At the individual level, the judges themselves must accept the restrictions of the new system on their historically wide-ranging discretion.

Although the guidelines are mandatory, the sentencing judge retains substantial discretion, especially in determining the existence of aggravating or mitigating circumstances in particular cases.[77] By expanding sentencing options the Act actually increases discretion and flexibility in some important respects. A sentence outside the applicable guideline is subject to appeal and the resulting case law will become a judicially created refinement of the guidelines. In addition, the Commission's policy statements on acceptance of plea bargaining arrangements will give judges new powers in this critical area.

CONCLUSION

The *Sentencing Reform Act of 1984* contains a comprehensive and far-reaching new approach for the federal law of sentencing, setting forth the purposes to be served by the sentencing system and the kinds and lengths of sentences to be imposed. The new guideline system will reduce the unacceptable disparity of punishment that plagues the federal system, and will help to assure sentences that are fair—and perceived to be fair—to offenders, victims, and society.

FOOTNOTES

[1] *The Comprehensive Crime Control Act of 1984*, Title II of H.J. Res. 648, Public Law 98-473, 98 Stat. 1837, was passed as an amendment to the Continuing Resolution (H.J. Res. 648) and signed by the President on October 12, 1984.

Attorney General William French Smith noted the importance of this major sentencing reform: "Of the improvements [under consideration by the Senate Judiciary Committee] . . . perhaps the most important are those relating to sentencing criminal offenders. These provisions introduce a totally new and comprehensive sentencing system that is based upon a coherent philosophy." Criminal Code Hearings before the Senate Committee on the Judiciary on S. 1630, 97th Cong., 1st. Sess. Part XVI at 11760,65 (1981).

[2] S. 1437, 95th Cong. 1st Sess., 123 Cong. Rec. 13059 (1977). In 1975 I worked with Senator John McClellan on different sentencing reform proposals and introduced the predecessor to this legislation. S. 2699, 94th Cong. 2nd Sess. *See*, Kennedy, *Criminal Sentencing: A Game Of Chance*, 60 Judicature 208 (1976). *See also* Kennedy, *Reforming the Federal Criminal Code: A Congressional Response*, 8 N.C. Cent. L.J. 1 (1977); Kennedy, *Introduction To A Symposium On Criminal Code Reform*, 47 Geo. Wash. L. Rev. 451 (1979); Kennedy, *Introduction To A Symposium on Sentencing (Part I)*, 7 Hofstra L. Rev. 1 (979); Kennedy, *Toward A New System Of Criminal Sentencing: Law With Order*, 16 Amer. Crim. L. Rev. 353 (1979); Finberg, *Sentencing Reform and the Proposed Federal Criminal Code*, 5 Hamlin L. Rev. 217 (1982).

[3] National Commission on Reform of Federal Criminal Laws, *Final Report* (1971) *reprinted* in *Senate Judiciary Committee Crime Subcommittee Criminal Code Hearings*. Part I at 159-514, 95th Cong., 1st Sess. (1977) Washington, D.C. U.S. Gov't Printing Office.

This Commission, which came to be known as the Brown Commission after its chairman, Edmund G. Brown, Sr., former Governor of California, was proposed by President Lyndon Johnson's "National Strategy Against Crime" in his March 9, 1966 message to Congress. 112 Cong. Rec. 5368 (1966), established by P.L. 89-901, 80 Stat. 1516.

[4] Senate Comm. on the Judiciary, Legislative Calendar, S. Doc. No. 554, 93rd Cong., 1st Sess. 83, 6046 (1973); S. 1, 94th Cong. 1st Sess., 121 Cong. Rec. 211 (1975).

[5] S. 1437, 95th Cong. 1st Sess., 123 Cong. Rec. 13059 (1977). Introduced on May 2, 1977, reprinted at 124 Cong. Rec. 9 (1978), and favorably reported by the Senate Judiciary Committee, S. Rep. No. 605, 95th Cong., 1st Sess. 1977, and passed by the Senate 72-15, on January 30, 1978, 124 Cong. Rec. 1345-465 (1978).

[6] S. 1722, 96th Cong., 1st Sess., 125 Cong. Rec. 23,537 (1979), S. Rep. No. 553, 96th Cong., 2d Sess. (1980); S. 1630, 97th Cong. 1st Sess., 128 Cong. Rec. 522 (daily ed. Jan. 25, 1982), S. Rep. No. 307, 97th Cong., 1st Sess. (1981).

[7] See *Attorney General's Task Force on Violent Crime, Final Report* 56-57 (1981). The proposals were included in S. 2572, 96th Cong., 2d Sess. (1982) and passed by the Senate, 95-1, on September 30, 1982.

[8] My bill, S. 668, 98th Cong., 1st Sess., 129 Cong. Rec. S. 2090 (daily ed. March 3, 1983), was substantially included in the Administration's 16 title crime package introduced on March 16, 1983 by Senators Thurmond and Laxalt, S. 829, 98tn Cong., 1st Sess., 129 Cong. Rec. S. 3096 (daily ed. March 16, 1983). S. 668 was also contained, except for technical differences, in the later compromise package. S. 1762, reported on August 4, 1983, S. Rep. No. 225, 98th Cong., 1st Sess. (1983) and passed by the Senate, by

a vote of 91-1, 130 Cong. Rec. S. 741 (daily ed. February 2, 1984). These sentencing provisions were ultimately adopted, essentially intact, in the *Comprehensive Crime Control Act of 1984*, H.J. Res. 648, P.L. 98-473 (*supra* note 1). For a summary of parallel developments in the House over the past decade *see, e.g.*, Rodino, *Federal Criminal Sentencing Reform* 11 J. of Legis. 237 (1984).

[9] United States District Judge Joseph L. Tauro's concise and thoughtful article is instructive in this regard. Tauro, *Sentencing: A View From the Bench*, 9 New England Journal on Criminal and Civil Confinement 323 (1983). Many former and active United States Judges such as Marvin E. Frankel, Harold R. Tyler, Morris Lasker, Jon O. Newman, and former Attorney General Griffin B. Bell have been the most articulate spokesmen for sentencing reform. *See, e.g.*, Report on S. 1722, S. Rep. No. 553, 96th Cong., 2d Sess. 912 (1980); Report on S. 668, S. Rep. No. 223, 98th Cong., 1st Sess. 1, 61 (1983). *See, e.g.*, Frankel, *Criminal Sentences: Law Without Order* (1972); Frankel, *Panel on Sentencing Provisions in the Proposed Federal Code*, 80 F.R.D. 151, 153 (1979); Laskar, *Presumption Against Incarceration*, 7 Hofstra L. Rev. 243 (1979); Tyler, *Sentencing Guidelines: Control of Discretion in Federal Sentencing*, 7 Hofstra L. Rev. 11 (1978); Newman, *A Better Way to Sentence Criminals*, 55 A.B.A.J. 1562, (1977). *Senate Judiciary Crime Subcommittee Criminal Code Hearings, supra* note 3, part XIII at 8595-96 (Testimony of Griffin B. Bell), at 8973 (Testimony of Harold R. Tyler), at 8973 (Testimony of Morris Lasker).

[72] An obvious—and obviously impractical—way to end prison overcrowding is to build more prisons. *See* Edward M. Kennedy, *Prison Overcrowding: The Law's Dilemma*, The Annals of the American Academy of Political and Social Sciences, Vol. 478, March 1985 (forthcoming).

[73] Rodino, *Federal Criminal Sentencing Reform*, 11. J. of Legis. 218, 232 (1984). *See* the Comptroller General of the U.S., *Reducing Federal Judicial Sentencing and Prosecuting Disparities* 15, 16 (1979). The question was initially raised by Prof. Stephen J. Scholhofer, *see* Schulhofer, *Prosecutorial Discretion and Federal Sentencing Reform*, 53-72 (Report for the Federal Judicial Center 1979); *Criminal Code Hearings, supra*, Part XIV at 10101 (testimony of John Cleary).

[74] 28 U.S.C. § 994(a) 2 (D). *See* discussion in S. Rep. No. 223, *supra* note 13 at 60, 164.

[75] Pub. L. 98-473, Sec. 236(a) (2). 98 Stat. 1837 (October 12, 1984).

[76] *See, e.g.*, 28 U.S.C. § 991(a) (judge members selected after consideration of list recommended by the Judicial Conference of the United States); 28 U.S.C. § 991(n) (consultation and reports from the Judicial Conference); 28 U.S.C. § 995(b) (utilization of existing resources of the Administrative Office of the United States and the Federal Judicial Center).

[77] It is intended that the guidelines system actually enhance, rather than detract from, the individualization of sentences. *Id.* at 49-50, 158. *See* Newman, *supra* note 9, at 1566 ("[E]ven with guidelines, judges will still have to make difficult sentencing decisions, trying to reconcile as best they can the tensions between the virtues of more uniformity and the insistent demands for individual consideration of each defendant's case.")

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill was ordered to a third reading, read the third time, and passed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION FOR PRODUCTION OF DOCUMENTS

Mr. DOLE. Mr. President, I send to the desk a resolution in behalf of myself and the distinguished minority

leader and ask for its immediate consideration.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 128) to authorize production of documents by the Senate Permanent Subcommittee on Investigations.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. DOLE. Mr. President, since 1981, the Permanent Subcommittee on Investigations has been investigating allegations of improper practices in the Hotel Employees and Restaurant Employees International Union. The Senate previously agreed to two resolutions to authorize the subcommittee to provide records of this investigation to Federal investigative agencies, Senate Resolution 523 of the 97th Congress and Senate Resolution 345 of the 98th Congress.

The subcommittee has referred the testimony of four witnesses to the Department of Justice to determine whether those witnesses should be prosecuted for perjury before the subcommittee during this investigation. Documents relating to their testimony may assist the Department in making a proper determination of that issue and about other potential criminal matters, and the Department accordingly has requested access to records of the subcommittee. The subcommittee has also submitted its report on this investigation to the Senate, Senate Report 98-595, and anticipates that law enforcement agencies may make further requests for subcommittee documents concerning the investigation. Senators ROTH and NUNN, the chairman and the ranking minority member of the subcommittee, would like to be in a position to respond to authorized requests for pertinent subcommittee records.

The enclosed resolution would authorize the chairman and the ranking minority member, acting jointly, to provide the necessary records and related documents. The subcommittee retains discretion to withhold confidential matters.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 128) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 128

Whereas, the Permanent Subcommittee on Investigations has been investigating allegations of improper practices in the Hotel Employees and Restaurant Employees International Union;

Whereas, the Subcommittee has asked the Department of Justice to determine whether violations of the federal perjury statute, 18 U.S.C. § 1621, occurred during the Subcommittee's proceedings and, the Department of Justice has requested access to records of the Subcommittee for this and for their investigatory purposes;

Whereas, by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by administrative or judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that documents, papers, and records under the control of or in the possession of the Senate are needful for investigation of possible offenses or for use in any court for the promotion of justice, the Senate will take such action as will promote the ends of justice consistently with the privileges and rights of the Senate: Now, therefore, be it

Resolved, That the Chairman and Ranking Minority Member of the Permanent Subcommittee on Investigations, acting jointly, are authorized to provide to law enforcement authorities records of the Subcommittee relating to its investigation of the Hotel Employees and Restaurant Employees International Union.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PRINTING OF COMPILATION ENTITLED "MAJORITY AND MINORITY LEADERS OF THE SENATE"

Mr. DOLE. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 129) relating to the printing of the compilation entitled "Majority and Minority Leaders of the Senate" as a Senate document.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 129) was agreed to.

The resolution reads as follows:

S. RES. 129

Resolved, That the compilation entitled "Majority and Minority Leaders of the Senate", prepared by the Senate Parliamentarian Emeritus, Floyd M. Riddick, shall be printed, with any revisions and certain tables, as a Senate document, and an additional 2,000 copies shall be printed for distribution by the Secretary of the Senate.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDERS FOR THURSDAY

ORDER FOR RECESS UNTIL THURSDAY, APRIL 4, 1985

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until noon, Thursday, April 4, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF SENATOR PROXMIRE

Mr. DOLE. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order of 10 minutes each, the Senator from Wisconsin [Mr. PROXMIRE] be recognized under a special order for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER DESIGNATING A PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, following the special order just identified, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond the hour of 1 p.m., with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

POSSIBLE CONSIDERATION OF CERTAIN NOMINATIONS ON TOMORROW

Mr. DOLE. Following the conclusion of morning business, Mr. President, it is the intention of the majority leader to turn to the Executive Calendar for two nominations, Rosemary M. Collyer, of Colorado, to be General Counsel of the National Labor Relations Board, and Donald Ian Macdonald, of Florida, to be Administrator of the Alcohol, Drug Abuse, and Mental Health Administration. I would indicate that would only be in the event they have been cleared on both sides.

(Later the following occurred:)

Mr. DOLE. Mr. President, I understand that the distinguished minority leader would permit me to add two additional nominations to the list, General Doolittle and General Eaker, to be considered in the executive items in addition to the two nominations previously agreed to?

Mr. BYRD. Mr. President, reserving the right to object—I do not intend to object—may I ask the distinguished majority leader, in the event rollcall votes were entered on any of these nominations that will have been cleared by tomorrow, will those rollcall votes occur tomorrow?

Mr. DOLE. I can announce to my colleague there will be no rollcall votes tomorrow on any matter.

Mr. BYRD. I have no objection, Mr. President.

Mr. DOLE. And that would be also, I might say to the distinguised minority leader, only if these are cleared. If

there is objection, we will put them over.

Mr. BYRD. I thank the majority leader.

Mr. DOLE. Mr. President, I understand that we do not have the nominations; they have not been received as yet.

The PRESIDING OFFICER. Without objection, the two additional nominations are added.

Mr. DOLE. Mr. President, I understand that they can be added to the list to be cleared tomorrow and approved if they are cleared and if they do not require rollcall votes.

Mr. BYRD. Right.

The PRESIDING OFFICER. The Chair agrees with the majority and minority leaders.

(Conclusion of later proceedings.)

INTENTION TO ADJOURN UNTIL MONDAY, APRIL 15, AT 12 NOON

Mr. DOLE. Mr. President, following the conclusion of tomorrow's session, it would be the intention of the majority leader to adjourn the Senate over until Monday, April 15, 1985, at 12 noon.

SENATE CONCURRENT RESOLUTION 38—PROVIDING FOR AN ADJOURNMENT OF THE CONGRESS FROM WEDNESDAY, APRIL 3, OR THURSDAY, APRIL 4, 1985, UNTIL MONDAY APRIL 15, 1985

Mr. DOLE. Mr. President, I send a concurrent resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 38) providing for an adjournment of the Senate and the House of Representatives from Wednesday, April 3, or Thursday, April 4, 1985, until Monday, April 15, 1985.

The resolution (S. Con. Res. 38) was considered and agreed to, as follows:

S. CON. RES. 38

Resolved by the Senate (the House of Representatives concurring), That when the Senate adjourns on Wednesday, April 3, 1985, or Thursday, April 4, 1985, pursuant to a motion made by the Majority Leader, or his designee, in accordance with this resolution, and that when the House of Representatives adjourns on Wednesday, April 3, 1985, or Thursday, April 4, 1985, pursuant to a motion by the Majority Leader, or his designee, in accordance with this resolution, they stand adjourned until 12:00 o'clock noon on Monday, April 15, 1985.

Mr. DOLE. I move to reconsider the vote.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDERS FOR MONDAY, APRIL 15, 1985

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate convenes on April 15, 1985, the reading of the Journal be dispensed with; that no resolutions come over under the rule; that the call of the calendar be dispensed with; and that, following the recognition of the two leaders under the standing order, there be a special order in favor of the Senator from Wisconsin [Mr. PROXMIRE] not to exceed 15 minutes, to be followed by a period for the transaction of routine morning business not two extend beyond the hour of 1 p.m., with statements limited therein to 5 minutes each; and provided further that the morning hour be deemed to have expired.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORITY FOR COMMITTEES TO FILE REPORTS ON WEDNESDAY, APRIL 10, 1985

Mr. DOLE. Mr. President, I ask unanimous consent that during the adjournment of the Senate, the committees be authorized to file reports between the hours of 9 a.m. and 3 p.m. on Wednesday, April 10, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move that the Senate stand in recess until 12 noon tomorrow, Thursday, April 4, 1985.

The motion was agreed to, and at 7:40 p.m., the Senate recessed until tomorrow, Thursday, April 4, 1985, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate April 3, 1985:

DEPARTMENT OF STATE

Charles A. Gillespie, Jr., of California, a career member of the Senior Foreign Service, class of Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Colombia.

CONFIRMATIONS

Executive nominations confirmed by the Senate April 3, 1985:

ACTION AGENCY

Donna M. Alvarado, of Virginia, to be Director of the ACTION Agency.

DEPARTMENT OF STATE

Faith Ryan Whittlesey, of Pennsylvania, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Switzerland.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

THE JUDICIARY

Thomas J. Aquilino, Jr., of New York, to be a judge of the U.S. Court of International Trade.

Frank H. Easterbrook, of Illinois, to be U.S. circuit judge for the seventh circuit.

James F. Holderman, Jr., of Illinois, to be U.S. district judge for the northern district of Illinois.

Melvin T. Brunetti, of Nevada, to be U.S. circuit judge for the ninth circuit.

Howell Cobb, of Texas, to be U.S. district judge for the eastern district of Texas.

Edith H. Jones, of Texas, to be U.S. circuit judge for the fifth circuit.

George La Plata, of Michigan, to be U.S. district judge for the eastern district of Michigan.

Ronald E. Meredith, of Kentucky, to be U.S. district judge for the western district of Kentucky.

Alice M. Batchelder, of Ohio, to be U.S. district judge for the northern district of Ohio.

Herman J. Weber, of Ohio, to be U.S. district judge for the southern district of Ohio.

Carol Los Mansmann, of Pennsylvania, to be U.S. district judge for the third circuit.

J. Thomas Greene, of Utah, to be U.S. district judge for the district of Utah.

Carolyn R. Dimmick, of Washington, to be U.S. district judge for the western district of Washington.

Mark L. Wolf, of Massachusetts, to be U.S. district judge for the district of Massachusetts.

William G. Young, of Massachusetts, to be U.S. district judge for the district of Massachusetts.

Ann C. Williams, of Illinois, to be U.S. district judge for the northern district of Illinois.

Walter K. Stapleton, of Delaware, to be U.S. circuit judge for the third circuit.

Charles C. Lovell, of Montana, to be U.S. district judge for the district of Montana.

IN THE COAST GUARD

Coast Guard nominations beginning James Adase, and ending George F. Hillegas, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on March 20, 1985.

HOUSE OF REPRESENTATIVES—*Wednesday, April 3, 1985*

The House met at 3 p.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We ask for Your blessing, Almighty God, not because we are worthy, but because You have promised to love us as we are. In spite of our faults we yet turn to You, O God, that You will forgive our wrong acts or selfish deeds, and turn us to the paths of new life and good works. Help us not to be content with the ordinary, but allow us to do what is pleasing in Your sight and worthy of our calling; as Your people. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. STRANG. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. STRANG. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 246, nays 155, answered "present" 3, not voting 28, as follows:

Mr. SENSENBRENNER and Mrs. ROUKEMA changed their votes from "yea" to "nay."

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 74. Joint resolution to designate the week of September 8, 1985, as "National Independent Retail Grocer Week."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 1239) entitled "An act making urgent supplemental appropriations for the fiscal year ending September 30, 1985, for emergency famine relief and recovery in Africa, and for other purposes."

The message also announced that the Senate agree to the amendments of the House of Representatives to the amendments of the Senate numbered 2, 6, 8, 9, and 14 to the above-entitled bill.

□ 1520

VOTING RECORD OF REPRESENTATIVE NATCHER

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, an important milestone in legislative history was reached yesterday.

Representative WILLIAM H. NATCHER of Bowling Green, KY, has never missed a day or rollcall vote since he has been a Member of Congress.

BILL NATCHER first took the oath of office on January 6, 1954. Since that time, he has cast 9,960 rollcall votes and answered 4,041 quorum calls, making a total of 14,001 rollcalls. Yesterday, on April 2, 1985, on rollcall No. 44, BILL NATCHER cast his 14,000th rollcall.

May his example of constancy and dedication be a light in the darkness of political negativism and a continuing inspiration to us all.

PERMISSION FOR SUBCOMMITTEE ON ADMINISTRATIVE LAW AND GOVERNMENT RELATIONS OF COMMITTEE ON THE JUDICIARY TO SIT TODAY DURING THE 5-MINUTE RULE

Mr. SAM B. HALL, JR. Mr. Speaker, I ask unanimous consent that the Subcommittee on Administrative Law and Government Relations of the Committee on the Judiciary be permitted to sit today, Wednesday, April 3, 1985, while the House is considering amendments under the 5-minute rule.

The SPEAKER pro tempore (Mr. MOAKLEY). Is there objection to the request of the gentleman from Texas?

Mr. WALKER. Mr. Speaker, reserving the right to object, I do so only to inquire of the gentleman whether or not this has been cleared with the minority.

Mr. SAM B. HALL, JR. Mr. Speaker, if the gentleman will yield, it has been cleared with the minority.

Mr. WALKER. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

STOP PROLIFERATION OF OFFICIAL RESIDENCES BEFORE IT STARTS

(Mr. PETRI asked and was given permission to address the House for 1 minute.)

Mr. PETRI. Mr. Speaker, evidently the search is on for an official residence for the Secretary of State, to be donated to the Government by some wealthy individual. I suppose there was some justification for an official residence for the Vice President, especially as it is located on Government property. But let us think twice before carrying this residence proliferation any further.

If the Secretary of State has a grand residence provided free of charge, can we deny this same perk to the Secretary of Defense? Surely he has equal importance and security concerns. And how about the Secretary of the Treasury? He'll want and deserve a lovely residence, too. And the Director of the CIA certainly has security problems as great as anyone's. But then, you can't have two distinct levels of the Cabinet—the haves and the have-nots. By and by, all major officials, and maybe the Speaker of the House, too, will hold forth like great lords in grand ducal palaces scattered about the city.

Mr. Speaker, this is a prospect totally inappropriate to a democracy. And don't think it is costless to the taxpayers either. The wealthy donors of these mansions are going to take charitable deductions based on inflated valuations, avoid capital gains taxes, and cost the rest of us a bundle in reduced revenues.

So before we create a new class of great princes and dukes in our midst, let's stop this residence proliferation before it starts.

PRESIDENT OF COLOMBIA OPPOSES MILITARY INTERVENTION IN CENTRAL AMERICA

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, we were honored today by a visit from the President of Colombia, Belisario Betancur, who is one of the leaders of the Contadora group that is trying to bring about a political solution to the hostilities in Central America.

One thing that President Betancur said which will be of interest to all of us in this body is—and I quote—that "military intervention, from whatever source, will not put an end to the conflict in Central America. It will only masticize it."

Mr. Speaker, the same message was heard in this Chamber just a few weeks ago from President Alfonsín of Argentina. I hope Mr. Reagan gets the message in time to change his militaristic policy in Central America.

THE McINTYRE CONTROVERSY

(Mr. McCANDLESS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCANDLESS. Mr. Speaker, I rise today to address what surely has to be one of the most shameful chapters in the history of the House of Representatives. The refusal of this body to seat the duly elected, and State-certified winner of Indiana's Eighth Congressional District would be noteworthy in a totalitarian society. In a democracy such as ours, it is no less than unthinkable.

The facts of the case are clear. Rick McIntyre won the election by 34 votes. The recount increased Mr. McIntyre's lead to 418 votes. The recount was conducted by three people on each recount commission in 15 counties. In 9 of the 15 the commissions were made up of two Democrats and one Republican. Of the ballots that were disallowed in the recount, 96 percent of them came from counties controlled 2-1 by Democrats. No claims of fraud or irregular procedure have been made.

Meanwhile, through no fault of their own, 500,000 people in Indiana have no voice in the House of Representatives. This is wrong, Mr. Speaker, and Mr. McIntyre should be seated.

NEWLY INTRODUCED BILL WOULD ADDRESS PROBLEM OF HAZARDOUS WASTE TREATMENT

(Mr. TORRES asked and was given permission to address the House for 1 minute.)

Mr. TORRES. Mr. Speaker, I am introducing a bill today to encourage the construction of environmentally safe hazardous waste facilities.

My legislation does a number of things: It encourages businesses to reduce or treat the waste they generate. It encourages the safe transportation of hazardous waste. And it coordinates the work of the Federal agencies when they have to respond to an emergency.

Mr. Speaker, it is not enough to pass legislation, as we did last year, to phase out the use of landfills for hazardous waste disposal. We also need to encourage alternative disposal methods.

Similarly, it is not enough to pass Superfund legislation this year, as I hope we do. We also need to stop transporting waste—long distances and in poorly inspected trucks—from one leaking site to other landfills.

Mr. Speaker, my legislation hastens the day when all hazardous waste landfills can be closed, and treatment facilities can be built where the waste is generated. We cannot afford to wait much longer.

IN SUPPORT OF PRESIDENTIAL LINE ITEM VETO AUTHORITY

(Mr. GALLO asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. GALLO. Mr. Speaker, today I rise to support congressional approval of a constitutional amendment to give the President line item veto authority.

It is clear that reducing the Federal deficit must be a top priority of this Congress and the administration. This unreasonable Federal deficit holds the potential to destroy our economic recovery and threaten future economic viability. Our future must be built on a solid foundation of sound management and lean Government.

In order to bring the deficit under control, we must consider new ways to restrain spending. Raising taxes is simply not the answer. We should, instead, limit Federal spending by granting line item veto authority on appropriations bills to the President. With a Presidential line item veto, the U.S. Government would be held to the same standards as those of 43 of our States.

Many of these same States have also managed to balance their budgets. The power to restrain big spenders is one which has worked very well for the State of New Jersey and I believe would work equally well for the Federal Government.

Under present law, the President is reluctant to exercise his veto power because he has only the power to veto an entire appropriations bill which may cover spending for literally hundreds of programs, most of which are necessary and worthwhile. There are, however, those items that would not stand the test of individual votes. Granting the authority of line item veto to the President would provide our constituents with the needed assurance of the necessity of Federal expenditures.

I, therefore, call upon my colleagues on both sides of the aisle to join me as a cosponsor of House Joint Resolution 49, as introduced by my distinguished colleagues, Mr. ARCHER, Mr. HALL, and Mr. KEMP. House Joint Resolution 49 proposes a constitutional amendment to give the President line item veto authority on appropriations bills.

□ 1530

U.S. PRISONERS ALIVE IN SOUTHEAST ASIA

(Mr. HENDON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HENDON. Mr. Speaker, Pvt. Robert Garwood, who returned to the United States from Vietnam in 1979, has made available to the Wall Street Journal and more recently to me information showing U.S. prisoners of war alive in Communist prisons in Southeast Asia in the late 1970's.

Lt. Gen. Eugene Tighe, former director of U.S. military intelligence, has said publicly that Private Garwood's statements "don't sound unrealistic at all" and that some of Garwood's information coincides with data General Tighe saw while he was Director of the Defense Intelligence Agency.

Mr. Speaker, I want to share with you and my colleagues a statement that I made to the press recently, and it is this: Some of the information Private Garwood has given to me is a virtual carbon copy of information our Government has, showing a large number of U.S. prisoners of war in captivity at a very specific location in Southeast Asia in August of 1982. The source of that 1982 report passed two Government administered lie-detector tests showing he was telling the truth.

To repeat, Mr. Speaker and my colleagues, Private Garwood's information is a virtual carbon copy of that report.

Isn't it time, Mr. Speaker, to bring these brave men home?

ROTUNDA CEREMONY TO REMEMBER VICTIMS OF HOLOCAUST

(Mr. ANDREWS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANDREWS. Mr. Speaker, last evening this House passed a resolution allowing for a rotunda ceremony to commemorate the victims of the Holocaust. This observance will be an important statement of our Nation's moral leadership.

We are the only Nation in the world besides Israel which has an annual observance in memory of the victims of the Holocaust. It serves as an expression of the commitment of the American people and their Government, and our recognition that only through remembrance and study of what happened and why can we prevent the heinous crime of genocide from occuring again.

Beyond this, however, the days of remembrance honor those who survived the horrors of the concentration camps and came to America to build new lives. These people are loyal and productive citizens of our Nation. They are active participants in the democratic process. Their contributions to the national heritage, culture, and economy have enriched us all. Their journey from survival in the death camps to great and productive lives in their new homes is a testament to the immense strength of the human spirit, and the capacity to do good that exists in all of us.

BOOSTING U.S. FOOTWEAR

(Mr. McKERNAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McKERNAN. Mr. Speaker, since 1981, there has been a 50-percent increase in foreign shoes entering this Nation. Imports now account for more than 70 percent of U.S. sales.

In Maine, employment in the footwear industry has dropped by 27 percent since 1981. In the last year alone, 32 footwear manufacturers have closed their doors or have reduced their operations, resulting in a job loss of 4,200.

The International Trade Commission is holding a hearing later this month as part of its renewed investigation of how footwear imports have affected the domestic industry. And today, several of my colleagues in the congressional footwear caucus and I are introducing legislation that demonstrates our concern for the industry's future. The American Footwear Industry Recovery Act of 1985 would limit footwear imports for an 8-year period to about half of the U.S. market. This would ensure that domestic manufacturers in Maine and elsewhere have time to recover and compete on a fair basis with importers.

I urge my colleagues to support this very important legislation.

FEDERAL SUPPLEMENTAL COMPENSATION PROGRAM

(Mr. EDGAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDGAR. Mr. Speaker, yesterday we passed a temporary extension of the Federal supplemental compensation program which expired on March 31. I am pleased that this temporary extension was passed, but further action is still needed by the House.

In my home State of Pennsylvania, unemployment levels are still above the national average. The problem of long-term unemployment continues to grow worse. Throughout the State, especially for communities dependent on steel, coal, and textiles, recession and joblessness continue. Over the last several years in my own district, hundreds of workers have lost their jobs at Westinghouse's Lester plant; the plant will close down in 2 years.

Dramatic industrial and demographic changes will cause the number of discouraged and dislocated workers to increase even more in Pennsylvania and throughout the Nation.

The President has said he will veto an extension of FSC, there is great pressure to reduce the budget deficit, and that the Senate is reluctant to act. However, it is my view that the House of Representatives must take the lead in standing up for the workers and communities devastated by these economic forces.

I support the efforts of Congressmen PEASE, CLINGER, and others to

make long-term improvements in the Federal component of the unemployment compensation program to address this critical situation. I look forward to working with my colleagues toward this end.

IN NICARAGUA 114 MEMBERS OF OPPOSITION IMPRISONED IN ZONA FRANCA PRISON

(Mr. WEBER asked and was given permission to address the House of 1 minute.)

Mr. WEBER. Mr. Speaker, I have just returned from a very enlightening 4-day tour of El Salvador, Nicaragua, and Honduras, with our colleague, the gentleman from California [Mr. DORNAN].

Mr. Speaker, while in Nicaragua, I was horrified to learn that the Sandinista government has imprisoned 114 members of the opposition Social Christian Party in the Zona Franca Prison near Sandina Airport. This information came to me not from Contra guerrillas, Mr. Speaker, but from three members of recognized opposition parties in the independent press in Managua.

Furthermore, I was informed that in an effort to force false concessions from these political prisoners, the Sandinistas have undertaken an incredible practice of threatening to imprison these political prisoners with deathly ill tuberculosis patients.

Furthermore, I learned that they have carried out this threat in certain circumstances.

Mr. Speaker, this gestapo-style tactic should fill all of us, regardless of our view on the Central American situation, with the utmost revulsion and I call on my colleagues on both sides of the aisle to join me in demanding that the Sandinista government end this incredible human rights abuse.

H.R. 700 IS NOT A CIVIL RIGHTS BILL

(Mr. ARMEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ARMEY. Mr. Speaker, supporters of H.R. 700, the Civil Rights Restoration Act of 1985, will tell you they have the answer to the problems faced by minorities in America. They are wrong.

H.R. 700 is not a civil rights bill. A better name for it would be the Comprehensive Federal Intrusion Act. Under the aegis of civil rights, it extends the hands of the Federal Government into almost every aspect of our economy. Small business, small farms, ranches, and schools, would be burdened by intrusive and unnecessary regulations.

Today I am offering an alternative to H.R. 700, the Minority Opportunity Restoration Act, which addresses the real problems faced by minorities. My bill offers enterprise zones to help rebuild inner cities, the youth opportunities and ways to help young people compete in the labor market, urban homesteading to improve families as well as neighborhoods, and education vouchers to allow the less privileged a chance to opt for a better education.

The Minority Opportunity Restoration Act will give minorities an opportunity to prosper and build for themselves, rather than remain under the oppressive hand of the Federal Government.

EXERCISE OF RIGHT TO EXPRESS POINTS OF VIEW

(Mr. STRANG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STRANG. Mr. Speaker, I rise with some sadness to read from the CONGRESSIONAL RECORD of April 2 on page H1734 some remarks addressed to us by our majority leader, the distinguished gentleman from Texas, Mr. WRIGHT. It says, and I quote:

> Today in 1 minute speeches Members of the Republican freshman class took practically an hour just to make speeches to sell their point of view.

Mr. Speaker, that is not the kind of leadership that I came here to get. We have a right to exercise our point of view under the rules of this House, and I am deeply disappointed.

MARXIST TYRANNY IN NICARAGUA

(Mr. LIVINGSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LIVINGSTON. Mr. Speaker, the gentleman from Minnesota [Mr. WEBER] just confirmed the lead article of this morning's Washington Times that that bastion of democracy and enlightened liberal thought, the Marxist government of Nicaragua, has just imprisoned 114 of its outspoken opponents.

So this was what that farce of an election in November was for. The Sandinista tyrants put on a happy face to the world, take a stab at professed pluralism, and use the election as an opportunity to uproot those who through peaceful means threaten the Sandinistas' grip on an innocent nation.

It is hard to see a silver lining in such an ominous cloud, but if there is one perhaps it is that the supporters of the Sandinistas here in Congress will find it a little harder to explain away these new acts of tyranny of the Marxist despots. And it is one more reason we should do all in our power to support the Nicaraguan freedom fighters.

ATA NAMES 1985 TRUCKDRIVER OF THE YEAR

(Mrs. BYRON asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BYRON. Mr. Speaker, in this day and age when we hear nothing but so many problems and horror stories, I rise today to share with my colleagues a story of which I am very proud.

I have a constituent, John Howard Chamberlain, age 45, that has been honored today by the American Trucking Association as the driver of the year. Mr. Chamberlain, who resides in Westminster, MD, drives for the Giant Food Co. He has logged over 2 million miles of accident-free driving on our highways, and his aim is to increase that by a few more million miles to 3 million or 4 million miles.

I would just like to share with my colleagues this achievement of a fine, outstanding Marylander.

BEQUESTS FOR THE CHILDREN

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, people my age are the children of a very special generation of Americans, who led us out of the Great Depression, and to victory in World War II. For both of these great achievements, our leaders had to borrow. In so doing, they added $200 billion to the national debt.

All our lives, we—their children—are having to pay interest on that debt. Until we began adding debt of our own, the total cost of our inherited debt was roughly $7 billion per year. This was a small price to pay for the prosperity and freedom these achievements made possible.

Now we are the Nation's leaders. Under our stewardship, the national debt will grow by at least $2 trillion—$3 trillion, if we are not careful. All their lives, our children will have to pay interest on that debt. Every year, it will cost them roughly $200 billion.

Adjusted for inflation, that's five times the debt burden our parents left us. And what great achievements did this buy, that will endure in our children's memories?

ODE TO VILLANOVA

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker—

I rise today
To honor a team,
The Villanova Wildcats,
Who now reign supreme!

They captured the prize
Many others had sought.

A team of destiny;
They were not to be caught.
Stars are they all,
McLain and McClain, Jensen and Pressley.
But the brightest star of all—the MVP—
Is a guy from the Bronx named Ed Pinckney.
For the past four years
He has anchored his team
And we, from the Bronx, are proud, indeed,
That E-Z Ed has achieved his dream.
A word of praise
Must also go
To that fiery Italian,
Coach Rollie Massimino.
The Wildcats were told
It could not be done.
But the world was wrong;
Villanova is Number One!

UNITED STATES-JAPAN TRADE IMBALANCE

(Mrs. JOHNSON asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. JOHNSON. Mr. Speaker, some have termed Japan's recently announced intention to increase auto exports to the United States by 25 percent as "unfortunate," "poorly timed," and "a miscalculation."

Others consider it an outrageous act of arrogance and greed from a close ally whose economy we helped rebuild and whose security we share in maintaining.

Faced with a staggering $123 billion trade deficit, nearly one-third of it with Japan, Americans are reevaluating our trade relationships and policies in search of answers.

The swift Japanese action to take advantage of expired auto quota agreements with the United States has highly charged the current trade talks on opening Japan's telecommunications market.

Their unabashed auto market-grab and intransigence in negotiations have taunted harsh retaliation against Japanese products in this country if U.S. demands for market access are not met.

Do Japanese trade officials really believe reducing the number of technical standards required for approval of telecommunications equipment from over 50 to 30 signifies an opening of their market?

Are the Japanese serious about opening their markets when their requirements involve fine points such as how many times a telephone may automatically redial a number?

Can we believe that allowing one Japanese citizen employed by a subsidiary of an American firm to sit on a telecommunications standards advisory committee will ensure U.S. access to Japan's domestic market?

Mr. Speaker, it is high time we wake up to the realities of the global marketplace instead of relying on protrated negotiations, or for the dollar to fall.

Mr. Speaker, I encourage my colleagues to give teeth to our defensive Mixed Credits Program which we legislated nearly 2 years ago by funding it now. We should stop telling our competitors how aggressive we can be and start showing them.

U.S. ROUTE 22 BYPASS IN WEIRTON, WV

(Mr. MOLLOHAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOLLOHAN. Mr. Speaker, today I am introducing legislation which is significant to the economy of the northern panhandle of the First Congressional District of West Virginia as well as the entire upper Ohio Valley.

My bill would designate the U.S. Route 22 bypass in Weirton, WV, as a Federal priority primary route.

This 2.7-mile, four-lane bypass will link the Weirton-Steubenville Bridge—now under construction—to an existing four-lane highway at Haller Park. Without the bypass, the new bridge is not nearly as effective. Together, the bridge and the bypass represent the solution to this heavily industrialized area's transportation needs.

The legislation I am introducing would increase the Federal share of funding for the U.S. Route 22 bypass from 75 percent to 95 percent and, thus, provide the State of West Virginia with a tremendous incentive to allocate its primary highway funds to this critical project.

I encourage your support for this local, regional, and national transportation priority.

□ 1550

THE REBIRTH OF NORTHEAST URBAN AREAS

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, my colleagues, now that the dust has settled over Villanova's spectacular NCAA championship victory, the American people can draw certain conclusions.

First and foremost is that basketball is back at its best in the East and Northeast U.S.A. And that is the way it was up to the early 1950's, during the days of a healthy urban America. Now we are seeing a rebirth of the Northeast urban areas.

From downtown Philadelphia, home of Villanova; to Washington, DC and Georgetown; to Brooklyn, NY, home of St. John's; to downtown Allentown, Bethlehem, and Easton in the Lehigh Valley of Pennsylvania, the home of emergent basketball power Lehigh University, America's northeastern cities are on the move.

Mr. Speaker, Lehigh, the surprise victor in the ECC actually beat Georgetown in the opening round game of the NCAA tournament. That is, Lehigh beat Georgetown 32 to 29 in the second half of their historic game on March 13, 1985. The second half winning performance of Coach Tom Schneider's never-say-die engineers led by Mike Polaha and Daren Queenan reflects the Lehigh Valley's own urban comeback and is cause for pride in the achievements of Pennsylvania's 15th Congressional District.

THE REAGAN ARMENIAN GENOCIDE POSITION

(Mr. LEHMAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEHMAN of California. Mr. Speaker, during the 98th Congress, the House unanimously passed a resolution commemorating the victims of the Armenian genocide.

Earlier this week, Congresswoman NANCY JOHNSON and I were joined by 24 other Members of this body in a bipartisan letter to the President asking that he discuss this issue in his talks with Turkey's Prime Minister.

Well, the President did discuss the Armenian Genocide with the Prime Minister.

However, rather than join the majority of House Members and the hundreds of thousands of Americans of Armenian ancestry who acknowledge the genocide as an historical fact, the President went on record as opposing our efforts to commemorate what is commonly known as the first genocide of the 20th century.

And while the President expressed his regret that the Turks and Armenians have not been able to resolve their differences, rather than offering to facilitate a resolution, the President has decided that commemorating the Genocide would, "harm relations with an important ally."

Mr. President, I remind you of your proclamation in 1981, "like the genocide of the Armenians before it—the lessons of the Holocaust must never be forgotten."

And Mr. President, I remind you of what better ally we have than the thousands of Armenians who have helped build this Nation.

LAWS ARE FOR EVERYONE

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BENTLEY. Mr. Speaker, in all the furor over the majority ignoring precedent by denying Mr. McIntyre

his seat pending the outcome of the recount, we may have forgotten that there is only one contested election before the House.

It is not the McIntyre case, but the Second District of Idaho. In order to keep McCloskey alive, the task force on the McIntyre issue has adopted a novel approach. The House now apparently recounts according to rules it adopts after the election any race where it is dissatisfied with the result of a close election.

This is a very bad precedent. It ignores the function of the localities and of the States. It casts doubt on the laws governing the election of public officials and it opens a wedge for Federal control of the electoral process.

But in this one case, the evil of such an approach is even worse. The majority is applying a rule to its advantage in Indiana and refusing to apply that same rule in Idaho. If the Eighth District of Indiana deserves to be recounted yet again by House tellers, then the Second District of Idaho should be recounted. Idaho has never been recounted. Indiana has been recounted at least twice.

On what basis are new rules so selectively followed? Despite the protestations of the majority, there seems to be ample evidence that rules are adopted only on the basis of who is ahead and to what party he belongs. If the majority isn't going to seat McIntyre, it should at least look into unseating others on the same basis.

EXTENDING THE RIGHT TO VOTE FOR PRESIDENT TO THE U.S. TERRITORIES

(Mr. DE LUGO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DE LUGO. Mr. Speaker, I am pleased to announce that 123 Members of the House—Republicans and Democrats, conservatives and liberals, from the North, South, East, and West—have agreed to cosponsor House Joint Resolution 23, which would extend the right to vote for President to the U.S. territories of the U.S. Virgin Islands, Guam, American Samoa and the Northern Marianas.

Over 123 of our colleagues agree geographic disenfranchisement of American citizens is patently unfair. Their support also shows that members of both parties take their party platforms seriously, since both the Democratic and the Republican platforms included planks advocating the Presidential vote for the territories.

This bipartisan demonstration of support is deeply appreciated by the people of the territories, and I urge our colleagues who have not yet signed up to join with the 123 members sponsoring this historic legislation which reaffirms the vitality of our American democracy.

THE WIC NUTRITION IMPROVEMENT ACT OF 1985

(Mrs. ROUKEMA asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. ROUKEMA. Mr. Speaker, today I call the attention of my colleagues to legislation I have introduced to improve the effectiveness of the Federal Special Supplemental Food Program for Women, Infants and Children—the WIC Program—without any increase in budget outlays and at no cost to the Federal Government.

The WIC Nutrition Act of 1985 would bar States, counties, and municipalities from collecting sales tax on food purchased with WIC funds. At least 14 States and numerous local governments last year diverted over $7.4 million Federal funds from this program into State treasuries, while also retaining 20 percent of the program grants to cover administrative costs. This diversion had the effect of denying participation in the program to at least 16,000 women, infants, and children nationwide.

In these days of budget constraint, we must do everything in our power to ensure that our scarce national resources are used as effectively as possible. Every dollar taxed by these 14 States is a dollar that is unavailable for the purchase of food.

I urge my colleagues to support the WIC Nutrition Improvement Act of 1985.

OBSERVATION OF RECENT ELECTIONS IN EL SALVADOR

(Mr. JONES of Oklahoma asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JONES of Oklahoma. Mr. Speaker, last weekend I had the privilege of leading a delegation of U.S. observers to El Salvador to view those elections. There were eight of us in the official delegation; from both political parties: two Members of Congress, six from the private sector.

On that election day Sunday, we dispersed to nearly 30 towns in El Salvador, had extensive conversations about and saw the conduct of the elections; came back, issued a communique on which we had unanimous agreement. That agreement was that those elections were free, they were fair, as judged by any standard including that which we would use in the United States.

We urged in that communique that all parties respect the outcome of those elections. The party of President Duarte scored a tremendous victory of 54 percent, and now we understand today that two of the parties who did not fare so well; the PCN and Arena, are protesting those elections and threatening to undermine the outcome of those elections.

□ 1600

I think it would be a tragedy for the seeds of democracy that have been planted in El Salvador if all parties did not adhere to and respect those elections. On behalf of all of the members of that U.S. observer delegation we again urge all parties in El Salvador to adhere to and respect those elections.

A COURAGEOUS LEADER

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, please let justice be done. Seat Rick McIntyre.

Mr. Speaker, I rise today, confirming the observations of the distinguished gentleman from Oklahoma who just spoke. I, too, was a special observer Sunday in El Salvador. It was a joy to see a dynamic democracy in action in that small country. Monday I was in the adjoining country of Honduras to see our bilateral agreements continuing to strengthen the friendship between our country and that beautiful little Central American republic.

However, Mr. Speaker, I would like briefly to speak today about Nicaragua and one of its native sons who is one of the most courageous leaders and defender of liberty that we have anywhere throughout North America.

Mr. Speaker, this hero that I speak of is your kind of man. Like you, he rose from humble beginnings to a leader in his country. I am speaking about the Archbishop of Nicaragua Obando y Bravo. When our colleague, VIN WEBER, and I flew into Managua Saturday we were prepared to meet a man of great faith, but we were not prepared for the tower of strength and courage that warmly welcomed us into his home. Mr. WEBER and I knew within minutes of meeting Archbishop Obando y Bravo why all freedom loving Nicaraguans call him the greatest man in their country.

We met with the archbishop for over an hour, and he confirmed our worst fears about the direction of his beloved country.

He is a man for all seasons, and this dark winter that Nicaragua is suffering requires men and women of this dedication. I would like to pass on to the House some startling facts about loyalty and disloyalty in the Catholic clergy of Nicaragua. These facts were first presented to us by our Embassy and the archbishop confirmed them. There are only 912 Catholic clergy in

that small country—that includes all priests, nuns, monks, both foreign and Nicaraguan citizens. This is a fairly low ratio of cleric to laypersons, less than one priest per 3,000 people.

Now please analyze the following: 860 of the priests and nuns in Nicaragua are loyal to Archbishop Obando y Bravo and his eight bishops; 860! That leaves only 52 who have joined the pro-Communist popular church, the phoney euphemism for a Communist-puppet, state controlled religion. And get this fact—only 10 of that disloyal band of 52 are Nicaraguans—only 10.

Mr. Speaker, isn't it about time this body recognizes that the handful of naive nuns, priests, ministers, women groups and students who go down to Nicaragua to get the deluxe, quicky liberation theology tour are being sold a pro-Communist bill of goods. What they are shown on the 'Potemkin' Sandinista tour is not the ugly reality of anti-Christian antiliberty Nicaragua, but just a Fantasy Island tour of lies and illusion.

Archbishop Obando y Bravo told Vin and I that not one of the nine commandantes has been seen in a church in years. Nor has suspended priest Miguel d'Escoto, the token Foreign Minister, ever been seen inside a church in Nicaragua. Has even one of "the revolutionary tourists" returned home to tell the truth about these anti-Christian Leninists and their contempt for religion. Can't you just imagine d'Escoto yelling to Danny Ortega, at the sight of every flight bringing to Managua the next load of naive clerics begging to be brainwashed, "Boss, de plane, de plane! It's Fantasy Island time!"

FREEZE THE BUDGET OF NASA

(Mr. MORRISON of Connecticut asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MORRISON of Connecticut. Mr. Speaker, later today the House will be considering the 1986 authorization of NASA, H.R. 1714.

I plan to offer an amendment to that authorization to implement a concept that many are talking about but few are putting forward as reality, and that is a budget freeze.

H.R. 1714 is being presented to us with a 5-percent increase over the amount appropriated for this budget year. That is almost $400 million. This is the first 1986 authorization to come before us, and I think it is time we implement the freeze concept as a means of controlling spending and getting the budget deficit under control.

I hope all those who believe that we must make a start on solving the budget deficit will support my amendment and freeze the budget of NASA as we will have to freeze and even cut the budgets of many agencies that come before us.

FAIR RETIREMENT ACT OF 1985

(Mr. SLAUGHTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SLAUGHTER. Mr. Speaker, on Tuesday I introduced the Fair Retirement Act of 1985 to extend full individual retirement account eligibility to spouses who choose to work in the home and to maintain the relative value of IRA rights over time by indexing the tax-free annual contribution limit to inflation.

The existing limitations on IRA contributions for married couples with one wage-earning spouse are inequitable.

At the end of 1984, IRA assets in this country totaled $132 billion. This amount of long-term investment capital, made available through IRA's, has helped fuel economic growth in this decade. Without indexing, however, IRA's will in effect be phased out slowly, as inflation erodes the value of the annual IRA contribution.

Congress must act now to eliminate the inequity in current law and grant non-wage-earning spouses the same IRA rights as wage-earning spouses and to ensure that the individual retirement account remains an attractive and valuable investment for retirement.

NO WHITE HATS IN NICARAGUA

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, no one wears white hats in Nicaragua. The gentleman from Minnesota [Mr. WEBER] mentioned the incarceration of several political prisoners in Managua by the Sandinistas. I am sure he is correct. On a recent visit to Nicaragua, I observed many similar violations of human rights, persecution of the church and lack of freedom of the press and travel. I am also concerned about the Sandinistas program to relocate thousands of peasants, uprooting them from their homes. In fact, there are many incidents that suggest to me that Daniel Ortega is not a friend of democracy; that he is primarily a man that loves power and that he is doing very little to democratize his country.

That does not mean that our policy of aiding the Contras is right. The Contras too appear to be violators of human rights and commit atrocities like the Sandinistas. But the point is, if we are going to speak out against human rights abuses on the right, we should do so on the left too. And Daniel Ortega and the Sandinistas are at the bottom of the barrel when it comes to those nations that should be proud of their democratic traditions. Those original goals of the Sandinista revolution are becoming ancient relics.

SEAT RICHARD McINTYRE IMMEDIATELY

(Mr. LENT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LENT. Mr. Speaker, I sincerely regret the circumstances which bring me here today. However, I speak before my colleagues on behalf of the voters of Indiana's Eighth Congressional District and in the interests of preserving our American system of democratic government.

The citizens of Indiana's Eighth have been unfairly robbed of representation in the House of Representatives since January 3. In a blatant abuse of political power, the democratic-controlled House has refused to seat Congressman-elect Richard McIntyre, a Republican, and the certified winner in this particular election contest.

Displaying a cavalier disregard for the law and the will of the electorate, House Democrats have taken matters into their own hands to alter the outcome of this election. They have chosen to conduct a selective recount in the hope of swinging the results in favor of their colleague, Democrat Frank McCloskey.

Such unprecedented actions make a mockery and a sham of the democratic process in America. The only wrongdoing evidenced throughout this entire disgraceful episode in American history has been perpetrated by the House Democrats!

The American system of government is the envy of the world. Yet, I see a dangerous threat to democracy when a political party can steal power away from the voters in determining representation in Congress. The voters of Indiana's Eighth District elected Richard McIntyre to represent them in Congress. Let us seize the opportunity to preserve and protect their rights—and the rights of all American citizens—and seat Richard McIntyre immediately!

PROVIDING FOR CONSIDERATION OF H.R. 1714, NATIONAL AERONAUTICS AND SPACE ADMINISTRATION AUTHORIZATION ACT, 1986

Mr. WHEAT. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 119 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 119

Resolved, That at any time after the adoption of this resolution the Speaker may,

pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1714) to authorize appropriations to the National Aeronautics and Space Administration for research and development, space flight, control and data communications, construction of facilities, and research and program management, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology, the bill shall be considered for amendment under the five-minute rule by titles instead of by sections, and each title shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore (Mr. CROCKETT). The gentleman from Missouri [Mr. WHEAT] is recognized for 1 hour.

Mr. WHEAT. Mr. Speaker, for the purposes of debate only, I yield the customary 30 minutes to the gentleman from Mississippi [Mr. LOTT], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 119 is an open rule providing for the consideration of H.R. 1714, the National Aeronautics and Space Administration authorization for fiscal year 1986. The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology. It further provides that the bill shall be read for amendment by titles instead of by sections and that each title shall be considered as read. Finally, Mr. Speaker, the rule provides for one motion to recommit.

Mr. Speaker, H.R. 1714 authorizes $7.9 billion for the National Aeronautics and Space Administration [NASA] in fiscal year 1986. This overall funding level is equal to the amount requested by the administration and is approximately $375 million above the fiscal year 1985 funding level.

Mr. Speaker, this is a simple, open rule which will allow full consideration of this legislation. I urge my colleagues to support the rule.

□ 1610

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 119 provides for the consideration of H.R. 1714 which authorizes appropriations to the National Aeronautics and Space Administration for fiscal year 1986. The rule provides for consideration of the bill in the Committee of the Whole, with 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Science and Technology Committee.

Following general debate the bill will be read by title instead of by section for amendment under the 5-minute rule, and any germane amendments will be in order for consideration. So this is a completely open rule. Finally, the rule provides for the usual motion to recommit.

Mr. Speaker, H.R. 1714 authorizes approximately $7.9 billion for NASA in fiscal year 1986 for a variety of purposes including research and development, space flight, control and data communications, construction of facilities, and research and program management.

The total authorization is identical to the amount requested by the administration, although the committee has allocated the funds somewhat differently than requested. The total authorization is 5 percent over the fiscal 1985 authorization, meaning real growth for the agency is about sixtenths of 1 percent. I think the committee is to be commended on holding down spending for NASA while at the same time upholding its important missions and needs.

Mr. Speaker, this authorization will permit NASA to move forward on such ongoing programs as the space shuttle, space telescope, the Galileo mission, and the gamma ray observatory and shuttle/spacelab payload experiments.

Mr. Speaker, title II of this bill establishes a space shuttle pricing policy for fiscal years 1989–91 that is not without controversy, judging from the additional views in the committee report. Some of the members of the committee think the pricing policy will undermine efforts by the private sector to make outerspace a commercially viable venture. Nevertheless, the bill was reported by voice vote, and the Members who have an alternative pricing system will be able under this rule to offer their amendments. This rule was also adopted by voice vote, without controversy. I therefore urge its adoption so that we can proceed with the consideration of the NASA authorization.

Mr. WHEAT. Mr. Speaker, I yield 1 minute to the gentleman from North Carolina [Mr. ROSE].

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 1401, H.R. 1402, H.R. 1403

Mr. ROSE. I thank the gentleman for yielding time to me.

Mr. SPEAKER, I ask unanimous consent that my name be removed as a cosponsor from the bills, H.R. 1401, 1402, and 1403.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. LOTT. Mr. Speaker, I have no requests for time, and I yield back the balance of my time.

Mr. WHEAT. Mr. Speaker, I have no further requests for time, I urge the adoption of the resolution, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the bill, H.R. 1714, and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION AUTHORIZATION ACT, 1986

The SPEAKER pro tempore. Pursuant to House Resolution 119 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 1714.

□ 1615

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1714, to authorize appropriations to the National Aeronautics and Space Administration for research and development, space flight, control and data communications, construction of facilities, and research and program management, and for other purposes, with Mr. TORRES in the Chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Florida [Mr. FUQUA] will be recognized for 30 minutes, and the gentleman from New Mexico [Mr. LUJAN] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida [Mr. FUQUA].

Mr. FUQUA. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, I rise in support of H.R. 1714, which would authorize fiscal year 1986 funds for the National Aeronautics and Space Administration.

I want to congratulate Mr. NELSON, chairman of the Subcommittee on Space Science and Applications, and

Mr. GLICKMAN, chairman of the Subcommittee on Transportation, Aviation and Materials for their leadership in bringing this legislation to the floor. They have done an outstanding job in perfecting this legislation. I also want to acknowledge the efforts of Mr. LUJAN, Mr. WALKER, and Mr. LEWIS on the other side of the aisle.

The success of the Space Shuttle Program continues to renew our Nation's confidence in American greatness and to demonstrate to the world that we are again first in space. But, we cannot rest on our laurels because the competition in international space activities is increasing at a rapid rate. Our space program plays a positive role in exerting world leadership in political, economic, and scientific knowledge which we must exploit to advantage.

NASA's activities are designed to maintain U.S. leadership in aeronautical and space research and technology and its utilization. More specifically, the objectives of NASA's activities are to: make the space transportation system fully operational and cost effective; move forward toward the establishment of a permanently manned space station; conduct an effective and productive program of aeronautical research and technology which will contribute to the enduring preeminence of the United States in aviation; conduct an effective and productive Space and Earth Sciences Program which expands human knowledge of the Earth, its environment, the solar system and the universe; conduct effective and productive space applications and technology programs which contribute materially to our Nation's current and future leadership in space; and enhance opportunities for U.S. private sector involvement in civil space and space-related activities.

The NASA fiscal year 1986 budget authorization provides for a deliberately paced program of flight projects and ground-based activities to make progress toward these objectives.

The NASA fiscal year 1986 budget request includes funding for ongoing programs such as the space shuttle, the space telescope, the Galileo mission, the Gamma Ray Observatory, shuttle/spacelab payload experiments, a Venus radar mapper mission, and the numerical aerodynamic simulation project.

Funding is provided to continue three new initiatives introduced last year including the upper atmospheric research satellite mission, the Mars geoscience/climatology orbiter mission, as well as a scatterometer instrument for the Navy remote ocean sensing system. The NASA fiscal year 1986 request also includes funding for continuing systems definition studies and advanced technical development activities for a permanent manned space station.

Finally, the budget request includes funding for two new initiatives: the Office of Commerical Programs and the orbital manuvering vehicle.

Mr. Chairman, I would like to discuss the recommendations our committee has made with respect to the NASA budget request. The bill before you would authorize $7,886 million for the agency which is the same amount as the request.

The major thrusts of the budget changes recommended by the committee are the following: Augment the shuttle orbiter structural spares to retain critical skills thereby maintaining production readiness for a fifth orbiter vehicle; and augment the space science and applications supporting research and technology activities for advanced technical development activities which should serve to reduce the technical and schedule risk of future flight program.

Reallocation of $10 million in aeronautical research and technology activities for higher priority activities. I understand that some of this reallocation has been reconsidered and will be clarified and documented in a colloquy between Mr. GLICKMAN and Mr. LEWIS.

The committee added a number of language provisions including title II which would establish policy guidelines for establishing the space shuttle pricing policy for commercial and foreign users for the period fiscal year 1989-91.

I am including in the RECORD a comparison of the NASA fiscal year 1985 operating plan, the NASA fiscal year 1986 budget request and the committee action on the fiscal year 1986 budget.

I urge the support of my colleagues for H.R. 1714.

Space Program elements in fiscal year 1986 involve:

Definition and technology effort in preparation for development of a permanently manned space station, the next major step in exploration and utilization of space and a key element in continued U.S. leadership in space. The ability to function routinely in space onboard the space station will provide countless opportunities for experimenting in the known sciences as well as in those still to be discovered. Commercial companies, other U.S. Government agencies, and foreign governments have been invited to join us in this endeavor broadening the horizons for all those who participate. Definition and preliminary design contracts will be indicated in fiscal year 1985 so that the best ideas and technology of industry are considered before the final design and development are begun.

Expanded use of the space shuttle and other elements of the space transportation system capitalizing on its demonstrated capabilities to place satellites in orbit, to retrieve and repair satellites, and to conduct experiments and make observations using the shuttle and the spacelab. The fiscal year 1986 program will provide for the procurement of the hardware, mission integration and training, ground processing and flight operations of the space shuttle. Flights during 1986 include payloads for NASA, Department of Defense and domestic commercial and international users of space. The present fleet of three orbiters will be expanded with the delivery of the fourth orbiter in mid-1985, and final operational modifications to OV-102 will be completed during 1985. Additional spacelab flights will capitalize on the success of the initial mission as this unique capability is exploited for space research and applications missions. The Centaur upper stages for Department of Defense and NASA missions will proceed toward the critical first uses of the planetary version in 1986 for the Galileo and Ulysses Missions. The initial launch from the Vandenberg launchsite scheduled for early 1986 will use the first set of lighter weight filament wound cases for the solid rocket booster. Work will continue on the space shuttle main engine to improve the operating margins, reliability and maintainability of the present configuration. Development efforts will be initiated on a reuseable orbital maneuvering vehicle to extend operational on-orbit capabilities beyond the range of the orbiter.

A banner year for the Space Science and Applications Program including the planned launch of the Galileo and Ulysses—formerly the International Solar Polar Mission—missions and the Hubble space telescope, the observations of Halley's Comet from Astro telescopes aboard the space shuttle, and the Voyager encounter with Uranus. The Galileo Mission will retain an option to fly by the asteroid Amphitrite on its way to Jupiter where it will send a probe into Jupiter's atmosphere and conduct a series of encounters with satellites of the giant planet. Ulysses will fly past Jupiter and use the powerful gravitational force of the planet to accelerate the spacecraft into a trajectory which will permit observation of the Sun at high latitudes previously beyond our capability to observe. The Hubble space telescope will provide a quantum jump over the best ground-based telescopes in our ability to observe and better understand the universe. Work will continue on important missions for the future: the Gamma Ray Observatory will study extremely high energy phenomena; the Venus radar mapping mission will penetrate the dense cloud cover and provide global imagery of the surface of Venus; the upper atmosphere research satellite will provide important information on the chemical composition and vlunerability of

the upper atmosphere; the Mars orbiter will provide geoscience and climatology mapping of Mars; the advanced communications technology satellite will demonstrate new capabilities in frequency reuse and onboard switching; and the scatterometer will fly on a Navy satellite to acquire global ocean data. Progress will continue in other areas including materials processing in space, the search and rescue locator system and analysis of data acquired from the Earth radiation budget satellite launched in late 1984.

Space research and technology activities to advance the technology base which provides new concepts, materials, components, devices, software and subsystems for use in U.S. civil and military space activities. This research emphasizes the longer range aspects of generic research and technology development in transportation, spacecraft and platform systems which are crucial to future U.S. leadership in space.

The aeronautical research and technology program contributes materially to the enduring preeminence of U.S. civil and military aviation by: First, conducting disciplinary and systems research at the leading edge of technology in those areas critical to the continued superiority of U.S. aircraft; second, maintaining the research centers in positions of excellence in facilities and technical staff; third, assuring timely transfer of research results to the U.S. aeronautical industry; fourth, assuring appropriate involvement of universities and industry; and fifth, providing aeronautical development support to other government agencies and U.S. industry. Conducted well in advance of and independent of specific applications, the aeronautical research and technology program includes both fundamental research in the aeronautical disciplines and systems research applicable to general classes of advanced military and civil aircraft. The program involves participation by aeronautical manufacturers to ensure that the technology is compatible with practical design considerations and can be successfully transferred into application in new and better aircraft, systems and components.

Mr. Chairman, I want to further discuss two program areas: the space shuttle and the space station.

SPACE SHUTTLE

There are many reasons why the space shuttle is an important and logical step in manned space flight and the U.S. space program:

First, the shuttle is our only manned space activity.

Man has worked hard to achieve—and has indeed achieved—the freedom of mobility on land, the freedom of sailing on his oceans, and the freedom of flying in the atmosphere. And he has discovered that he can also have the freedom of space. Man has learned to fly in space, and man will continue to fly in space.

Given this fact, the United States cannot forgo its responsibility—to itself and to the free world—to have a part in manned space flight. And the space shuttle is clearly the most meaningful and useful manned space program for the coming decade.

Second, the space shuttle is needed to make space operations less complex and less costly.

Today we have to mount an enormous effort every time we launch an expendable space vehicle. The reusable space shuttle gives us a way to avoid this. This airplane-like spacecraft makes a launch into orbit an almost routine event at a cost much less than the expendable launch vehicles. This is possible by not throwing everything away after we have used it just once—just as we don't throw away an airplane after its first trip from Washington to Los Angeles.

The shuttle also allows for less cost to payload development. A satellite that will be launched in the shuttle will no longer have the environmental, structural, weight, and other associated constraints as those launched on an ELV. If an anomaly should occur to the satellite, the shuttle makes it possible to retrieve or repair, eliminating the need to throw away a costly satellite.

Fourth, the shuttle will encourage far greater international participation in space flight.

Since the initiation of the development of the Shuttle Program many European nations have been participating in a joint program to develop the spacelab. The Spacelab Program is a cooperative effort between NASA and the European Space Agency [ESA]. ESA is designing and developing the flight hardware. The spacelab will initiate a new era for space experimentation. Considerable international utilization of the shuttle/spacelab capability is now underway and future activity is being planned. In their long-range planning, other nations see the transition from the demonstration phase to the operational and commercial application aspects of space exploitation. Within this framework, the trend is toward greater flexibility, larger instruments and instrument groupings, and longer mission durations. The capabilities of the shuttle/spacelab offer new opportunities in the exploration and use of space.

The globally televised launch and return of the first five flights of *Columbia* and the first flight of *Challenger* calls to mind the proven significance of the Space Program in the arena of international relations and understanding and, thus, in the preservation of world peace. Because of the magnitude and ambitious character of NASA's Space Program, the United States can look back on a long and fruitful history at collaboration with European and other nations. Future opportunities for international cooperation will greatly exceed past joint activities because of the Space Shuttle Program.

The initiation of routine space transportation operations in late 1982 marked the culmination of about 20 years of planning, designing, and development of a reliable, readily accessible and economically superior method to operate in space, for the purpose of expanding Earth-bound man's control over his destiny as an inhabitant of the only known life-supporting body in the solar system.

The space shuttle and NASA's future planning toward human permanence in space is the main element of NASA's conformance to the Space Act of 1958. As we move into the 1980's and prepare to respond to new challenges that will face us, we should review these policies and plan for the future, particularly with a view toward technology-driven projects that will help to provide the United States with the leadership in technology and its applications that is mandated by the Space Act.

One of these new challenges that appears as an important issue when considering the international aspects of the space shuttle is the challenge of international competition in space.

After overcoming the Soviet Union's initial lead in space in the early 1960's, the United States has generally maintained overall leadership in exploiting the various advantages that space offers. More recently, however, the United States has begun to lag the U.S.S.R. in some areas, such as long-duration manned orbital flight with its opportunities for extensive experimental and empirical data in such areas as life sciences, materials processing, assembly and repair, manned observations, and command and control. Other countries are becoming increasingly competitive. In particular, the current vigor of Soviet manned space program activity indicates continued expansion of capabilities and an increase in military space operations. During calendar year 1981 and 1982 the U.S.S.R. launched six manned flights including a 211-day space station mission completed on December 10, 1982, the longest in history and more than double the length of the longest U.S. mission to date—Skylab-3, 84 days. On April 20, 1983, the Soviets launched a new mission involving a three manned crew to the Salyut-7/Cosmos 1443 orbiting craft for another long duration mission.

Increasing competition to U.S. operations in space can also be expected from the European Economic Community which, through the European Space Agency [ESA], is developing its own space transportation system, the

expendable Ariane. Ariane, designed to compete with the U.S. shuttle and already drawing customers from it, will be able to launch Atlas-class payloads to geosynchronous transfer orbit—1,700 kg—while follow-on versions in development or planning have capabilities beyond that—up to 2,420 kg. Even a fully reusable crew and supply transport vehicle, the Hermes, is being studied for a two-stage version of Ariane V. In Japan, orbital capability will be provided by the Japanese-developed "N" launch vehicle, also to compete with the United States in the provision of launch services to geosynchronous orbit.

On the other hand, the emerging user community for the space shuttle includes numerous foreign countries whose initial response to the Shuttle Program's offer of launch services has been excellent. International involvement has been an important feature of the Space Shuttle Program since its inception. Nine member countries of ESA—Belgium, Denmark, France, Germany, Italy, The Netherlands, Spain, Switzerland, and the United Kingdom—entered into an agreement in September 1973 with the United States to undertake, as an ESA special project funded entirely in Europe—possibly in excess of $800 million—to design, develop, manufacture, and deliver to NASA a space laboratory, called spacelab, for use with the shuttle. Austria, an ESA observer, is also contributing to the spacelab development.

Also, the National Research Council of Canada [NRCC] undertook in June 1975 to design, develop, and manufacture a space shuttle-attached remote manipulator system [RMS] at Canadian expense. The RMS will deploy payloads from the shuttle cargo bay, retrieve them, and perform certain payload servicing operations in space, all under remote control from the orbiter flight deck.

In summary, while previous international undertakings in space have amply demonstrated that the life styles and general well-being of mankind can be enhanced by reaching out beyond the Earth's atmosphere to exploit the unique properties of spaces, the space shuttle is the first significant quantum leap with the potential to make those operations a routine international activity. With its introduction, the United States, thus, is offering the services of a new, unique and highly useful transportation system to the world, comparable in its significance to the railroad some 100 years ago and the DC-3 aircraft 46 years ago.

SPACE STATION

Last year, in his State for the Union Message to Congress, President Reagan outlined a bold new initiative for the United States that will maintain and ensure, during the decade of the 1990's and beyond, our hard won position of leadership in space. The President's initiative is a permanently manned space station to be in operation within a decade. As a fundamental element of his vision for this Nation's future, the space station will:

Reflect and contribute to America's commitment to research, technology, and productivity;

Be a peaceful, visible demonstration of U.S. strength and commitment to leadership;

Implement the clear direction the Civil Space Program has needed and found in the President's national space policy set forth in July 1982.

The time for space station is ripe—the agenda for tasks which can be undertaken and enhanced using the unique capabilities of the space station is full, and both U.S. industry and the NASA institution are fully prepared to implement the President's initiative. The station is, I believe, the next logical step in space.

To maximize the unique advantages provided by the environment of space, we need to establish a permanent presence that enables us to work in space full time and fully utilizes the capabilities of the space shuttle. Without the capability of the shuttle, it would be impossible to establish the more permanent presence in space referenced by the President on July 4, 1982, in his national space policy statement. A second reason is that the operations we have conducted with the shuttle have stimulated great interest in the private sector to look toward investments in future space activities. The construction of a space station is necessary to create the facilities that will greatly encourage such investment, and to stimulate new technology that will spinoff into the U.S. economy. Finally, the shuttle has also stimulated great international interest in the U.S. space program, as evidenced by the overwhelming reception of the Enterprise in Europe last summer and the recent highly successful flight of the spacelab. NASA is planning the Space Station Program in such a way that it will be possible for our friends and allies around the world to participate with us in taking this major step.

Based upon NASA and industry analyses over the past 18 months, the Space Station Program will serve a number of functions, such as:

A laboratory in space, for the conduct of science and the development of new technologies;

A permanent observatory, to look down upon the Earth and out at the universe;

A transportation node where payloads and vehicles are stationed, processed, and propelled to their destinations;

A servicing facility where payloads and vehicles are maintained, and if necessary, repaired;

An assembly facility where, due to ample time on orbit and the presence of appropriate equipment, large structures are put together and checked out;

A manufacturing facility where human intelligence and the servicing capability of the station combine to enhance commercial opportunities in space;

A storage depot where payloads and parts are kept on orbit for subsequent deployment; and

A staging base for more ambitious future missions.

The space station will represent a fundamentally new and versatile capability to support activities in space in the decade of the 1990's and beyond.

NASA is requesting $230 million for the Space Station Program. An extensive definition effort is planned with sufficient resources to assure that the program, when hardware development is initiated, will be thoroughly defined, responsive to user requirements, and based on the proper mix of man and machine, incorporating the most advanced technology available.

This detailed engineering definition effort will provide the basis for commitment to the final design for the construction of the space station.

SUMMARY OF COMMITTEE ACTIONS

The following table 1 summarizes the budget action taken by the Committee on Science and Technology on the fiscal year 1986 NASA budget request at the full committee markup on March 27, 1985.

TABLE 1

[In millions of dollars]

Program	Fiscal year 1985 operating plan	Fiscal year 1986 budget request	Committee action
RESEARCH AND DEVELOPMENT			
1(a)(1) Space Station	150.0	230.0	230.0
1(a)(2) Space Trans. Cap. Dev	351.4	459.3	444.3
1(a)(3) Physics and Astronomy	677.2	630.4	637.4
1(a)(4) Life Sciences	62.3	72.0	72.0
1(a)(5) Planetary Exploration	290.9	359.0	359.0
1(a)(6) Space Applications	374.1	551.8	550.8
1(a)(7) Technology Utilization	9.5	11.1	11.1
1(a)(8) Commercial Use of Space	(8.5)	30.0	20.0
1(a)(9) Aeronautical Res. and Tech	342.4	354.0	354.0
1(a)(10) Space Research and Tech	150.0	168.0	168.0
1(a)(11) Tracking and Data Adv. Sys	14.8	16.2	16.2
Total: Research and Dev	2,422.6	2,881.8	2,862.8
SPACE FLIGHT, CONTROL AND DATA COM.			
1(b)(1) Space Shuttle Prod./Oper. Cap	1,492.1	976.5	1,011.5
1(b)(2) Space Transportation Oper	1,314.0	1,725.1	1,715.1
1(b)(3) Space/Ground Net. Com. and Data Sys	795.7	808.3	803.3

1(d) Research and program mgt	1,336.3	1,345.0	1,345.0
Total: NASA	7,510.7	7,886.0	7,886.0

Again, I urge the support of my colleagues for H.R. 1714.

Mr. LUJAN. Mr. Chairman, I yield myself 4 minutes.

Mr. Chairman, I rise in support of H.R. 1714, the NASA authorization bill for fiscal year 1985. I want to take this opportunity to congratulate the chairman of the Subcommittee on Space Science and Applications, Mr. NELSON, as well as the ranking minority member, Mr. WALKER, for the fine bill they brought to the full committee. Likewise, I also want to congratulate our chairman, Mr. FUQUA, for the bill he has brought to the floor.

By any standard, this bill is a good bill. It provides fair and balanced funding levels for NASA's programs and moves us ahead in some very important policy areas.

In view of the strong concern about the deficit and the critical need for a balanced budget, this piece of legislation shows a fine sense of fiscal responsibility on the part of many of us: Our chairman, Mr. FUQUA, and by Mr. NELSON and Mr. WALKER, as well as the other members of the committee. In addition to using our congressional responsibility to clarify priorities within the NASA budget, we have also managed to keep the total dollars at the same level as the President's request. This is an accomplishment of which all of us can be proud.

I am especially pleased that this bill recognizes that we have crossed the threshold of a new age in space science and applications. The programs supported in this budget will revolutionize many areas of science over the next decade. The programs in this budget will lead to the commercialization of many new space-based industries. By the year 2000, we may see space factories engaged in materials processing, turning out new drugs and products for the benefit of all mankind.

This budget provides the necessary infrastructure to support these activities, especially the space station, the space shuttle, and the orbital maneuvering vehicle. The space station is a vital part of our Nation's investment in science and technology. The quality of our progress in science and technology will affect the competitive strength of our industries and have a strong impact on jobs. If we move ahead rapidly, we will create more jobs and have a stronger industrial base. If we drag our feet—if we don't push back the frontiers of new technology—we will limit our ability to compete in the industrial marketplace in the years ahead. The space station will act as a hard driver of technology and strengthen our technology base in the years ahead.

While this budget is a balanced one, there are also some very controversial issues remaining in this bill. At both the subcommittee level and the full committee level, one of the major concerns was the issue of shuttle pricing policy.

The question of shuttle pricing policy was hotly debated during the markups of both bills and I expect that it will be hotly debated today on the floor. During consideration of various amendments proposed in both the subcommittee and the full committee, it was clear that this debate was not a partisan one. In committee, the votes were close and I expect they will be close again.

Resolution of the issue of shuttle pricing policy will have a major impact on the future of space commercialization. The shuttle pricing policy issue is, first and foremost, a policy issue. Although the debate revolves specifically around prices that we will charge commercial and foreign customers for a launch on the shuttle, the issue is really one of policy. Once we have set the policy, all pricing decisions come easily. My primary concern is that we have not yet made the policy decision on the appropriate use of the national resource of the space shuttle. The fact is that resolution of the shuttle pricing issue will set a precedent on the relative role of government and of industry in the future use of space. Resolution of this issue will also have an impact on the budget of the National Aeronautics and Space Administration.

For these reasons, the debate on this bill is important. I urge my colleagues to participate fully in this debate.

□ 1620

Mr. FUQUA. Mr. Chairman, I yield 5 minutes to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. I thank the chairman of my committee for yielding this time to me.

Mr. Chairman, the Subcommittee on Transportation, Aviation and Materials conducted numerous field inspections and held extensive hearings here in Washington on the aeronautical part of the fiscal year 1986 NASA authorization. Testimony was taken from a variety of witnesses, both inside and outside of NASA.

Members of the subcommittee worked long and hard in carefully reviewing the NASA aeronautical program and the 1986 budget request. We found that although the dollar amount for aeronautical R&D is small—$354 million recommended by the committee this year—the payoff is very large. This is true because NASA emphasizes the high-risk, long-term research and technology that industry is financially unable or unwilling to undertake. Such efforts provide the foundation for future aircraft and engines which return many times their initial cost to our economy. In this sense, NASA's aeronautical R&D is an investment in the truest meaning of the term.

For example, in 1983, export sales of aerospace products, the bulk of which were civil aircraft, exceeded $16 billion. Imports were estimated to be $3.4 billion. The resulting $12.6 billion net positive contribution to our balance of trade was the largest of any U.S. manufacturing industry.

However you look at it, aviation is one of the real winners that this country still has, and NASA's aeronautics program helps to maintain that.

U.S. suppliers have built nearly 90 percent of the free world's civil air fleet by dollar value. Our airlines are our best ambassadors, offering superior quality, safety, comfort, and reliability, at economical costs. They speak well of America—to operator and user alike.

Of course, these results did not just happen. They came because we have consistently had the best products. And one of the big reasons for that has been the long-standing partnership between government and industry in developing new aeronautical technology.

Because of this, the Committee on Science and Technology has repeatedly urged the administration and the Congress to increase the resources devoted to aeronautical R&D. We have pointed to the many long-term benefits of such investment, which are reflected in billions of dollars in sales of U.S. aircraft both here and abroad, and in millions of jobs for Americans.

Yet, in spite of its proven cost benefits, the NASA aeronautics program has not kept pace with inflation nor with the relentless pressure from our competitors, both military and commercial. For example, the administration's request for fiscal year 1986 is only 15 percent greater than the actual amount spent in fiscal year 1980. If inflation is considered, the request for 1986 is 16 percent less than the purchasing power of the 1980 budget. There aren't many government programs that can make that claim.

Furthermore, anyone familiar with the dramatic increases in both the cost and complexity of new technology in the last few years knows that a level budget won't produce the same results as it once did. It simply costs more today to achieve each increment of improvement in fuel efficiency or safety or performance.

Of course, none of this would cause alarm if the Europeans, Japanese, and the South Americans had not begun to pose a serious competitive threat. But they have.

In fact, within the last year, the European Airbus consortium announced a launch of its all-new 150-passenger commercial airliner, the A-320. This puts them ahead of any of our aircraft companies who are still in the planning phase.

Because of this, I believe, the committee's recommendation is at the low end of what is actually needed. In my view, international conditions call for

expanding NASA's aeronautical program, not curtailing it.

The administration, for its part, is moving slowly in this direction. But such was not always the case. Initially it went all out to change NASA's basic method of doing business. It sought to break up the long-standing partnership between the Government and industry that was largely responsible for our preeminence in aeronautics.

Since, then, of course, the Congress has spoken clearly to reject this misguided idea. Also, the Office of Science and Technology Policy was "born again" and, in a very comprehensive study, reaffirmed the importance of NASA's work to both national security and economic well-being.

The fiscal year 1986 budget reflects this more responsible attitude. It shows a growth of 3.5 percent over last year—still far short of what is needed, even to stay even with inflation, but about the best we can hope for in a difficult budget climate.

For this reason, the committee recommended approval of the aggregate amount requested by NASA with only some minor realignment of programs within the aeronautical research and technology line item.

Mr. Chairman, in my statement I will have more information regarding the specifics of the NASA aeronautics program, but we have decided to recommend some changes from what our committee report has in there in connection with some priorities in that, and, in this connection, I would be glad to yield to my ranking member, a friend with whom I have been pleased to work, the gentleman from Florida [Mr. LEWIS].

Mr. LEWIS of Florida. I thank the gentleman for yielding.

Mr. Chairman, I rise to engage my colleague from Kansas in a colloquy regarding the recommended allocation of funds within the line item in the bill called aeronautical research and technology. In particular, I would ask him to explain and clarify his views on recommended changes in this area since the full Science and Technology Committee considered this bill last week.

Mr. GLICKMAN. As agreed during the full committee markup of this bill last week, I, along with other Members concerned with the NASA aeronautics program, met to reconsider the report language approved by the full committee containing specific guidance with regard to the aeronautical programs of NASA. As a result of those meetings, I am recommending the following revised guidance:

First, NASA should proceed with planning for the altitude wind tunnel at the Lewis Research Center, but should cap its expenditures in fiscal year 1986 at $3.5 million and should seek ways to overcome the limitations on capability identified by the Congressional Advisory Committee on Aeronautics.

Second, NASA should proceed with the oblique wing flight test at a level of $3.7 million in fiscal year 1986. The reduction of $1 million from the request is intended to encourage NASA to seek greater cost sharing from the military for this program.

Third, NASA should reduce funding within the fluid and thermal physics R&T Program by approximately $1.4 million, for work on adaptable wall and magnetic balance wind tunnel test techniques.

Fourth, NASA should apply the funds saved by the above actions—about $3 million—to high speed aeronautics.

Mr. LEWIS of Flordia. I thank the gentleman.

Mr. GLICKMAN. Mr. Chairman, I would just add a couple more things in this regard.

The subcommittee and the committee feel very strongly that NASA should pursue strongly its work on high-speed aeronautics, hypersonic aircraft. I think we can do this. We can do it with appropriate environmental impact and we can do it to cause the United States to take the lead in the area of hypersonic aircraft.

No. 2, Mr. Chairman, this year the committee had the benefit of the Congressional Advisory Committee on Aeronautics, which is really a blue-ribbon, dollar-a-day group of people who, for the first time ever in my recollection in the history of government, spent over a year coming in and recommending changes in the NASA Program. While we did not buy every change that committee recommended, we had the opportunity for responsible private sector input into the NASA Aeronautics Program. I think that will improve the program and will also improve the way our aviation programs are handled in this country from the standpoint of the Government, NASA, and the FAA.

Mr. LUJAN. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman very much for yielding this time to me.

Mr. Chairman, I rise to join my chairman, Mr. NELSON, and the chairman of the full committee, Mr. FUQUA, the ranking member of the full committee, Mr. LUJAN, in support of H.R. 1714, the annual authorization for the National Aeronautics and Space Administration.

This is a bill that has been brought in with funding levels that are equal to the President's request to Congress. The Committee on Science and Technology carefully examined the budget request, and while we made a number of additions which were either above individual requests or represented items not included in the budget, we were able to offset those additions with reductions in other planned NASA activities.

The President requested $7,886 million for fiscal year 1986. The committee has made recommendations for $69 million in increases and an offsetting $69 million in reductions, for no net increase.

I would like to point out that the request for fiscal year 1986 represents a growth rate of 5 percent which, when adjusted for inflation, is a real growth rate of six-tenths of 1 percent. The committee fully supports this growth, which is required to support the space station initiative.

Let me make that clear. What we have in this budget is an attempt to try to provide a start for the future of the space station. That is what the addition is in here for. I understand that we are going to have arguments made on the floor later, I have seen copies of amendments, by people who are going to cut the budget back to last year's funding level and I understand that is a very attractive kind of thing, a supposed 5-percent reduction.

I assume that NASA, like everyone else, can probably find 5 percent to reduce, but I would make the point that the reason why there are increased levels in this budget is for one purpose and one purpose only, and that is to support the space station.

The President of the United States, despite the fact that he understands that we have got to do something about the deficits that we face, also understands that we have to project into the future. We have to understand that by the year 2010 we are capable of generating a trillion dollar new economy from outer space; that by the year 2050 we are capable of generating a $4½ trillion economy in outer space.

□ 1630

The only way you can do that is with a space station. The only way that we are able to have that kind of an economic burgeoning in outer space is with a space station. As soon as you take out the space station, as soon as you begin to reduce the effort on the space station, you are eliminating much of our effort to move into that kind of a space future.

Now, I understand that we have got a lot of Luddites around the Congress here who are perfectly willing to cancel out science and technology and are perfectly willing to move away from the space station. I would say that some of that is penny wise and pound foolish. I come to the floor as someone who consistently comes to the floor saying that we can find ways to cut the budget. There is no doubt that we can find ways to cut this budget, too, and I am not going to be

really opposed to the concept of trying to attain a budget freeze.

But I think that we had better understand that we are going to have an impact on one of the great growth areas that the President himself had defined.

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I am very glad to yield to the gentleman from Michigan.

Mr. PURSELL. Mr. Chairman, I understand that the gentleman from Pennsylvania has led many deficit budget battles over the years and that is commendable, but as I understand from the office of the Director, Mr. Beggs, and from the staff of Mr. BOLAND'S office, it is inaccurate to say that the 5 percent, to hold it to the 1985 levels, would not be correct in respect to the space stations. In essence NASA would take some dollars out of different programs, not totally across the board. The space station would not be jeopardized. There will be, therefore some additional reprogramming for the total program in the 1985–86 budget which we are debating in the authorization bill today. Also, it should be noted that the HUD and NASA House committee are holding testimony downstairs, the Director is present, and the information I have at this moment is that it would not jeopardize the space program.

Mr. WALKER. Mr. Chairman, I thank the gentleman for that information, and I think it is valuable to have it on the record.

The point that I was making, however, is that the reason why the President increased this budget above last year's spending levels is because we do have the space station in it for $230 million. That is the reason why we are in here at higher levels than what we spent last year. If we are not going to take it out of the space station, it is obvious then that NASA can find other places in the budget to take it out.

That is the reason why—if that is the point that the administration is peddling now, if the gentleman has just given us correct information and if Mr. Beggs says he can sustain a 5-percent cut, then I do not understand why any of us would be opposed to that out on the floor. I am glad to have that information from Mr. Beggs, and I wish he would have told the subcommittee that when he came before it because I think at this point we probably could have come up with a similar kind of proposal.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. WALKER] has expired.

Mr. LUJAN. Mr. Chairman, I yield 2 additional minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. PURSELL. Mr. Chairman, will the gentleman yield further?

Mr. WALKER. I am glad to yield to the gentleman from Michigan.

Mr. PURSELL. Mr. Chairman, I just want to clarify the record and say that I did not indicate that he endorsed a 5-percent reduction to go back to 1985. All I am saying is that he is in position to reprogram his money and earmark it for different programs that would not jeopardize the space station.

Now, that is according to HUD staff and people who are principally on the Democratic side of the aisle. So I am just suggesting, to be clear with the gentleman, that he did not indicate that he would support it, yes or no, on the amendment to reduce the budget. I did talk to him personally today. I did not put him in that position; I thought it was unfair to do so. And so we had a discussion in regard to the transfer dollars and the reprogramming efforts with respect to the whole budget.

Mr. WALKER. Then let me ask the gentleman, who is it that is telling us that the money can be easily programmed without jeopardizing the space station?

Mr. PURSELL. I am indicating the staff with which I met just recently and who are testifying downstairs with respect to the NASA and HUD budget. I would be happy to give those names to you.

Mr. WALKER. I am trying to clarify it here. Who is it? Is it NASA that is saying we can do this without jeopardizing the space station?

Mr. PURSELL. No; I did not say that. I indicated that staff members of HUD, the staff under Mr. BOLAND, indicated that there would likely occur, if the amendment were adopted, reprogramming efforts that would not jeopardize the space program.

Mr. WALKER. I understand the gentleman. And what I recall is that last year, when the staff came to the floor with Mr. BOLAND, they also adopted an amendment for a mantended station rather than a permanently manned station, which would have been an attempt to undercut the whole manned station program. So what the gentleman is telling me is that the same staff that tried to undercut the program last year is now telling us that this cut will not undermine the program?

Somehow I have a problem understanding that, and I go back to my original statement that perhaps we are jeopardizing the space station here, because that is precisely the committee and the committee staff which undercut the program to some extent on the House floor last year. So I go back to my original point.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. WALKER] has expired.

Mr. FUQUA. Mr. Chairman, I yield 7 minutes to the gentleman from Florida [Mr. NELSON], the chairman of the Subcommittee on Space Science and Applications.

Mr. NELSON of Florida. Mr. Chairman, I rise in strong support for the bill H.R. 1714, which would authorize appropriations for the National Aeronautics and Space Administration in fiscal year 1986.

This bill was reported by the Committee on Science and Technology on March 27, 1985, by voice vote.

For the benefit of the committee, I will summarize the bill and the actions taken.

The NASA fiscal year 1986 budget request was $7.866 million. The actions recommended by the Committee on Science and Technology result in a budget authorization of $7.866 million which is identical to the NASA request. With regard to space activities the committee is recommending $59 million in increases and an offsetting $59 million in decreases. The difference between the committee action and the administration's request for space activities are summarized as follows:

I. RESEARCH AND DEVELOPMENT

A. Space Transportation Capability Development.

$5.0 million reduction in Spacelab activities.

$3.0 million decrease in Payload Operations and Support Equipment.

$7.0 million decrease in the Tethered Satellite System.

B. Physics and Astronomy.

$7.0 million increase in Research and Analysis including $4 million for a Shuttle test of the Gravity Probe B Experiment;

$2 million in advanced technical development for the Advanced X-Ray Astronomical Facility, and $1 million in Advanced Technical Development for the Space Infrared Telescope Facility.

$3.0 million redirection within Shuttle/Spacelab Payload development activities to provide increased impetus for intermediate class payloads.

C. Space Applications.

$4.0 million increase in Environmental Observations/Oceanic Processes research and analysis for advanced technical development for the Ocean Topography Experiment (TOPEX).

$3.0 million increase in Environmental Observations/Space Physics Research and Analysis for advanced technical development for the International Solar Terrestrial Physics program.

$8.0 million reduction in scatterometer instrument activities.

D. Commercial Use of Space.

$10.0 million general reduction.

II. SPACE FLIGHT, CONTROL AND DATA COMMUNICATIONS

E. $35.0 million increase in Space Shuttle Production/Operational Capability which is the net result of a $45 million increase in orbiter activities for augmentation of Orbiter structural spaces, $5 million decrease in Launch and Mission support, and a $5 million decrease in Changes and Systems Upgrading.

F. $10.0 million decrease in Space Transportation Operations activities.

G. $5.0 million decrease in Space Tracking and Data Acquisition activities.

III. CONSTRUCTION OF FACILITIES

H. $1.0 million general reduction.

IV. RESEARCH AND PROGRAM MANAGEMENT

I. No change.

The Committee adopted a number of language provisions and deleted one provision proposed by the Administration as follows:

A. The Committee adopted a new Section 106 proposed by NASA which provides statutory oath administration authority to the NASA Inspector General staff in the performance of duties.

B. The Committee deleted a new Section 107 proposed by NASA which would amend the patent section of the Space Act of 1958 to provide that inventions in space under United States jurisdiction be considered made or used in the United States for purposes of patent law.

C. The Committee adopted a new Section 108 to clearly show the Subcommittee's intent with regard to the additional funding provided for Orbiter activities.

D. The Committee adopted a new Section 109 to extend the life of the National Commission on Space from "twelve months" to "eighteen months."

E. The Committee adopted a new Section 110 requiring the Administrator to review those recommendations of the President's Private Sector Survey on Cost Control dealing with NASA and such other recommendations as may be included in the OMB report "Management of the United States Government—1986" and submit a report to Congress.

F. The Committee adopted a new Section 111 requiring the Administrator to initiate a feasibility study to ensure a timely flight opportunity for a physically disabled American.

G. The Committee adopted a new Title II which would establish a Space Shuttle Pricing Policy for the period fiscal year 1989–1991 which will be discussed more later.

H. The Committee adopted a new Title III, a provision to authorize funding for the Department of Transportation, Office of Commercial Space Transportation, which was established pursuant to the Commercial Space Launch Act.

In considering the NASA fiscal year 1986 budget request, the Subcommittee on Space Science and Applications held 10 days of hearings in February and March 1985 to review the status of NASA space activities. Testimony was taken from representatives of NASA, the U.S. Air Force, the Aerospace Safety Advisory Panel, and the industrial and scientific community. The aeronautics activities of NASA were considered separately by the Subcommittee on Transportation, Aviation and Materials and will be discussed in detail by the gentleman from Kansas [Mr. GLICKMAN].

The NASA budget for fiscal year 1986 before you:

Includes $230 million to continue systems definition studies and advanced technical development activities leading to development of a space station in the 1990's;

Provides funding for orbiter structural spares and operating spares to support the existing four orbiter fleet and to help maintain production readiness for a fifth orbiter vehicle;

Supports continued development of the space telescope for a late 1986 shuttle launch;

Schedules the Galileo mission to Jupiter for a 1986 shuttle launch using the shuttle/Centaur upper stage;

Continues support for flight missions such as Voyager and Pioneer that have been launched and are returning valuable scientific data;

Supports shuttle operations leading to an initial flight rate capability of 24 flights per year;

Authorizes continuation of U.S. support to the Ulysses with only the European spacecraft for launch in 1986;

Provides for continuation of the Upper Atmospheric Research Satellite Program and for the development of a scatterometer instrument for the Navy remote ocean sensing satellite;

Includes funds for continuing development of the Venus radar mapping mission and the Mars geoscience/climatology orbiter;

Includes funds for initiation of the Orbital Maneuvering Vehicle Program;

Continuing support to launch and operation of the tracking and data relay statellite system;

Supports NASA civil service employment levels at approximately 21,800;

Mr. Chairman, in conclusion, I want to address NASA's advanced program plans and the need for long-range civilian space goals. This committee has continually urged increased emphasis by NASA on long-range planning.

There is the continuing need to ensure U.S. preeminence in space for reasons of national morale, political prestige, advancement of U.S. science and technology, and educational motivation and stimulation. The development of new space systems goals and advanced programs beyond the basic space shuttle and the planned space station is a necessary consequence of this need for continued vitality in space, particularly in the light of a—to all appearances healthy and dynamic—Soviet space program.

The National Commission on Space which was established in last year's authorization and the membership of which was announced by the President last week should provide a valuable mechanism for public discussion of our Nation's long-range civilian space goals.

In the context of the clear needs which are presently foreseen, proper planning for the future will result in a balanced civilian space program which will make major contributions to our economy and national prestige.

NASA is one of the few Federal agencies whose spending power has decreased over 15 years. The spending power in the NASA budget is less than one-third of that 15 years ago. While NASA spending represented 4.4 percent of Federal budget outlays in fiscal year 1966, NASA spending represent less than eight-tenths of 1 percent of Federal budget outlays in fiscal 1986. These NASA budget trends do not recognize the positive contributions which the NASA programs can make to national defense, the Nation's economy, monitoring of our natural resources, energy and mineral exploration, and the expansion of scientific knowledge.

In developing the bill before us today, I want to thank the gentleman from Pennsylvania [Mr. WALKER] for his efforts. I want to recognize the dedicated efforts of the members of the Committee on Science and Technology and, in particular, my colleagues on the Subcommittee on Space Science and Applications. Each member of the subcommittee on both sides of the aisle has made a significant contribution.

As always, we can depend on the gentleman from Florida [Mr. FUQUA], the chairman of the full committee, and the gentleman from New Mexico [Mr. LUJAN], the ranking Republican member of the committee for their knowledge and personal insight into these complex programs. Their diligent efforts continues to be of immeasurable help in establishing a sound bill and strong NASA programs.

SPACE STATION

The space station will represent a fundamentally new and versatile capability to support activities in space in the decade of the 1990's and beyond.

While definition of a specific station configuration is yet ahead of us, it might be appropriate to describe conceptually what NASA now considers the station to encompass. A space station is conceived as a multipurpose permanent facility in low-Earth orbit, that is comprised of both manned and unmanned elements and that significantly enhances the efficiency of operations in space. The station would consist of a manned base and associated unmanned platforms, oriented to the needs of both science and applications missions, and man-tended from the base. The base and the platforms would be launched in modular sections carried into orbit in the cargo bay of the shuttle. The shuttle would also be used for logistics resupply and crew rotation.

For fiscal year 1986 NASA is requesting $230 million for the space station program. NASA is continuing an extensive definition effort with sufficient resources to assure that the program, when hardware development is initiated, will be thoroughly defined, responsive to user requirements, and based on the proper mix of man and machine, incorporating the most advanced technology available. These definition efforts will include an automation plan to utilize the best of both manned and unmanned modes to achieve optimum productivity at the

station. The fiscal year 1986 effort will include continuing assessment of space station utilization requirements and continuation of a number of advanced development test beds to evaluate high leverage space station technology options. The fiscal year 1986 program will comprise the second year of this detailed engineering definition effort which will provide the basis for commitment to the final design for the construction of the space station.

SPACE TRANSPORTATION SYSTEM

The space transportation system is at a critical phase at this time regarding the continuation of the capability to produce additional space shuttle orbitors. We have invested several billion dollars to develop this capability, a capability that puts this country in the forefront of an increasingly worldwide competitive space industry.

Yet, as we are just now on the verge of fully recognizing and exploring its uses and benefits, we are at the same time on the verge of losing the capability to build additional orbiters—the heart of the space transportation system. The space transportation system is a national system to be used as a national resource for civil and defense purposes.

The committee has recognized this problem by authorizing funds in the fiscal year 1984, fiscal year 1985, and fiscal year 1986 NASA budgets to procure orbiter structural spares and to maintain production readiness for a fifth orbiter vehicle.

This funding will keep the nationwide network of major orbiter structural subcontractors from further closing down their manufacturing capability, while the need for additional orbiters receives more study. These structural components will be used as spares to the current orbiter fleet in the event of major structural damage. Such major damage could have a significant impact on the ability of NASA to meet its launch commitments. By having the structural spares available, this impact can be lessened. Should a decision be made at a later time that an additional orbiter is required, these structural components will be used to build that orbiter. By having these components such as wings, vertical stabilizer, crew compartment available, the manufacturing effort to build an orbiter will be reduced.

I urge your support of this logical approach to an issue of vital national interest. It is an approach that allows us to continue to study this problem as we gain additional flight experience and evaluate the results of the new marketing initiatives that are being undertaken along with the resultant mission demands. The four orbiter fleet now authorized can meet mission demands for the next 4 or so years. But we know that these demands are almost certain to grow; the exact timing of this growth is difficult to predict. However, the long lead times involved in building an orbiter make it mandatory that we not close off our manufacturing capability at this time.

PHYSICS AND ASTRONOMY

In 1982 the National Academy of Sciences published a report entitled, "Astronomy and Astrophysics for the 1980's" popularly referred to as the Field study after its leader, professor George Field. This report, based on a consensus of the U.S. astronomical community, is of great value in laying out a blueprint for astronomy and astrophysics for the coming decade. The recommendations in this report deserve serious and prompt attention by NASA with a view toward implementation.

The committee notes that the field study endorsed two major projects which were assumed to be firm commitments. That is, these projects were taken as already approved, and the study focused on the follow-on projects. These two major projects were the shuttle infrared telescope facility [SIRTF] and the solar optical telescope [SOT]. It is of concern, however, that neither of these programs are progressing at a satisfactory rate toward the dates originally projected. This survey further recommended the advanced x ray astrophysics facility as the highest priority future astronomy program.

The committee recommended modest increases in the advanced technical development activities for the shuttle infrared telescope facility and the advanced x ray astrophysics facility and for laboratory equipment and instrumentation.

Another major emphasis of the Field study was the need to strengthen the infrastructure of the astronomy and astrophysical sciences. Vigorous basic research programs at U.S. universities are essential for training future scientists and engineers and ultimately, for dissemination of the latest scientific results to university students and the general public. Grants awarded through NASA's Research and Analysis Program provide a direct stimulus to the academic community and are the mainstay for the infrastructure in the astronomical and astrophysical sciences.

PLANETARY RESEARCH AND ANALYSIS

The Planetary Exploration Program encompasses the scientific exploration of the solar system including the planets and their satellites, comets, and asteroids, and the interplanetary medium. The program objectives are: (1) to determine the nature of planets, comets, and asteroids as a means for understanding the origin and evolution of the solar system; (2) to understand the Earth better through comparative studies with the other planets; (3) to understand how the appearance of life in the solar system is related to the chemical history of the solar system; and, (4) to provide a scientific basis for the future use of resources available in near-Earth space. Projects undertaken in the past have been highly successful. The strategy that has been adopted calls for a balanced emphasis on the Earth-like inner planets, the giant gaseous outer planets, and the small bodies (comets and asteroids). Missions to these bodies start at the level of reconnaissance to achieve a fundamental characterization of the bodies, and then proceed to levels of more detailed study.

In the past several years, the administration's budget request for planetary research and analysis has been, in the opinion of the committee, inadequate. As a result the committee has added a significant amount of money to this line item for the past several years. However, for fiscal year 1986, the agency request for research and analysis is adequate. Accordingly, the committee has added no funding. The request includes adequate technology development funding for the comet rendezvous and asteroid flyby mission. The committee did have to add funding for other missions for which the request was inadequate and has made it clear in report language that the adding of funds for other missions is not intended to imply any bias against the CRAF mission.

MATERIALS PROCESSING IN SPACE

The materials processing in the space program is establishing a research base on the role of gravitational influences in the processing of materials, particularly those of high technological interest. There is a growing awareness now that phenomena such as convection, sedimentation, and bouyancy during fluid phase processing can limit the perfection and performance of an extremely wide range of materials and processes from semiconductor crystals to biological separation techniques. The key to obtaining this knowledge lies in sound research and in the ability to eliminate gravity for times long enough for measurement and experimentation.

The materials processing in the space program has a strong commitment to the former; and, the shuttle now provides the unique and complementary opportunity for the latter. The benefits to both terrestrial as well as space processing can well be substantive—a view clearly shared by Russia, Europe, and Japan, who all now have active MPS programs as well. The NASA MPS Program also assists in the commercialization of space processing by establishing unique arrangements for industry/Government risk sharing in proof-of-concept joint endeavors. These no-exchange-of-funds programs produce benefits, not only to American industry, but to the research based NASA MPS Program as well.

Again, I urge my colleagues to support H.R. 1714, the NASA fiscal year 1986 authorization.

□ 1640

Mr. LUJAN. Mr. Speaker, I yield 5 minutes to the gentleman from Florida [Mr. LEWIS].

Mr. LEWIS of Florida. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in support of H.R. 1714, authorizing appropriations for the National Aeronautics and Space Administration for fiscal year 1986.

I am pleased that we were able to stay within the President's request this year. It was not easy—there are so many worthwhile programs—it is truly unfortunate that some had to be cut. However, given the budget constraints we must face, I believe this bill provides for a sound NASA program for the coming year.

The Aeronautics R&D Program authorized in this bill reflects an increase of just under 3½ percent which barely accounts for inflation. I know I speak for many of my colleagues when I say I wish we could augment this very worthwhile program. Aerospace is one of the few areas where we still enjoy a favorable trade balance, and this is in no small measure due to the outstanding aeronautics research and technology provided by NASA through the programs authorized in this bill.

I am especially pleased that we were able to provide some real growth in the R&T base activities this year. These programs were increased by $17 million or 7.6 percent over last year's appropriation. Too often in the past the R&T base programs have been viewed as a source of funds to satisfy special interests. But without these programs there would be no technology base for the future—so it is particularly satisfying to me that this did not happen this year.

And, I might add, that this was accomplished without sacrificing the propfan program this year. I am happy to report that this very important program will go forward as planned with the flight validation still scheduled for 1987.

Mr. Chairman, I would like to call to your attention a report that was released earlier this week by Dr. Keyworth, Director of the Office of Science and Technology Policy outlining the national goals for aeronautics R&D. This report was the result of a 2-year study by the Aeronautics Policy Review Committee established by Dr. Keyworth. The committee, composed of government, industry, and academic experts, recommended three major goals for aeronautics R&D into the 21st century.

First, we must advance the technologies needed to develop a new generation of quieter, more economical subsonic aircraft. This will benefit not only civil aircraft, but military aircraft as well by providing increased payloads and range, reduced maintenance, and increased operational flexibility.

The second goal is the development of the technology necessary for sustained supersonic flight—which also has potential application for both civil and military aircraft.

And, finally, the third goal is the convergence of aeronautical and space technologies and the exploration of the transatmospheric regime. This is a particularly visionary goal, and one which the Committee on Science and Technology has consistently supported.

Mr. Chairman, these are all lofty goals—made all the more difficult because of our constrained aeronautics budget—but I believe the Aeronautics Program in this bill is directed toward those goals, and I urge all my colleagues to join me in supporting the fiscal year 1986 NASA authorization bill.

Thank you.

Mr. LEWIS of California. Mr. Chairman, will the gentleman yield?

Mr. LEWIS of Florida. I am most happy to yield to my colleague, the gentleman from California.

Mr. LEWIS of California. Mr. Chairman, I appreciate my colleague, the gentleman from Florida yielding.

First, let me say that I believe the entire House should extend their congratulations to the gentleman from Florida [Mr. FUQUA], our chairman, and to the gentleman from New Mexico [Mr. LUJAN], the ranking member, and also to the gentleman from Florida [Mr. LEWIS].

Further, I would very much like to associate myself with the remarks of our colleague, the gentleman from Florida [Mr. NELSON] for they reflected very much my experience in the work we have done in the field of NASA's effort in my Subcommittee on Appropriations that deals with their budget.

Further, I would like to specifically rise in support of the language in the authorization bill which strongly urges NASA's continued efforts to explore the viability of a second source for the shuttle solid rocket motors. Injecting competition into this field would be another significant step in advancing the progress we are already making.

Mr. Chairman, I rise in support of language in the authorization bill which strongly urges NASA's continued efforts to explore the viability of a second source for the shuttle solid rocket motors.

As the Members know, to a large degree the future commercial success of the shuttle depends on costs. We must find areas where costs can be reduced and proceed vigorously to implement those savings.

The history of competition in Government procurement in general, and in the area of propulsion specifically, suggests that significant savings can be made on the shuttle's solid rocket motors.

Several major propulsion companies have already indicated to NASA a strong interest in competing on the solid boosters. While each of the companies would in all probability have different costs projections, one chief executive officer advised me recently that at current costs, with a 24-per-year-flight rate at the end of the decade, savings to NASA between 1988–99 would be $1 billion.

And so Mr. Chairman, we sense that this is an area of tremendous importance to the Shuttle Program and I encourage NASA to review this matter most carefully, particularly in view of discussion about the future need for large boosters for heavy lift vehicles.

Mr. FUQUA. Mr. Chairman, I yield 1 minute to the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. Mr. Chairman, first of all, I rise in strong support of this legislation.

I want to commend the chairman and the members of the Science and Technology Committee for their fine work, especially the chairman, the gentleman from Kansas [Mr. GLICKMAN], the gentleman from Florida [Mr. NELSON] and my colleague, the gentleman from Ohio [Mr. TRAFICANT] who has been a fine new member of that committee.

The National Aeronautics and Space Administration has written some of the most brilliant success stories in American history. Today, NASA continues its ground-breaking research and development, providing new technology and changing the way we perceive ourselves and the universe. The money spent on NASA is one of the most cost-effective investments we can make and I offer my wholehearted support to this legislation and encourage my colleagues to vote for it.

Those of us from Ohio are particularly proud of NASA because of the work performed by the men and women at the Lewis Research Center in Cleveland. The Centaur, for example, has powered missions to Mars and put a payload in geosynchronous orbit 22,000 miles above the Earth. In the field of aeronautics propulsion, the Lewis Center's Advanced Turboprop project is proceeding on schedule to complement work already performed on fuel efficient aircraft engines. Lewis is also NASA's lead center for satellite communications.

Finally, I must mention the lead role that the Lewis Center has played in space power development. This particular area of expertise will become

increasingly important in the years to come as NASA proceeds with the space station, the major step in space exploration. The power requirements for the space station will require the development of new systems and technology. The research and development will be performed at the Lewis Research Center.

Our country was developed by people who were always looking toward the horizon, curious to see what they would find. That same curiousity has taken men to the Moon and sent satellites beyond our solar system. The spiritual and economic benefits of the work performed by NASA are impossible to forecast or calculate. Based on past performance, though, we can confidently assert that those benefits will be immense. This legislation will make the resources available for our brightest scientists and engineers to keep advancing the horizon for all of us. Our continued progress as a nation depends on the kind of activities this bill will make possible. I urge bipartisan support for the legislation.

□ 1650

Mr. LUJAN. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. McGRATH].

Mr. McGRATH. Mr. Chairman, I rise in support of H.R. 1714, the NASA authorization for fiscal year 1986.

I would like to commend the chairman and the ranking minority member of the committee for their efforts in reporting out a sound and well balanced piece of legislation which is funded at the same level as the President's request.

H.R. 1714 provides authorization for a number of important programs within the National Aeronautics and Space Administration. I am especially pleased that the bill provides $230 million for continued design and research on a manned space station, which is the requested amount.

The space station will serve to invigorate American industry by distributing over 75 percent of the space station's systems investment to industry; and also by creating an environment of industry competition for space station design and development contracts. This will help to maintain this country's position at the cutting edge of new and innovative technology.

I was pleased to note in the report that the committee has taken an interest in the area of space access for the physically disabled. On Earth, disabled people face barriers that limit their opportunities to be fully productive. In the zero-gravity environment of space, all barriers to access are removed, and all people equally weightless. As someone with longstanding interest and experience in working with the handicapped, I applaud the committee's view that the inclusion of a disabled person on future missions affords a historic opportunity to prove that those handicapped on Earth may be freed to become highly valuable and fully productive members of the space-based materials processing economy of the future.

The bill provides $45 million to maintain production readiness for an additional orbiter vehicle. While I am pleased that the lines will remain open, I believe a policy decision on the funding of a fifth orbiter is long overdue. I think it is the consensus of the members of the committee that there is a need for a fifth orbiter, and I am sorry funding for it has not been provided in this bill.

Nevertheless, I want to emphasize that I support this bill, and remain an enthusiastic advocate of NASA and the space program. I urge my colleagues to vote favorably on H.R. 1714.

Mr. FUQUA. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. BROWN], a member of the committee.

Mr. BROWN of California. Mr. Speaker, I rise in support of the bill H.R. 1714, which would authorize fiscal year 1986 appropriations for the National Aeronautics and Space Administration.

I congratulate the chairman of the full committee, Mr. FUQUA, and the chairman of the subcommittee, Mr. NELSON, for bringing a basically sound bill to the floor. I also congratulate the senior Republican Member, Mr. LUJAN, and the ranking member of the subcommittee, Mr. WALKER, for the high degree of cooperation that they demonstrated as we worked on this bill together.

Although I have some reservations about this bill, I do want to particularly commend the committee for two actions. First, the committee added advanced technology development funding for several science missions to keep them moving toward start of their development in future years. Second, the committee approved my amendment to earmark $3 million for shuttle intermediate-class payload development. I appreciate the committee's recognition of the need to provide for more frequent shuttle flight opportunities for scientists.

Mr. Chairman, in authorizing fiscal year 1986 funds for the National Aeronautics and Space Administration, the Science and Technology Committee has fallen short of the commitment made to the committee by Administrator Beggs for 1 percent real growth for the agency. The shortfall is not large and would not be of great concern if the committee's actions were driven by a more overriding principle than remaining within the budget levels submitted by the administration. As the authorizing committee, we have the responsibility for setting national space policy. But we have fallen short of this lofty goal, and have chosen instead to allow NASA programs to coast for yet another year while we fail to recognize and acknowledge our role as policymakers.

When compared with the growth in military space programs, the NASA funding levels look even bleaker. We now spend nearly twice as much on military space programs as we do on NASA's space programs. In fiscal year 1985, for example, the military is expected to spend approximately $13 billion compared to NASA's $7 billion on space programs. The difference between civilian and military spending in space will become even more pronounced if the President's strategic defense initiative goes forward as planned. Below is a chart from the Congressional Budget Office which shows the funding trend for NASA versus Defense Department spending on space programs.

SPACE ACTIVITIES OF THE U.S. GOVERNMENT; HISTORICAL BUDGET SUMMARY—BUDGET AUTHORITY

[In millions of dollars]

Fiscal year	NASA		Defense
	Total	Space [1]	
1959	330.9	260.9	489.5
1960	523.6	461.5	560.9
1961	964.0	925.0	813.9
1962	1,824.9	1,796.8	1,298.2
1963	3,673.0	3,626.0	1,549.9
1964	5,099.7	5,016.3	1,599.3
1965	5,249.7	5,137.6	1,573.9
1966	5,174.9	5,064.5	1,688.8
1967	4,965.6	4,830.2	1,663.6
1968	4,587.3	4,430.0	1,921.8
1969	3,990.9	3,822.0	2,013.0
1970	3,745.8	3,547.0	1,678.4
1971	3,311.2	3,101.3	1,512.3
1972	3,306.6	3,071.0	1,407.0
1973	3,406.2	3,093.2	1,623.0
1974	3,036.9	2,758.5	1,766.0
1975	3,229.1	2,915.3	1,892.4
1976	3,550.3	3,225.4	1,983.3
Transitional quarter	931.8	849.2	460.4
1977	3,817.8	3,440.2	2,411.9
1978	4,060.1	3,622.9	2,738.3
1979	4,595.5	4,030.4	3,035.6
1980	5,240.2	4,680.4	3,848.4
1981	5,518.4	4,992.4	4,827.7
1982	[2] 6,043.9	5,527.6	6,678.7
1983	6,875.3	6,327.0	9,018.0
1984 estimate	7,217.0	6,590.0	10,590.0
1985 estimate	7,491.4	6,804.3	12,912.7

[1] Excludes amounts for air transportation (subfunction 402).
[2] Includes $33.5 million unobligated funds that lapsed.

Let me now go into a little more detail about NASA's science and applications programs and the actions that the committee has taken:

First, I would like to make special note of the progress made in the committee in recognizing the need for more frequent shuttle flight opportunities for university scientists. Testimony in support of the Shuttle Science Working Group report of September 1984 indicated the need to develop intermediate class payload opportunities to fill the gap between the spacelab capabilities and the getaway specials, and recommended a $25 million per year budget for this activity. The committee earmarked $3 million for intermediate-class payload development, and adopted report language

urging the agency to develop this program, and to report to the committee on its progress and on future plans. This is a small step in support of this important activity.

The committee recognized the importance of advancing fundamental science and applications by supporting, although at minimal levels, the gravity probe-B [GP-B] experiment, the ocean topography experiment [TOPEX], the x-ray astronomy facility [AXAF], the shuttle infrared telescope facility [SIRTF], and the international solar terrestrial physics [ISTP] program. Unfortunately, however, the meager funding supplements provided in this bill for these programs do not add up to any badly needed new starts this year, a matter of concern in the out-years when other important programs will be delayed as a consequence. Nevertheless, the additional funds added for TOPEX, ISTP, and GP-B will be helpful in moving these programs toward fiscal year 1987 new starts, and are appreciated by the scientific community.

I would like to say a few words about these exciting science missions. For more than 20 years, NASA has funded an experiment, gravity probe-B, that would test a particular effect predicted by Einstein's general theory of relativity. The effect predicted is very small, so that a delicate and expensive apparatus is needed, and, for the same reason, the experiment must by done in the zero-gravity conditions of space. With the advent of the shuttle, it is possible to conduct a test aboard the shuttle to see if the apparatus will work before committing funding for the full experiment. The committee added $4 million to move the agency toward the shuttle test of this relativity experiment.

The infant field of x-ray astronomy was invigorated by the high-energy astronomy observatory satellites 1 and 2, but they stopped returning data in 1981. NASA plans to follow up this successful start by building the advance x-ray astronomy facility [AXAF]. Because AXAF would utilize very advanced x-ray optics, these optics could present a significant risk to the development program. Therefore, the committee added $2 million for continued advanced technology development of AXAF in order to minimize technical uncertainties and to indicate a commitment to the eventual start of development of this mission.

The field of infrared astronomy was revolutionized by the infrared astronomy satellite [IRAS], which conducted an all-sky survey from space, and NASA plans to follow with the space infrared telescope facility [SIRTF]. There is a need to develop and test technologies for the maintenance and servicing of this cryogenically cooled telescope so it can be operated for a period of years—a significant improvement over the 1-year lifetime of IRAS. Therefore, the committee added $1 million for advanced technology development of this mission.

The committee added $4 million for the ocean topography experiment [TOPEX] to prepare for a fast start on its development. TOPEX was planned for a 1990 launch—based on an expected fiscal year 1986 start which is not included in this bill—in order to achieve maximum overlap with the NROSS satellite [Navy resource observation satellite] and thus make maximum impact on the world ocean climate experiment [WOCE] and the tropical ocean global atmosphere [TOGA] research programs. An increment to the TOPEX budget will enable efforts to begin the integration of science instruments onto the spacecraft.

The international solar terrestrial physics [ISTP] program is planned as a six-satellite joint program between NASA, three satellites; the European Space Agency, two satellites; and Japan; one satellite. The United States has indicated to its foreign partners its intent to carry out this program, and a new start has been anticipated in fiscal year 1986. A small investment now in detailed studies of the science instruments and related engineering tradeoffs could minimize program runout cost and prevent schedule delays. Therefore, the committee added $3 million to prepare for an early start on development of the program.

The programs I just mentioned are a few examples of the very exciting scientific research that NASA is involved with. As I mentioned earlier, the funding supplements provided by the committee are welcomed, but I am concerned about the long-term funding trend in NASA's space science and applications programs. I have been assured that the absence of new starts this year is not indicative of reduced commitment to space science. I hope this is true. But in the attempt to keep spending down this year, we may be adding to the ultimate costs of these projects, and thus to the overall Federal budget, by feeding standing armies to keep scientific teams together.

Our inability to make a long-term commitment to the health of the space sciences is perhaps most evident in our universities. Dr. George Keyworth, the President's science adviser, described the status of university research facilities as "disgraceful and deplorable" in his confirmation hearings in 1981, and he noted that the situation offers "unattractive prospects" for those interested in pursuing careers in experimental science. Countless witnesses have since testified before our own committee on the situation today in which we are training the next generation of space scientists and engineers on antiquated equipment.

Both the National Science Foundation and the Department of Defense have recognized the university instrumentation problem and have devoted significant resources to it. The erosion of our universities' laboratory equipment is not a problem that is going to be solved overnight. The amendment which I offered in the committee to devote $11 million to the problem for fiscal year 1986 would not, by itself, have made a significant difference without a similar commitment next year, and for years after that. Yet the committee rejected this modest attempt to begin to address this issue.

But the space sciences and applications programs are not the only areas where the lack of a coherent space policy is evident and disturbing. Determining national policy with regard to the related issues of the space shuttle, the need for a fifth orbiter, pricing policy, the space station, and space science is a difficult task. As a long-time member of the Space Science and Application Subcommittee, I have participated for over 10 years in developing national space policy. I have been an enthusiastic and strong supporter of our Nation's space programs, and of the shuttle program in particular. However, this support does not preclude taking a critical look at the way Federal dollars are allocated to NASA.

The United States currently operates a fleet of four space shuttles, counting the Atlantis, which will be delivered later this year. Since fiscal year 1983, NASA has stockpiled spare parts in the event that a decision is made to procure a fifth space shuttle. By the end of fiscal year 1985, NASA will have been given $400 million for this program. But according to testimony of NASA Administrator James Beggs, there is no need for a fifth shuttle orbiter.

Over the last decade, the expected number of shuttle missions has decreased from over 500 to around 300 missions through 1991. Administrator Beggs, in testimony before our committee, said "we could fly these things—the current shuttle fleet—until well into the second or third decade of the 21st century at the flight rate we are projecting now." Yet the bill before us adds $45 million to the administration request for shuttle structural spares to "keep the production lines open" for another year to protect a future option to procure a fifth orbiter.

Mr. Chairman, in a year when critical programs are being eliminated or cut to the bone, it is a mystery to me why we insist on protecting our option to procure an unneeded fifth orbiter at some future hypothetical date at a price tag of somewhere between $2 and $3 billion. I would like to note

that NASA and the Department of Defense are engaged in a study of our future space transportation needs. NASA should be supported in this endeavor, and ought to be forging ahead on the cutting edge of space technology as was done with the Space Shuttle Program. NASA should be looking ahead to second generation space transportation, not building another space truck.

I have raised these issues resulting from the absence of a coherent national space policy, in the past. Clearly, the problems will not be solved overnight, nor will the solutions be simple, nor will everyone agree on how best to proceed. But we can't postpone the solutions indefinitely. Perhaps one witness before our committee said it best when he remarked that "each year these problems are not addressed, they become more critical and difficult to solve. We are prepared to wait another year and to watch our scientific enterprise coast for a little way, but we also clearly recognize that this cannot be allowed to continue for long. We urge the Congress to begin planning a solution now."

Mr. Chairman, I am in support of this bill. It is not from my standpoint the best bill in the world and I have some reservations about many parts of it. But I think the committee and the committee leadership has worked diligently to bring to the floor a bill they consider to be balanced and satisfactory.

Let me speak for just a moment in a general way about why I have reservations about this bill. And I do this because I do not want to have the Members swayed by my views unless they share some of my biases.

I have always had a vision about space. I have measured the space program against that vision. It is a vision which was enunciated a generation ago by great Presidents such as Eisenhower and Kennedy, a vision about the tremendous values which space held for the benefit of all mankind and about a role for the United States as a leader in the search to explore this new frontier.

I think we have lost that vision and it is that loss of vision which causes me so much pain as we debate the bill this year.

Let me mention a few of the things that cause me to say this. Today we hardly have a civilian space program. More than 75 percent of our space program is military, funded by the Department of Defense. And it is being used in accordance with a long-range plan to develop space as an extension of the arena of war on Earth. That disturbs me very deeply because I think that we could and should draw a line against putting weapons in space, and we could set a new standard for what the human race might do cooperatively in space rather than making it an extension of the arms race and the battlefields which we are trying to avoid here on Earth.

So that is the No. 1 problem that faces me, the problem that pressures from the Department of Defense, which in the last 5 years has increased its space spending more than the total NASA budget today, is something which is forcing us into making compromises in the civilian space program that we should not have to make.

What has happened in the civil space program? We have no strategic plan for it. We in the Congress last year decided to set up a commission to give us some ideas about long-range plans. The membership of that commission was not even appointed until last week.

I do not think there is much enthusiasm in this administration to encourage long-range thinking about civil space programs. What has happened is that the vision of space as a new frontier for man's exploration has gone down the tubes.

We had a magnificent program, magnificent visions of what man could do in exploring the solar system. Yet we have not had a new start in years, and we are not going to have any major new starts in exploring the solar system for years to come.

We have a dozen major new scientific experiments lined up waiting to be launched. None of those are being started this year.

Yes, the chairman wisely allocated a small amount of money to continue with the definition of these projects and to do some of the preliminary development. But no new major scientific starts are authorized in this budget.

The condition of university research in space science is going downhill. There is inadequate funding for the enhancement of laboratory facilities and for the analysis of data. We have starved these needs, instead, spending the money for programs, worthy in themselves, and more politically attractive, such as the space station. But the science programs have been starved because of that, a fate which the National Academy of Sciences anticipated in its report on the space station.

Possibly more important, vital applications programs, programs that could result in the development of new industries here on Earth and in space have been thwarted and frustrated in part because of lack of funds and in part because of policy barriers set up which NASA could not control. And I am delicately alluding here to certain restrictions flowing out of DOD requirements that face us. These restrictions have prevented the development of healthy applications programs which could provide the opportunity for this trillion dollars in new commercial activity referred to by our distinguished friend from Pennsylvania [Mr. WALKER].

That is a minimum of what we could expect if we were to allow the civil space program to develop in the way that it should.

□ 1700

This bill does not fulfill that vision, and it is that vision which I am measuring it against. There are many important policy areas that are not being adequately dealt with in this bill. The shuttle pricing policy is one example, and we will debate this policy during the amendment period.

We are faced with contradictions in that policy which we cannot resolve. We are seeking to establish pricing policies for foreign and commercial payloads which will make us competitive with Arianne, the French system. If we do that, we put the domestic, commercial, expendable launch vehicle business out of business. And we want to cultivate that expendable launch business, and we are not being able to do that.

So we have not been able to resolve these contradictions. I will develop this a little further during debate in the amendment process.

Mr. LUJAN. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. PACKARD].

Mr. PACKARD. I know of no program in the United States at the present time that has done more to encourage our young people to pursue academic excellence in science and technology than has our space program.

I have certainly come onto this committee heartily endorsing the program and certainly I am rising now to support H.R. 1717, authorizing appropriations for the National Aeronautics and Space Administration for fiscal year 1986.

Aeronautical research and technology programs typically precede aeronautical development and production by many years. The cycle in which a theoretical analysis or a laboratory experiment leads to large-scale testing which results in a proven technology advance may run 10 to 15 years—and the design, development, and production process by which the new technology is incorporated in an actual airplane can take another 6 to 8 years. The Air Force C-17 airlift transport, just now entering full-scale engineering development, uses NASA winglets conceived in 1973 and tested in 1975. It also incorporates one of the first applications of a propulsive lift concept first developed and tested at NASA Langley in the fifties.

The supercritical aerodynamics research conducted by NASA in the sixties now provides much of the basis for the wing designs employed on today's transports and fighters. And in

areas where high-speeds are not essential, such as fans, compressors, and the small General Aviation aircraft, industry still uses the NACA low-drag airfoil sections developed even 10 to 15 years earlier.

The NASA "Refan" program of the early 1970's not only demonstrated an important noise reduction concept, but provided an approach and an impetus to a new engine development which has made possible transport aircraft, such as the McDonnell Douglas DC-9 "dash 80" and subsequent derivatives, which exhibit major savings in fuel. And the energy efficient engine research started by NASA several years later has provided technology now being incorporated in more advanced engines which will be even more fuel efficient.

NASA configuration concepts developed and tested in the sixties strongly influenced the designs of the F-14 and F-15 fighters now in service.

Numerous other examples could be cited, including the increased use of composite structures, the development of advanced fight management controls and displays, and the availability of new fire-resistant materials, all based on NASA-sponsored research during the last decade. And one final contribution—indirect but important—should be recognized: The unique NASA environment and programs have provided invaluable training for a number of top engineers who now apply their technical expertise and experience in key positions throughout the civilian aeronautics industry.

Not all of NASA's work lead to successful development of new technology, to be sure. High-risk aeronautical research, apart from being time-consuming and expensive, can never be counted upon to produce a profitable return for the private investor or a reliable basis for military development. For that reason, we must depend on NASA to continue conducting the broad, future-oriented, high-risk research that cannot be supported by the private sector of the DOD. Only with an assured supply of superior technology can our aircraft manufacturers continue to develop the superior U.S. civil and military aircraft on which we all depend.

I urge my colleagues to support this bill, H.R. 1714, which authorizes the appropriate authorization levels for the space program.

The CHAIRMAN. The time of the gentleman has expired.

At this time the Chair would like to advise the gentleman from Florida [Mr. FUQUA] that he has 8 minutes remaining; the gentleman from New Mexico [Mr. LUJAN] has 6 minutes remaining.

The Chair recognizes the gentleman from Florida [Mr. FUQUA].

Mr. FUQUA. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from Massachusetts [Mr. BOLAND], who is chairman of the subcommittee that deals with this budget on the Committee on Appropriations.

Mr. BOLAND. I thank the distinguished chairman of the Science and Technology Committee for yielding this time to me. I want to congratulate the chairman of the House Science and Technology Committee, the gentleman from Florida, and the chairman of the Space Science and Applications Subcommittee, Mr. NELSON, on reporting this very fine bill; and also the ranking minority member, Mr. LUJAN, of the Science and Technology Committee for the their efforts on this bill.

Mr. Chairman, I was particularly pleased to read the section of the bill dealing with the shuttle pricing issue. I wrote the gentleman from Florida in January and suggested that the shuttle was at the crossroads: Either we were going to continue to support this $18 billion investment by ensuring that the price for the shuttle was set at a level that would enhance the development of space, or we were going to see the space transportation system gradually atrophy to a launch rate of something less than 11 or 12 per year.

I believe the subcommittee has taken a bold step in setting a ceiling on the shuttle price at $71.4 million for the period 1989 through 1991. I also believe the committee's action is essential to maintain the viability of both the shuttle and this Nation's effort to advance the commercialization of space.

Without freezing the shuttle price, we would see virtually every commercial communications satellite launched by Ariane. After spending $18 billion on the shuttle, somehow that does not make sense, and it has not made sense to this committee.

I also want to assure the gentleman that we in the Committee on Appropriations will make an effort to reference by citation the shuttle pricing language carried in this authorization bill.

So, Mr. Chairman, on balance, I believe that your committee has done an excellent job with this bill. I do, however, want to add one note of caution: We are operating in a different atmosphere this year, and the HUD-Independent Agencies Subcommittee which I chair faces inequities among the agencies carried in our bill—including the fact that incremental units for HUD's subsidized housing program was zeroed for fiscal years 1986 and 1987.

In the past, our subcommittee has prided itself on producing an appropriations bill as early as possible, and almost always before the beginning of the fiscal year. But in all candor, I will have to admit that this year we could find ourselves, along with all the other subcommittee appropriations bills, in a continuing resolution.

I do not know how that will affect the NASA appropriation, particularly in relation to other agencies in the HUD bill—but you can be assured, Mr. Chairman, that we will do our best. I want to congratulate you and your committee on reporting an excellent bill.

□ 1710

Mr. Chairman, I want to make something very clear here. My friend, the gentleman from Pennsylvania [Mr. WALKER], suggested that last year the HUD Subcommittee undercut the space station with a man-tended effort. He is wrong. We actually added $5.5 million for the space station to help fund the man-tended option, bringing the 1985 total to $155.5 million. We believed the man-tended options was important, and we still do—because some day you may have to use it.

On the other point, the gentleman from Pennsylvania indicated that the 5-percent increase from the 1985 level to the 1986 request was for the space station. That is also wrong. Of that $375 million, only $75 million is for the space station. We asked the Administrator yesterday how he would address a reduction of that magnitude, and he did not suggest that a nickel would come from the space station.

So I thought the gentleman from Pennsylvania would like to have the record corrected, and I so do.

Mr. LUJAN. Mr. Chairman, I yield 3 minutes to the gentleman from Washington [Mr. CHANDLER].

Mr. CHANDLER. Mr. Chairman, it would be difficult, I think, to find any effort funded whole or in part by this Federal Government which does not deserve an increase in budget authority. Most of the programs we are going to authorize in this Congress are not only worthwhile but could all use additional budget authority.

And then beyond that, I think we would be hard pressed to think of a program that is any more worthy of greater budget authority than NASA. The success of our space program has been an inspiration to all mankind. The benefits to the private sector of our economy have been direct, immediate, and substantial.

But we can talk until we are blue in the face about reining in Federal spending and getting a handle on that $200 billion deficit, and we are not going to get anywhere by voting for increases in authorization bills.

If we are going to bring down the deficit, we are going to have to start with an across-the-board freeze. That is an absolute minimum. And that only brings the deficit down by $38 billion. Then we have to build on that

$38 billion base with additional cuts, every single one of them painful.

And we cannot bring about an across-the-board freeze if we vote to increase budget authority for even the best program by 5 percent over the fiscal 1985 funding level.

I support NASA and I support funding NASA at current levels, but I cannot support an increase in the face of a $200 billion deficit. We owe it to the working people of our country, to our children, and our grandchildren to rein in this deficit.

I plan to vote today for the Morrison amendment which will scale this back to 1985 levels and then I can support it.

I also want to say that my remarks should not be construed as being critical of Mr. FUQUA, Mr. NELSON, Mr. LUJAN, or Mr. WALKER. They are gentlemen with whom I serve on the committee, and I have the highest regard for them. My purpose today is to explain to you why something that is very important to me personally and something that is very important to my district cannot be supported. I can see the day when I am going to have to stand in front of a group of poor, elderly, whatever, and explain to them why they did not get an increase in their budget authority; and I do not want to have to explain why NASA got one and why I supported it. We have got to be consistent and we have got to start now. It cannot be business as usual in anything that we do, including NASA.

Mr. FUQUA. Mr. Chairman, I yield such time as he may consume to the gentleman from New York [Mr. SCHEUER].

Mr. SCHEUER. Mr. Chairman, I rise in strong support of the NASA authorization bill for fiscal year 1986, H.R. 1714, which is being brought to the floor today by the Committee on Science and Technology.

I congratulate the chairman of the full committee, the gentleman from Florida [Mr. FUQUA], and the chairman of the subcommittee, another gentleman from Florida [Mr. NELSON], for providing a well crafted and fiscally responsible bill.

In accomplishing this, we had the full support and the full cooperation of the minority, led by the senior Republican member, Mr. LUJAN from New Mexico, and the ranking member of the subcommittee, Mr. WALKER from Pennsylvania.

In particular, I want to commend the committee for two items that were highlighted in its report accompanying the bill (H. Rept. 99-32).

First, the committee stressed the need for the United States to have a vigorous development in remote sensing and the need for NASA and NOAA to cooperate in this matter.

I certainly support that.

Second, the committee strongly endorsed the International Biosphere/Geosphere Program, a program of research which would treat the Earth as a living system.

This program becomes more important as we are faced with problems—such as the carbon dioxide greenhouse effect—which are global in extent and which involve all systems of the Earth, it oceans, atmosphere and biosphere.

Let me now go into more detail about the two programs which I have mentioned. Both these programs will require significant interaction between NASA and NOAA and I want my colleagues to know that as chairman of the subcommittee which deals with NOAA's Atmospheric Research Programs, I intend to encourage them and ensure a great deal of cooperation between these two agencies.

Last year, our committee reported and Congress enacted the Land Remote-Sensing Commercialization Act of 1984, which became Public Law 98-365. Section 501(a) of that act directs NASA to continue and to enhance [its] programs of remote-sensing research and development. The most noteworthy recent event in NASA's Remote-Sensing Program has been its cancellation of virtually all of the work it was conducting on advanced technology using solid-state sensors, known as the multilinear array technology. Because of this, I have concluded that contrary to the legislative intent the agency has neither continued nor enhanced its Remote-Sensing Program. Certainly I do not see the vigorous program of R&D that was envisioned when we developed the language of Public Law 98-365.

At this point I want to make it very clear that I am not questioning the work that NASA is doing in this area, but rather the work it is not doing. In other words, the quality is acceptable, but the quantity is lacking. In particular, there seems to be much too little work on applications of remote sensing from space. If commercialization is ever going to succeed, there needs to be a great deal of research done on how this data from space can be of use here on Earth. The committee and I personally maintain great faith that this technology has the potential to be of great benefit to all mankind. But the benefits will not just happen without a great deal of hard work. And for this reason NASA must support the research, especially applications research, necessary to realize and achieve these potential benefits.

Section 501(e) of Public Law 98-365 calls for a national plan for research and development to be jointly developed by NOAA and NASA, and submitted to the Congress by July 17, 1985. I am looking forward to the timely receipt of this report and am urging NOAA to cooperate fully with NASA in its development.

In its report on H.R. 1714, which I fully support, the committee reiterated that it considered the Nation's remote sensing capabilities as an important national asset. Public Law 98-365 recognized this by providing that any commercial activity must operate so as to preserve the public interest and our national security. NASA's research activity should support this national asset just as NASA's Communications Research and Development program supports our national communications satellite industry.

Let me now turn my attention to the International Geosphere/Biosphere Program [IGBP], which is a proposed program of international and interdisciplinary research aimed at understanding the Earth as a living planet. More specifically, the program would seek to describe and understand, first, the interactive physcial, chemical, and biological processes that regulate the Earth's unique environment for life; second, the changes occuring in the system; and third, how these changes are influenced by human actions.

This idea surfaced as a U.S. initiative at the "Unispace '82" meeting in Vienna, Austria. It was advanced by activities at the National Research Council of the U.S. National Academy of Sciences, and last September was formally considered by the International Council of Scientific Unions [ICSU]. ICSU subsequently adopted a resolution to investigate the possibility of such a formal international research program and formed an advisory group to make a recommendation for its implementation at the next ICSU council meeting, which is scheduled for 1986. A U.S. committee on IGBP has been formed by the National Research Council to develop the U.S. proposal to ICSU. The committee report emphasizes the importance of IGBP and I want to associate myself strongly with that statement. The committee and I believe that as IGBP proceeds, observation of the Earth from space will become an integral component of the program. We encourage NASA to continue its research and development activities to support IGBP and also to continue supporting the Earth Systems Science Advisory Committee and the National Research Council Committee on the International Geosphere/Biosphere Program.

As chairman of the Subcommittee on Natural Resources, Agriculture Research and Environment, I intend to encourage NOAA to participate fully in this program.

Mr. Chairman, for all of the above reasons, I believe that this is a very good bill. It is forward looking and funds several important activites. I intend to support it and I urge my colleagues to do the same.

Mr. FUQUA. Mr. Chairman, I yield such time as he may consume to the gentleman from Virginia [Mr. BOUCHER].

Mr. BOUCHER. Mr. Chairman, I want to take this opportunity to bring to the attention of our colleagues the committee's interest in second sourcing of the solid rocket booster propellant for the space shuttle.

The committee report to accompany H.R. 1714 includes language supporting NASA's investigation of a second source and encouraging the agency to determine whether such competition would produce significant savings in the Space Shuttle Program.

The administration has stressed repeatedly the value of competition as a mechanism to increase efficiency and reduce costs. Having reviewed this matter, I believe that the Solid Rocket Booster Program is an ideal candidate for implementing second sourcing. Hundreds of millions of dollars can be saved over the life of the Shuttle Program.

I eagerly anticipate NASA's report to the committee on this matter.

Mr. FUQUA. Mr. Chairman, I yield such time as he may consume to the gentleman from Tennessee [Mr. GORDON]

Mr. GORDON. Mr. Chairman, I would like to voice my support of H.R. 1714, the NASA authorization bill covering fiscal year 1986. The programs outlined in this authorization will allow us to maintain a balanced research and development effort in space transportation, space science, space applications, aeronautics, and space technology.

Before continuing, let me compliment Chairman FUQUA and the distinguished ranking Republican member from New Mexico, Mr. LUJAN, for their hard work and effort in bringing this fine bill to the House floor.

I would also like to congratulate Hon. Mr. NELSON, chairman of the Subcommittee on Space Science and Applications for his dedication and the firm hand he exercised in guiding the NASA bill through the hearings and markup process. The subcommittee minority, led by Mr. WALKER also displayed excellent team spirit in moving this legislation.

Mr. Chairman, my support of this bill comes with no reservations.

I am excited and pleased with the initial progress being made by NASA on the Space Station Program. The development of this multipurpose facility is essential to the future of this country's space science and space technology research programs. The scope of this project and the magnitude of the investment will require that NASA continue to exercise administrative vigilance through all phases of space station development to ensure that the ambitious objectives of this exciting program are achieved.

I am pleased with the inclusion of title II in the bill covering the pricing of shuttle services to commercial and foreign users for the 3-year period beginning October 1988. This title underscores the importance of our national goal to make the space transportation system available to commercial and foreign users at a price which encourages the full and effective use of space.

I also applaud NASA for its development of the Hitchiker, Spartan, and Get Away Special shuttle payload programs. These programs will provide scientists with more flexibility, at a lower cost, to conduct serious scientific research in space.

I strongly support the continued authorization of funding for NASA's Technology Utilization Program. Although the size of this program is relatively small, its importance in accelerating the transfer and application of advanced aeronautics and space technologies cannot be overstated. It is my firm belief that we must continue to look for ways to shorten the time between the development of new space technologies and their infusion into the broader national economy.

Finally, Mr. Chairman, I would like to commend NASA for recent actions taken in the area of space commercialization. This year NASA's Office of Commercial Programs hopes to provide seed money for three to six centers for the commercial development of space. It is my feeling that these centers will play a critical role in assisting the scientific and research communities in moving new ideas through the basic research phase into the marketplace.

I am pleased to see this kind of government encouragement in response to the increasing level of interest shown by private industry and the capital markets in commercial space activities.

The aerospace industry is clearly one of this Nation's high tech winners in the world market arena. The importance of this industry in general, and the civil aircraft sector in particular, to the U.S. economy must not be overlooked as we make decisions about our future directions. The export of civil aircraft, engines and parts continue to make a positive contribution to our balance of trade that is second only to agriculture.

Of the approximately three quarters of a million employees in the industry, nearly one-third are engineers and scientists, the highest ratio for any manufacturing industry. As both a developer and user of new technologies, the aviation industry, when healthy is a catalyst for technological advancement across a broad sector of nonaerospace industries. While usually described by listing a relatively few large manufacturers, the industry is in fact the summation of over 15,000 firms located in at least 40 States that make up the supplier base that is common for all aircraft development in the United States, both military and civilian.

The nationwide employment, the technical competence it represents, the major contributions to the GNP and the balance of trade and maybe most importantly, the self supporting industrial base for national defense use are all vital to the U.S. economy. These benefits all stem from the premier stature of our industry in world competition. A status that was achieved through the aggressive exploitation of new technology to provide superior products. A position that is now being eroded through the concerted efforts of foreign backed industries.

The continued health of the U.S. aeronautics industry is heavily dependent on the research and technology development conducted by NASA. As the technology level, the competition and the stakes in the world market grow, so does the importance of the NASA aeronautical research programs.

Mr. FUQUA. Mr. Chairman, I yield such time as he may consume to the gentleman from California [Mr. MINETA].

Mr. MINETA. Mr. Chairman, I rise in support of H.R. 1714, the NASA fiscal year 1986 authorization bill. Programs within this authorization provide for continued research and development in space flight, space science, space applications, aeronautical and space research, and technology, and necessary supporting construction and administrative efforts.

Before continuing, I would like to take a moment to pay tribute to Chairman FUQUA and the distinguished senior Republican member from New Mexico, Mr. LUJAN, for their leadership in producing this fine bill and bringing it to the floor.

I would also like to congratulate our Chairman of the Subcommittee on Space Science and Applications, Mr. NELSON, for his hard work and dedication during the hearing and markup process. The support provided by the subcommittee minority, led by Mr. WALKER, also contributed significantly to this legislation.

Mr. Speaker, I would like to say a few words about why I support this bill with no reservations. The bill provides balanced support for the full spectrum of NASA's activities while observing the need for fiscal restraint.

I am particularly pleased with the funding level agreed to by the committee for the gravity probe-B experiment. This experiment is designed to test a particular effect predicted on Einstein's general theory of relativity and has received widespread support from the scientific community including endorsements from: the Presi-

dent's Scientific Advisor; several Nobel Prize scientists; various standing scientific advisory committees.

It is important to point out that the funding level recommended by the committee in fiscal year 1986 for the gravity probe-B experiment will enable NASA to conduct a test on the shuttle to determine if the delicate and expensive apparatus required for this experiment will work before committing funds to the full experiment.

I also strongly support the Hubble Space Telescope Program. The launch of this automated observatory in 1986 will improve our access to space for observation purposes by more than a hundredfold. In addition, this program will exercise the broad capabilities of the space transportation system for delivery, servicing, repair and retrieval of payloads from space. Finally, the contribution by the European Space Agency of certain space telescope hardware exemplifies the opportunities and benefits that accrue from including our international partners in space projects like the Hubble space telescope.

Mr. Chairman, I must make one final comment on the space station project. The space station initiative represents one of the most important decisions this country has ever made in space science and technology. Our decision to embark on the space station project today will enable us to achieve a permanent manned presence in space in the next decade. This investment will provide the capability to accelerate both our space science and applications programs as well as the commercial utilization of space. This investment is also consistent with our national objective of maintaining a leadership position in space science and technology.

Mr. Chairman I fully support this bill with no reservations and I urge my colleagues to join me in voting for it.

Mr. FUQUA. Mr. Chairman, I yield 2 minutes to the gentleman from Missouri [Mr. VOLKMER].

Mr. VOLKMER. Mr. Chairman, I rise in support of H.R. 1714 which authorizes appropriations for NASA for fiscal year 1986. The distinguished chairman of the commitee, the Honorable DON FUQUA from Florida, has brought a strong bill to the floor and I want to commend him for his efforts and leadership on this matter of great importance.

I also want to recognize the dedicated efforts of the members of the Committee on Science and Technology and, in particular, the members of the Subcommittee on Space Science and Applications and its chairman, the Honorable BILL NELSON, for developing the bill before us today. The gentleman from Florida is to be congratulated for the leadership, patience, and legislative insight he has demonstrated in preparing this bill. I also want to acknowledge and commend the senior Republican member of the subcommittee, the Honorable ROBERT WALKER, for his efforts and cooperation on this legislation.

Mr. Chairman, NASA has achieved an unparalleled level of success over the years and has demonstrated, time and again, that it is among the finest and most competent organizations in this country and in the world. It has achieved this distinction as a result, in large part, of the strong support of the Congress. In this tradition, I urge all of my colleagues to support this excellent bill.

Mr. Chairman, I would now like to say a few words about some of the programs that are authorized funding by this bill.

It is my view that H.R. 1714 strikes an excellent balance between the need to maintain an adequate level of funding for such manned programs as the space shuttle and space station, while at the same time providing a healthy level of support for space science initiatives.

One such group of space science initiatives which I believe are particularly important are those that relate to the International Geosphere/Biosphere Program [IGBP]. This proposed program is a coordinated international research effort aimed at understanding the Earth as a living planet, including the investigation of such phenomena as the El Nino, large volcanic emissions that are injected into the atmosphere, and the "greenhouse effect" that can be caused by increasing atmospheric levels of carbon dioxide from burning fossil fuels. Many NASA activities authorized within this bill will contribute to the IGBP research program. Flight missions include the upper atmosphere research satellite [UARS], the ocean topography experiment [TOPEX], the Navy research ocean satellite system [NROSS]—which is a Navy satellite with a NASA instrument—the geopotential research mission [GRM], and the ocean color imager [OCI]. Also, NASA's interdisciplinary research program and its Goddard Institute of Space Science will contribute substantially to the science base of IGBP.

Other NASA space science and aeronautics programs are also providing significant economic benefits and long-term productivity advances to the Nation as a whole. Many direct advances in communication satellites, improved aircraft—including more energy efficient aircraft—remote sensing satellites, and other innovations have both improved the productive capacity of industry and stimulated the development and growth of many new businesses. Indirectly, through the development and dissemination of advanced technologies to U.S. firms, the spinoffs from the space and aeronautics programs have been applied in virtually every sector of the economy.

In the manned spaceflight arena, H.R. 1714 authorizes NASA to continue its efforts to conduct preliminary design and focused technology expansion in support of the development of a permanent manned space station. This station will add a whole new dimension in the ability of the United States to conduct space science research, in-space manufacturing, and on-orbit support of space-based assets. I believe that NASA is approaching this program in a logical, straightforward manner. In this regard, it is clear that a substantial amount of work remains to be done. For example, two new technologies that need to be developed to permit long-term economical operation of a permanently manned space station are: First, a closed; that is, regenerative, or partially closed life support system for the air and water used on the station; and second, a solar dynamic system that uses the heat from the Sun to make electrical power—rather then relying on less efficient solar cells which use sunlight to make electricity. Important technology development efforts such as these will be undertaken with the funding provided in this bill.

NASA is also devoting a substantial amount of time and attention to increasing the cost efficiency of the backbone of America's space program, the space shuttle. This includes efforts to increase the number of flights that can be completed by a fixed, or even reduced, level of manpower, as well as measures to directly reduce the cost of component parts. In the latter area, NASA is taking such measures as: First, encouraging contractors to set increased "learning curve" goals to reduce unit production costs; and second, conducting extensive research efforts to increase the operational lifetime of individual components such as engine turbo pumps. As more fully discussed in the report that accompanies this bill, I would also like to commend NASA for its current study of the potential for competitive procurement of solid rocket motors from a second production source to reduce space shuttle operating costs. The programs contained within this bill will continue to place emphasis on reducing space shuttle operating costs.

In summary, Mr. Chairman, I believe H.R. 1714 is a balanced and well formulated bill that will authorize programs which can provide substantial future benefits to the United States. Accordingly, I strongly recommend that this bill be overwhelmingly adopted.

Mr. LUJAN. Mr. Chairman, I yield my remaining 3 minutes to the gentleman from New York [Mr. BOEHLERT].

Mr. BOEHLERT. Mr. Chairman, I rise in support of H.R. 1714.

An examination of the cooperative efforts between NASA and the Federal Aviation Administration reveals that although the charters of both agencies are very broad, the mutually supportive roles of those agencies have been well defined and should be clear to those who have an interest for budget or executive direction purposes. FAA has the responsibility to provide for the safe and efficient use of the Nation's airspace and for research and development in the air traffic and airways facilities area. This is being carried out aggressively in the development of a revitalized system described in the FAA national airspace plan. On the other hand, the FAA relies almost exclusively on NASA for conducting long term aeronautical research and technology development programs. NASA's programs provide a data base to the FAA for the better understanding to meet Government responsibilities regarding airworthiness certification, including structural concepts and materials, advanced aerodynamics, propulsion, controls and aircraft operating systems.

Under well-defined formal interagency agreements, NASA and FAA cooperative activities take advantage of the unique facilities and expertise at NASA to carry out research using applications and safety perspectives guidance provided by the FAA. An example of these types of activities are exemplified in the recently conducted full-scale transport controlled impact demonstration. The subject of the NASA-FAA cooperative activities cover the entire spectrum of the aeronautical disciplines and are continually changing as projects are completed and new ones addressing different problems are added. The number of outstanding activities reach over 50. There does exist a close relationship between NASA and FAA in safety-related research that helps assure that the Nation gets an efficient, well-focused program in this important area.

Mr. Speaker, I think it is important that we put things in perspective. Although we are calling for a $375 million increase in authorization over last year, I would say that that is a modest request. Keep in mind that we are at the same time standing idly by when the excise tax on cigarettes is going to be reduced 50 percent come October 1, from 16 cents a pack to 8 cents a pack. Every 1 penny in excise tax on cigarettes brings in $212 million. Now, if we just stopped that action, we will have $1.6 billion to deal with, pay for the increased authorization here, and have a billion and some change left over. Let's do it.

□ 1720

Mr. FUQUA. Mr. Chairman, how much time do I have remaining?

The CHAIRMAN. The gentleman from Florida [Mr. FUQUA] has 1½ minutes remaining.

Mr. FUQUA. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas [Mr. ANDREWS].

Mr. ANDREWS. I thank the gentleman for yielding time to me.

Mr. Chairman, I first want to compliment my subcommittee chairman, Mr. NELSON, and my full committee chairman, Mr. FUQUA, for their strong leadership in keeping this authorization bill within the constraints of the President's request. We have made some modest changes in priorities, but the overall totals remain identical.

One of the major issues that has been addressed in this bill is that of shuttle pricing. This was a thorny issue, but the subcommittee held 2 days of hearings on the subject, heard from all interested parties, and made a decision based on input from these hearings as well as a number of private discussions. I believe that we have achieved the best balance in the price that has been determined for the 1989–91 timeframe that we can with all of the variables that had to be considered.

The space station is an exciting program that is backed by both the administration and the committee. We have authorized $230 million in this authorization bill to complete the preliminary design and technology expansion effort. This month NASA will award its first contracts for the design of this permanent space station. The space station will be the natural follow-on to the Shuttle Program and will not only be an exciting new phase for the United States, but will be a new challenge that will enable us to have a new level of capability in space.

The space station will serve as a docking facility for space vehicles such as the space shuttle as well as a permanent facility in space for scientific, technological, and commercial purposes. The upcoming phase B preliminary design for the space station is critical in order that all of the potential users can be accommodated. It will provide us with the confidence that the needed elements for the station can be produced within cost and schedule requirements.

In my own congressional district, the Johnson Space Center is the lead NASA center for the overall architecture and assembly structure, all of the integration of utilities, the docking structure, and other module outfitting. All of the NASA centers are involved in the definition and design of the space station. This is an exciting era for NASA. This is an exciting era for the United States and our international partners. New doors are opening and new concepts are emerging.

This authorization is a modest beginning for this exciting new era. With the budget constraints that we are facing, this bill is a masterful balance of our priorities—we cannot have everything that we would like, but we have chosen our priorities carefully.

Mr. FUQUA. Mr. Chairman, I yield 1 minute to the gentleman from California [Mr. LEVINE].

Mr. LEVINE of California. I thank the gentleman for yielding me this time.

Mr. Chairman, there remain few programs in America as promising and important as our space program. I rise in strong support of H.R. 1714, the 1986 NASA budget authorization bill. As our Nation continues to demonstrate its leadership role in space exploration and development—and in the absence of an overall budget freeze—Congress should support a modest but necessary 5-percent increase in funding for NASA's program activities. I hope that the NASA budget increases for the last several years signals a new era of expansion in our nation's civilian space program.

Mr. Chairman, last year I supported and voted for an overall budget freeze. That could well be a good program for fiscal year 1986. But, in the absence of an overall freeze, NASA is hardly the place to cut. I am particularly enthusiastic about NASA's commitment to development of a permanently manned space station. Given the current rate at which Congress is funding design and research for the space station, it should be ready for operation in the early 1990's. Once deployed, the space station will promote a new generation of space travel, commercialization and cooperation.

A permanent manned space station will enable crew members to react instantly to data and observations, allowing them to make full and flexible use of a zero gravity laboratory environment. In such an environment we can look forward to producing new high purity drugs and crystals for advanced computer chips. Without a permanent or at least long-term presence in space, we cannot conduct biological testing on the effects of zero gravity on humans, and thus hope to undertake long-term manned missions in the future. The space station provides real hope to expansion of opportunities for our disabled citizens.

The space station represents all of the best elements in our civilian space program. In addition to allowing for greater space commercialization, the space station has generated an unprecedented opportunity for international cooperation. I hope that NASA will continue to work with Japan, Canada, and the European Space Agency in developing and financing space station components, reiterating our Nation's commitment to cooperating with other space faring-nations for peaceful purposes and promoting greater cost effectiveness in our own space program.

I would also like to remind my colleagues that as demand for use of our space shuttle increases every year, we should endorse the Science and Technology Committee's budget request, which provides $45 million more for shuttle structural spares than requested by the administration. In order for this Nation to carry out its civil and commercial space missions and space station activities, it should invest in a fifth shuttle orbiter. I would call my colleagues' attention to the committee report which states if the United States does not soon decide to build an additional orbiter, "the production base may have declined to such an extent that the country will no longer be able to build the vehicle for a reasonable amount of money."

The NASA Space Program has never failed to provide the public with continuous exposure to wonderous and useful scientific discoveries. Now that space is becoming more familiar and accessible, we must reassert our interest in exploring its endless boundaries. I would suggest that strong support for this bill will speak loudly for pursuing that goal.

Mr. FUQUA. Mr. Chairman, I yield the remainder of my time to the gentleman from Oklahoma [Mr. WATKINS].

Mr. WATKINS. I thank the gentleman for yielding this time to me.

Mr. Chairman, the legislation which first authorized the creation of the National Aeronautics and Space Administration directed NASA to achieve the broadest possible dissemination of the technology developed for space exploration. To help accomplish this directive, NASA has established its Technology Utilization Program, with Industrial Applications Centers located around the country to access NASA technology and put it into the hands of nonspace-related business and industry.

As a former member of the Space Science Subcommittee, I supported and encouraged NASA's IAC's and its Technology Utilization Program. But the more I studied, I began to realize that, despite all its good intentions, NASA was discriminating against rural America.

That is why several years ago, as a member of the Science and Technology Committee, I worked with the Space Science Subcommittee to direct NASA to establish a Rural Applications Team. This Rural Applications Team, which has been funded at only $140,000 the past 2 years, is working to not only identify the problems in rural America, but initiate the use of technology to solve rural economic and industrial problems. This program, which has only been in existence a few short years, is beginning to reap success.

That is why I am encouraged, Mr. Chairman, to see that the administration has sought, and this committee has authorized, an additional $1.6 million for the TU Program. I would like to ask the chairman and members of this committee to make sure that rural America, through the Rural Applications Team, receives its fair share and appropriate increase. I would also like to work with you in the near future to see what opportunity exists to make the Rural Applications Team a part of legislative language.

● Mr. LAGOMARSINO. Mr. Chairman, I rise in support of H.R. 1714, the NASA authorization for fiscal year 1986, and to congratulate the committee for its work on the bill.

We have here an exceptional piece of legislation—an authorization bill for a major agency which is virtually identical, at least in price, to the President's request.

It's an excellent bill. It authorizes a level of funding for the space shuttle which allows the program to continue at a pace tailored to its mission and capabilities. And it allows for future expansion of those capabilities via a fifth orbiter by keeping the production line intact. The Shuttle Program is now entering its most productive years. In 1986, the second shuttle spaceport will begin operations at Vandenberg Air Force Base in California, providing the Shuttle Program with a polar orbital capability for the first time and opening new possibilities for Earth research and national security.

The bill also continues the Space Station Program initiated last year, moving into phase B of the program—the development of detailed definition and design. The space station is inextricably linked to the space shuttle, and its deployment in the next decade will bring us to a new frontier of knowledge and capability in space.

For the first time, this Nation will have a year-round presence in space, and a staging station for future voyages beyond near space. The benefits—technological, scientific, medical, and industrial, as well as in national security—are bound to be even more numerous than we can foresee today.

Finally, the bill provides a reasonable level of funding for research and development in physics and astronomy, planetary exploration, life sciences, space applications, technology and other fields which have kept us on the cutting edge of science, technology, and economic development here on Earth.

It's truly an outstanding result of the efforts of all involved, and I urge an "aye" vote.●

● Mr. TORRICELLI. Mr. Chairman, I would like to congratulate my committee chairman, Mr. FUQUA, and my subcommittee chairman, Mr. NELSON, for the masterful job that they have done to keep this authorization bill within the budget constraints of the administration request. Although we have changed some of the priorities, this is a good bill and I would urge my colleagues to support it.

We are entering a new era for NASA. As the Shuttle Program is shifting from research and development into operations, the commercial potential will begin to be realized. With this in mind, an Office of Commercial Programs was established in NASA last year to support new commercial high technology ventures. The office is also responsible for the support of new commercial applications of existing technology and the transfer of existing space programs to the private sector.

This authorizing legislation increases the funding for the commercial use of space from the current level of $8.5 million to $20 million—about a 235-percent increase—for fiscal year 1986. Although this is $10 million less than NASA requested, the subcommittee felt that the funding recommended was more than adequate considering the maturity of the program.

As we are able to increase industry investment and participation in high technology, the position of the United States can only be enhanced worldwide. Several efforts were begun in this fiscal year that will be carried on and expanded in fiscal year 1986. Centers for the Commercial Development of Space were established; NASA facilities and equipment were made more readily available for private use; and joint NASA and private sector research for commercial applications were stimulated.

Last year, NASA Administrator Jim Beggs stated, in a speech to a Syracuse University audience—

> In the remaining 16 years of this century, there is no question that space will be the arena for expanding commercial activity in many areas, including communications satellites, launch vehicles and launch services, upper stage systems, industrial and scientific experimentations and manufacturing.

The efforts being put forth by NASA are designed to encourage significant private investments in commercial enterprises that take advantage of the unique characteristics of space, such as vacuum, microgravity, and radiation.

The Commercial Space Launch Act which was passed in the last Congress also established an Office of Commercial Space in the Department of Transportation. This office was set up to help private companies cut through the Federal redtape and to expedite the commercial use of space. Recently, this office granted its first license to a private company and is well on its way to opening these new frontiers to the private sector.

We offer a very balanced bill here today. Although there are modest changes in priorities from those requested by the administration and NASA, we are still at the same bottom

line. I would like to urge my colleagues to support this carefully constructed authorization bill.●

The CHAIRMAN. All time has expired.

Pursuant to the rule, the bill shall be considered for amendment under the 5-minute rule by titles, and each title shall be considered as having been read.

The Clerk will designate section I.

The text of section I is as follows:

Be it enacted by the Senate and House of Represenatives of the United States of America in Congress assembled, That this Act may be cited as the "National Aeronautics and Space Administration Authorization Act, 1986".

The CHAIRMAN. The Clerk will designate title I.

The text of title I is as follows:

TITLE I—NASA AUTHORIZATION

SEC. 101. That there is hereby authorized to be appropriated to the National Aeronautics and Space Administration to become available October 1, 1985:

(a) For "Research and development," for the following programs:

(1) Space station, $230,000,000;

(2) Space transportation capability development, $444,300,000;

(3) Physics and astronomy, $637,400,000;

(4) Life sciences, $72,000,000;

(5) Planetary exploration, $359,000,000;

(6) Space applications, $550,800,000;

(7) Technology utilization, $11,100,000;

(8) Commercial use of space, $20,000,000;

(9) Aeronautical research and technology, $354,000,000;

(10) Spece research and technology, $168,000,000;

(11) Tracking and data advanced systems, $16,200,000.

(b) For "Space flight, control and data communications," for the following programs:

(1) Space shuttle production and operational capability, $1,011,500,000;

(2) Space transportation operations, $1,715,100,000;

(3) Space and ground network, communications and data systems, $803,300,000.

(c) For "Construction of facilities," including land acquisition, as follows:

(1) Space transportation facilities at various locations as follows:

(A) Construction of orbiter modification and refurbishment facility, John F. Kennedy Space Center, $14,000,000;

(B) Construction of thermal protection system facility, John F. Kennedy Space Center, $3,600,000;

(C) Modifications for advanced technology engine test stand S-1C, George C. Marshall Space Flight Center, $6,500,000;

(D) Modification for enhanced life support systems testing, Lyndon B. Johnson Space Center, $1,100,000;

(E) Modifications to Pad A payload changeout room, John F. Kennedy Space Center, $2,200,000;

(F) Modifications to space shuttle main engine support systems, National Space Technology Laboratories, $2,500,000;

(2) Space shuttle payload facilities at various locations as follows:

(A) Construction of payload control rooms, John F. Kennedy Space Center, $1,200,000;

(B) Construction of spacecraft systems development and integration facility, Goddard Space Flight Center, $8,000,000;

(3) Construction of additions to research projects laboratory, Goddard Space Flight Center, $3,800,000;

(4) Construction of microdevices laboratory, Jet Propulsion Laboratory, $8,900,000;

(5) Construction of numerical aerodynamic simulation facility, Ames Research Center, $8,200,000;

(6) Modifications to the sixteen-foot transonic tunnel for improved productivity and research capability, Langley Research Center, $4,900,000;

(7) Modification of 64-meter antenna, DSS-14, Goldstone, California, $8,500,000;

(8) Modification of 64-meter antenna, DSS-43, Canberra, Australia, $8,900,000;

(9) Repair of facilities at various locations, not in excess of $750,000 per project, $22,000,000;

(10) Rehabilitation and modification of facilities at various locations, not in excess of $750,000 per project, $27,000,000;

(11) Minor construction of new facilities and additions to existing facilities at various locations, not in excess of $500,000 per project, $6,000,000; and

(12) Facility planning and design not otherwise provided for, $12,000,000.

Notwithstanding paragraph (1) through (12) of this subsection, the total amount authorized by this subsection shall not exceed $148,300,000.

(d) For "Research and program management," $1,345,000,000.

(e) Notwithstanding the provisions of subsection 101(h), appropriations hereby authorized for "Research and development" and "Space flight, control and data communications" may be used (1) for any items of a capital nature (other than acquisition of land) which may be required at locations other than installations of the Administration for the performance of research and development contracts, and (2) for grants to nonprofit institutions of higher education, or to nonprofit organizations whose primary purpose is the conduct of scientific research, for purchase or construction of additional research facilities; and title to such facilities shall be vested in the United States unless the Administrator determines that the national program of aeronautical and space activities will best be served by vesting title in any such grantee institution or organization. Each such grant shall be made under such conditions as the Administrator shall determine to be required to ensure that the United States will receive therefrom benefit adequate to justify the making of that grant. None of the funds appropriated for "Research and development" and "Space flight, control and data communications" pursuant to this Act may be used in accordance with this subsection for the construction of any major facility, the estimated cost of which, including collateral equipment, exceeds $500,000, unless the Administrator or his designee has notified the Speaker of the House of Representatives and the President of the Senate and the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate of the nature, location, and estimated cost of such facility.

(f) When so specified and to the extent provided in an appropriation Act, (1) any amount appropriated for "Research and development," for "Space flight, control and data communications" or for "Construction of facilities" may remain available without fiscal year limitation, and (2) maintenance and operation of facilities, and support services contracts may be entered into under the "Research and program management" appropriation for periods not in excess of twelve months beginning at any time during the fiscal year.

(g) Appropriations made pursuant to subsection 101(d) may be used, but not to exceed $35,000, for scientific consultations or extraordinary expenses upon the approval or authority of the Administrator, and his determination shall be final and conclusive upon the accounting officers of the Government.

(h) Of the funds appropriated pursuant to subsections 101(a), 101(b), and 101(d), not in excess of $100,000 for each project, including collateral equipment, may be used for construction of new facilities and additions to existing facilities, and for repair, rehabilitation, or modification of facilities: *Provided,* That, of the funds appropriated pursuant to subsection 101(a) or 101(b), not in excess of $500,000 for each project, including collateral equipment, may be used for any of the foregoing for unforeseen programmatic needs.

SEC. 102. Authorization is hereby granted whereby any of the amounts prescribed in paragraphs (1) through (11), inclusive, of subsection 101(c)—

(1) in the discretion of the Administrator or his designee, may be varied upward 10 per centum, or

(2) following a report by the Administrator or his designee to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate on the circumstances of such action, may be varied upward 25 per centum, to meet unusual cost variations, but the total cost of all work authorized under such paragraphs shall not exceed the total of the amounts specified in such paragraphs.

SEC. 103. Not to exceed one-half of 1 per centum of the funds appropriated pursuant to subsection 101(a) or 101(b) hereof may be transferred to and merged with the "Construction of facilities" appropriation, and, when so transferred, together with $10,000,000 of funds appropriated pursuant to subsection 101(c) hereof (other than funds appropriated pursuant to paragraph (12) of such subsection) shall be available for expenditure to construct, expand, and modify laboratories and other installations at any location (including locations specified in subsection 101(c)), if (1) the Administrator determines such action to be necessary because of changes in the national program of aeronautical and space activities or new scientific or engineering developments, and (2) he determines that deferral of such action until the enactment of the next authorization Act would be inconsistent with the interest of the Nation in aeronautical and space activities. The funds so made available may be expended to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment. No portion of such sums may be obligated for expenditure or expended to construct, expand, or modify laboratories and other installations unless a period of thirty days has passed after the administrator or his designee has transmitted to the Speaker of the House of Representatives and to the President of the Senate and the Committee on Science and Technology of the House of Representatives and to the Committee on Commerce, Science, and Transportation of the Senate a written report containing a full and complete statement concerning (i) the

nature of such construction, expansion, or modification, (ii) the cost thereof including the cost of any real estate action pertaining thereto, and (iii) the reason why such construction, expansion, or modification is necessary in the national interest.

SEC. 104. Notwithstanding any other provision of this Act—

(1) no amount appropriated pursuant to this Act may be used for any program deleted by the Congress from requests as originally made to either the House Committee on Science and Technology or the Senate Committee on Commerce, Science, and Transportation,

(2) no amount appropriated pursuant to this Act may be used for any program in excess of the amount actually authorized for that particular program by subsections 101 (a), (b), and (d), and

(3) no amount appropriated pursuant to this Act may be used for any program which has not been presented to either such committee,

unless a period of thirty days has passed after the receipt by the Speaker of the House of Representatives and the President of the Senate and each such committee of notice given by the Administrator or his designee containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action.

SEC. 105. It is the sense of the Congress that it is in the national interest that consideration be given to geographical distribution of Federal research funds whenever feasible, and that the National Aeronautics and Space Administration should explore ways and means of distributing its research and development funds whenever feasible.

SEC. 106. Hereafter, the Inspector General of the National Aeronautics and Space Administration is authorized to administer to or take from any person an oath, affirmation or affidavit, whenever necessary in the performance of the functions assigned by the Inspector General Act of 1978, as amended, 5 U.S.C. App., which oath, affirmation, or affidavit, when administered or taken by or before an investigator or such other employee of the Office of Inspector General designated by the Inspector General shall have the same force and effect as if administered or taken by or before an officer having a seal.

SEC. 107. Title III of the National Aeronautics and Space Act of 1958, as amended, is amended by adding at the end of section 305 the following new subsection:

"(m) Any invention made or used in outer space on a space vehicle (including satellites, platforms, and other orbiting vehicles, manned or unmanned, together with related equipment, devices, components and parts) under the jurisdiction or control of the United States shall be considered made or used in the United States for the purposes of title 35, United States Code. This subsection shall not apply to any process, machine, article of manufacture or composition of matter, an embodiment of which was first made or used in outer space prior to the effective date of this Act.".

SEC. 108. The authorization for space shuttle production and operational capability includes provisions for the production activities necessary to provide for a fleet of four space shuttle orbiters, including the production of structural and component spares, necessary to ensure confident and cost effective operation of the four orbiter fleet as well as provisions for maintaining production readiness (particularly critical skills needed for production and installation of electrical, mechanical, and fluid systems) for a fifth orbiter vehicle.

SEC. 109. Title II of the National Aeronautics and Space Administration Authorization Act, 1985, is amended as follows: In section 204(c), change "twelve months" to "eighteen months".

SEC. 110. Within ninety days of the enactment of this Act the Administrator shall review those recommendations of the President's Private Sector Survey on Cost Control and shall submit a report to the Speaker of the House of Representatives and the President of the Senate and the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science and Transportation of the Senate on the implementation status of each such recommendations which affects the National Aeronautics and Space Administration and which are within the authority and control of the Administrator.

SEC. 111. The Administrator shall initiate an immediate feasibility study and such planning efforts as may be necessary to ensure a timely flight opportunity for a physically disabled American.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will designate the first committee amendment.

Mr. FUQUA. Mr. Chairman, I ask unanimous consent that the committee amendments be considered en bloc, considered as read, and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The text of the committee amendments is as follows:

Committee amendments: Page 11, strike line 7 through 19.

Page 11, line 20, strike "108" and insert "107".

Page 12, line 4, strike "109" and insert "108".

Page 12, line 8, strike "110" and insert "109".

Page 12, line 11, after "control" insert "and such other recommendations as may be included in the OMB report "Management of the United States Government—1986"."

Page 12, line 21, strike "111" and insert "110".

The CHAIRMAN. The gentleman from Florida [Mr. FUQUA] is recognized for 5 minutes.

Mr. FUQUA. Mr. Chairman, just to briefly explain the amendments.

These two amendments reflect action that was taken in the full committee. The first amendment, deletes provisions in section 107 relating to patent rights in outer space. We found that we needed more time to study this issue and work with the Judiciary Committee in resolving matters that related to patent rights. We decided to delete that until another time, and bring it up in another bill.

Section 109 adds further language. The bill includes language relating to the Grace Commission recommendations. We expand that language to include the recommendations of the General Accounting Office and the Office of Management and Budget and other reports that have been made for cost effectiveness in Government. They are two good amendments, and were approved unanimously in the committee. I urge their adoption.

The CHAIRMAN. The question is on the committee amendments.

The committee amendments were agreed to.

AMENDMENT OFFERED BY MRS. MEYERS OF KANSAS

Mrs. MEYERS of Kansas. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. MEYERS of Kansas: Page 3, line 4, strike out "$1,011,500,000" and insert in lieu thereof "$976,500,000".

Page 2, line 13, strike out "$444,300,000" and insert in lieu thereof "$459,300,000".

Mrs. MEYERS of Kansas. Mr. Chairman, I would like to make it clear that I do support H.R. 1714; that I think the chairman and the ranking member of the committee do an excellent job, and that the subcommittee chairman and ranking subcommittee member do an outstanding job.

Mr. Chairman, I rise to offer an amendment to title I of H.R. 1714, the NASA authorization bill for fiscal year 1986.

What this amendment does is really very simple: it takes the $45 million added to the structural spares program by the committee and redistributes the bulk of it to other important programs which were cut by the committee. It also saves the taxpayer a full $20 million, by achieving a net reduction in the total authorization for NASA. In no way will this amendment hurt our Space Shuttle Program.

This amendment, has the full support of the administration, NASA, and of many member of the subcommittee.

I have 435 copies of a "Statement of Administration Policy" at the desk for my colleagues.

Let me take a moment to tell you what this amendment will not do.

This amendment will not cancel our option to have a fifth orbiter, should the need arise. It will not shut down the production lines for structural spare parts for the space shuttle. It will not hurt the U.S. Space Program one bit; in fact, this amendment will make the program stronger by restoring some cuts in the Shuttle Program made by the committee.

As you may know, there are two kinds of spare parts programs in the NASA budget: In one program are the funds used to buy spare parts in case we need them to repair existing orbiters, and in the other are the funds used to buy structural spare parts for repair and to preserve the option to buy a fifth shuttle orbiter. To date, NASA's Administrator has said he foresees no immediate need for a fifth

orbiter. In fact, there is great concern that, if anything, the demand in the next 10 years for launches will decrease, rather than increase.

In this bill we already have $100 million for spare parts for the shuttle in case repairs are needed; we also already have a total of $120 million for structural spare parts in case of accident we decide that we need a fifth orbiter.

My amendment does not concern either of these two sums. My amendment will leave the $220 million for spare parts for the orbiter intact.

What my amendment does do, however, is to take out the extra $45 million that the committee added to the existing $220 million for spare parts. What this amendment does is to take that extra money and put it back in places that the committee got it from in the first place when it shuffled funds around in the NASA budget request.

It is not as if my proposed amendment runs contrary to the will of all the members of the House Science and Technology Committee. This amendment was suggested at subcommittee level and offered at full committee level. The debate was heated and the vote was fairly close. I believe that this issue is important enough to be brought to the attention of the full House.

I have at the desk 435 copies of a letter written to me by Mr. Jim Beggs, the current Administrator of the National Aeronautics and Space Administration. In his letter, the NASA Administrator makes it quite clear that he does not want—nor does he need—the $45 million added to the structural spares program by the committee. In his words, he would prefer it if we restored some of the funding for the other space shuttle programs that the committee cut when it marked up the NASA bill.

All of us know that times are tough and money is tight. I believe that it is critically important that when we spend money, we spend it in the most efficient way possible. And, that is why I have proposed this amendment.

Let me take a moment to lay out the facts of the case.

Fact: According to the Administrator of NASA himself, the additional $45 million is not required for spare parts. If you doubt my words, please get a copy of the letter at the desk.

Fact: This amendment does not kill the fifth orbiter should we decide that we need one: there is already $120 million in the budget to keep that option open.

Fact: The additional $45 million is not necessary to keep the production lines open at the Palmdale, CA, plant. Passage of my amendment will not cause us to lose employees with expertise in shuttle production. Employees involved in this aspect of the Shuttle Program will continue to work on other defense contracts critical to our Nation's security. Should we need a fifth orbiter, we will have the experienced people to build it.

Fact: The Downey, CA, production line will remain open and structural spares will be produced and stored there. These parts can be used in case of accident or to prepare for assembly of an eventual fifth, should the need for a fifth orbiter arise in the future.

Fact: According to Administrator Jim Beggs himself, "there is no demonstrable need for a fifth orbiter."

Fact: According to Administrator Beggs, should the need for a fifth orbiter arise, NASA would make a substantial funding request to Congress to fund the fifth. In the words of Mr. Beggs himself, "Even if we did need a fifth, the $45 million in structural spares added by the committee wouldn't make much of a difference."

Mr. Chairman, my point is a very simple one: we cannot afford to spend hard-earned taxpayer dollars on unnecessary programs.

This amendment would take $25 million from the $45 million that was added and distribute it the following way: $10 million to restore funds that were cut in the Space Shuttle Program and operations capability line item and $15 million would go back into the space transportation capability and development item. These items carry with them a higher priority and certainly deserve to be in this budget. We would under this amendment, achieve an overall budget reduction of $20 million.

Mr. Chairman, I want to be very sure that my amendment is not misinterpreted as an antishuttle amendment or as an antispace amendment. I lend my wholehearted support to the Space Program. I know that an investment in space and space-related technologies is one of the soundest economic investments that we can make. Current figures indicate that for every $1 invested, we get a return of anywhere from $7 to $14. The Space Program is good for our economy and good for our Nation as a whole.

The $45 million in question, however, is not.

For these reasons, Mr. Chairman, I urge that my colleagues support my amendment. My amendment has broad, bipartisan support and will do the Space Program good—in the long run and in the short run. I urge my colleagues to support me in my effort to pass a fiscally responsible bill.

In closing, Mr. Chairman, I include the text of the letter to me from Mr. Beggs for insertion in the RECORD immediately following my remarks:

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION,
Washington, DC, April 1, 1985.

Hon. JAN MEYERS,
House of Representatives
Washington, DC.

DEAR MS. MEYERS: NASA proposed the Structural Spares Program for the Shuttle Program in FY 84; there was, however, a small relative amount spent for the program in 1983. In the the FY 1985 budget, Congress added $40M to our $120M requested, and the Space Science and Technology Committee has proposed another $45M to the $120M requested in FY 1986, which raised the all year total of $460M to $505M. We believe the additional $45M is not required to complete the program and would prefer that the funds remain in the accounts as they were originally proposed.

It should be further noted that we will be spending several hundred million over the next several years purchasing the operational spares for the shuttle.

We would be distressed if additional monies were allotted to the Space Science budget in FY86 since our budget request for the Space Science and Applications received the largest increase of any budget segment within NASA.

I hope this clarifies the Agency position on these important appropriation issues.

Sincerely,

JAMES M. BEGGS,
Administrator.

AMENDMENT OFFERED BY MR. WALKER AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MRS. MEYERS OF KANSAS

Mr. WALKER. Mr. Chairman, I offer an amendment as a substitute for the amendment offered by the gentlewoman from Kansas [Mrs. MEYERS].

The Clerk read as follows:

Amendment offered by Mr. WALKER as a substitute for the amendment offered by Mrs. MEYERS of Kansas: On page 5, line 17, strike "1,345,000,000" and insert in lieu thereof "$1,300,000,000".

Mr. WALKER. Mr. Chairman, it is apparent from the letter that the gentlewoman from Kansas has read that the NASA administration, the Administrator, feels as though $45 million can be saved in this budget. OMB has brought forth a position which indicates that $45 million can be saved.

The issue here is whether or not you want to save the money by taking it out of any chance we have of having a fifth orbiter, a or whether you want to take it out of the hides of bureaucrats. What my amendment says is: Let us save the whole $45 million but let us eliminate bureaucrats. Let us save the option of the fifth orbiter and let us cut some bureaucrats.

It seems to me that is a better option. It seems to me that what we have here is an opportunity to save the option for the fifth orbiter. We think it is extremely important, having studied this matter for the last several years, that preserving the option for the fifth orbiter is very, very important if you look toward the future of the space station. So, therefore, what my amendment does is, it

says let us keep that in place but take the money out of administration at NASA.

The difference between my amendment and the amendment offered by the gentlewoman is that she saves a total of $20 million, and this amendment saves the whole $45 million. The total $45 million in savings would be in this amendment; whereas, there would only be an actual savings of $20 million in her amendment because she programmed some money the other way.

So I would hope the committee, knowing that NASA and OMB feel that we can save $45 million, will preserve our option here of keeping the fifth orbiter, but will do it by having us take it out of administration rather than away from the Shuttle Program.

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I would be glad to yield to the gentleman from Florida.

Mr. FUQUA. I thank the gentleman for yielding.

Mr. Chairman, I would like to say that the gentleman has shared the amendment with us. We have discussed it and I am prepared to accept the gentleman's amendment in light of events. I think it is a good amendment in this particular case.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I would be glad to yield to the gentleman from New Mexico.

Mr. LUJAN. I thank the gentleman for yielding.

Let us not move so fast in accepting that amendment. I do not want it to just go on unanswered.

What the gentlewoman has proposed is that we take the $45 million out. The reason she has said that is because she has been told by NASA, in writing, that that is all right; that the $45 million can be done away with. But what she has done that is not being done by the gentleman from Pennsylvania in his amendment is she is taking the money that was cut to arrive at that $45 million in some of those programs, and those were launch and mission support, systems upgrading which reduces the weight and makes more efficient the system, which is exactly what the gentleman from Pennsylvania is talking about, those are the things that we want to move on ahead with.

The $5 million for space lab she is putting back in. Payload operations support equipment, the tethered satellite. Those are all very desirable things that the subcommittee cut in order to be able to put the $45 million on the spare parts for the shuttle.

That is really not quite fair. You want your cake and you want to eat it, too. You want to keep the $45 million there. You want to reduce those programs that you did not particularly like. And it is always very popular to attack a bureaucrat and say, "Hey, let us take it out of there." Let us take both of them out if that is what the gentleman wants to do. But I think the gentlewoman has some logic in saying let us take it from the add-ons and put it back to the deductions that the subcommittee made.

So I do not want to leave with the impression that everybody has agreed to what the gentleman is doing. Let me just quote, if I may, from a letter from NASA which says:

> We believe the additional $45 million is not required to complete the program and would prefer that the funds remain in the accounts as they were originally proposed.

This is the Administrator from NASA saying that. We would like them in those places where they were originally proposed. The gentlewoman from Kansas is saying exactly that. We are not going to give you everything.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. WALKER] has expired.

(By unanimous consent, Mr. WALKER was allowed to proceed for 3 additional minutes.)

Mr. WALKER. Mr. Chairman, I would continue to yield to the gentleman from New Mexico. I would like to be able to reply to the gentleman.

Mr. LUJAN. I thank the gentleman for yielding further to me.

So, Mr. Chairman, that is exactly what the gentlewoman is doing. She is complying with what the NASA policy is.

Furthermore, the letter from the Administrator of NASA goes on to say:

> It should be further noted that we will be spending several hundred million dollars over the next several years purchasing the operational spares for the shuttle.

□ 1740

What he is saying is that we have $220 million now, and we will be spending several hundred million later on. Give us the money back for some of those programs that we think are important.

Mr. WALKER. Mr. Chairman, I understand the gentleman's point. The gentleman is in fact defending the NASA position over the congressional position, and that is perfectly appropriate. That is what the gentlewoman from Kansas has brought to the floor.

It is my contention that we in the Congress also have some ability to determine the priorities in this budget. That is exactly what we have done. We feel strongly that it is important to have the option of the fifth orbiter. I would contend the gentlewoman's amendment is well intentioned, but it does in fact cancel out the option of this orbiter. If we do so, we are doing it knowingly, and I do not think that is the direction in which we ought to proceed.

I think it is extremely important to retain that option. I think it is important enough to retain that option that I am willing to rearrange priorities within NASA in such a way that we eliminate bureaucratic overhead in favor of keeping the option of the fifth orbiter. That is precisely what my amendment will do. I think it makes some sense, then, to go in that particular direction rather than to do as the gentlewoman has proposed, save the money by going back to the OMB–NASA priorities that came to our committee.

That is really all my amendment seeks to do, and it ends up saving us in fact more money than what is in the gentlewoman's amendment. It seems to me that that in itself, since the argument was made that we ought to be fiscally prudent here on the floor, says to us, "OK, take the option that saves the most money." That is the fiscally prudent thing to do.

Mrs. MEYERS of Kansas. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I am glad to yield to the gentlewoman from Kansas.

Mrs. MEYERS of Kansas. Mr. Chairman, as much respect as I have for the ranking member of the Space Subcommittee, I do think that this amendment is somewhat destructive. I do not think that we should take $45 million from administrative salaries. I think there is some unhappiness with NASA over the position because I know there are two strongly held beliefs here—well, there actually is one strongly held belief, and that is that should we need the fifth orbiter, we would have it.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. WALKER] has expired.

(By unanimous consent, Mr. WALKER was allowed to proceed for 2 additional minutes.)

Mr. WALKER. Mr. Chairman, I continue to yield to the gentlewoman from Kansas [Mrs. MEYERS].

Mrs. MEYERS of Kansas. Mr. Chairman, the argument is that should we need the fifth orbiter, it will be there. Mr. Beggs wants that, the gentleman from Pennsylvania [Mr. WALKER] wants that, and the gentleman from Florida [Mr. FUQUA] wants that. The way we are going to get there is what is different, and Mr. Beggs is saying that when they need a fifth orbiter, they will request $200 million or $300 million a year over a 2-year or 3-year period because it is an enormously expensive project, and that setting aside $45 million in spare parts will not accomplish the goal. I think that is clearly where the difference in thinking is.

Mr. WALKER. Mr. Chairman, let me say to the gentlewoman that when you cancel out the $45 million at the front end of the production lines, you

in fact cancel out that option. At that point, yes, it would be $200 million or $300 million, but as a matter of fact later it would be $500 million or $600 million because you are going to have to recreate the production lines that will be lost as a result of this particular amendment.

The gentlewoman is correct that some of the production lines stay open. The problem is that we are now in the process of shutting off the front end of those production lines and moving down the stream. It is the front end of the lines that the $45 million will preserve. The loss of the $45 million will assure that those will be shut down and will have to be recreated, and that would make the fifth orbiter infinitely more expensive. It ends up being a penny-wise, pound-foolish kind of approach if we really do think we will have to go to a fifth orbiter because it will assure that that fifth orbiter will cost us infinitely more money in the end.

We think it is important to preserve the option of a cost-effective fifth orbiter, and that is precisely what my amendment would achieve. It would leave the $45 million in place that has the cost-effectiveness in the fifth orbiter as its main mission, and it will take the money out of administrative costs.

I would remind the gentlewoman that there is over $1.3 billion there in administrative costs, so it seems to me that that may be the place where we could achieve some of these savings.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. WALKER] has expired.

Mr. BROWN of California. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Pennsylvania [Mr. WALKER] and in support of the original amendment offered by the gentlewoman from Kansas [Mrs. MEYERS].

The issue before us has been very well explained by the gentlewoman from Kansas. What the subcommittee did—and it was, of course, a bipartisan action—was to add $45 million, which had the net effect, at least in the eyes of the supporters of the action, of continuing the option for a fifth orbiter for another few months.

There are many of us who have supported the shuttle for a long time and who supported not only a fifth, but a sixth, and a seventh orbiter, at some time in the past. We now know that so many orbiters are unnecessary, but we want to keep our options to make mistakes open as long as possible, and that is what this amounts to.

There is a parallel situation to this, and I hate to bring it up, but it is the zeal with which the Congress retained its option to build the Clinch River breeder reactor years after the economic justification for it had passed. So we should confront this head-on. There is no economic justification for the fifth orbiter.

Since we began the process of determining what the manifest would be out into the next 10 years, we have progressively reduced the prospective loads on the shuttle orbiters. We had originally hoped it would take seven to carry all these loads, and we had in mind a huge number of communications satellites, with all of the Defense Department loads which we could imagine and all the great scientific projects we were going to do.

And what has happened? The Defense Department has received permission to use expendable launch vehicles. That wiped out 10 percent of the load. ARIANE has come in with a cheaper launch for communications satellites. They took 50 percent of that load last year. The budget for new science starts has been drastically slashed. We do not have the number of new science starts. We are going to be building shuttles, if we go to the fifth orbiter, to park them in a garage out in California and use them as part of a museum or something. I do not think that is what we ought to be doing in these times of budgetary austerity which some of my friends delight in talking about so much.

Therefore, I think the sensible thing to do is to adopt the amendment offered by the gentlewoman from Kansas [Mrs. MEYERS] and reject the obvious amendment offered by the gentleman from Pennsylvania which was leaped on with great alacrity by the chairman of the committee because he hopes it would forestall an even deeper cut later on. That is not the way we ought to play games here on the floor of the House.

Let us vote the amendment offered by the gentlewoman from Kansas up or down on its merits. I happen to think it is extremely meritorious. I am a cosponsor of it, as a matter of fact, and supported it in the full committee. We should face the reality of the fact that the direction we are moving in has removed the need for the fifth orbiter, and let us save that $45 million.

I think that the administrator, Mr. Beggs, has been overly generous in putting $220 million in this budget to protect the assembly line for spare parts and for structural spares. We are not going to need most of those and we will probably save some money there if we do not insist on loading this bill up with extra amounts like $45 million. I think the administrator probably will cut some money out of these accounts. Of course, it is my hope that he will put it in some of the programs I have mentioned, the science programs and the solar exploration program and some of the others. He may not want to do that. But let us realistically face this political choice. If we do, it will be one of the few times we do realistically face anything around here. We should vote down the amendment offered by the gentleman from Pennsylvania [Mr. WALKER] and adopt the amendment offered by the gentlewoman from Kansas [Mrs. MEYERS].

Mr. MONSON. Mr. Chairman, I move to strike the last word, and I rise in support of the substitute amendment.

Mr. Chairman, this bill came out of committee without adding to the anticipated deficits from the administration's budget. Those who have worked so diligently deserve a lot of credit for this.

Almost daily, additions are made to spending proposals that would go a few million dollars beyond our anticipated deficit here, and a few million dollars there, soon adding to billions. Not only has this committee not added further to this problem, but it has taken steps to help in stimulating a study of ways in which spending might be reduced in the future.

Looking into the possibility of more competition and providing needed elements of space exploration is one example. The inspiration to America, the economic stimulus that new technology brings and the educational opportunities that are developed, all persuade me that this is a good investment of our tax dollars.

Too often in the past we have seen America take the lead only to see other nations capitalize on our development because we do not follow through on our commitment.

The substitute amendment accomplishes a reduction without causing us to put in jeopardy a program we are not ready to make a decision on. An accented possibility or the future space station needs both argue for the need to keep open a fifth orbiter option until we have the information required to make such a decision. If keeping this option open would add further to our anticipated deficits, I would be the first to oppose it.

What this substitute amendment does is saves us the $45 million in question, preserves the prerogatives of Congress to determine priorities for our agencies and allows us to keep open an option that is vital to our space program.

Mrs. SCHNEIDER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong support of the amendment being offered by my colleague, the gentlewoman from Kansas [Mrs. MEYERS].

I would say that this amendment, I had the opportunity to offer this amendment in the committee. As Mrs. MEYERS had already indicated, it was a heated debate, but I will say that afterward the overwhelming majority

of the Members there indicated that they felt we were in the right.

I think it is important that we reiterate the fact that this is an effort to direct our energies toward fiscal restraint, toward making major measures or major steps toward reducing the deficit and the fact that Mr. Beggs and the administration is not enthused about spending this money this year, I see that this is a reasonable, commonsense approach, toward using our money most wisely for this program.

Mr. LOWERY of California. Mr. Chairman, I move to strike the last word.

Mr. Chairman, for the 4 years prior to the start of the current Congress I had the honor to serve as a member of the Science and Technology Committee and its Subcommittee on Space Science and Applications. During those 4 years I have attended numerous hearings at which the need for a fifth orbiter and viable structural spares program were thoroughly debated.

As a result of those extensive hearings, I have become fairly knowledgeable on these issues and have strongly supported the past and present initiatives of the committee to ensure that this Nation maintains a viable option to build a fifth orbiter.

Mr. Chairman, this country has devoted a lot of time and resources to developing a reuseable space launch vehicle that is unparalleled anywhere in the world. This vehicle, especially when used in conjuction with the space station, will usher in a whole new era of living and working in space. Indeed, with the space shuttle we will be able to service and repair malfunctioning satellites that are in orbit, manufacture exciting new drugs and materials that cannot be produced on the Earth, and provide a more economical access to space for Government, civilian, and foreign payloads.

However, Mr. Chairman, if the full potential of the space shuttle is to be realized, the size of the orbiter fleet will have to be adequate to service the demands that will arise over the next two decades.

Originally, the Orbiter fleet was to have comprised seven vehicles. Later, this was scaled back to five and then, during the Carter administration, to four. Mr. Chairman, I am convinced that a fleet of only four Orbiters will not be sufficient to provide the flexibility and degree of access to space that this country will need in the future.

The administration is now in the process of deciding whether or not it believes a fifth space shuttle Orbiter is required. It is my strong belief that if the Congress does not supply this funding augmentation to the structural spares budget, then the option to build a fifth orbiter at an affordable price will no longer be available.

In closing, Mr. Chairman, I believe that this $45 million funding augmentation is prudent and necessary. To not provide these funds would be shortsighted and could foreclose an option that I am certain we would come to regret for many years.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. WALKER] as a substitute for the amendment offered by the gentlewoman from Kansas [Mrs. MEYERS].

The question was taken; and on a division (demanded by Mrs. MEYERS) there were—ayes 15; noes 12.

Mrs. MEYERS of Kansas. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently, a quorum is not present. Pursuant to the provisions of clause 2, rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

The CHAIRMAN. Four hundred and seven Members have answered to their

names. A quorum is present, and the Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentlewoman from Kansas [Mrs. MEYERS] for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 288, noes 127, not voting 17, as follows:

[Roll No. 48]

AYES—288

□ 1820

Mr. LIGHTFOOT, Mr. SIKORSKI, Mrs. BYRON, Ms. MIKULSKI, Mr. HOYER, and Mr. MARKEY changed their votes from "aye" to "no."

Mr. MARKEY and Mr. HENDON changed their votes from "no" to "aye."

So the amendment offered as a substitute for the amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Kansas [Mrs. MEYERS], as amended.

The amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MR. MORRISON OF CONNECTICUT

Mr. MORRISON of Connecticut. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MORRISON of Connecticut: Page 7, after line 20, insert the following new subsection:

(i) Notwithstanding the preceding provisions of this section, the total amount authorized to be appropriated by subsections (a), (b), (c), and (d) shall not exceed $7,510,700,000.

Mr. MORRISON of Connecticut (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. MORRISON of Connecticut. Mr. Chairman, the amendment that I am offering with the gentleman from Michigan [Mr. PURSELL] provides the House with the first opportunity to speak out in favor of freezing our expenditures in fiscal year 1986. In particular, this amendment reduces the authorization level for NASA from the $7.841 billion in the bill, as amended on the last vote, to $7,510,700,000, the amount which was appropriated, including supplemental appropriations, in fiscal year 1985.

It is not my intent to single out the NASA budget. However, this is the first major authorization bill for fiscal year 1986 to come before this House and we should not lose this opportunity to stand up for deficit reduction.

Many Members of this House, myself included, and in particular, also, the gentleman from Michigan [Mr. PURSELL], believe that the time to start to implement the freeze on spending is now.

Obviously, there is a budget resolution still to come. Ultimately, it may decide this question. But we do not know we are going to get to a budget resolution. We do not know when we are going to get to act on the whole question of the Federal budget. But this is an opportunity for us to act now, and we should not avoid that responsibility or postpone our day of reckoning. If we cannot apply the logic of a budget freeze across the board, we are not going to get at the problem of the Federal deficit.

What this amendment would require is that NASA in 1986 spend no more dollars than we appropriated to it in fiscal year 1985. This amendment does not make the priority judgments about where this cut should come.

□ 1830

The decision about where the cuts should be applied is going to be made either by further action by this House

on a conference report or by the Administrator of NASA. They are not being made by this amendment.

This is a vote on overall spending levels; not on the priorities with respect to the budget. This is not an attack on the hard work by the committee and its members, its chairman and ranking members who have labored to set appropriate priorities. I respect their efforts, but I think we must start by freezing dollar levels all across our budget if we are going to get our budget deficit under control.

Increases, with respect to our expenditures, are going to have to be paid for. They have to be paid for either by higher taxes or cuts somewhere else. I do not believe that people in this House will support the kinds of cuts in student loans, cuts in housing programs, cuts in mass transit assistance, cuts in agricultural programs and the like that would have to be made in order to find the funds to supply the extra $330 million, which would be authorized without this amendment.

The approach to spending that I am proposing is the kind of approach that I believe we are going to have to be using across the board in our budget. Our failure to do it now at the start will be a signal of our unwillingness to do it down the road. I think this is an opportune time for the House to speak its will. In addition, what we vote here will send a message to our Budget Committee about what this House is prepared to do, so that the Budget Committee, in coming forward with its recommendations, will be able to understand the House's willingness to make the tough choices that need to be made.

The committee has come in essentially with the President's level on this budget. I do not think this House is prepared to adopt the President's budget as proposed. We shouldn't start the process by adopting the first of the President's budget proposals and putting ourselves in the circumstance of not being able to respond to the desperate need to do something about the budget deficit.

The CHAIRMAN. The time of the gentleman from Connecticut [Mr. MORRISON] has expired.

(By unanimous consent, Mr. MORRISON of Connecticut was allowed to proceed for 5 additional minutes.)

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the gentleman.

Mr. PURSELL. I thank the gentleman for yielding to me.

Mr. Chairman, I want to say very briefly, I know the hour is late, we have engagements, commitments for the evening, I support the Morrison-Pursell amendment. I think we are going to see a trend of amendments coming up in the future with regard to authorizations and appropriations bills in which many of us feel very strongly this year that we would like to maintain a budget authority freeze across the entire budget: Defense, domestic, and other programs related to some off-budget items.

I congratulate the gentleman from Connecticut. He has been a leader in this freeze movement. Maybe it is not enough, totally, to achieve a $50 billion deficit, but this is a start. So, 5 percent in this budget from the authorized level, 1985, to hold the figure at the 1985 level, is appropriate for this House to support today.

I would ask the Members on behalf of this country and for all of us, taxpayers alike, that we endorse this amendment and vote yes on the Morrison amendment.

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the gentleman.

Mr. FUQUA. I thank the gentleman for yielding.

Mr. Chairman, I want to inquire of the gentleman; that I understand the philosophy behind the amendment is a freeze, to go back to the fiscal year 1985 budget numbers?

Mr. MORRISON of Connecticut. The gentleman is correct.

Mr. FUQUA. Now, what would the position of the gentleman be, and also the gentleman from Michigan, of those budgets that have been submitted to the Congress, the President's budget, that are below the fiscal year 1985 funding level. The 1986 budget is below the 1985 budget. Is it your intention to bring those budgets up to the 1985 level?

Mr. MORRISON of Connecticut. No. I personally do not have a particular position overall on each of those matters. I think they have to be decided on their own merits. However, I do believe that they should not in general be brought up above the level of 1985 expenditures.

There may be others who have different positions on that question, and they will have to decide that at the time. But the principle is that if we are going to do anything about this budget deficit, we are going to have to be able to hold the line. Perhaps we can do better than hold the line; there may be some areas where we can save additional funds. I am not proposing that that be done with respect to the NASA budget; I think people think it is a priority, but not so much of a priority that we can be starting here to spend additional funds for fiscal year 1986.

Mr. FUQUA. I thank the gentleman.

Mr. TAUKE. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the gentleman from Iowa.

Mr. TAUKE. I commend the gentleman for offering this amendment. I think it sends a very powerful message to not only the general public, but also the appropriate committees in Congress.

It is essential that we set as policy that we are not going to go above last year's spending levels on these discretionary programs. Because I do not notice too many people running around here embracing the President's budget cuts. I have not embraced all of them either, and I do not know anybody else who has.

If we start using his budget increases as our standard when we bring bills to the floor, we are going to be in deep, deep trouble when we come to other measures later on. If we are going to deal with the deficit in a responsible way, we have to freeze across the board and make additional cuts where necessary and where it is feasible.

I do not think asking for a freeze in this program is asking for anything that we do not want to have applied to other programs that will be brought before us.

I commend the gentleman for a very powerful statement on one of the first issues out of the chute.

Mr. McKINNEY. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the gentleman.

Mr. McKINNEY. I would like to congratulate my colleague from Connecticut, and simply state we do not know if there is going to be a budget; we know we have not accepted the President's budget. This is the first authorization. If we are going to live up to what I hear all of us saying, "fairness, and hold the line and cut the deficit," it is going to have to be done authorization by authorization.

When NASA comes up to us with an appropriation, it will be lumped with a great many other subjects. I congratulate the gentleman; I certainly intend to vote for his amendment. There should be no exception in any program that comes before this Congress, including the military, in going over the 1985 budget.

Mrs. JOHNSON. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the gentlewoman.

Mrs. JOHNSON. I thank the gentleman.

Mr. Chairman, I want to congratulate the gentleman from Connecticut and the gentleman from Michigan on a very powerful and important amendment. When people from all walks of life come into my office and say we can live with a freeze, and they are the very people who are out there on the front lines trying to meet the needs of people with very real and desperate needs, that is an indication to me that we are united in this Nation in at least one thing and that is that we are facing a crisis here in Washington.

If we do not begin to address that crisis bill by bill, appropriation by appropriation, we will not succeed in retaining the vitality and the growth that we have achieved in the last year, turning around the trade deficit and assuring the future of this country.

I congratulate the gentlemen and support their amendment.

Mr. MORRISON of Connecticut. I thank the gentlewoman for her very strong words of support.

I think in the kind of expressions that we are hearing in support of this amendment, we have an opportunity to start on what is going to be a long and difficult road to deal honestly with the deficit problem. I think that this is a first opportunity, and it certainly will not be the last, but if we do not send the message today I do not think we will get the opportunities in the future to deal with this in an equitable, evenhanded, and appropriate way.

I urge that you support the amendment.

Mr. NELSON of Florida. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, last September, Mr. MACKAY and I came before this body and offered an across-the-board freeze substitute amendment to the budget resolution. We only received 108 votes in favor of it. It was an idea whose time had not come. Today, it seems to be an idea whose time is beginning to come, and when the budget resolution comes to the floor, I hope that we will recognize that its time has come.

If that is the will of this body, then NASA, as well as Defense, as well as all of the other agencies of Government should sacrifice together, tighten their belts in an across-the-board freeze. Why am I opposing this amendment today? I am because that policy has not been set, and the one agency that you start to send off the wrong signal in cutting it back $375 million, is the one agency that is advancing our science and technology which is the future of this country, which is the future of our economic competitiveness in the world markets, which is the future of giving our people vision, which is the future of the country.

□ 1840

I wish that the process were such as it is supposed to be where the budget resolution comes first, we express that overall budget philosophy, and then we come along and flesh it out in our authorization and appropriations bills. That has not been able to be the case.

Because of the delay in the budget on the Senate side, the fact that we are coming with the first authorization bill here, it is not the right signal to say that we are not going to press the frontiers of knowledge, that we are not going to move industrialization into space, that we are not going to move pharmaceutical manufacturing that will find those wonder drugs for those dread diseases here on Earth. That is the wrong signal for us to send out.

If at some future time we adopt a budget resolution that freezes across the board, which I will support, and if the Budget Committee does not come forth, I will offer as a substitute, then I think it is incumbent on all of these agencies of Government that we make them toe the line and tighten up. But this is the wrong signal to send here.

The specific increase is a $230 million item, which is the second year of the design and definition of the permanently manned space station, a station that, if in Earth orbit by 1992, the 500th year of the landing of Columbus and the discovery of the New World, we will have manufacturing in space, we will develop a $60 billion industry of commercialization by the turn of the century, and ladies and gentleman, that is where we want this country to go.

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. NELSON of Florida. I yield to the gentleman from Michigan.

Mr. PURSELL. I thank the gentleman for yielding.

Mr. Chairman, I congratulate the gentleman from Florida on his earlier statement with respect to the budget freeze amendments. The time is now, the game is different, and the Americans are looking for that deficit reduction.

What we are saying is we want to be fair across the board. You cannot protect a program and PURSELL another program, and another Member of Congress XYZ program. If we do that, we will never achieve that deficit reduction. We will never abide by the principle of an across-the-board cut. So let us be consistent today. This is the first big authorization bill on the floor.

Let us see where the test is today, that we can really face up to the deficit, be consistent, and tell every voter in Florida, Michigan, and anywhere else in this Nation that we want to be consistent and fair so that we treat every special interest group and everyone who is on the Federal dollar, and one out of every three Americans is now taking some subsidy from the Federal Government, that we want to treat everyone alike, but we all want to achieve the $50-billion deficit reduction.

The CHAIRMAN. The time of the gentleman from Florida [Mr. NELSON] has expired.

(By unanimous consent, Mr. NELSON of Florida was allowed to proceed for 1 additional minute.)

Mr. NELSON of Florida. I would just respond, before I yield to the gentleman from Connecticut, I wish the gentleman from Michigan had been consistent and supported the budget freeze substitute last year.

Mr. MORRISON of Connecticut. Mr. Chairman, will the gentleman yield?

Mr. NELSON of Florida. I yield to the gentleman from Connecticut.

Mr. MORRISON of Connecticut. I thank the gentleman for yielding.

Mr. Chairman. I want to tell the gentleman I voted with him and supported him on his freeze last time and I am going to be with him this year as well. I think we are going to have to start now.

I think it is important to recognize that in fiscal year 1981, the funding level for the NASA was $5 billion. This proposal will still have the NASA funding level $2½ billion above what it was in 1981, while many other programs in the discretionary category have suffered cuts.

So we are not sending the wrong signal. We have been sending the right signal that NASA can grow and develop, but this is the year when the signal for everyone is that we are going to have to freeze.

Mr. NELSON of Florida. To the contrary, the purchasing power of the dollars allocated to NASA as compared back to the year 1981 is $500 million less.

Mr. SMITH of Florida. Mr. Chairman, will the gentleman yield?

Mr. NELSON of Florida. I yield to the gentleman from Florida.

Mr. SMITH of Florida. I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman for his statement, and the gentleman from Connecticut for his statement. I was one of those 108 who stood up last year and tried to do this. You are right. It is an idea whose time has come. Like you, I invite everybody to join the Wright bandwagon this year.

Mr. NELSON of Florida. I thank the gentleman.

Mr. LUJAN. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Connecticut.

Mr. Chairman, this amendment is shortsighted. If you are really concerned about the future of the United States, this is not where we ought to cut.

How do we reduce that deficit? We are all interested in reducing the deficit. We reduce it by increasing the economic activity in this country, and what does this budget do? This budget takes us into a new frontier, into better ways of doing things, research into new engines that will save energy, research in avionics. What industry is there that produces such a positive balance of trade for the United States other than the aviation industry?

The economic benefits of this program, of this research that we are doing, Mr. Chairman, for every dollar

invested, it returns from $7 to $14. What do we get from it? Why do I say that it is an investment? We get such things as heart monitors for patients who have been in intensive care and are beginning to move out of intensive care. We get new medicine, new medicines for diabetes, for arthritis, yes, even for cancer. Time release implants for medication. Miniaturization of computers. That is where we make money. That is where the taxes will come from to balance that budget. Lightweight materials. Ceramics so we do not have to depend on foreign material.

Let me just say in conclusion, Mr. Chairman, that such a cut will seriously damage our progress and I would hope that this House turns down that amendment.

AMENDMENT OFFERED BY MR. WALKER TO THE AMENDMENT OFFERED BY MR. MORRISON OF CONNECTICUT

Mr. WALKER. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER to the amendment offered by Mr. MORRISON of Connecticut: On line 4 following "$7,510,700,000." add the following: "*Provided, however,* That none of the reductions caused by this subsection shall be made in activities related to commercial space development."

Mr. WALKER. Mr. Chairman, if we are to proceed with the freeze concept, and I think some of the people here who have made the arguments make them very articulately not just about this program but that they are going to make all of these cuts in the future, and I assure them that I will be out here making certain that if they do not do it, that they get done.

But the point here is that I think that we do not have to accept, though, the 1985 priorities. The President set forth some very specific priorities in his budget. He said that it is time to move toward commerical development of outer space, and he said that based upon some very important economic figures.

Chase Econometrics has taken a look at what space development means. The adoption of this amendment, or this amendment by Mr. MORRISON, if it is to come out of commercial space activities, will result in the loss of 320,000 jobs, according to Chase Econometrics. It will result in a $9.2 billion loss in gross national product, according to the figures of Chase Econometrics.

I do not know about you, but I do not have a district and I do not think very many people have districts that can afford a job loss of 320,000 jobs or a loss of GNP of $9.2 billion.

Where does that come from? Chase Econometrics says that for every billion dollars extra investment by the Federal Government in space, it results in the creation of 800,000 jobs, or it increases the gross national product by $23 billion.

□ 1850

The $375 million in this amendment works out to the kind of figures I just discussed.

What does my amendment do? My amendment says, "If you want to freeze, OK, fine, freeze. Get the $375 million, but don't do it in a way that eliminates jobs and eliminates GNP. Keep the commercial space development. Keep the future intact. Make certain we continue to move into outer space aggressively and create jobs and create a real future."

So my amendment is an amendment that says, "Keep the space station in place. Keep going forward on that because that is the commercial future. Keep the commercial space office fully funded, because that is where the jobs are. Make certain that we continue the progress toward jobs."

It would be a shame to come on this floor with freeze-type amendments that in fact undercut the economy of this country. I am afraid that unless we adopt an amendment such as the one I offer here, that is exactly what we are going to be doing in the NASA budget.

So I would plead with the Members, if we are going to freeze, let us go ahead and freeze, but let us save 320,000 jobs. If we are going to freeze, let us save $9.2 billion in GNP. Let us at least do that and adopt some of the President's priorities about economic growth in the future rather than simply adopting the priorities of 1985 in the freeze-type approach.

Mr. Chairman, I yield back the balance of my time.

Mr. GLICKMAN. Mr. Chairman, I rise in opposition to the Walker amendment and in support of the Morrison amendment.

First of all Mr. Chairman, I want the Members to know that if they support the Walker amendment, they will be supporting only commercial space development really, because what he does is he takes all the cuts out of planetary sciences, astronomy, life sciences, and aeronautics and puts it all into commercial space development. That is really a ridiculous thing to be doing for the future of the country, as the gentleman from New Mexico [Mr. LUJAN] said. So I would urge the Members to vote against the Walker amendment.

Let me tell the Members something. This is really a tough issue for me because I am a subcommittee chairman of this committee, and I have got a lot of jurisdiction, including $700 million in the aeronautics budget. But I have been around the country advocating a freeze, and it has got to start somewhere.

My colleague, the gentleman from Florida, talked about the signals, that this is a bad signal to send. I will be honest. I think it is a worse signal to send if we start exempting all of our programs out until we get a budget resolution. We may never get a budget resolution. I hope we do. I hope the gentleman from Pennsylvania [Mr. GRAY] is able to provide one.

But those cuts must start somewhere, and if it does not start in an area which affects me in my aeronautics budget, where is it going to start? It is going to start nowhere because no one will ever be willing to provide it.

The question is, can NASA give a few hundred million dollars in its budget without crippling itself? My best guess is, yes, they can give a few hundred million dollars in their budget without crippling themselves.

I do not like the amendment. I think that it is an across-the-board amendment. It has got some irresponsible character to it. But we have a crisis in America, and the crisis is that we are bleeding to death because of high deficits, and if we do not start here, we will never start anywhere.

So, Mr. Chairman, I urge the Members today to vote against the Walker amendment. It is highly irresponsible. It will work against the scientific advance of this country. And, reluctantly, I urge the Members to vote for the Morrison amendment.

Mr. PACKARD. Mr. Chairman, I move to strike the last word, and I rise in opposition to the substitute amendment as well as the original amendment.

Mr. Chairman, on the floor of the House is not the appropriate place for us to pick and choose what programs are going to remain funded and what programs are not. That is the job of the subcommittee and the job of the committee, and I feel our committees have done an excellent job in bringing this bill to the floor of the House.

I personally think that the worst thing we could do, if we want to implement a freeze program, which I have supported all along, would be to do it on a piecemeal basis by which we relegate to the Members of this Congress the right to pick and choose what programs they wish to freeze and what programs they wish to disregard as far as the deficits are concerned.

I think if we are going to freeze, we are going to have to have an across-the-board freeze, and this is not the way to do it, to take the first bill where the President has suggested an increase and freeze, with the expectation that in the future every other bill and every other program will be frozen, too. I am convinced the Congress will not act responsibly in following through with subsequent requests for a freeze, and for that reason I believe that it would be a mistake to

freeze this program when it is perceived by both the committee and the subcommittees and the administration to be a valuable enough program to call for increases at this particular time, expecting that there would be a freeze in the future.

Mr. Chairman, I yield back the balance of my time.

Mr. PORTER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, let me say to the Members of the House that I have been talking lately to everyone who will listen: what $200 billion deficits going out to infinity will do to our children. In the 5 years that I have been privileged to be a Member of this body, the Congress has added $1 trillion of debt to the $1 trillion that was already there, and it will reach $2 trillion very soon. The numbers get so large that sometimes it becomes mind boggling.

But let me put it in perspective for the Members. What this $2 trillion of debt will mean is that every one of our children will pay $100,000 in extra taxes during their productive lives just to carry the interest cost. Last year's $200 billion of deficit is going to cost each one of our children $10,000 more to pay just to carry the interest on that deficit.

What does that mean? That means that our children and our grandchildren can no longer have the same economic opportunities to grow in a free society that you and I have had and that our parents have had—unless we do something to stop this drenching of red ink. Already, young people look forward to a Social Security system that is going to give them back 75 cents on the dollar. By contrast, the people who are retiring today receive $3 or more on every dollar they invested.

Already, young people cannot buy a home because interest rates are so high. They are so high because we in the Congress cannot clean our fiscal house and cannot bring down this deficit and bring down interest rates to give them the same opportunities that we had.

Mr. Chairman, there is only one way that we are ever going to take hold of this problem. That is to freeze every program and every authorization at last year's level, and then work our way down to getting the budget into balance.

I think NASA can survive on $7 billion. I think they can do it at least for 1 year.

Mr. Chairman, I urge the Members to adopt the original Morrison amendment, and I commend the gentleman from Connecticut for offering it.

Mr. JONES of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. PORTER. I yield to the gentleman from Oklahoma.

Mr. JONES of Oklahoma. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, let me just say that I am not going to take much time of the committee, and I can hardly add much to the "profile in courage" that the gentleman from Kansas [Mr. GLICKMAN] gave us just a few minutes ago. But for the past 4 years I have heard the same arguments as chairman of the Budget Committee, that it is never the time to start the serious act of deficit reduction.

It is going to be very difficult for this Congress this year to pass a budget resolution. I think if all of us would reflect upon what our constitutents are telling us, we would know they are telling us that "We are willing to share in the sacrifice to move toward a balanced budget, and we will accept a cut if everybody else is treated the same way."

That is a freeze resolution. It has to start somewhere. We can do much to advance the budget process by starting it here tonight and passing this freeze amendment of the gentleman from Connecticut [Mr. MORRISON] and the gentleman from Michigan [Mr. PURSELL]. I hope that we will put our votes where so many of us have put our rhetoric and vote for the Morrison amendment.

□ 1900

Mr. PORTER. I commend the gentleman from Oklahoma for that statement, also one of courage. There is no way to get at this except to say no to increases in spending.

I would urge adoption of the amendment offered by the gentleman from Connecticut [Mr. MORRISON].

Mr. BROWN of California. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I am willing to support a freeze. I have only one qualification on that, and that is that it be a freeze that extends across the board.

I am not a profile in courage. It does not make too much difference to me in my district which way I vote on this, but I like to be consistent.

I favor actually a larger budget for NASA. I think it can be justified, but I would support a freeze if it is applied across the board.

Now, this is not going to be the courageous vote that some of you have said it is going to be. It is going to be a popular vote and a lot of you are going to get on it, because it is going to be popular.

Where it is going to be hard is when you get to the defense budget up here.

I ask you now, are you willing to really be courageous and recognize that when you vote for a freeze here, you have committed yourself to a freeze across the board?

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I will be happy to yield.

Mr. PURSELL. I cannot speak for all the Members here, but I know many on this side of the aisle are prepared to vote yes on a defense budget freeze across the board.

Mr. PACKARD. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I would be happy to yield to my friend, the gentleman from California.

Mr. PACKARD. Mr. Chairman, I commend the gentleman from California on his statement. I believe there are many of us here who have already indicated a commitment to that concept, but I think it is a two-edged sword. You would also have to commit on the other side of the aisle that when social programs and entitlement programs come before this body, that they, too, would be frozen.

Mr. CHANDLER. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I would be happy to yield to the gentleman.

Mr. CHANDLER. Mr. Chairman, I appreciate the gentleman yielding and I really appreciate the comments of the gentleman from California.

I spoke earlier. I want to be associated with them, with the gentleman from Michigan [Mr. PURSELL] and the gentleman from Oklahoma [Mr. JONES]. If we do not start tonight, if there is not the perception of fairness, when we do get to something like the gentleman is saying, like defense or a real cruncher, Social Security, the ball game is over. If you cannot start tonight, you are not going to make it.

Mr. BROWN of California. Well, I wanted to raise this, Mr. Chairman, because I want all of us to know where the courage is really going to be required. On this side it is going to be on the social issues. You know that.

On that side, it is going to be the defense issue.

Now, properly speaking, these policies should be resolved in the normal course of events in our budget committee and brought to us in a way that we can take a vote as to what we want to do.

As the distinguished gentleman from Oklahoma has indicated, that may not happen, and if it does not, we are going to have to take the action that is required here on the floor; but I am very reluctant personally to start it with this bill without the assurance that we are going to have the kind of discipline that is indicated and the kind of courage that is indicated in voting for a freeze across the board when these more difficult issues come up.

I do not think this vote is difficult. I think you can vote for a freeze here and think, well, it really does not commit me to do anything else, or I can vote not for a freeze here and say

that I will vote for it later on down the line when I see the picture.

I am convinced personally that we should support the administration's request on this bill, which is not unreasonable, and that we should if we later decide to have an across-the-board freeze cut it back in the Appropriations Committee, which is the proper place to do it.

The CHAIRMAN. All time has expired.

PARLIAMENTARY INQUIRY

Mr. MORRISON of Connecticut. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. MORRISON of Connecticut. Mr. Chairman, the parliamentary situation here is that the first vote, as I understand it, is on the Walker amendment and not on the freeze itself, is that correct; regardless of the disposition of the Walker amendment, there will be a separate vote on the freeze, is that correct?

The CHAIRMAN. The gentleman is correct.

Mr. MORRISON of Connecticut. I thank the Chair.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. WALKER] to the amendment offered by the gentleman from Connecticut [Mr. MORRISON].

The amendment to the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut (Mr. MORRISON).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title I?

If not the Clerk will designate title II.

The text of title II is as follows:

TITLE II—SHUTTLE PRICING POLICY FOR COMMERCIAL AND FOREIGN USERS

FINDINGS

SEC. 201. The Congress finds and declares that—

(1) the Space Transportation System is a vital element of the United States space program, contributing to United States leadership in space research, technology, and development;

(2) the Space Transportation System is the primary space launch system for both United States national security and civil government missions;

(3) the Space Transportation System contributes to the expansion of United States private sector investment and involvement in space and therefore should serve commercial users;

(4) the availability of the Space Transportation System to foreign users for peaceful purposes is an important means of promoting international cooperative activities in the national interest and in maintaining the freedom of space for activities which enhance the security and welfare of mankind;

(5) the United States is committed to maintaining world leadership in space transportation;

(6) making the Space Transportation System fully operational and cost effective in providing routine access to space will maximize the national economic benefits of the system; and

(7) national goals and the objectives for the Space Transportation System can be furthered by a stable and fair pricing policy for the Space Transportation System.

PURPOSE

SEC. 202. The purpose of this title is to set a reimbursement pricing policy for the Space Transportation System for commercial and foreign users which is consistent with the objectives of the Space Transportation System and encourages the full and effective use of space.

DEFINITIONS

SEC. 203. For purposes of this title, the term—

(1) "Administrator" means the Administrator of the National Aeronautics and Space Administration;

(2) "additive costs" means the direct and indirect costs to the National Aeronautics and Space Administration of providing additional flights of the Space Transportation System beyond the costs associated with those flights necessary to meet the United States Government's space transportation needs, including the average direct and indirect costs of program charges for manpower, expended hardware, refurbishment of hardware, spare parts, propellants, provisions, consumables, launch and recovery services, program support, and contract administration;

(3) "operating costs" means the total direct and indirect costs to the National Aeronautics and Space Administration to operate the Space Transportation System, including the direct and indirect costs of program charges for manpower, expended hardware, refurbishment of hardware, spare parts, propellants, provisions, consumables, launch and recovery services, program support, and contract administration; and

(4) "capital recovery charge" means a charge determined by the Administrator based on the cost of an orbiter amortized over 100 flights.

SHUTTLE PRICES FOR COMMERCIAL AND FOREIGN USERS

SEC. 204. (a) Except as provided in subsections (c) and (e), the Administrator shall charge each commercial or foreign user of the Space Transportation System, as reimbursement, a pro rata portion of an amount determined under subsection (b).

(b)(1) The amount referred to in subsection (a) shall be equal to the sum of—

(A) the average additive cost of a flight, plus

(B) a capital recovery charge for a flight.

(2) In no event shall the amount determined under paragraph (1) exceed the average operating cost of a dedicated commercial flight of the Space Transportation System.

(c) The Administrator may reduce the amount charged any commercial or foreign user of the Space Transportation System under this section (but not below that user's pro rata portion of the average additive cost of a flight of the Space Transportation System) as necessary to achieve one or more of the following goals:

(1) the preservation of the role of the United States as a leader in space research, technology, and development;

(2) the efficient use of the Space Transportation System;

(3) the long range goal of greatly increasing commercial space activities; and

(4) the goal of enhancing the international competitive position of the United States in providing space transportation services and capabilities.

(d) For purposes of this title, the Administrator shall assume twenty-four flights per year of the Space Transportation System.

(e) The Administrator may—

(1) set an amount lower than the amount determined under subsections (a), (b), and (c), or

(2) provide no-cost flights,

for any commercial or foreign users of the Space Transportation System who is involved in research and development programs with the National Aeronautics and Space Administration.

EFFECTIVE DATE

SEC. 205. This title shall apply to flights of the Space Transportation System during the period beginning on October 1, 1988, and ending on September 30, 1991.

The CHAIRMAN. Are there amendments to title II?

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 13, strike title II and insert in lieu thereof the following:

TITLE II—SHUTTLE PRICING FOR COMMERCIAL AND FOREIGN USERS

FINDINGS

SEC. 201. The Congress finds and declares that—

(1) the Space Transportation System is a vital element of the United States space program, contributing to United States leadership in space research, technology, and development;

(2) the Space Transportation System is the primary space launch system for both United States national security civil government missions;

(3) the Space Transportation System contributes to the expansion of United States private sector investment and involvement in space and therefore should serve commercial users;

(4) the availability of the Space Transportation System to foreign users for peaceful purposes is an important means of promoting international cooperative activities in the national interest and in maintaining the freedom of space for activities which enhance the security and welfare of mankind;

(5) the United States is committed to maintaining world leadership in space transportation;

(6) making the Space Transportation System fully operational and cost effective in providing routine access to space will maximize the national economic benefits of the system; and

(7) national goals and the objectives for the Space Transportation System can be furthered by a stable and fair pricing policy for the Space Transportation System.

PURPOSE

SEC. 202. The purpose of this title is to set a reimbursement pricing policy for the Space Transportation System for commercial and foreign users which is consistent with the objectives of the Space Transportation System and encourages the full and effective use of space.

DEFINITIONS

SEC. 203. For purposes of this title, the term—

(1) "Administrator" means the Administrator of the National Aeronautics and Space Administration;

(2) "additive cost" means the direct and indirect costs to the National Aeronautics and Space Administration of providing additional flights of the Space Transportation System beyond the costs associated with those flights necessary to meet the United States Government's space transportation needs, including the average direct and indirect costs of program charges for manpower, expended hardware, refurbishment of hardware, spare parts, propellants, provisions, consumables, launch and recovery services, program support, and contract administration;

(3) "operating costs" means the total direct and indirect costs to the National Aeronautics and Space Administration to operate the Space Transportation System, including the direct and indirect costs of program charges for manpower, expended hardware, refurbishment of hardware, spare parts, propellants, provisions, consumables, launch and recovery services, program support, and contract administration; and

(4) "capital recovery charge" means a charge determined by the Administrator based on the cost of an orbiter amortized over 100 flights.

SHUTTLE PRICES FOR COMMERCIAL AND FOREIGN USERS

SEC. 204. (a) Except as provided in subsections (c) and (f), the Administrator shall charge each commercial or foreign user of the Space Transportation System, as reimbursement, a pro rate portion of an amount determined under subsection (b).

(b)(1) The amount referred to in subsection (a) shall be equal to the sum of—

(A) the average additive cost of a flight, plus

(B) a capital recovery charge for a flight.

(2) In no event shall the amount determined under paragraph (1) exceed the average operating cost of a flight of the Space Transportation System plus the capital recovery charge.

(c) The Administrator shall reduce the amount charged any commercial or foreign user of the Space Transportation System under this section (but not below that user's pro rate portion of the average additive cost of a flight of the Space Transportation System) as necessary to achieve the following goals:

(1) the preservation of the role of the United States as a leader in space research, technology, and development;

(2) the efficient use of the Space Transportation System;

(3) the achievement of greatly increased commercial space activities; and

(4) the enhancement of the international competitive position of the United States in providing not less than two-thirds of all free world space transportation services and capabilities.

(d) The Administrator shall set rates of reimbursement in full consideration of the potential economic viability of alternative domestic launch services.

(e) For purposes of this title, the Administrator shall assume 24 flights per year of the Space Transportation System.

(f) The Administrator may—

(1) set an amount lower than the amount determined under subsections (a), (b), and (c), or

(2) provide no-cost flights, for any commercial or foreign user of the Space Transportation System who is involved in research and development programs with the National Aeronautics and Space Administration.

ROYALTY RECOVERY

SEC. 205. The Administrator shall examine and report to the Congress on the feasibility of providing space shuttle launch services on a basis of royalty recovery over the economic life of commercial products produced or processed in space.

ON-ORBIT SERVICES

SEC. 206. The Administrator shall conduct a study and report to the Congress on a proposed pricing policy for certain services such as on-orbit service, repair or recovery of spacecraft.

EFFECTIVE DATE

SEC. 207. This title shall apply to flights of the Space Transportation System during the period beginning on October 1, 1988, and ending on September 30, 1991.

Mr. WALKER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALKER. Mr. Chairman, in terms of priorities in this bill, this is probably the most important question that we face, and that is the question of future pricing of the shuttle loads. We have adopted in the committee an amendment relating to shuttle pricing that essentially freezes into place the present price on the shuttle. The problem with that is that it does some things, from my perspective, that create real problems out there.

First of all, we have just begun to develop in this country a commercial expendable launch vehicle industry. They are partially being developed because government has encouraged them to believe that there is a market for expendable launch vehicles in the future. In other words, this is private enterprise at work within the space community at the present time. This is where we have the potential for developing jobs in the future.

This amendment was offered in committee. There was a bipartisan vote on it. It was defeated 23 to 18 in committee, so it is a fairly controversial issue; but it does relate to the question of whether or not you want to see space used for commercial purposes.

Under my amendment, what we adopt is a flexible pricing policy. It allows the NASA administrator to price all the way from about $45 million up to $106 million. What that does is assure that at least we give the commercial ELV, expendable launch vehicle industry, a chance to survive. This does not guarantee that any of them are going to make it in the market place, but it does give them some hope that at some point in the future they are going to be able to survive.

Why is that important? Because we are on the verge of expanding a major space economy. If we send the wrong signals to investors at the present time, what we will end up doing is canceling out a large portion of the economy that we can develop. We will cancel a large number of jobs that can be created in this industry.

We are talking not just of thousands of jobs, not just hundreds of jobs, we are talking literally millions of jobs. In fact, if by the year 2010 you can create a trillion dollar economy in space, and that is indeed possible based on very conservative economic judgments, you create the 1985 equivalent of 35 million jobs that do not exist today.

□ 1910

If we begin the process of sending the wrong signals to the investment market at the present time, what you will end up doing is canceling out that option and spreading it out further down the line. I do not think that is what we want to be all about.

I think we ought to develop the kind of flexible pricing policy that assures that the NASA Administrator can take prices and set them based upon the market. We ought not be subsidizing shuttle flights. We ought not have the taxpayer paying a portion of what it costs to fly aboard the shuttle.

We ought to have a market price for the shuttle that is in reality what the real market is.

What this does is permit the NASA Administrator to, in fact, establish such a market price. Now, If you have a product out there that can only fly aboard the shuttle, that has the potential of real development in the future, that allows the NASA Administrator to price that low and allows it to fly, as a matter of fact, even lower than the pricing so that we can get that research and development done. But if you have like a communications satellite that is already proven in the marketplace, then this would allow the NASA Administrator to price that high providing that he attains a certain percentage, two-thirds of the market, for Amercan products.

In other words, he can price low in order to keep a certain share of the market for American products. That is also important because you are competing now with the French that have their ARIANE flying. We want to make certain we do not give up the whole marketplace to ARIANE. It would be foolish to come to this floor and end up adopting something which was marketability for French products.

This amendment protects both sides of that. It protects the option for the ELV's in this country, to get their market in place. It also protects us against French interference in the total world market.

I will tell you that I think that this pricing policy is probably the most crucial decision that you will make. It is difficult to understand. It is not very easy to explain out here.

But the fact is that the future of space is wrapped up in what we make in terms of policy determinations on pricing. If we price too high we will drive competition out of the marketplace. If we price too low and subsidize, we will set a standard that will allow no commercial activity.

I would hope that you will adopt this amendment that allows the flexibility necessary to proceed into the future.

Mr. NELSON of Florida. Mr. Chairman, I rise in opposition to the amendment.

I want to recall for you the remarks of the gentleman from Massachusetts [Mr. BOLAND], the chairman of the Appropriations Subcommittee, in the opening of the bill being supportive of the very technical and detailed languge in the bill on the shuttle pricing policy. He supports this policy. The committee continuously had votes in the subcommittee and the full committee that supports the committee bill, and I urge you to stick with the committee language.

I will just briefly give you an explanation of what it is. The mission model is 24 flights a year. You can break that down into thirds. Eight flights are going to be DOD payloads. The second eight flights are going to be NASA science experiments, interplanetary missions. We know those 16 flights are going to fly. Whether or not the additional eight flights fly to make a total of 24 depends on whether or not our price is competitive with the French ARIANE. So we are not going to fly that additional eight flights. We are not going to be able to use this fantastic flying machine for those total 24 if we do not have a price that can compete in the international marketplace.

Now, let me tell you how close it is. The last year the French took 50 percent of the international competition on satellite business, communications satellites, 50 percent of them signed up to go on the ARIANE.

This is a policy judgment of our committee. We feel very strongly that it is not in the best interests of the mission, so we have gone through dozens and dozens of hearings and we have heard from the communities all involved, and we have heard from all the commercial users of the shuttle that there is real potential for $60 billion in commercial development in space. And they support our kind of pricing policy.

Mr. VOLKMER. Will the gentleman yield?

Mr. NELSON of Florida. I yield to my distinguished colleague from Missouri [Mr. VOLKMER].

Mr. VOLKMER. I just wish to commend the gentleman from Florida for his work on this pricing policy and I wish to also bring about that the French are now constructing a second launch facility and that within the time period when this pricing policy will go into effect, they will have the capability of taking 17 launches a year, which will basically, with their new launchers, the ARIANE 4 and 5, when they have it ready, then with them being able to do more than one payload at a time, they would be able to take it all away from the shuttle. And if we go along with the amendment by the gentleman from Pennsylvania, as my colleague said, we can pretty well kiss those commercial payloads goodbye and we will just have the shuttle sitting on the ground.

Mr. NELSON of Florida. I thank the gentleman who served as the immedicate past chairman of this Space Subcommittee, and I thank him for his insight.

Mr. WALKER. Will the gentleman yield?

Mr. NELSON. I yield to my good friend from Pennsylvania.

Mr. WALKER. I thank the gentleman.

I do want to correct the RECORD with regard to the remarks of the gentleman from Missouri, because I think the gentleman from Florida [Mr. NELSON] will admit that, in my amendment, we protect two-thirds of the marketplace for the United States against ARIANE. In the committee bill, there is no such protection, there is no such flat market share involved. So, therefore, my amendment not only gives us the option of earning more money, but in light of the last freeze, vote, we might be interested in earning a little bit more money out of the shuttle. But it also assures that we do not have ARIANE usurping more than one-third of the marketplace.

I thank the gentleman for yielding.

Mr. NELSON of Florida. The gentleman is indeed correct about protecting two-thirds of the market. Indeed, I helped him write that language.

However, in our examination and our conclusions, we have come to the conclusion that the Nation's best interest is served by keeping the price at approximately what it is.

Mr. FUQUA. Will the gentleman yield?

Mr. NELSON of Florida. I yield to the gentleman from Florida, my chairman of the full committee.

Mr. FUQUA. I want to thank the gentleman for yielding and rise in opposition to the Walker amendment. I think the language that is in the bill is appropriate language.

I have several concerns about the language of my friend from Pennsylvania, even though well-intentioned. But I hope that it does not prevail and that we can keep the language that is currently in the bill.

I thank the gentleman for yielding.

Mr. NELSON of Florida. I thank the chairman.

Mr. LUJAN. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment.

I do want to rise in support of the amendment offered by the gentleman from Pennsylvania [Mr. WALKER] because I think it is in the best interests of the space program of the United States.

The bill, as it stands today, calls for a reduction generally of what we are charging to date. Now, that is not exactly true. That is almost totally true.

Today, the cost on the shuttle for a full payload is $71 million. Now, it is true that under the committee bill, it can go to $71.4 million, just slightly above that.

But the thrust of that amendment is to take the cost down to $45 million. You know, there is only one thing wrong with that, and that is generally the only decision that can be made is to either charge what we are charging now or charge less, except for $400,000 that the amendment calls for.

Now, what brought this whole thing on, the shuttle pricing, of course, was the competition with the ARIANE. But also the administration's desire to recover some of the costs.

Now let me tell you what happens and what the bill now says should happen. A satellite—say a communications satellite that is launched into orbit and stays there—the earning potential of that satellite, I have been told, is up to $1 billion, $1 billion that that satellite can make during the time that it is up in orbit.

If that is the case, that there is that good profit in there, and that is $1 billion profit, I might say, if there is that good profit in there, let us get some of that profit to reduce this deficit.

The Walker amendment says, all right, you should reduce the price in some instances and, as a matter of fact, he takes the same amount that is in the bill now, $45 million.

□ 1920

Either the bill now or the Walker amendment, both of them can reduce it to $45 million. The difference is that, under Mr. WALKER's amendment, you can take it up to 105 if your want to charge someone more than you are presently charging; you can do that.

Now the gentleman from Pennsylvania [Mr. WALKER] has two other things in there that are particularly attractive to me, and that is that we have in this country the only country that has the capability of bringing something back from space.

Anybody can shoot it, and put it up in orbit—not anybody; the French, the

Russians, ourselves—all of the competitors can put it in orbit, but we are the only ones that can bring it back, or that can fix it. We ought to take advantage of that.

I pointed out in committee, when you go to Sears and buy a refrigerator, they say, "All right, for 10 percent more" or whatever the figure may be, "we'll fix it for you if it breaks down." We ought to do the same kind of marketing.

We ought to say to the launchers, "We'll charge you so much and then for a little extra, we'll give you a package deal that nobody else can offer if you'll come with us." That is the way to attract business.

We also can offer lower costs for royalties, but under Mr. WALKER's amendment, it guarantees that you capture two-thirds of the market, and that is a lot better than we are doing now; we only have half of it.

The CHAIRMAN. The time of the gentleman has expired.

The question is on the amendment offered by the gentleman from Pennsylvania [Mr. WALKER].

The question was taken; and the chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 206, noes 201, not voting 25, as follows:

[Roll No. 49]

□ 1930

Mr. DE LA GARZA changed his vote from "aye" to "no."

Messrs. HAMMERSCHMIDT, DE LA GARZA, HOPKINS, ROBINSON, LENT, MILLER of California, OBERSTAR, SCHUMER, and STUDDS changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

□ 1940

The CHAIRMAN. The Clerk will designate title III.

The text of title III is as follows:

TITLE III—OFFICE OF COMMERCIAL SPACE TRANSPORTATION

SEC. 301. Section 24 of the Commercial Space Launch Act (Public Law 98-575; 98 Stat. 3064) is amended by adding at the end thereof the following: "There is authorized to be appropriated to the Secretary to carry out this Act $586,000 for fiscal year 1986.".

The CHAIRMAN. Are there any amendments to title III?

Are there any further amendments to the bill?

If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. MOAKLEY] having assumed the chair, Mr. TORRES, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1714) to authorize appropriations to the National Aeronautics and Space Administration for research and development, space flight, control and data communications, construction of facilities, and research and program management, and for other purposes, pursuant to House Resolution 119, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment?

Mr. PENNY. Mr. Speaker, I demand a separate recorded vote on the Morrison-Pursell freeze amendment.

The SPEAKER pro tempore. Is there a separate vote demanded on any other amendment?

If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The Clerk will report the amendment on which a separate vote has been demanded.

The Clerk read as follows:

Amendment: Page 7, after line 20, insert the following new subsection:

(i) Notwithstanding the preceding provisions of this section, the total amount authorized to be appropriated by subsection (a), (b), (c), and (d) shall not exceed $7,510,700,000.

The SPEAKER pro tempore. The question is on the amendment.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. PENNY. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 369, noes 36, not voting 27, as follows:

□ 2010

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

PERSONAL EXPLANATION

(Mr. WOLPE asked and was given permission to address the House for 1 minute.)

Mr. WOLPE. Mr. Speaker, yesterday evening I was inadvertently away from this Chamber during three suspension votes. The first of these votes was H.R. 1373, which would designate the Point Reyes National Seashore as the Phillip Burton Wilderness Area. Had I been present I would have voted "yes" on H.R. 1373. The second of these votes was H.R. 1869, the contemporaneous recordkeeping bill, which would repeal current recordkeeping requirements regarding tax deductions for the business use of automobiles and similar property. Had I been present I would have voted "yes" on H.R. 1869. The third of these votes was House Concurrent Resolution 107, which calls on the President to take action to reduce our trade deficit with Japan. Had I been present I would have voted "yes" on House Concurrent Resolution 107.

□ 2020

CLASSIFIED REPORT ON U.S. SUPPORT FOR DEMOCRATIC RESISTANCE MOVEMENT IN NICARAGUA—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore [Mr. TRAFICANT] laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations:

(For message, see proceedings of the Senate of today, Wednesday, April 3, 1985.)

U.S. PARTICIPATION IN THE SPECIAL FACILITY FOR SUB-SAHARAN AFRICA

(Mr. LUNDINE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNDINE. Mr. Speaker, we are all too well aware of the daily struggle for life currently taking place throughout sub-Saharan Africa. The bill passed yesterday is testimony to the fact that we in the United States care deeply about the welfare of those who lack the necessary food, shelter and clothing to survive. However, I think what is sometimes lost sight of in the immediacy of the current crisis is what we are doing or can do to prevent such catastrophes from occurring again and again.

We must address the long-term as well as the short-term problems of Africa. The problems created by drought and the overall economic crisis in Africa have not come about only in the last 3 years. They are the result of a long-term deterioration. Annual per-capita grain production in the 24 countries most seriously affected by the drought has been falling on the average of 2 percent a year ever since 1970. If this trend continues, per capita grain production will be lower in these countries in 1988 even with adequate rainfall, than it was in the drought year of 1984. Obviously, something must be done to reverse this trend.

A long-term development strategy must include a greater emphasis on human resource development, greater self-reliance, greater economic integration, and scientific and technical progress. Changes must be made in education and training to ensure greater relevance to the needs of African economies. Agricultural projects must be oriented toward the small landholders who make up the majority of the African population rather than targeted at large farms as has been the practice of the past. Resources must be used efficiently and the infrastructure necessary to development must be built.

These changes cannot be made successfully if we are not willing to provide the financial and technical support necessary to bring them about. Consequently, Congressman MCHUGH and myself are today introducing legislation which would authorize U.S. participation in the special facility for sub-Saharan Africa. This special facility will be administered by the World Bank with its purpose being to transmit policy advice backed by development lending. Our bill proposes a U.S. contribution of $450 million over a 3 year period and along with the contributions of other donor countries will create a pool of resources well in excess of $1 billion for development lending solely to the countries of sub-Saharan African.

The need for this legislation is clear. In real terms, development lending to Africa has declined from the level achieved in the early 1980's. This situation comes at a time when short- and long-term prospects for African development are bleak. At the same time, many African governments have come to realize that internal economic policy adjustments are needed to help encourage greater food production and foster more successful development. Countries that have undertaken such measures have seen encouraging responses. While more countries are determined to alter their policies; domes-

tic, political, and economic constraints make it very difficult to implement further adjustments.

The special facility for sub-Saharan Africa will have as its primary goal the implementation of policy reforms to help the African countries to help themselves. To succeed, these efforts must be reinforced by development resources which help to ease the adjustment process. The appalling conditions prevalent in the countries of sub-Saharan Africa underscore the need for the United States to participate with the other aid donor countries in a coordinated framework. The special facility for sub-Saharan Africa provides such a framework while providing some of the additional development capital required to give Africans hope for the future.

TOWARD A COHERENT U.S. RESPONSE TO AFRICA'S LONG-TERM DEVELOPMENT NEEDS

(Mr. McHUGH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McHUGH. Mr. Speaker, yesterday the House of Representatives passed much needed funding legislation to meet the food crisis currently afflicting sub-Saharan Africa. All of us can be proud of the leadership role that our Nation has played in addressing the needs of the victims of famine in Africa, people whose tragedy has touched the lives of our people and people in other nations.

As I indicated yesterday, however, passage of this much needed legislation is not an answer to all of the problems that Africa faces. As important as our response to the immediate crisis is, the economic and political problems. In Africa clearly require a more coherent, long-term strategy.

Today, along with my colleague from New York [Mr. LUNDINE], I am introducing legislation that responds to a growing consensus that Africa's problems must be solved by Africans themselves through the adoption of policy reforms designed to promote long-term, equitable, economic growth and development. Our bill would provide for a U.S. contribution of $450 million to the special facility for sub-Saharan Africa, a new and temporary multilateral agency that is designed to provide the economic resources needed to support a difficult economic adjustment process.

The special facility was created out of a recognition that, pressing as the current crisis is, it is not short-term. Indeed, one need only examine the facts to recognize that sub-Saharan Africa lags far behind other regions of the world in some of the most basic indicators of development. For example, the 380 million people who live in Africa south of the Sahara have an average life expectancy of 49 years, the lowest in the world. There is only one doctor for every 21,000 people; not surprisingly, both infant mortality and population growth rates are also the highest in the world. Per capita income in sub-Saharan Africa is only $491 per year.

These conditions predated the current draught, the worst in Africa's history, a draught which has seriously exacerbated those preexisting conditions and threatens millions of Africans with starvation and death. We must respond to the immediate crisis, but we must also come to grips with the deeper human and resource development problems which have long plagued Africa.

Burdened with a growing debt-service obligation, declining prices for primary export commodities, a low rate of return on capital investment, and food production that is lagging behind population growth, the prospects for Africa will remain bleak unless African governments undertake fundamental policy reforms.

To encourage and sustain the kind of changes that are needed, Africa desperately requires additional resources to stabilize and reform its teetering economies, as much as $6 billion for the next 3 years according to one recent report.

Unless we and others face up to this larger issue, we will be regularly confronted with dire emergencies in Africa. The longer term development needs must be addressed. In the past, one of Africa's major sources of concessional financing for development purposes has been the International Development Association [IDA], the soft-loan window of the World Bank. However, even if commitments elsewhere are substantially reduced, IDA cannot increase its activities in Africa during the next 3 years because of a $3 billion reduction in its overall lending program, a reduction forced on IDA by the United States over the objections of every other donor.

To help address the financing gap, the World Bank has created the special facility to push for policy reforms in Africa and has appealed to the world community for $1 billion to support these reform efforts. Regrettably, the United States, which has traditionally been the leading proponent and sustainer of IDA, has not responded to this appeal. As a consequence, some other potential donors have also withheld their support.

The Reagan administration argues that the United States does not need to contribute to the special facility, both because it is increasing its bilateral economic aid programs for Africa and because the administration has its own program to encourage policy reforms there.

In fact, the administration is requesting less bilateral economic aid for Africa next year than was originally requested for the current year. Moreover, if there should be future increases in bilateral aid, they will be at the expense of our reduced commitment to IDA.

As for the administration's program to support policy reform in Africa, the amount of funds involved is far too small to have a significant effect standing alone. If those funds were provided to the World Bank, they would leverage additional funds from other donors. This would result in a larger pool of funds which, when applied in a coordinated fashion, would more effectively promote the necessary economic reforms which are so essential to meaningful development. Furthermore, African governments are more likely to adopt reforms recommended by an international institution that is not perceived as having ulterior political motives.

What is needed, then, is a coherent U.S. response to the long-term problems that Africa faces. As a next step, the gentleman from New York [Mr. LUNDINE] and I believe the United States should respond affirmatively to the World Bank's appeal. That is what our bill does and we hope that our colleagues will join us in taking this next step.

STIFFER PENALTIES FOR MINORITY FRONT COMPANY ACTIVITIES

(Mr. MITCHELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MITCHELL. Mr. Speaker, there has been a great deal of discussion about the so-called front companies forming in an attempt to bilk the Federal moneys that are designed for minority businesses.

I do not think the front company problem is that big, but I do think we need to address it. I think it is being used to smear and discredit some programs.

Therefore, today I am introducing legislation amending the Small Business Act which would increase the penalties from 2 years imprisonment to 5 years imprisonment for each front company, and from $5,000 to $50,000 for everybody who tries to put up a front company.

I hate them. I hate front companies if they attempt to bilk from legitimate minority businesses.

There was a little song out that was popular a couple years ago: "Ebony and Ivory Living Together in Perfect Harmony."

I want them in jail. I want to put them in jail and let them sing that to each other in jail. Ebony and ivory living together in perfect harmony.

Mr. Speaker, there is a serious effort underway to end all Federal funding and support for minority business development. Not only do these efforts include court action, and reductions in Federal funds, but smear and discredit tactics are being focused on front company activities as well. A front company is one which claims to be a minority firm, but the ownership, day-to-day management and operations are controlled by a nonminority person.

As chairman of the House Small Business Committee, I have been made aware of such ineligible front company firms who routinely participate in Government-sponsored progams designed specifically to benefit minority businesses. While I applaud the effort of those who seek to prevent such dishonesty and lack of business integrity, it is apparent that there will always be a few avaricious business persons who will violate or circumvent the law to benefit from the various progams aimed at sustaining minority businesses in this country.

Mr. Speaker, today, I am introducing legislation which seeks to deter offenses of this kind by increasing fines for violation of section 16(a) of the Small Business Act (15 U.S.C. 645) from $5,000 to $50,000 and increasing prison sentences from 2 years to 5 years.

Although the extent to which front company activities pervade Federal programs has been blown out of proportion by critics of affirmative action, I do believe that legislation is warranted to discourage those few who, as a result of their rapacious nature, bring scandal and defamation to otherwise legitimate remedies to past and ongoing discrimination in Federal contracting and subcontracting programs.

Because the perpetrators of these schemes to steal economic opportunities from legitimate minority firms are threatening the very existence of minority and women-owned businesses in this country, both the minority and majority parties involved deserve punishments to suit their felonious crimes. I would like to encourage my colleagues to join me in cosponsoring and working for the enactment of this legislation.

ADDRESS BY BELISARIO BETANCUR, PRESIDENT OF COLOMBIA, TO HOUSE OF REPRESENTATIVES

(Mr. LELAND asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. LELAND. Mr. Speaker, last year I had an opportunity to meet with President Belisario Betancur, President of Colombia. This morning he was here addressing some Members of Congress and other interested parties and he made an incredible speech. I would like to enter this into the RECORD if I can for the purpose of our immediate membership and those who would read the RECORD to learn from this great man.

He is an outstanding leader in the Contadora movement. He is trying to bring peace to the Central American question, and I would hope that, indeed, he is successful.

ADDRESS BY BELISARIO BETANCUR, PRESIDENT OF COLOMBIA, TO HOUSE OF REPRESENTATIVES OF THE UNITED STATES, WASHINGTON, DC, APRIL 3, 1985

THE SUBVERSION OF UNDER DEVELOPMENT IN LATIN AMERICA

I am Belisario Betancur, freely elected, on my fourth attempt, President of a South American country called Colombia, with a territory equal to that of France, the Federal Republic of Germany and Japan combined, and with a population of almost 30 million people, distributed on the Caribbean Coast, the Pacific Coast, the Andean region, and along the Orinoco and Amazon regions. Without exaggeration, I could be taken as an example of a typical Latin American, for I am the second child of a semi-illiterate campesino family of 22 children, born of the same father and mother, 17 of whom died of a grave illness: subdevelopment. Struggling against such conditions, I was the only one in my hamlet who was able to study, sleeping in parks, and doing all kinds of work, from picking coffee beans as a child and working in bars, to writing for newspapers and being a university professor.

1. Our mutual sin

North Americans as well as Latin Americans have to confess and be ashamed of the ugly sin of mutual ignorance, which, most of the time, denotes a lack of interest. The guilt is not unilateral, since if you at times are mistaken in identifying us, I must confess that few people in my country would be able to name the fifty states of the Union or point to them on a map; correspondingly, not even our nearest neighbors know that an hour away from Miami, in our beautiful Caribbean archipelago of San Andres and Providencia, surrounded by Panama, Costa Rica, Nicaragua, Honduras, Jamaica and the Cayman Islands, English is spoken and the predominant religion is Protestant.

2. Returning to forgotten lessons

In Latin America the desire to satisfy our needs, has arrived tumultuously, upsetting the traditional structure, which gives this desire the inappropriate name of subversion: inappropriate because among ourselves very often the subversive agents are not the masses, nor the leaders, but the situations and needs.

As a result, we must repeat lessons that have been forgotten, or were never really learned, one way or another. It is our aspiration that we be given the benefit of a doubt, in regard to our desire for democracy. We prefer liberty; yes, we prefer democracy. We are not fighting with anyone in North America. It is just that people oppressed by misery, grasp at any straw, seek any port in a storm, above all when they cannot find development in liberty. But I have faith that in Latin America, Central America, and the Caribbean we prefer liberty. We prefer peace to war, because our only war is against underdevelopment. We are privileged survivors among the agony of people who, nevertheless, cherish the values of the American Constitution.

3. The Contadora group

But, in spite of our problems, we like to look around and try to help, in a democratic and Christian way, neighbors who need us. Hence the philosophy and action of Contadora is founded in the need to give contemporary and worthy metaphysical answers to the subjective and objective agents that work in every subversive process. For this reason, the Act of Contadora has as its aims:

To ensure the defense and promotion of democracy in the Central American Isthmus through means of free and pluralistic elections of governments and representative institutions, eliminating all interferences in internal matters and all forces destabilizing the governments of the region;

To create opportunities for participation to those not in agreement, so that in a state of reconciliation they become part of the solution to their country's national and international problems;

To give dignified answers to subjective or personal subversive factors, so that there are only free people in our homelands making exile and clandestine operations unnecessary; for it is our conviction that in a democracy all ideologies may exist without fear;

To make subversion impossible because the objective factors that motivate it will be eliminated by creating financial support for a social infrastructure such as hospitals, schools, water supplies, food production, sewerage systems, employment, cheap credit, and fair prices for products;

To seek peaceful solutions to conflicts, giving more importance to dialogue and the rejection of all military intervention, since we are convinced that such intervention would unchain a subversive wave throughout Latin America and the Caribbean;

To achieve, as its consequence, the demilitarization of Central America and the departure of foreign military experts.

In this we coincide with what Indiana Representative Lee H. Hamilton has said: "Military action alone will not resolve the underlying problems of the region and will not neutralize the advances of communism in the long run." [1] And with the Congressman from Arkansas, William Alexander, who says that "What is important is not who has the most powerful weapons, but who has the most valid political ideals, and who has the politics that offer the best response to the elemental prayers of Central Americans, more often motivated by Christianism than by Communism." [2]

All of which has as its basis that we recognize realistically, that peace in Central America requires that the countries interested in the region adhere to these principles. Because true peace is one and indissoluble, and war in any region affects it in the whole world. For that reason, Colombia likewise seeks agreement with internal armed groups, and also has encouraged agreement among opposing factions in other countries: we are proud that we are seen as a moral force rather than a military power. Thus we better serve democracy and humanity. Because definitely, we are citizens of the world, citizens of the cosmos as Carl Sagan would say.

I must not ignore the Report of the Bipartite Commission on Central America: we are attentive to its recommendations, even

[1] Lee H. Hamilton, "Covert Action Is Not in Our National Interest," the Washington Post, May, 184
[2] William Alexander, "Schizoid Latin Policy," the New York Times, July, 2183.

though we are not in complete agreement with the Manichean philosophy of supporting only the social infrastructure of those who behave themselves. This treatment of the crisis reminds us of the obsolete Renaissance debate over which came first, the chicken or the egg. We hope that the recommendations of the Commission will lead to peace.

4. Drugs as a destructive force

Permit me to touch on a painful theme. Drugs are a two-way tragedy: they weaken our two countries and destroy values that are the foundation of our moral and physical patrimony.

We are all daily victims of this plague.

Our two governments give no quarter in the struggle against drugs. Colombia has done it, and will continue to do it relentlessly, even if with material and logistic limitations. We have reached a point of no return, because we wish to be on the side of human dignity. We wish to look more at history than at our human condition. And we are disposed to pay the price, even of our own lives, which would be a small sacrifice to free humanity from this scourge.

But we do not wish to feel alone in this struggle, in which you, too, take part: For here is the greatest center of drug consumption. The tremendous wealth proceeding from drugs, is deposited here. North American banks launder fantastic sums of money and are barely punished. Many of the great North American drug traffickers live here. According to the Washington Post, "The Colombians are making a mighty effort, one extending far beyond the American preoccupation with law-enforcement (necessary as that is) and one costing them far more in basic social stability than the American drug problem (terrible as it is) costs the United States." And it is true: we continue to fumigate crops, destroy laboratories, seize shipments, jail criminals, and extradite nationals, for whom, notwithstanding, we request dignified treatment, at the same time that we insist on the extradition of North Americans who commit the same transnational crimes.

5. Six proposals

In sum, I have the honor of submitting to you, Honorable Congressmen, the following proposals:

I. To establish an Alliance for Peace, Development and Democracy between the United States and Latin America;

II. In the case of Central America, support the Act of Contadora and the commitments inherent in it for all the countries that have an interest in the area; support plans to generate employment and construction for the physical and social infrastructure that the region requires, using the Interamerican Development Bank as the technical secretaryship and coordinating entity of the Advisory Group for the region, according to the general plan of the Kissinger Report;

III. Perfect the International Coffee Agreement, as a program of cooperation;

IV. Seek a better adjustment between fiscal politics and monetary politics of the United States and other industrialized countries, which is reflected in lower interest rates for the developing countries; and to facilitate the exports of these countries, eliminating protectionist barriers;

V. Strengthen multilateral credit organizations: without long-term credit directed to well-structured projects, it will not be possible to stimulate the growth of developing countries.

VI. Intensify the battle against drugs declared, by the United Nations, a crime against mankind: eradicate drug-producing crops in Latin America and in the United States, destroy drug processing laboratories, dismantle the international organization that controls drugs, strengthen the educational campaigns against their use, institute more severe punishments for drug users, and provide stimuli for the substitution of other crops;

7. A driving force

The opportunity to converse with the representatives of this great democracy, could not pass without a new appeal to the spirit that has endured throughout the history of this nation: the same spirit that once permitted Jefferson to say that "every man, and every group of men on earth, possesses the right to self-government."

These groups of men and all humanity, will be more secure if we give them peace; if we give them dignity, if we give them courage. We wish to give them that courage, that dignity and that peace. We would feel very well accompanied if you—free citizens of this free and great nation—persist in that courage which has illuminated its great men since the time of Washington and that has been the glory of your people.

I wished to come to you to speak frankly, as a friend: no euphemism can you expect, for that reason, from the President of Colombia. Our Liberator, Simon Bolivar, used to say that the good friend of he who governs is he who speaks the truth.

Permit me, in the manner of Niels Bohr, one of the fathers of contemporary physics, to close this unforgettable encounter with his words: "Every phrase that I utter should be considered not as an affirmation, but as a question." [3]

That is what we are: leaders who seek the ways of liberty to bring our people happiness through progress and justice. It says in the Bible: "And the Lord appeared to Solomon in a dream by night saying: Ask what thou wilt that I should give thee. And Solomon said: Give to thy servant an understanding heart, to judge thy people and discern between good and evil. And it was pleasing to the Lord that Solomon had asked such a thing. And the Lord said to Solomon: Because thou hast asked this thing, and hast not asked for thyself long life or riches, nor the lives of thy enemies, but hast asked for thyself wisdom to discern judgment, behold I have done for thee according to thy words, and have given thee a wise and understanding heart, insomuch that there hath been no one like thee before thee, nor shall arise after thee." (I Kings 3:5-13).

With a wise and just heart, we should feel the moral duty to offer responses through democracy and liberty, to the anguished questions of America and the world.

ROBERT M. BOR, CHIEF COUNSEL OF THE COMMITTEE ON AGRICULTURE

(Mr. DE LA GARZA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DE LA GARZA. Mr. Speaker, I want to pay tribute today to one of the finest public servants who has ever helped this House do the job the people sent us here to accomplish.

Just a few weeks ago, at the end of February, the Agriculture Committee's chief counsel, Robert M. Bor, retired from the committee to enter the private practice of law. I do not know of any member of any congressional staff who has a finer record.

Bob Bor's contributions to the Agriculture Committee would take more time to list than the 1-minute rule of the House would allow. But I know that every member who served on the committee in the years since he came to us from the Department of Agriculture in 1975 will agree that Bob's knowledge of legislation and agricultural programs made a tremendous contribution to the work of the committee.

We needed a counsel who could put our decisions into effective legal form. Bob did that for us, and more. He worked with our members and the staff to make sure that what we wanted to do was done well. His reports gave us the ammunition we needed for effective management of legislation in the House. His experience both in agricultural programs and in the working of the House gave us the backup that made our committee both stronger and better respected. And one thing more—Bob Bor has been one of the hardest working men most of us have ever known. When there was a job to do, he was there until it was done and done well.

I know that Members of Congress are not the only people who are grateful for the work Bob Bor did on the Hill. Many members of the broad agricultural community who have worked with him through the years on legislative and other problems have reason to admire his skill and to be grateful for his dedication.

Beyond all this, those of us who worked with Bob through these past years have come to know him as a man you can trust and depend on. I do not know whether there is any higher tribute you can pay a friend than to say that about—and I know we all say it about Bob.

Bob is a native of New York, a graduate of New York University and Columbia University Law School, an Army veteran of World War II, and a man who is lucky in his family of Judy, his wife, his sons and daughter, and his grandson, the television actor.

Before joining the Agriculture Committee staff in 1975, Bob served for many years at the Department of Agriculture. In the USDA's general counsel's office, he became an expert and experienced hand at matters dealing mainly with foreign agricultural affairs and domestic commodity programs.

There are many reasons we will miss Bob at the Agriculture Committee. We will miss his wise counsel. We will miss his calm and his command of the com-

[3] Cited by Jacob Bronowsky, El Ascenso del Hombre, Fondo Educativo Interamericano, Bogota 1979.

plex affairs we deal with. We will miss his ability to work with men and women from every field and from many countries. Most of all, we will miss his companionship and his friendship.

If there is a saving grace to Bob's departure, it is the fact that we know he will still be active in the field of agriculture. I and other members of the Agriculture Committee, and the staff people who worked with him, wish Bob well in his new career in the private practice of law. I know it will be a successful career—because I know Bob Bor.

INTRODUCING H.R. 1916, TO ADDRESS THE SOCIAL SECURITY NOTCH

(Mr. SMITH of New Jersey asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of New Jersey. Mr. Speaker, yesterday I introduced legislation which addresses the Social Security benefit disparity commonly referred to as the "notch." The bill is appropriately designated as H.R. 1916.

I am sure the Members of this body are fully aware of the gross inequities in benefit payments which have resulted from the benefit formula change signed into law in 1977 by former President Carter. That piece of legislation, the 1977 Social Security Financing Amendments, was intended to prevent what was then a benefit overcompensation problem. Instead, however, the so-called solution has a completely unfair and penalizing effect between benefits paid to individuals who have similar work records but were born only 1 year, 1 month, in some cases just 1 day apart.

Mr. Speaker, I am sure that, like me, many of my colleagues have been concerned about the notch problem since its inequities became clearly evident early in 1982; 1982 was the year that those who were born in 1917 and worked until age 65 were able to take their long-awaited retirement and began receiving their Social Security benefits. They were looking forward to a rewarding and worry-free retirement.

This is not the case, however. As these newly retired citizens began to receive their benefits, they learned that regardless of their work records, their benefits would be calculated under a different formula than those who were born a year before them. Hence their benefits are now substantially lower even though they may have retired only a year later.

Mr. Speaker, had the 1977 formula been designed in a fashion enabling retirees born after 1916 to receive benefits which were more consistent with those of their older coworkers, we would not need to address this issue once again. It is also an issue which could have been addressed during the 98th Congress. In the last Congress, 126 Members of the House of Representatives had sponsored various bills which were authored to address the notch. Yet still, the problem persists and the victims cry out for relief.

It is not easy, Mr. Speaker, to explain to an individual who has worked hard all his or her life why an older neighbor, perhaps with a similar or even less impressive work record, should receive up to $100 or more in Social Security benefits per month. And $100 per month equals $1,200 per year, a considerable amount of money considering that most of these people are dependent on fixed pension incomes. It is not right for us to ask the younger person, simply due to his or her date of birth, to accept the tremendous benefit disparity. It is not fair for us, as a nation proud of its quest for equality, to allow this inequity to continue.

Mr. Speaker, as responsible leaders, elected to represent the interests of our constituents and to promote their welfare, we must commit ourselves to further investigating this benefit disparity and acting to bring justice to those who have become victims of the notch.

Mr. Speaker, I have been corresponding regularly during the past 2 years with nearly 2,000 residents of the Fourth Congressional District of New Jersey who are affected by the notch. These Americans were children during the Great Depression and heroes of the World War II era. They have contributed so much to the success of our Nation. Must they endure yet another hardship brought upon them by their own leaders? Their effort, their dedication, and their work for this Nation is embedded in our universal recognition as a world leader. We cannot shadow their contributions now. We cannot ignore this inequity.

The bill I introduced yesterday, H.R. 1916, outlines steps for developing recommendations to remedy the disparity in the computation of Social Security benefits awarded persons born after 1916. I urge my colleagues to support this bill as a way to alleviate the notch problem and insure that all our senior citizens are fairly compensated for their lifetime contributions to our great country.

AID TO CENTRAL AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. IRELAND] is recognized for 5 minutes.

Mr. IRELAND. Mr. Speaker, I rise this evening to begin a discussion with my colleagues in the House which will continue over the next several weeks. Mr. Speaker, following the Easter recess we will consider assistance to our neighbors in Central America.

My remarks here will be short but I ask that my complete statement on aid to Central America be printed in its entirety.

Mr. Speaker, I believe we must view aid to Central America on the basis of an assumption fundamental to our democratic society: There is no ideology more foreign to this hemisphere than that of the Communist state.

In Nicaragua today we very clearly have a Soviet-Cuban backed Marxist-Leninist regime. We have evidence of a military buildup in Nicaragua unprecedented in any other Central American nation. Refugees are fleeing by the thousands and the elections which were held were a sham.

The promises of the revolution of 1979 for a pluralistic society—a nonaligned foreign policy—and elections have been denied. What the Sandinistas have done in Nicaragua is a tragedy, and their behavior toward others, their neighbors, is no better.

We, the Members of the U.S. Congress, must come to grips with the reality of the situation—Nicaragua poses a direct threat to the security of our Nation. To fail at this time to provide the necessary aid will surely bring chaos and instability to the entire region and seriously diminish the ability of the United States to influence events in our own hemisphere and the world.

The regime in Managua is lying to us just like it lied to the OAS despite that organization's willingness, in an unprecedented move prior to the overthrow of the Somoza dictatorship in July 1979, to recognize the coalition fighting against the government.

The United States has persistently raised four points with the Sandinistas in its bilateral talks at Manzanillo. These are the same points which lie at the heart of the multilateral Contadora negotiations.

First, we want Nicaragua to cease its support for insurgencies in other countries.

Second, we want the national directorate to adhere to the principles of the OAS Charter, and to honor the promises made in 1979 in return for OAS recognition of it as a transitional government.

Third, we want Nicaragua to reduce the size of its military to parity with that of its neighbors, and to refrain altogether from obtaining or seeking advanced military technology. The economies of Central America cannot afford an arms race. Nor can the democracies of Central America thrive in the face of a military threat from a state located in the heart of their region.

Finally, we want to see a reduction in Nicaraguan dependence on the Soviets, the Cubans, and clients like the

PLO or Libya. Neither the United States nor any other nation in the hemisphere can tolerate another Soviet military outpost. One Cuba in the Caribbean is more than enough.

I ask my colleagues to think about these facts. Nicaragua has not lived up to its commitments to the OAS nor does it plan to honor the four conditions discussed with the United States and the Contadora group which I have just mentioned.

In fact, we know its expansive military policies are continuing as are its close ties with the Soviet Union and Cuba. It is providing material, financial, and political support to insurgents in El Salvador, Honduras, Costa Rica, and Guatemala.

At the same time, we are being asked by the Managua regime to believe their propaganda that the freedom fighters are really nothing more than henchmen of former President Somoza. We are being asked to shape U.S. foreign policy on the basis of information supplied by the Sandinistas who have not lived up to one of their commitments since overthrowing the previous regime.

The facts clearly demonstrate that nearly all the so-called Contra leaders were actually staunch opponents of Somoza. Many fought against Somoza and contributed to his defeat.

What has really happened to them is that they became discouraged and disillusioned when they saw that the democratic revolution—for which they had sacrificed so much—was being transformed into a Marxist-Leninist dictatorship.

The key to U.S. policy in Central America is to create conditions under which Nicaragua becomes a peaceful and democratic member of the Central American community.

Our overall goals are to: Support economic development; promote the security of threatened nations; encourage negotiations among the countries of the region that will serve the interests of the democratic process; support democratic governments where they exist; and help countries in the process of becoming democracies.

We cannot expect to meet these goals if Nicaragua continues in the stranglehold of communism. We cannot expect Nicaragua to stand independently and free if we do not help to create a climate which promotes a pluralistic society, allowing alternative points of view and democratic institutions.

If we do nothing, or if we insist upon doing very little, then we can be guaranteed of failure. But if we choose instead to review the facts—to take an honest look at the situation—then we can provide a measure of hope to those that ask for our assistance and seek the freedom of a democratic society.

Mr. Speaker, I ask that the full text of my remarks be printed in the RECORD.

STATEMENT OF THE HON. ANDY IRELAND REGARDING AID TO CENTRAL AMERICA

In 1947, President Harry Truman said that it should be American policy to support free peoples who are resisting attempted subjugation by armed minorities or by outside pressures. It is exactly this principle that is being tested today in Central America, for there is no ideology more foreign to this hemisphere than that of the communist state.

In light of this fundamental assumption, I contend that a negative vote on assistance to the Nicaraguan freedom fighters will send a message to the Sandinista regime and its Soviet and Cuban backers that we accept the consolidation of a Marxist-Leninist regime in Nicaragua and we are unconcerned with the threat that it poses to our other Central American neighbors and to the security of the United States.

I do firmly believe that it is the security of the United States that we are talking about here. As such, each and everyone of you must review the facts, listen to reason, and strike a blow for freedom that will be heard around the world, by approving assistance to those fighting for freedom and democracy in Central America.

Let's review some of the facts for a moment.

The National Bipartisan Commission on Central America, the so-called Kissinger Commission, warned us early last year, in reporting its conclusions, that the crisis in Central America is acute. It requires our immediate attention. We do have a fundamental interest in the Central American region—interests which are now seriously threatened by the Soviet-Cuban successes in Nicaragua. If we do not respond positively and quickly, we will find ourselves compelled to commit to substantial increases in economic and military assistance in order to protect our vital security interests in the region.

In addition, further increases in Soviet influence in our Hemisphere will not only require greater commitment of our resources, but will threaten our shipping lanes in the region, result in increased violence in the area, and perhaps, most importantly, erode our power to influence events worldwide. We will be perceived as being unable and/or unwilling to influence events in our own sphere.

We are currently the target of a specious public relations campaign by the Sandinista regime intended to shape U.S. foreign policy in the region and to discredit the freedom fighters.

The Sandinistas call them "counter-revolutionaries". They denounce the leaders of the armed anti-Sandinista organizations as henchmen of former President Somoza. But, the facts clearly demonstrate that nearly all the so-called "contra" leaders were actually staunch opponents of Somoza. Many fought against Somoza and contributed to his defeat. What really happened to them is that they became disillusioned when they saw that the democratic revolution—for which they had sacrificed so much—was being transformed by the Sandinistas into a Marxist-Leninist dictatorship.

For too long, the debate over whether or not we provide assistance to our friends in Central America has been cluttered with these kinds of lies and disinformation, sent to us compliments of the Sandinista regime in Managua. They have lied to the OAS and they are now lying to us.

Let me cite just a few examples:

In June, 1979, the Organization of American States [OAS], in an unprecedented move, recognized the coalition fighting against the repressive dictatorship of Anastasio Somoza. The most pervasive argument for this move was the coalition's promises to establish a pluralistic society with a mixed economy, to hold early elections, and to pursue a nonaligned foreign policy.

In July, 1979, the coalition which represented every major sector of Nicaraguan society—including organized labor, private business, and the Catholic Church—overthrew the Somoza dictatorship. Many Nicaraguans and supporters of the revolution in other countries had high hopes that the new government would improve the lives of all the country's citizens.

The Sandinista government, heir of the coalition, has violated these promises made to the OAS and to the Nicaraguan people because of the policies of the National Directorate of the Sandinista National Liberation Front [FSLN]. The FSLN's nine Marxist-Leninist revolutionary leaders, declaring themselves the "vanguard of the revolution", have imposed their programs on the government and the people of Nicaragua.

To consolidate their power, the Sandinistas, with Soviet and Cuban help, have established a pervasive security apparatus and auxiliary organizations. The resulting repression has caused tens of thousands of Nicaraguans to flee their homeland. This level of emigration is clear evidence that the "pluralistic society" promised by the revolution does not exist.

The Sandinista military build-up has exceeded all legitimate defensive needs. Since 1979, the army has swollen from about 6,000 to 119,000 with 62,000 of those on active duty.

In addition, the Sandinistas have amassed a total of 150 tanks and 200 armored vehicles. They have also received 13 helicopters, including at least five MI-24 gunships, the top of the line Soviet assault helicopter. These aircraft give the Sandinistas the ability to strike targets deep in Costa Rica and Honduras.

This Soviet supported surge in Sandinista military expansion, along with Nicaragua's continued support of Marxist-Leninist guerrillas operating in neighboring countries, has thoroughly disrupted the balance of power in Central America and violates its commitment to the OAS to pursue a nonaligned foreign policy.

In addition, the November 4, 1984 elections in Nicaragua were seriously flawed and did not confer legitimacy upon the Sandinista regime. The Sandinistas refused to grant the minimal conditions for the democratic parties to participate and thus faced only token opposition on election. Again, these actions are counter to the promises made to the OAS.

The United States has persistently raised four points with the Sandinistas in its bilateral talks at Manzanillo. These are the same points which lie at the heart of the multilateral Contadora negotiations.

First, we want Nicaragua to cease it support for insurgencies in other countries.

Second, we want the National Directorate to adhere to the principles of the OAS Charter, and to honor the promises made in 1979 in return for OAS recognition as a transitional government.

Third, we want Nicaragua to reduce the size of its military to parity with that of its

neighbors, and to refrain altogether from obtaining or seeking advanced military technology. The economies of Central America cannot afford an arms race spurred by Nicaragua's bid for supremacy. The democracies of Central America cannot thrive in the face of a military threat from a state located in the heart of their region.

Finally, we want to see a reduction in Nicaraguan dependence on the Soviets, the Cubans, and clients like the PLO or Libya. Neither this nation nor any other nation in the hemisphere can tolerate another Soviet military outpost. One Cuba in the Caribbean is more than enough.

I ask my colleagues to think about these facts. Nicaragua has not lived up to its commitments to the OAS nor does it plan to honor the four conditions discussed with the United States and the Contadora group which I have just mentioned. In fact, we know its expansive military policies are continuing as are its close ties with the Soviet Union and Cuba. It is providing material, financial, and political support to insurgents in El Salvador, Honduras, Costa Rica, and Guatemala. This support takes the form of arms, ammunition, communications, coordination, logistics, training, propaganda, medical assistance and advice.

Why or how, then, can we be expected to believe the current propaganda campaign intended to discredit the freedom fighters?

Can the Sandinistas possibly have any credibility left after repeatedly violating their agreement with the OAS and their own people?

The key to U.S. policy in Central America is to create conditions under which Nicaragua becomes a peaceful and democratic member of the Central American community.

Our overall goals are to: Support economic development; promote the security of threatened nations; encourage negotiations among the countries of the region that will serve the interests of the democratic process; support democratic governments where they exist; and help countries in the process of becoming democracies.

We cannot expect to meet these goals if Nicaragua continues in the stranglehold of communism. We cannot expect Nicaragua to stand independently and free if we do not help to create a climate which promotes a pluralistic society, allowing alternative points of view and democratic institutions.

What the Sandinistas have done in Nicaragua is a tragedy, and their behavior toward others, their neighbors, is no better. We must come to grips with the reality of the situation—doing anything less shortchanges our responsibilities as a leader of the free world.

If we do nothing, or if we insist upon doing very little, then we can be guaranteed of failure. But if we choose instead to review the facts—to take an honest look at the situation—then we can provide a measure of hope to those that ask for our assistance and seek the freedom of a democratic society.

It is in this spirit that we seek the views of the American people in an open public discussion of the issues. It will provide an opportunity to review our present policy and address the concerns of citizens as expressed by those living in the State of Florida.

Next week in my district I plan to meet with my constituents and present them with the facts of the case on the Sandinista regime in Nicaragua. It is my contention that given the correct information, the American people will opt for assistance to Central America so that we can continue to ensure that our Hemisphere does not become dominated by the likes of the Soviet-Cuban alliance we see today in Nicaragua.

The SPEAKER pro tempore. The time of the gentleman from Florida [Mr. IRELAND] has expired.

Mr. IRELAND. Mr. Speaker, I ask for an additional 1 minute.

The SPEAKER pro tempore. The Chair will advise the gentleman that he cannot request additional time under a 5-minute special order.

The gentleman's time has expired.

□ 2030

INTRODUCTION OF THE 1985 FARM BILL ALTERNATIVE, H.R. 1965

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri [Mr. EMERSON] is recognized for 5 minutes.

Mr. EMERSON. Mr. Speaker, I have today introduced a bill adopted by the American Farm Bureau Federation representing in its membership a large number of farmers and ranchers throughout the United States. H.R. 1965 is obviously the product of a substantial amount of work, no doubt certain compromises, and represents a reasonable, pragmatic proposal that deserves the strong consideration of those in Congress and the administration who will participate in constructing a 1985 Farm Act that will be put in place for at least the next 4 years. It is an alternative 1985 farm bill proposal that I commend to all Members for their perusal and their active support—where possible.

Agriculture and its related industries are today in the midst of a very critical time. Many of our farmers are facing tremendous difficulties. Alarming numbers of them are caught between heavy indebtedness and low prices, and virtually all are suffering from an inadequate return on the substantial investments they've made in order to produce food and fiber for us, and for a major part of the world's population.

That production, Mr. Speaker, must continue—but it must continue in a way that allows real profitability to return to the family farm. In that regard, I think we have reached a consensus—both here in Washington and out in farm country—that our present Federal farm programs are not moving us in that direction.

In short, we are approaching this year's rewrite of farm bill with a growing awareness that what we have now isn't working. After 50 years of direct Federal invovlement in the agriculture economy, those commodities that have received the most help remain, in some respects, today the ones with the worst marketing and income problems. And from that realization, the farm community and its Representatives in Congress have largely come to agree that change is needed.

To that end, I believe that the 1985 farm bill must allow our farmers to eventually move closer to the marketplace, while at the same time providing needed protection against the highly unfavorable market conditions that exist today and will not go away tomorrow.

Thus far, the only blueprint for this change we have seen is the administration's proposed farm bill. While the goal of this proposal is perhaps a good one, I think its timetable is too ambitious. Allowing our farmers and ranchers to work their way back to solid ground will take time, and the farm bill we enact must allow that time, and provide a bridge to that farm economy in the future that can be more self-reliant.

Likewise, if our farmers and ranchers are to move closer to the market, we have a great deal of work to do in order to make those markets ones in which they can compete fairly and profitably. The key to that, of course, lies in our farm exports, and our farm bill must contain substantive provisions for promoting these exports.

Again, the administration's farm bill proposal contains such provisions, but probably does not do enough in terms of export promotion.

A few weeks ago, the American Farm Bureau Federation, the Nation's largest general farm organization, unveiled a carefully worked out alternative to both our existing farm programs, and the administration's proposal. In terms of laying a path for positive change in Federal farm programs, while protecting our farmers against the consequences of moving too quickly, I believe this proposed farm bill represents a reasonable, realistic option that deserves our most serious consideration. It is for that reason that I am introducing this proposal, and in doing so, laying it on the table to serve as a good starting point from which we can develop the best possible farm bill.

In addition to maintaining reasonable price and income safeguards for our producers, this proposal reflects the strong emphasis on increased exports and soil conservation that I believe must be included in the farm bill. Among the export provisions is a commodity bonus feature in which portions of commodities in CCC storage would be offered as a bonus to those who buy our products on the world market.

Likewise, the bill includes a 7- to 15-year conservation reserve program aimed at converting erosion-prone land now in crop production to less intensive uses. This, along with a provision linking eligibility for farm program benefits with nonproduction on

fragile lands, will go a long way toward addressing our critical soil loss problem.

Mr. Speaker, this legislation, like any other existing proposal, is not perfect. Individual provisions will not be satisfactory to everyone—and it does not represent a cure-all for the problems of the farm economy. In fact, I think it is important to point out that the things that will help agriculture the most—lower deficits, fair trade, and a stable world economy—are not things we can provide in a farm bill. Yet, we must have a solid, realistic framework for our Federal farm programs if our farmers are to weather the present storm, and I believe that this proposal is an excellent place to start.

I and those who are cosponsoring this bill reserve the right to differ on specific points contained herein, and to refine our positions if circumstances so warrant as the general policies incorporated in this bill are translated into legislation that will be signed into law.

Mr. Speaker, I include at this point in the RECORD, as prepared by representatives of the American Farm Bureau Federation: First, a summary of the major provisions of the bill; second, a chart providing preliminary forecasts for target prices, loan rates, and so forth; and third, a series of questions and answers relating to the bill:

FARM BUREAU'S FARM BILL—1985: SUMMARY OF MAJOR PROVISIONS

(As adopted by the AFBF Board of Directors, March 4-5)

I. AGRICULTURAL EXPORT EXPANSION AND PUBLIC LAW 480

Provides for an export commodity bonus program to offset the use of export subsidies by competing countries and the U.S. trade disadvantages being experienced because of currency exchange relationships. This provision would help regain foreign markets and reduce CCC and farmer-owned reserve stocks. The provisions of the cargo preference laws shall not apply to this program.

The Export Credit Revolving Fund would be activated and extended through 1989. Export sales financed or guaranteed under any CCC export credit program would be exempted from cargo preference laws.

Use of the intermediate credit program authorized under section 4 of the Food for Peace Act of 1966 is mandated.

The special standby export subsidy program is exempted from cargo preference laws.

To provide additional export outlets while helping meet the food needs of developing countries, the minimum tonnage to be shipped under titles I, II and III of PL 480 shall be 10 million tons (up from current levels of about 8 million tons). All PL 480 shipments would be exempted from cargo preference laws.

II. DAIRY

Milk shall be supported at such level equal to 90 percent of the simple average "all milk" price received by farmers for each of the preceding three years. This price level shall be automatically revised effective October 1 of each of the years 1985 through 1989 except in the case of 1985 the price level revision shall occur on the first day of the month following enactment of the Agriculture Act of 1985. If the Secretary estimates that net government price support purchases of milk or the products of milk will be less than 5 billion pounds or in excess of 5.99 billion pounds he shall adjust the support price as determined in this subsection according to the following scale:

Net Government purchases	Percent of support price	Projected adjusted support price (as of 3/85)
Less than 3	104	12.46
3 to 3.99	103	12.34
4 to 4.99	102	12.22
5 to 5.99	100	11.98
6 to 6.99	98	11.74
7 to 7.99	96	11.50
More than 8 [1]		

[1] If CCC purchases are projected to exceed 7.99 billion pounds milk equivalent during the next 12 months, the Secretary is given discretionary authority to adjust the support price by not more than 3 percent on April 1, 1986, and for any subsequent 6-month period.

III. LOAN LEVELS

For wheat, feed grains, and rice:

The Secretary shall make available to producers nonrecourse loans and purchases for each of the 1986 through 1989 crops at a level equal to 75 percent of the simple average domestic price received by farmers for each of the preceding five marketing years, excluding the high and low valued years; provided that the level of loans and purchases shall not be adjusted by more than 10 percent in any year, including the first year of such program.

For cotton (extend current loan formula):

The Secretary shall make available to producers nonrecourse loans and purchases for each of the 1986 through 1989 crops at the lower of:

(a) 85 percent of the average price (weighed by market and month) of such quality of cotton quoted in the designated U.S. spot markets during three years of the five year period ending July, excluding the high and low valued years, or;

(b) 90 percent of the average announced of comparable cotton prices quoted C.I.F. Northern Europe for comparable U.S. cotton.

The current minimum loan level of 55 cents per pound is eliminated.

IV. TARGET PRICES/DEFICIENCY PAYMENTS FOR WHEAT, FEED GRAINS, COTTON, AND RICE

The target price in 1986 will be frozen at 1985 levels. Beginning in 1987, the target price shall be set at a level equal to 110 percent of the same average market prices used to determine the loan rates for the commodities but shall not be adjusted by more than 5 percent annually including 1987. Deficiency payments will be computed as under current law.

V. ACREAGE REDUCTION REQUIREMENT

When total carryover of wheat or feed grains exceeds four percent of annual world utilization, or when cotton carryover exceeds 3.5 million bales, or when the total supply of rice exceeds the normal supply by fifteen percent, the Secretary of Agriculture shall implement a voluntary acreage reduction program. Authority for acreage reduction and paid diversion programs shall be continued through the 1989 crop year.

VI. ADVANCE DIVERSION PAYMENTS

If the Secretary of Agriculture makes land diversion payments as provided for in the Agriculture Act of 1985 to assist in adjusting the acreage of the 1986, 1987, 1988, or 1989 crop of wheat, feed grains, cotton or rice, at least 50 percent of such a land diversion payment shall be made available to a producer as soon as possible after the producer agrees to undertake the diversion of land in return for the payment.

VII. SOYBEANS

The current loan formula is retained for soybeans with no additional authority for acreage reduction or deficiency payments.

VIII. SUGAR

The Secretary shall support the price of domestically grown sugarcane through nonrecourse loans at appropriate levels but not less than 18 cents per pound for the 1986 through 1989 crops of sugar. Sugar beet loan levels shall be set at levels that are fair and reasonable in relation to the level of loans for sugarcane.

IX. WOOL AND MOHAIR

Wool and mohair titles will remain substantially the same as under the 1981 Act.

X. PEANUTS

The peanut program would be continued at current support price levels.

The peanut quota will be established at the level of the previous three years average of domestic edible and seed use with annual modifications made by the Secretary not to exceed 5 percent.

Future changes in quota loan levels would be modified only to reflect the percentage change in the prices paid index of the previous two years.

XI. FARMER-OWNED RESERVE

The farmer-owned grain reserve will be terminated and replaced by loans to wheat and feed grain producers to be made available without interest for a nine month period. A nine month extension will be made available which will include a charge for interest.

XII. PAYMENT LIMITATIONS FOR DEFICIENCY PAYMENTS

The total amount of deficiency payments (excluding disaster payments) that a person shall be entitled to receive under one or more of the annual programs established under this act for wheat, feed grains upland cotton, and rice shall be limited to $50,000 for each of the 1986 through 1989 crop years. The term "payments" as used in this section shall not include loans or purchases or any part of any payment that is determined by the Secretary of Agriculture to represent compensation for resource adjustment or public access for recreation.

XIII. CONSERVATION RESERVE AND SODBUSTER

The Secretary of Agriculture must provide for a conservation reserve program for owners and operators of erosion-prone land to assist them in conserving soil consistent with budgetary limitations. Contracts of seven to fifteen years would be offered under which producers would convert erosion-prone cropland to less intensive uses such as pasture, permanent grass, legumes or trees.

Any producer who brings fragile land into production shall be ineligible for any farm programs benefits on any crop in his entire farming operation.

The following chart illustrates changes in target prices, loan rates and deficiency payments for wheat; feedgrain, cotton and rice

under the proposed Farm Bureau Farm Bill. These run only through 1987 since certain variables make projection beyond that point difficult.

THESE FIGURES ARE PRELIMINARY FORECAST ESTIMATES AND ARE SUBJECT TO CHANGE BASED UPON FURTHER ANALYSIS

	1985	1986	1987
Wheat:			
Target	4.38	4.38	4.16
Loan	3.30	2.97	2.67
Maximum deficiency payment	1.08	1.41	1.49
Feed grains (example corn):			
Target	3.03	3.03	2.93
Loan	2.55	2.30	2.07
Maximum deficiency payment	.48	.73	.86
Cotton per lb:			
Target	.81	.81	.77
Loan	N/A	N/A	N/A
Maximum deficiency payment	N/A	N/A	N/A
Rice cwt:			
Target	11.90	11.90	11.31
Loan	8.00	7.20	6.48
Maximum deficiency payment	3.90	4.70	4.83

Preliminary forecast estimates show the cost of the four year Farm Bureau Farm Bill at about $27.1 billion, or an average of about $6.8 billion per year.

THE FARM BUREAU FARM BILL—MOST ASKED QUESTIONS

(Farm Bureau has been involved in a year-long study of issues involved in the 1985 farm bill that Congress will have to consider this session and has proposed legislation that will improve farm earning opportunities.

(Here are some of the most frequently asked questions about the proposed 1985 Farm Bill. All bear heavily on the keys to the right type of a farm program, market orientation, trade compatibility, income protection and fiscal responsibility.)

Won't the Farm Bureau farm program mean lower farm prices?

Farm prices move up and down over time. The purpose of the down side of any market is to expand consumption and reduce the incentives of competitors to produce products that are in excess supply.

Many farmers are not satisfied with the commodity prices they received after the 1983 PIK program and the drought. These major events clearly illustrate that it is beyond the ability of government to force commodity prices up and keep them up without laying the foundation for more inflation, higher taxes, higher farm input costs, interest rates, debt and further farm consolidations.

While lawmakers were trying to push prices up for major crops, the livestock industry was forced to make major adjustments without government help.

Will the Farm Bureau farm program mean fewer farmers?

The Farm Bureau plan is not skewed toward more or fewer farms. Farm programs in place since the 1930's have not stopped the decline in the number of farms and farmers. Changes in the number and size of farms will continue to be influenced by technological advances and economic efficiency. This will benefit commercial agriculture and consumers.

Is the Farm Bureau farm bill the "free market" alternative?

No. A "free market" alternative would eliminate all direct income and price subsidies and all indirect subsidies for production and marketing research, disease and pest control. Farm Bureau's proposal *does not* eliminate all government price intervention and involvement in farming and ranching.

Farm Bureau supports a continuation of present farm programs but with modifications to regain market share, eliminate excess inventories, reduce taxpayer costs and improve economic balance among crops and between crops and livestock.

This bill simply relates government price supports more to the market, less to political actions which have actually intensified many current farm difficulties.

How will the Farm Bureau farm bill help overall farm income?

If farm programs are more related to markets and less dependent on political decisions, U.S. farmers will stop losing market shares and income opportunities to foreign producers. The policy supports economic growth for agriculture and increased opportunities for income.

Marginal farm acreages in Europe, Canada, Australia, Argentina and the United States will be reduced. Only then can U.S. producers regain their competitive position.

Will there be cost savings?

This bill calls for reduced farm program spending. This approach gives farmers more credibility in calling for spending reductions in other entitlement programs.

The most important benefit for individual farmers in the longer term will be to bring interest rates down. Farm costs will be under less inflationary pressure and the overall economy will be on a better foundation for longer term growth, more trade and increased farm exports.

Why doesn't this proposed legislation support mandatory production controls to raise farm prices?

Farm prices ultimately reflect the interaction of supply and demand around the world, not just supply in the United States. Whenever the U.S. mandated production controls while trying to sustain politically favorable but unrealistic farm prices, production increased in foreign countries. Our markets were lost when acreage reduction programs were instituted in the U.S. When markets are lost they are difficult to regain.

Mandatory production controls have not worked in the past. Both production and marketing opportunities have been lost for commodities where this approach has been used.

Mandatory controls in the U.S. would signal foreign producers to expand production and sales of food and fiber while U.S. farmers reduce output and carry stocks and U.S. taxpayers pick up the costs of much of the world's farm programs. U.S. farmers would be restricted to producing for only the domestic market.

Mandatory controls would mean production allotments and/or marketing quotas. Ultimately, government would decide farming opportunities. Producers would lose the opportunity to produce. Producers would likely lose one-third or more of the present crop acreage of feedgrains, wheat, soybeans, cotton and rice.

Where is the income opportunity for U.S. farmers in the world market?

World demand for food and fiber will increase in the years ahead but not at the artifically high rates of growth experienced during the 1970's. Increased population and higher incomes in "middle income" countries present income opportunities for U.S. farmers. Those people with increased incomes will upgrade their diets.

What about domestic demand?

Demand in the U.S. is growing very slowly. With the expansion of cost-reducing technology, the only viable income opportunity is to produce and sell larger volumes in the world market.

What are the objectives of the Farm Bureau farm program proposal?

Basically the objectives are threefold: (1) increase market shares and income opportunities; (2) encourage more efficient and balanced use of farm resources within farms and among farming regions; and (3) reduce taxpayer cost.

These objectives will be met by:

1. Loan rates for major crops tied to world market prices to insure that U.S. products will be price competitive. This will, in turn, give a signal to other export competitors that we will compete and not hold a price umbrella over the market.

2. Resources organized on farms and among regions for market opportunity rather than government program opportunity.

3. Taxpayer costs reduced by increased market opportunities and eliminating the market disruption and taxpayer costs of the federal farmer-held reserve.

Will this farm bill favor one commodity over another when it becomes law?

No. Current programs are out of economic balance. Wheat, for example, is not priced as a feedstuff. But, with 100 bushels per acre wheat on more and more farms, wheat must be fed periodically to keep stocks from building. Feeding more wheat would be better for corn producers when droughts occur because a larger livestock industry would be maintained. Feed prices would not experience the severe run-ups that hurt the livestock industry and eventually reduce feedgrain consumption.

With all loan rates made more responsive to market prices, farm resources would be better utilized over time. This means that there would be less incentive for supply reduction programs year after year as has been the experience with wheat, rice and cotton.

What causes production imbalance?

Supply reduction programs put severe pressure on farmers to increase production of "nonfarm program" crops such as fruits and vegetables. For example, the repeated reduction in tobacco quotas has caused more and more tobacco farmers to raise vegetables. Sooner or later this government-induced vegetable production causes problems for vegetable producers outside tobacco raising areas.

Livestock producers will benefit from more market responsive loan rates for wheat, feedgrains, cotton, rice and soybeans.

The 800 million acres of rangeland and pasture in the U.S. that are not suitable for crop production will better maintain their value. Without farm program changes, rangeland agriculture will continue to decline as government guaranteed grain prices and production reduction programs raise cost of meat production and ultimately reduce consumer demand.

How will farmers and the nation benefit from this farm bill proposal?

Farmers will benefit by taking action to stop the erosion of their markets and thus position themselves for increased market income opportunities in the future.

Farmers will also benefit by getting control of federal spending in order to bring interest rates down.

The nation will benefit since food will be produced and consumed, not produced and stored. The economy will benefit from continued productivity gains by farmers. Taxpayers will benefit through reduced program costs and less pressure on the Federal Reserve to pursue inflationary money policies.

How will this farm bill differ from present farm programs?

This proposal will allow decisions about prices to be made more by market participants rather than set by politicians and bureaucrats.

Present programs are basically the accumulation of several years of election year political tinkering with farm pricemaking.

This proposal will not eliminate political intervention in farm prices, but it will be more difficult for candidates to promise farmers more income from taxpayers and consumers than market prices are signalling.

Tying loan rates for major commodities to markets would be a farm policy "watershed" without doing away with farm program benefits. This policy recognizes that U.S. farmers live in a world market for agricultural products.

This program will be a major step in correcting the farm economic policy mistakes made in the 1977 and 1981 farm laws by favoring production for use, not for storage.

Will lower target prices mean reduced incentives for producers to participate in voluntary supply reduction programs?

Yes. But the target price concept was never intended as an incentive to cut production. The target price is an income support program. This proposal keeps the original purpose intact. Congress will have to decide how much income to transfer to farmers.

Under this proposal, supply reductions will not be needed on a regular basis. When they are needed, Congress will have the pay for them by reducing some other area of federal spending.

How will livestock producers benefit from this farm program?

Feed is a major expense for beef, pork, lamb, poultry and egg producers. Farm programs over the years have favored crop production only. By raising the cost of feed to the livestock industry, federal farm programs have encouraged increased specialization in crops due to reduced price risk and have injured livestock producers by artificially increasing grain prices.

Increased specialization in crop production and away from crop and livestock production on farms has led to more political intervention to increase crop prices when markets weakened.

Farm programs have affected not only the cost of feed but also its availability by favoring storage and acreage reduction programs over production and use.

With consumers apparently making some fundamental shifts in red meat consumption, livestock producers cannot absorb the impact of federal farm programs that raise production costs and prices to consumers. Without policy realignment between crops and livestock, the U.S. livestock industry will continue to decline.

How will this bill correct the problems with the farmer-held, government-managed grain reserve?

That's pretty simple. The farmer-held reserve will be abolished.

The reserve was started in 1977 in response to political pressure for food reserves. As expected, the reserve quickly became a convenient device for federal farm program managers to take grain out of market channels at home and abroad in an attempt to raise grain prices. In the meantime, with markets shorted and inflated prices, livestock producers were whipsawed and foreign buyers found grain elsewhere.

The Farm Bureau bill eliminate the reserve and replaces it with a simple extension of the regular nine-month loan program. The additional nine-month loan period, with interest paid, would let the market determine grain stocks, not federal farm program managers. Consumers will be served since grain will be produced and used, not stored. Taxpayers would benefit by not having to pick up the tab for storing huge quantities of grain.

This bill will eliminate one of the worst historical farm program initiatives—stockpiling grain.

How will this bill solve the dairy problem?

By tying government-guaranteed dairy prices to the market price, producers will get a better signal from consumers. This basic signal has been lost for several years.

With dairy technologies pushing per unit milk production costs downward, there are new opportunities for expanding the utilization of milk products.

Unless dairy price supports are consistent with market reality, farmers will be pushed to mandatory controls since government stocks of dairy products are certain to mount after the diversion program expires.

BETHANY L. GOLDBERG'S "MY PLEDGE TO AMERICA" ESSAY WINS FOR STATE OF RHODE ISLAND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island [Mr. ST GERMAIN] is recognized for 5 minutes.

● Mr. ST GERMAIN. Mr. Speaker, each year the U.S. Veterans of Foreign Wars and its ladies auxiliary conduct the Voice of Democracy script writing contest. This year more than 300,000 secondary school students participated in the contest competing for the six national scholarships which are annually awarded as top prizes. The contest theme this year was "My Pledge to America."

I would like to take this opportunity to submit to the RECORD this year's winning script from the State of Rhode Island. Its author is Bethany L. Goldberg who lives at 8 Cedar Lane in Warren, RI. Bethany is the daughter of Palmer and Sandra Goldberg. She is a senior at Warren High School where she serves as a representative to the student council and is a member of the National Honor Society.

I join in with the residents of Rhode Island's First Congressional District in saluting Bethany for such an outstanding achievement. Her essay reads as follows:

MY PLEDGE TO AMERICA

(By Bethany L. Goldberg)

As a young American, I boast of the origin of my country. America's forefathers accomplished so much with faith, determination, stamina and hardships. Therefore, I now pledge to play my role in maintaining and in improving this great country for which the Pilgrims endured many difficulties and survived. Americans today must also persevere so that their children and their children's children will live in even a better world. Undoubtedly, more than faith alone may be necessary. Pilgrims had faith that they could establish a nation that offered life, liberty and the pursuit of happiness. As the English dramatist, George Bernard Shaw taught us, creation begins with imagination. "You imagine what you desire; you will what you imagine; and at last you create what you will. "Like the Pilgrims, I intend to keep burning that same torch of liberty with diligence throughout critical times. To preserve American freedom, I and other American citizens today must act with the same devotion to principle, the same fidelity to duty; because America symbolizes the mighty guardian of human liberty, of equal justice, and of universal brotherhood.

Although I as a young American have yet to vote, I am well informed about people seeking to lead America. Knowing their qualifications, I reach decisions. Then I urge and influence eligible voting citizens in my community to vote and to support the best people for my government. As President Abraham Lincoln said, "Voting is the people's business. The election is in their hands. If they turn their backs to the fire and get scorched in the rear, they'll find they have got to sit on the blister." Thereby, I will always cherish the right to vote, the right for which many Americans have sacrificed their lives. I realize that government is only as good as its leaders and its leaders are only as good as its citizens demand. Therefore, I pledge to support those persons who I believe will guarantee good government and the quest for excellence.

Basically, my pledge to America is to be a good citizen. When I rear my family, I will to the best of my ability attempt to perpetuate America's democratic ideals. At the present time, I maintain a sense of respect as an individual and a sense of family, appreciating the community and respecting the nation as a whole. I am aware of America's laws and privileges in the Bill of Rights and in the Constitution. For these privileges as a young American I am thankful. By obeying always the laws and also doing my best to insure that others abide, I demonstrate my good citizenship. In fact, everyday in school I display loyalty and patriotism with these words: "I pledge allegiance to the flag of the United States of America . . ." Pledging my allegiance to the flag declares my respect for what the stars and stripes symbolize—our indivisible nation which guarantees liberty and justice for all. I will even fulfill my duty to fight for my country in time of need by serving in a military force. Desiring to help govern my country, I will furthermore willingly accept the challenge of jury duty in the future. Above all, I hope to discover all my talents and to make use of both my talents and my opportunities to benefit me and my country to the optimum.

At this moment, I pledge to obtain the best education possible for myself. As a well-educated person, I shall become a worthwhile and contributing member of American society. As a knowledgeable person, I shall do my part to insure that all Americans have the opportunity stated in the Constitution that guarantees the pursuit of happi-

51-059 O-86-16 (Pt. 6)

ness by attempting to eliminate poverty, illiteracy and human suffering. In an age of advanced technology, I shall do my part in endeavoring to maintain the spark of humanity and individuality to keep society from becoming too impersonal. I and other Americans must remain cognizant of the human touch and keep faith in worthiness of humanity. In essence, I shall persist in helping America perpetuate the principles of democracy and freedom and preserving these ideals stipulated in the Constitution, so coveted by America's forefathers.

Moreover, in this age of "star wars," I must preserve the resources of the planet Earth. I must maintain respect for the water, the air, the trees, and all other natural resources. Mostly, I must retain faith in humanity. I must cherish what is best, and take what is good and strive to make life better. In the winter of my life, I hope I can reminisce knowing that because of my personal contributions to humanity, I have left America the greatest Nation in the world.●

CONGRESSMAN ANNUNZIO URGES HALT TO DEFAMATION OF ETHNIC GROUPS BY MASS MEDIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, House Concurrent Resolution 4, a bill I introduced at the opening of the 99th Congress, would put the Congress on record in opposition to films and television or radio broadcasts which defame, stereotype, demean, or degrade ethnic, racial, or religious groups.

As an American and the son of Italian immigrants, I am only too well acquainted with the innuendos, the sick jokes, and the countless other vicious, contemptible, and cruel methods employed by our mass media to degrade members of ethnic and minority groups. It is a tragic commentary upon our times that those ethnic groups and minorities which have managed to retain a vestige of their original national identity, while at the same time assimilating into democratic society and contributing mightily to the strength of our Nation, should be made to suffer most acutely by motion pictures, television programs, radio broadcasts, and periodicals which demean their identity.

Denigrating remarks about any group in our society concerning characteristics over which one has no control, such as race, ethnicity, or religion, are immoral in themselves. More importantly, though, and of particular interest to Congress, is that these characterizations strike at the very heart of a healthy and wholesome political system. My resolution recognizes that the vitality of our political institutions and our values are dependent on harmonious relationships among the various ethnic groups. Only if mutual respect is accorded to these groups can our democracy grow stronger and more dynamic.

When the media allows and encourages aspersion to be cast upon groups, this disturbs social harmony and becomes a political concern. Groups that have been maligned cannot help but question the worth of their allegiance to a political system which seems to affirm attacks upon them.

Unfortunately, the motion picture, radio, and television industries have on occasion been less than diligent in their responsibility to help create a society in which individuals can respect their heritage, and throughout my career as a Member of the House of Representatives, I have called upon the Congress to take a leadership role in standing up against this ethnic denigration.

Supporters of my resolution do not want government censorship; they want the leaders in the media industry to exercise a social conscience in human relationships just as they want industries to exercise a social conscience in matters such as employment, pollution control, or pricing policies.

Stereotypes as presented on television can be particularly influential on young children. Whether in life or in the media, to a great degree, we become what we see. Children are influenced not only by what they are told to be, but also by observing what people, with whom they identify, are actually like or portrayed as being. Consequently, the challenge to the media is very great indeed, since the motion picture and broadcast media have become central to the American way of life and have profound influence, particularly on children. The television set is a perfect instrument for those who would spawn prejudice and prejudgment of our fellow human beings.

In the past when private industries defaulted in their social responsibilities, they were subjected to governmental regulation. My resolution simply calls for an evaluation and an accounting by the media industry a year after congressional passage to determine the adequacy of the code of ethics or the guidelines which they develop and apply under this legislation.

Mr. Speaker, with the immense influence that the media has today on our American way of life, a greater sensitivity must be encouraged in the depiction of ethnic and minority groups. The passage of my bill, House Concurrent Resolution 4, will go a long way toward the elimination of derogatory and defamatory materials which reinforce negative ethnic stereotypes, and I urge all my colleagues in the House of Representatives to support this legislation.●

UPDATE ON HOUSE RECOUNT OF INDIANA EIGHTH CONGRESSIONAL DISTRICT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. PANETTA] is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, as I indicated last week in a special order, it is my intention to keep the House fully informed of the progress of the House recount in the Eighth Congressional District of Indiana.

Last Wednesday, the task force on the Indiana Eighth Congressional District held a hearing here in Washington, DC. The hearing provided an opportunity for any interested party to inform the task force of his or her views regarding the recount process, and to establish a record regarding such views. We heard from numerous witnesses, including present and former Members of Congress, and from various citizens and legal experts. Without exception, the witnesses agreed that the House was authorized to conduct the recount pursuant to its constitutional duty to determine the elections and returns of its Members.

While the hearing was taking place in Washington, DC., the six House recount teams, headed by Arizona election official Jim Shumway, were counting ballots in the largest county in the Eighth Congressional District—Vanderburgh County. The Vanderburgh County recount was concluded on Thursday night, March 28, and the recount teams fanned out to begin the next two counties on the schedule early Friday morning.

That same Friday morning, the members of the task force convened for a hearing in the municipal building in Evansville, IN. The purpose of the hearing was to listen to the candidates, their lawyers, and the citizens and elections officials of the Eighth Congressional District of Indiana who were affected by the recount. Over a dozen witnesses appeared, and each made a contribution to the record.

In the afternoon, following the hearing in Evansville, the task force members traveled to Spencer County, where two of the recount teams were in the process of counting absentee paper ballots. After viewing the recount in progress, the task force reconvened for consideration of two ballots from Vanderburgh County, which had been segregated for task force consideration on the basis that they might contain "distinguishing marks."

Mr. Jim Shumway presented the ballots to the task force, and explained the peculiarities regarding each. The ballots were masked so that none of the members of the task force could observe for which candidates the ballots had been cast. This procedure was agreed to, and will be followed

throughout the recount, so that the task force members will have no prior knowledge or information pertinent to any particular ballot, which might in any way influence the totally objective determination of each member.

Because Mr. Shumway was appointed recount director unanimously by the task force, and is an experienced election official and expert in the field, I asked that he make a recommendation based upon his expertise regarding each ballot. After due deliberation, the task force unanimously agreed with each of the recommendations of the recount director, and the ballots were counted and added back into the totals. Following the determinations, the task force adjourned, and Mr. Shumway proceeded with the recount.

The counting continued on Saturday, March 30, allowing the House recount team to finish Spencer County. On Monday, the recount teams were again on the go in two counties, both of which were finished Monday night. Today two more counties were counted. Orange County was completed, and Gibson will be completed tomorrow. The schedule for the remainder of the week includes several additional counties.

Tomorrow at 3:30, the task force will again convene in Evansville, IN, to decide on 24 more ballots upon which there are marks. We will also receive a report on the efforts of the recount director to reconcile any discrepancies in the tally sheets which have arisen during the House recount. And we will discuss procedures which the task force might follow in reconciling discrepancies in vote tallies. Next week the task force will again convene in Evansville, IN, to reconcile whatever discrepancies are pending at that time.

The staff of the task force reports that the counting teams have been doing yeoman service, working the weekends and well into the nights. That was certainly my observation when I was there on Friday. The recount teams in Warrick County, for example, worked from early Friday morning until nearly 11 p.m. on Friday night. They then continued Saturday morning in Spencer County. The House is certainly being well served by the conscientious work of the recount director and the GAO auditors, who are making every effort to conclude the recount in the most expeditious manner consistent with accuracy. Having a count upon which the House can depend is certainly worth waiting for.

The recount director has indicated that his recount teams will conclude their work at some point next week. As soon as their work is completed, and the recount director has submitted his report, I will convene the task force forthwith to consider any matters needing resolution.

TRIBUTE TO PATRICIA HARRIS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. LELAND] is recognized for 60 minutes.

GENERAL LEAVE

Mr. LELAND. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order this evening.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. LELAND. Mr. Speaker, when Patricia Harris died the Washington Post said her career had been marked by many firsts.

She was the first black woman who served in a Presidential Cabinet; first as Secretary of the Department of Housing and Urban Development and then as Secretary of the Department of Health, Education, and Welfare.

She was the first black woman to become an ambassador.

She was the first black woman to become dean of a law school.

And she was the first black woman to serve as a delegate to the United Nations.

But despite all the prestige of her career, she never forgot the purpose of her life—to improve the quality of life for everyone.

At a Senate Banking Committee hearing when her empathy for the poor was questioned, she replied:

Senator, I am one of them. You do not seem to understand who I am. I am a black woman, the daughter of a dining car worker. I am a black woman who could not buy a house 8 years ago in parts of the District of Columbia. If you think I have forgotten that, you are dead wrong.

Such humility and honesty characterized Patricia Harris' life. She never shouted her contributions. Instead she diligently worked on behalf of those who had no opportunity; spoke for those with no political voice.

When social programs were being cut right and left, Patricia Harris stood firmly in support of her people. Through her efforts HEW's budget was not cut and, in fact, was increased by $25 billion.

While others talked about giving women and minorities opportunity, Patricia Harris acted.

As Secretary of HUD, 50 percent of her political appointments were women and 28 percent were black or Hispanic. As Secretary of HHS 67 percent of her appointments were women and minorities.

While I am deeply saddened by the death of Patricia Harris, I refuse to dwell on this sadness. Rather, I prefer to think of the greatness she brought to all our lives by her quiet words and her tremendous works.

□ 2040

THE NATIONAL DEBT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia [Mr. RAY] is recognized for 30 minutes.

Mr. RAY. Mr. Speaker, I would like to join my colleague, the gentleman from Texas [Mr. LELAND], in his remarks in the tribute that he paid to Mrs. Harris.

Mr. Speaker, I would like to address a subject involving the economy.

The good news with the economy is that things look positive for 1985, following almost 2 years of lower unemployment, increased retail sales and housing starts, auto production up by 8 percent, inflation down and staying down, and interest rates in an affordable bracket.

The bad news is that it looks good because we have increased the national debt by 175 percent in the last 4 years, compared to President Nixon's debt increase of 11 percent, President Ford's increase of 59 percent and President Carter's increase of 49 percent.

From George Washington to Jimmy Carter, we built up a debt of $980 billion. During the last 4 years, we have almost doubled that figure.

We ended 1984 by borrowing $180 billion and as you pay your income tax this month, 13 cents of each tax dollar will go toward the 1984 interest on the national debt which is $1.6 trillion and increasing.

This philosophy, which we have practiced for over 60 years, of spending more than our income, is a ticking time bomb, which can have terrible consequences on our country if we fail to take corrective action, not sometime soon, but right now.

I get the feeling that America is at the crossroads and that 1986 must be a turn around for this situation.

The danger signals are all around us. The Ohio Savings & Loan closings creating a sense of panic among its subscribers.

Right near my home in Perry, GA, the closing of Briggs & Stratton, laying off 200 workers primarily because of an imbalance of automobile foreign imports.

The President's budget for 1986, which we have been reviewing in the Congress, recognizes that we have problems.

The President's budget proposes that we freeze Federal spending at approximately the 1985 level.

But his proposal is not exactly a freeze, as it cuts and reduces some programs, eliminates some outright, freezes others, but allows defense to increase along with health for 1 year and Social Security COLA'S.

For instance, the administration would abolish FmHA, eliminate or

reduce farm subsidies, dispose of the EMC's, dismantle the SBA over a few years, reduce Federal salaries by 5 percent, reduce Medicare by $18 billion over 5 years, discontinue revenue sharing to towns and cities and eliminate urban development action grants and other programs.

The Congress agrees with the President that we must cut spending by at least $50 billion. But there is disagreement on how the cuts will be made.

The Senate Budget Committee proposes a freeze and accepting 75 percent of the President's cuts and reductions. This would amount to a savings of $55 billion in 1986, $99 billion in 1987, and $141 billion in 1988.

The House Budget Committee seems to be working toward a nominal freeze at 1985 levels for all agencies, plus cuts or eliminations.

This would freeze the budget with no increase even for inflation, which would produce savings for the first year of $34 billion. Some programs would still have to be cut or eliminated in addition, in order to achieve an additional $16 billion in spending cuts.

The President is opposed to any tax increase until Federal spending is reduced and has promised to veto any tax raising bills.

My opinion is that we must cut at least $50 billion and I hope that the final budget will be fair, equal, balanced, and committed to a decrease in deficit spending.

Mr. Speaker, I support a balanced budget, but to be honest, I believe that it's impossible for the short range, even though achievable in the long range. Presently we must make a beginning.

I am of the opinion that the majority of the American public is becoming impatient with the administration and with the Congress. The impression that I am receiving is that most groups of citizens will tighten their belts, providing we as a government act in a fair, equal, balanced manner, with a determined commitment to turn around this philosophy we seem to have, which is continued spending beyond our income year after year. I for one am committed in the most serious way to altering this course.

Mr. Speaker, just a short while ago, today this body voted overwhelmingly to freeze the first authorization bill of the 99th Congress at the 1985 level.

Hopefully this will set the pace, and send a signal to all of the authorizing and appropriations committees.

RESIDENTS OF EIGHTH DISTRICT OF INDIANA HAVE NO CONGRESSMAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Colorado [Mr. STRANG] is recognized for 60 minutes.

Mr. STRANG. Mr. Speaker, I would also like to commend my distinguished colleague, the gentleman from Texas [Mr. LELAND], for his remarks concerning Patricia Harris, a very great American, and I would like to associate myself with his remarks.

I would also like to associate myself with the bulk of the comments of my distinguished colleague from Georgia [Mr. RAY]. It seems to me that if we do not start talking about balancing our budgets in this country and getting our house in order, we will not have a house.

Mr. Speaker, I rise tonight to discuss the disputed set of circumstances around the election in the Eighth District of Indiana, a district which presently has no Congressman represented in this House.

This afternoon we had an opportunity to vote on the first major budget appropriation bill of the 99th Congress, and it seems to me that this body did something very responsible. We voted for a budget freeze. That is probably the action that many of the Members of this House would like to have done in the future during this session, and it is certainly an action that meets with the approval of the bulk of the citizens of the United States.

The residents of the Eighth District of Indiana have no opportunity to share in that joy, Mr. Speaker, because they have no Congressman. They have no Congressman at all.

On election night, November 6, 1984, press reports of the results in the race for Congress in Indiana's Eighth District indicated that Republican Richard McIntyre was leading Democrat Frank McCloskey by more than 100 votes. Tabulation errors were then discovered in two counties during the 10-day period provided by Indiana law for the correction of errors. On the day after the election, November 7, the county clerk retabulated the result in Vanderburgh County before providing certified totals to the Indiana secretary of state. The retabulation added almost 200 votes to McCloskey's total, indicating a 72-vote lead districtwide for McCloskey. Two days later, on November 9, it was discovered that Gibson County had also made a tabulation error, a simple and obvious machine counting error.

□ 2050

Two precincts had been counted twice, incorrectly inflating the McCloskey margin by 111 votes. The correct tabulation in Gibson County gave McIntyre a 39-vote, districtwide lead based upon election night returns.

Correction of the Vanderburgh County error was made before certification was sent to the Indiana secretary of state. The Gibson County clerk, however, had already sent a certificate bearing the incorrect totals. Although admitting the error, the clerk, a Democrat, refused to correct the certificate.

McIntyre filed a mandamus action to require the Gibson County clerk to correct the error. The action was pursuant to a specific statutory remedy to correct certification errors in Indiana Election Code Section 3-1-26-7, and was entirely apart from Indiana's statutory recount process.

The Indiana secretary of state was notified of the action filed by McIntyre; he decided to delay certification of the winner in the Eighth District, pending resolution of the Gibson County error under the statutory remedy.

McIntyre was also granted a temporary injunction by the Marion County Court of Indianapolis to prevent the secretary of state from certifying McCloskey based on incorrect totals. McCloskey opposed the Gibson County mandamus action on the grounds that only a recount could correct the mistake. The judge in Gibson County, also, a Democrat, dismissed the mandamus action, and ordered a recount to begin. McIntyre appealed the dismissal.

The Indiana Supreme Court, on November 29 decided the issue in favor of the McIntyre position to correct the election night errors and against the McCloskey position to rely exclusively upon a recount. The State supreme court ordered the Gibson County Court to accept jurisdiction and recognize the statutory mandamus remedy and to decide upon the request for a mandamus order to correct the election results separately from the recount.

However, the county recount was completed by the time the Gibson County Court reassumed the jurisdiction, officially acknowledged error in the county returns, and granted the mandamus on December 10. The Gibson County clerk then sent a certified, corrected certificate, a corrected certificate, to the Indiana secretary of state, which verified the original tabulation error, but also reflected the results of the recount, in which McIntyre lost five votes by other tabulation corrections. McIntyre now led McCloskey by 34 votes.

During this same time McCloskey had filed a complaint before Judge Brooks in the U.S. District Court in Evansville seeking two injunctions. First, he requested an order directing the Indiana secretary of state to certify him the winner by 72 votes, arguing that the secretary must certify a winner based upon the county certificate then in his possession, no matter how clearly erroneous those totals were known to be.

Second, McCloskey sought an order to prevent the conducting of the recount requested by McIntyre. Mr. Speaker, this was a request to ask a

public official to certify results which were known to be erroneous. Hardly a high standard of conduct for any public official or anybody seeking public office.

Judge Brooks denied both injunctions after a lengthy hearing during which both McCloskey and the Indiana secretary of state testified. Upon receipt of the corrected Gibson County totals on December 13, as required by Indiana law, the Indiana secretary of state immediately issued a certificate naming Richard McIntyre the winner.

Mr. Speaker, yesterday on the floor of this House, we were treated to a lot of debate on the McIntyre-McCloskey situation. One of the points that was not brought out clearly is that there is no contest in this election. Mr. McCloskey has never contested the results of this election, and he lost. The State of Indiana has never contested this election. The contest, Mr. Speaker, seems to rest between one individual, Richard McIntyre, who has the certificate from the State of Indiana certifying that he won the race between Mr. McIntyre and the House of Representatives which has presumed to intrude upon the electoral process of the sovereign State of Indiana. And to presume on the process of counting votes in flagrant defiance of Indiana law. So the contest, Mr. Speaker, if it is a contested election, is between Mr. McIntyre and this House of Representatives denying 500,000 people in the State of Indiana any representation on the House of Representatives.

During the debate yesterday, my distinguished colleague, my distinguished colleague from Arkansas, Mr. ALEXANDER, entered into the RECORD what was purported to be the substance of a new Indiana election law, and I think that Mr. ALEXANDER is as anxious as I am to understand the full nature of what was inserted into the RECORD.

According to the chief of elections in the State of Indiana, the only thing worth pointing out in this particular issue is that the section inserted into the RECORD by the distinguished gentleman from Arkansas is not part of the current bill.

The section that was talked about by my distinguished colleague from Arkansas, Mr. ALEXANDER, was deleted in the Senate, and no part of the bill now in conference committee contains any sections on voter intent. Mr. Speaker, I felt obligated to be sure that my distinguished colleague knew the true facts, rather than the facts that were inserted into the RECORD on April 2.

There was a full and fair count of the votes in Indiana and the count was conducted under the laws of the sovereign State of Indiana. Not a single shred of evidence has ever been produced to suggest that the certficate of election naming McIntyre the winner was not based on a full, fair counting of the votes on election day. Any confusion as to the outcome of the Eighth District race for Congress is a result of the deliberate refusal of House Democrats to investigate their own, unsubstantiated allegations.

The presumption in favor of McIntyre's certificate and Indiana's electoral process has never been overcome by any showing of proof. No election irregularities have been alleged by either of the candidates in Indiana's Eighth District. No election irregularities have ever been alleged by either of the candidates. Either by the winner, Mr. McIntyre, who won by 34 votes, or by the loser, Mr. McCloskey, who lost by 34 votes. So why, Mr. Speaker, must we deny the 500,000 residents of the Eighth District of Indiana the right to have a Congressman in this Congress when we are voting on matters that affect them directly, particularly matters that relate to taxation. That is taxation without representation. Who was the winner on election night? McCloskey was not the winner. No official who ever had the right to declare a winner on that election ever certified McCloskey as the winner; no official. Because the only person who is allowed to certify the winner in election in the State of Indiana, in a congressional election, is the secretary of state.

McCloskey only appeared to be in the lead for about 2 days during the week after the election, prior to the discovery of errors in the Gibson County tabulation; a precinct was counted twice. A precinct was counted twice. One of the suits filed asked the secretary of state of Indiana to certify a candidate based on known errors, not a high standard of conduct for anybody in public office or seeking public office.

McCloskey never had an official lead by those guidelines.

□ 2100

McIntyre's certificate of election was based on corrected election day returns, not on any recount certificates; corrected election day returns. McCloskey did not win on election day only to have his victory overturned by McIntyre in the recount.
